SUBJECT: "DROP" Employee Program

An analysis of County employees currently participating in Florida's Deferred Retirement Option Program (DROP) was completed for the pay period ended March 6, 2011 to determine the estimated salary and fringe dollars of those participating in the program. For the 124 employees who will end DROP during the remainder of FY 2010-11, the cost of salaries and fringes associated with them is approximately \$4.4 million (Attachment 1). Attachment 2 is a detailed listing of employees participating in the DROP program by fiscal year.

Beyond FY 2010-11, there are 1,617 employees participating in DROP with termination dates over the next five fiscal years through FY 2015-16. Salaries and fringes associated with these mandated retirements are estimated at \$100 million (Attachment 1). Please note, approximately one-third of these employees are in sworn public safety positions, thereby increasing the likelihood that these DROP employees will be replaced. Salary and fringe calculations are based on the assumption that employees continue employment for the maximum period (60 months) allowed by Florida Retirement System.

This analysis does not imply that these costs are savings, nor does it assume that none of these employees will be replaced. It is the yearly cost in salaries and fringes of the employees who are enrolled in DROP and will retire over the next few years. Also, the DROP estimated costs do not net out any leave payout for current participants, since there are several factors that could significantly change any calculation of this future benefit.
