NOTE: Adventure Environmental, Inc. is pending insurance approval, will be added as soon complies with requirement.

PART #2: ITEMS AWARDED

BIDDERS ARE PRE-QUALIFIED, PER SECTION 2, PARAGRAPH 2.6 OF THE BID. OTHER VENDORS CAN BE ADDED DURING THE COURSE OF THE CONTRACT SUBMITTING ALL PERTINENT DOCUMENT AS OUTLINED IN THE BID.

SCOPE OF WORK**3.1 INTRODUCTION**

The work specified in this section consists of the removal and disposal of derelict vessels, their contents (including waste petroleum and other pollutants, if any) and associated debris.

3.2 DERELICT VESSELS AND DEBRIS

A derelict vessel is a vessel that is left, stored or abandoned in a wrecked, junked, inoperative or partially dismantled condition in or upon public waters and has been properly posted and noticed in accordance with the provisions of Section 705 Florida Statutes and / or which has been authorized by a law enforcement officer to be removed pursuant to Section 823.11 Florida Statutes. Associated debris may consist of any part of a derelict vessel or vessel contents, any item attached or immediately adjacent to a derelict vessel, and any part of a derelict vessel which may have become separated from the vessel prior to or during its removal.

3.3 SITE INVESTIGATION AND VESSEL INFORMATION

The awarded bidder shall have knowledge of the nature and location of the work and the general and local conditions in Biscayne Bay and other County waters where work is to be performed, including but not limited to those affecting navigation, transportation and staging of equipment, and access to vessels and disposal sites. The awarded bidder should have knowledge concerning vessel(s) to be removed. The vessel location, approximate size, material of construction, and other relevant information will be provided as part of each spot market quotation. A photo(s) of each vessel will also be provided when possible. The awarded bidder is responsible for field verifying all site conditions and vessel characteristics, including vessel dimensions, construction, and contents, prior to quoting.

3.4 WORK REQUIREMENTS

- 3.4.1 The awarded bidder shall be responsible for making all arrangements for access to the vessel(s) to be removed.
- 3.4.2 All vessels shall be removed in whole condition whenever possible, except as otherwise authorized by the Department of Permitting, Environment and Regulatory Affairs (PERA), using a methodology that will not result in adverse impacts to the environment. In water demolition of any floating vessel, or any vessel capable of being floated without substantial repair, will generally be prohibited. Any in-water demolition of the vessel hull or superstructure that results in the release of any solid or liquid waste to the environment is strictly prohibited. No pollutants, including but not limited to petroleum products, petroleum contaminated water, liquid and solid chemicals, sewage, and other wastes, may be spilled or otherwise discharged to surface waters, wetlands or upland areas as a result of work activities.
- 3.4.3 Removal and disposal of associated pollutants, if any, are the responsibility of the awarded bidder and must be done in accordance with all local, state and federal requirements. Any pollutant found to be contained within a derelict vessel must be removed prior to the vessel's demolition and be properly disposed of in accordance with applicable laws by the awarded bidder. During work, the awarded bidder shall have on site all equipment necessary to contain any accidental discharge of pollutants and shall be responsible for the remediation of any such discharge.
- 3.4.4 All vessels and debris shall only be disposed of at a landfill, recycling facility or other disposal location pre-approved by PERA. All fees associated with the transport and disposal of vessels, debris, and pollutants are the

responsibility of the awarded bidder and shall not be an additional cost to the County. Any pre-disposal preparation of the vessel required by the disposal facility is the responsibility of the awarded bidder. No equipment, hardware, or other materials may be salvaged from the vessel(s) by the awarded bidder unless explicitly authorized in writing by PERA and/or the law enforcement agency authorizing the vessel's removal and disposal.

