3.3 **TASKS**

3.2.1 The awarded bidder shall continuously monitor and fill all County tanks and ensure a constant supply of chemicals to each and every tank (identified in this Section), or their tanks or other equipment as applicable, with their chemical on an as needed basis to ensure continuous supply of chemical. The County reserves the right to require the bidder to top-off any tank in anticipation of possible work interruptions such as weather conditions, holidays, facility maintenance, or any other reasons. The bidder is responsible for coordinating with County personnel all delivery logistics, including but not limited to dates and times.
3.2.2 If a bidder provides its equipment, the bidder shall perform all installation, connections, maintenance, repairs, and removal of such equipment as required by a date certain after receiving a notice to proceed or remove.

3.2.3 The bidder may connect to, but not otherwise modify the County’s tanks, equipment, or facility in any way, or cause the County to purchase any equipment or perform any work or tasks associated with the scope of work described herein. If necessary, the County will provide limited space for the bidder’s equipment.

3.2.4 The bidder shall be on call during MDT work hours (7am to 5pm) and capable of commencing repair / service calls within twenty-four (24) hours after being notified by phone, e-mail, or letter.

Under no circumstances shall the bidder use County personnel, equipment, or resources for any tasks associated with the scope of work described herein including but not limited to ordering, receiving, unloading, staging, handling, or in any way mixing or dispensing the chemical or operating or maintaining the bidder’s equipment.

The bidder’s equipment shall be secured and protected from storms, and shall have a lock or other mechanism to prevent unauthorized access to chemical as approved by the County’s project manager.

3.4 BUS WASH INFORMATION

MDT’s wash system was manufactured by InterClean Wash Systems Inc., of Ypsilanti, Michigan. The system is a closed loop, hybrid using high pressure and brushes. Approximately 23 gallons of water are used to wash the average bus. The system’s output is approximately 60 GPM’s at a velocity of 2’ per second. MDT cleans 125 to 150 buses daily at each of the three garages, for a combined estimate of 2,625 to 3,150 total cleanings weekly.

The arch pressure is set at 50 pounds per square inch (PSI), governed by a pressure regulating valve (PRV). The total flow rate of the front/side arch (6 double and 4 single nozzle spray assemblies) is about 8 gallons per minute (GPM). That arch runs for 1 foot per second (FPS), or 40 seconds for a 40 foot bus. There is a separate rear arch (7 single nozzle spray assemblies) which is 10 GPM and it runs for 10 seconds per bus.

3.5 OTHER INTENDED USES

The following are the other intended uses for the chemical.

- Cleaning with shop floor scrubbers and mopping. Oil/grease spills and residue.
- Shop outside apron and Revenue Island cleaning. Oil/grease small spills and residue.
- High pressure/hot water wash. Engine and chassis cleaning of grease, road dirt and oil residues.
- Cleaning of HVAC bus evaporator.
• Cleaning of inside bus, light floor mopping.
