# FACT SHEET

## Wastewater Line Replacement

### BACKGROUND

On April 9, 2014, the United States District Court for the Southern District of Florida authorized a Consent Decree between Miami-Dade County, the United States of American, the State of Florida, and the Florida Department of Environmental Protection, for improvements to the County's wastewater collection system. The Consent Decree (CD) requires a number of operational and maintenance improvements to Miami-Dade's water and sewer system. The installation of new wastewater lines (CD Project 4.4) is part of these projects.

### PROJECTED SCHEDULE

Construction begins October 2015, with an expected duration of six to eight months.