- 3.4.5 A vessel may be disposed of at an artificial reef site if the vessel is determined by PERA to be suitable for reef deployment and contingent upon compliance with all Federal, State and local laws, regulations and requirements. Deployment of a derelict vessel on an artificial reef site must be approved by, and coordinated with, the PERA, Restoration & Enhancement Section. The awarded bidder shall be responsible for all preparation necessary to make the vessel suitable for artificial reef deployment, for transportation of the vessel to the designated artificial reef site, for sinking the vessel at the designated location, and for ensuring that the vessel sinks at the designated site as authorized. The awarded bidder shall also be responsible for notifying and coordinating with the appropriate agencies (e.g. U.S. Coast Guard) in advance of the deployment in accordance with those agencies' requirements. If, at any time, PERA or any other regulatory agency having jurisdiction determines that a vessel is unsuitable for reef deployment, the vendor shall dispose of the vessel at a PERA-approved landfill and/or recycling facility in accordance with the above Paragraph 3.4.4.
- 3.4.6 The following must be accomplished prior to the County granting approval for the sinking of a vessel as an artificial reef.
- A. All oil must be removed from tanks, pipes, bilges, etc. to ensure that no pollutants enter the water (steam cleaning is preferred).
 - B. All watertight doors/hatches/bottom tank covers, etc. must be removed or welded open.
 - C. Any items that may float free when the vessel sinks must be removed from the vessel.
 - D. All deck areas, bilge areas, engine spaces and cargo spaces should be broom swept.
 - E. Sufficient ballast to maintain location of vessel on ocean bottom must be placed in the vessel and shall consist of clean concrete.
- 3.4.7 The U.S. Coast Guard's inspection of the vessel does not remove liability for oil pollution or for a violation of the Ocean Dumping Act (Amends the Marine Protection, Research, and Sanctuaries Act, commonly called the "Ocean Dumping Act") which makes it unlawful for any person to dump, or transport for the purpose of dumping, sewage sludge or industrial waste into ocean waters after December 31, 1991.
- 3.4.8 The awarded bidder shall adhere to U.S. Coast Guard specifications and all U.S. Fish and Wildlife service requirements regarding endangered species, including but not limited to the West Indian Manatee.
- 3.5 PROOF OF PROPER DISPOSAL AND COORDINATION WITH PERA AND LAW ENFORCEMENT**
- 3.5.1 The removal and proper disposal of vessels and associated materials must be thoroughly documented by the awarded bidder. Original copies of receipts documenting the proper disposal of the vessel(s) and debris at an approved landfill / recycling facility, and for the proper disposal of any separate vessel components (such as engines) and pollutants, if any, must be provided to PERA. Receipts must be easily legible and specifically describe the disposal location and the quantity of material disposed of, by weight and/or volume. All documentation must be submitted by the awarded bidder to PERA within the time period required for completion of the work. Payment to the awarded bidder may be delayed until all proper documentation is received by PERA.
- 3.5.2 Required documentation must also include photographs of the vessel as it is being removed, while it is located on the vendor's barge or upland staging area, and at its final disposal point (e.g. at the landfill / recycling facility or within debris container). All photos are to be labeled with the vessel's identifying derelict vessel number as assigned by the Florida Fish & Wildlife Conservation Commission (FWC), PERA or other agency, if the number is not visible on the vessel in the photo. This documentation is to be provided to PERA along with those required by Paragraph 3.5.1 above.
- 3.5.3 The awarded bidder shall notify and coordinate all work with the PERA project manager at 305-372-6575 or designated employee, and Florida Fish & Wildlife Conservation Commission- (FWC-Officer) at 305-956-2500

or local law enforcement agency having jurisdiction. Unless otherwise advised in writing by PERA, the awarded bidder shall meet on-site with PERA and law enforcement representatives prior to removing the vessel(s) to verify that the vessel(s) remains eligible for removal and to coordinate the removal activities. No removal work is to be conducted until the awarded bidder has received a written "Notice to Proceed" from the County.

3.6 RESTORATION OF PROPERTY

Property, public or private, if damaged during vessel removal, or removed for convenience of the work, shall be repaired or replaced at the expense of the vendor in a manner acceptable to the County prior to the final acceptance of the work. Such property includes but are not limited to: walls, fences, boat ramps (either concrete or asphalt), sod, and walkways.
