Note on Data Sources: The following analysis draws on two sources of data. The first is the 2014 American Community Survey (ACS) 5-year estimates, released in December of 2015. The 5-year estimates are published for areas with populations of all sizes and are the most reliable and precise of the ACS period estimates as well as the most comprehensive, albeit the least current. (The 1-year estimates provide data on areas with populations of 65,000+). The ACS estimates provide information about the social and economic needs of communities and are used to help determine how more than $400 billion in federal and state funds are distributed each year. Note that counts of the population are provided by the Census of Population and Housing conducted by the US Census Bureau every 10 years; and official estimates of the population are derived from the previous census and from the Census Bureau’s Population Estimates Program.

The second source for the following analysis is the last complete long-form Census Survey, the 2000 Decennial Census. The ACS replaces the long-form census. The Census 2000, conducted by the Census Bureau, determined the resident population of the United States on April 1, 2000. Approximately 16 percent of households received a "long form" of the 2000 census, which contained over 100 questions.
Labor Force and Employment Participation Rates

The labor force participation rate, the share of all residents over 16 years of age working or actively looking for a job, was 62.2% in Miami-Dade County as reported in the 2014 ACS 5-year estimates (2014). This is up from 57.4% in 2000. In comparison, the US rate was slightly higher, 62.9%, and that was down 4% from 66.9% in 2000. The highest labor force participation rate was found in Commission District 8 at 65.1%, down from 65.5% in 2000. Commission District 7 was close behind at 64.8%, up from 62.3% in 2000. Only one other district experienced a decline, Commission District 11, from 63.9% to 63.5%. And Commission District 3 was the only commission district with a labor force participation rate below 60%, at 58.9%, up from 50.3% in 2000. The data also showed large gains in Commission District 5 (+12.4%), Commission District 6 (8.4%), and Commission District 2 (7.1%).

The employment-to-population ratio for Miami-Dade County was 55.2% according to the 2014 data. This was an increase of 2.8% from 2000. Nationally, this ratio fell from 64.4% in 2000 to 58.6% in 2014. The employment-to-population ratio in 2014 ranged from a high of 59.5% in Commission District 7 to a low of 48.7% in Commission District 3. In Commission District 7 this ratio was an increase from 58.9% in 2000. Similar to the labor force participation rate, the employment-to-population ratio for Commission District 3 also increased dramatically, from 42.2% in 2000. No other districts had a 2014 ratio below 50%.

Chart 1 summarizes the participation data for all of the commission districts.

Class of Workers in the Employed Population

Across all of Miami-Dade County, the 2014 share of all workers employed by private for-profit or not-for-profit companies, 75.3%, remained virtually unchanged from 2000, when it was 75.2%. Workers are employed residents, wherever their jobs may be. The districts with the lowest shares of private-company workers in 2014 were: Commission District 4 at 71.4%, down from 73.1% in 2000; Commission District 7 also at 71.4%, up from 71%; and Commission District 8 at 71.5%, up from 70%. Only one district, Commission District 12, had a 2014 private-company share above 80%, at exactly 80%, down from 80.8% in 2000.

The share of workers employed by any level of government decreased between the years 2000 to 2014, countywide, from 12.7% to 10.6%. The districts with the lowest 2014 government shares, both at 6.5%, included Commission District 5, down from 7.8% in 2000 and Commission District 12, down from 8.2% in 2000. Commission District 1 had a government share in 2014 of 16.9%, down from 19.6% in 2000. Commission Districts 8 and 9 both had 2014 government shares of 13.8%. The share in Commission District 8 was down from 16.8% in 2000, while in Commission District 9 it was down from 19.2%.

Interestingly, the share of workers lost in government sectors was picked up by self-employment. Self-employment increased in all 13 districts. Countywide, the share of workers in the self-employed class increased from 11.7% in 2000 to 13.9% in 2014. The highest 2014 concentrations of self-employed were in Commission District 4 at 20.7%, up from 17.3% in 2000, and Commission District 5 at 19.2%, up from just 12.8% in 2000. The lowest concentrations were in Commission District 1 with a 2014 share of 7.6%, up from 7.4% in 2000, and Commission District 2 at 7.8%, up from 7.5% in 2000.

Chart 2 summarizes the data on the share of workers in each class for all of the Districts. Maps 1-3 show the percent change in the actual number of workers in each class, private companies, government, and self-employment.

