

**Miami-Dade Transit  
Miami North Corridor Metrorail Extension, Preliminary Engineering Phase  
Contract No. TRO5-NCPE**

The public along the NW 27<sup>th</sup> Avenue North Corridor Metrorail Extension is being asked to provide community consensus and input on the Preliminary Engineering for the North Corridor Metrorail guideway and facilities. The consultant, Parsons Transportation Group, will provide the design concept that embraces opportunities to enhance and compliment its urban environment. In addition to providing transportation services in a safe environment, the physical components of the system, including aerial line structures, stations and art work, parking lots, turnback and storage facility, traction power substations, and other wayside structures, should afford good appearance, durability, sensitive design and provide a regional identity in compliance with local requirements and in relation to the varying neighborhoods and land uses of the cities along the corridor.

**URBAN DESIGN PUBLIC INVOLVEMENT  
UPCOMING MEETINGS**
