ARTICLE 7. SCOPE OF SERVICES

A. Background

The Miami-Dade Department of Transportation and Public Works (DTPW) is spearheading an innovative urban mobility project funded by the Fiscal Year 2022 Strengthening Mobility and Revolutionizing Transportation (SMART) Grant Program. This project, a key part of a multi-city collaborative, is designed to revolutionize urban transportation through the implementation of digital curb management and zero-emission delivery solutions.

DTPW Smart Curb Management and Microfreight Demonstration - Phase I SMART Grant

The DTPW was awarded a Phase I SMART grant from the US Department of Transportation (USDOT). The SMART program funds the implementation of a demonstration or prototypes of emerging mobility technologies. DTPW joined a collaborative of cities seeking to establish and demonstrate the applicability of digital curb infrastructure in the form of the Open Mobility Foundation's Curb Data Specification (CDS). The grant award will enable the introduction of platform of integrated data, networked sensors, and digital infrastructure to enable and scale safe, zero emission last mile freight and goods deliveries in the County. The digital infrastructure will test the ability to optimize curb space and facilitate real time management.

Additionally, in conjunction with the smart curb demonstration, DTPW will also make available electric micromobility delivery vehicles (cargo e-bikes or trikes) and use CDS and MDS (Mobility Data Standard) to monitor use to improve curb and device management and safety for all roadway users.

By design, this is an experimental demonstration with, as yet many unknowns. The Contractor will support DTPW's successful implementation of the demonstration and facilitate expanded learnings, as required by the grant, to inform potential Phase II scaling and deployment.

B. Objective

The main objective of this agreement is to provide DTPW with technical and strategic professional services to guide successful deployment and accompanying measurement and reporting necessary for pursuit of Phase II application to support scaling and expansion. Core objectives for DTPW are to:

- 1) Identify appropriate curb zones, via data and community input, to pilot smart, zero-emission loading zones.
- 2) Demonstrate utilization of the Curb Data Specification by both public agencies and private sector users and customers.
- 3) Explore utilization of electric microfreight for last mile delivery and evaluate safety, climate and community outcomes of use.
- 4) Comply with all federal grant requirements, including evaluation and reporting necessary for Phase II submission.

B. Partnering Entities

The Contractor shall deliver the scope of services outlined in this Agreement utilizing various subcontractors. The engagement and management of these subcontractors by the Contractor will be conducted in accordance with the stipulations in Article 21, Subcontractual Relations, of this Agreement. The Contractor maintains full responsibility for ensuring that the services provided by its subcontractors meet the standards and requirements established in this Agreement, and will be liable for the acts, omissions, and performance of all subcontractors as detailed in Article 21.

C. Scope of Services

The Contractor will provide the following scope of services:

1. Grant compliance and project management capacity support
The Contractor will work with DTPW project manager to aid in certain elements of grant reporting and compliance. These include support of DTPW in development of the required Evaluation and Measurement Plan, compilation of the findings of said plan, problem statement definition and research framing. The Contractor will aid DTPW project manager in other necessary duties to facilitate grant deployment and implementation of the demonstration project. The Contractor anticipates bi-weekly check in meetings, either on-site or remotely, with DTPW staff and additional coordination meetings among technology partners to ensure synchronization and facilitate deployment.

Research will include collaboration with DTPW project manager to assess pilot design in line with freight industry and local community needs. The Contractor will provide local and national industry knowledge and learnings to project design, deployment and evaluation via industry consultation and local freight industry stakeholder engagement. The Contractor will conduct stakeholder interviews to understand and describe the value proposition from Curb Data Specifications for private firms engaged in making urban deliveries.

Deliverables

- Demonstration draft concept evaluation and technical assessment
- Freight industry engagement and consultation of optimized operations

3. Conceptual Design Support

The Contractor will work with DTPW Project managers, public engagement, and technology partners to allow DTPW to craft a conceptual design for demonstration deployment. Design will include multiple demonstration sites, assessment of anticipated users, integration of multiple technology partners, and public interface of technologies. The Contractor will provide technical and strategic advice to enhance customer experience, roadway safety, congestion reduction and emission reductions. Concept will be pressure-tested against industry feedback and best practice assessment.

Deliverables

- Demonstration concept collaboration, evaluation and refinement

4. Technology Partner Integration Support

Multiple technologies and public agencies are involved in the micro-freight and smart curb zone demonstration. These entities must work together for a successful integrated demonstration. This will likely include new product development to enable the necessary integration and deliver outcomes desired by the County.

The Contractor will provide additional technical support to DTPW project managers to facilitate convenings of technology providers and alignment toward the defined outcomes and metrics of success. The Contractor will serve as an owner's representative, as needed, in management and delivery of technology partner components to ensure delivery that serves County needs. The Contractor will document lessons learned as is necessary for Phase II grant submission.

Deliverables

- Summary memos to DTPW outlining technology integrations, challenges, and accomplishments
- Documentation necessary for Phase II grant application

5. Policy and Regulatory Support

The Contractor will support DTPW with necessary policy assessments and, as needed, development.

Deliverables

- Preliminary policy notes and summaries
- Draft and final policy or SOPs

6. Collaborative Learnings and Exchange

DTPW was selected for grant award as a member of a multi-city collaborative. It is the expectation of USDOT that DTPW will engage in shared learnings and exchange with other members of the collaborative to accelerate innovation and improvement

The Contractor will assist the County in preparation of materials necessary for Phase II submission and acquisition.

The effect of any decision shall not be impaired or waived by any negotiations or settlements or offers made in connection with the dispute, whether or not the County Mayor participated therein, or by any prior decision of others, which prior decision shall be deemed subject to review, or by any termination or cancellation of the Agreement. All such disputes shall be submitted in writing by the Contractor to the County Mayor for a decision, together with all evidence and other pertinent information regarding such questions, in order that a fair and impartial decision may be made.