Occupation of Workers

The number of workers in Miami-Dade County grew by more than 247,000 (26.8%) between 2000 and 2014. Almost three-quarters of the growth came in management, professional and related occupations (35.5%) and service occupations (36.5%). Healthcare and technology occupations fall under management. Again, countywide for the remaining major categories, sales and office accounted for 18%; construction, extraction and maintenance occupations were 5.5% and production, transportation and material moving accounted for the last 4.5%.

Commission District 5 was the only one to add more than 30,000 workers, with 31,600 (44%). Management accounted for 38.1%, while services accounted for 38% of the district’s growth. Commission District 7 stands out with 77.5% of the growth in workers coming in the management category. Commission District 10 experienced 73.1% of its growth in the services category, offsetting a 28.6% drop in workers in sales.

No districts lost workers over the time period. Three districts, Commission District 10 (7,600), Commission District 1 (9,500), and Commission District 7 (9,600) added fewer than 10,000 workers between 2000 and 2014.

Chart 3 summarizes the data on the share of workers in each occupational category for all of the commission districts. Maps 4-6 show the percent change in the actual number of workers in management, service and sales occupations.

Industry of Workers

Countywide, more than 38% of employed residents were concentrated in three of 15 sectors: professional services (12.8%), health care and social services (12.7%) and retail trade (12.6%). Accommodation and food services accounted for an additional 9.1%, and when coupled with arts, entertainment and recreation at 2%, the total for the tourism sector came to 11.1% of workers.

Across all commission districts, retail trade saw shares in 2015 as low as 9.1% in Commission District 7 and as high as 15.1% in Commission District 9. No other districts had retail shares below 11%, and just two, Commission District 11 (14.1%) and Commission District 1 (14.6%), had shares above 14%. Employment of residents in professional services ranged from a low of 10.7% in Commission District 2 to 16.7% in Commission District 7. The share in only one other district was above 15%, Commission District 4 at 15.8%. No other districts were below 11%. In the Healthcare and social services sector, resident-employment shares ranged from 9.9% in Commission District 5 to 16.2% in Commission District 2. There was just one other district with a share below 11%, Commission District 12 at 10.5%. There were no other districts with a share above 15%. And the highest concentrations were seen in the tourism sector, the combination of arts and entertainment with accommodation and food services. Commission District 3 had 17.7% of employed residents in this sector. Commission District 5 was close behind with 17.5%. No other district reached 14%. At the low end, four districts were below a 9% share, Commission District 10 (8%), Commission District 13 (8.2%), Commission District 8 (8.2%) and Commission District 11 (8.7%).

No districts lost workers over the time period. Three districts, Commission District 10 (+7,600), Commission District 1 (+9,500), and Commission District 7 (9,600) added fewer than 10,000 workers between 2000 and 2014.

* Orange shading indicates the share of workers in that industry and commission district is below the countywide share. Green indicates it is above the countywide share. The intensity of the color, from lightest to darkest, indicates whether the share is within 10%, 25%, 35% or greater than 35% from the County share.

Data Sources: 2000 Decennial Census; 2014 ACS 5-year Estimates
Means of Transportation to Work

2014 ACS data shows that 86.2% of workers in Miami-Dade County drove a car, truck or van to work. According to the Census survey, 5.4% used public transportation, and the remainder used some other means (4.2%) or worked at home (4.2%). Car, truck or van use by commission district ranged from a low of 70.6% in Commission District 5 to a high of 93.7% in Commission District 7. Public transportation use in commission districts ranged from a low of 1.6% in Commission District 11 and Commission District 13, to a high of 14.9% in Commission District 3.

The share of workers reporting ‘other means’ in Commission District 5 was more than three times the countywide average and more than double the next closest district. In this district that includes the downtown core, 9% of workers reported walking to work.

The median travel time to work across the entire county was 27.6 minutes. Median travel times by district ranged from the briefest, 22.1 minutes in Commission District 5, to the longest, 31.6 minutes in Commission District 9 and Commission District 11. Commission District 8 was also over 30 minutes at 30.6 minutes. Four other districts were under 25 minutes: Commission District 13 at 22.3 minutes, Commission District 7 at 22.4 minutes, and Commission District 12 at 22.9 minutes and Commission District 3 at 24.2 minutes.

Chart 4 summarizes the data on the means and time of worker’s travel to work for all of the commission districts.
