2.2 TERM OF CONTRACT

This contract shall commence on the first calendar day of the month succeeding approval of the contract by the Board of County Commissioners, or designee, unless otherwise stipulated in the Notice of Award Letter which is distributed by the County's Procurement Management Division, and contingent upon the completion and submittal of all required bid documents. The contract shall remain in effect for sixty (60) months and upon completion of the expressed and/or implied warranty periods.

2.3 METHOD OF AWARD: To a Single Lowest Priced Vendor In The Aggregate

If a vendor fails to submit an offer on all items, its overall offer may be rejected. The County will award the total contract to a single bidder.

2.4 PRICES SHALL BE FIXED WITH ADJUSTMENTS ALLOWED:

The initial contract prices resultant from this solicitation shall prevail for a one (1) year period from the contract's initial effective date. The pricing adjustment shall not be in excess of manufacturers price adjustments to their most favored distributors. Adjustments in excess of five percent shall not be accepted. It is the awarded vendor's responsibility to request any pricing adjustment under this provision. For any adjustment to be effective it must be submitted ninety (90) days prior to the expiration of the then current anniversary date/year. Any adjustment received after ninety (90) days from the expiration of the then current date/year may not be considered. In these cases, the vendor shall notify the County of the delays in advance of the original delivery date so that a revised delivery schedule can be appropriately considered by the County.

Should the vendor(s) to whom the contract(s) is awarded fail to deliver in the number of days stated above, the County reserves the right to cancel the contract on a default basis after any back order period that has been specified in this contract has lapsed. If the contract is so terminated, it is hereby understood and agreed that the County has the authority to purchase the goods elsewhere and to charge the incumbent vendor with any re-procurement costs. If the vendor fails to honor these re-procurement costs, the County may terminate the contract for default.

3.3 Miami-Dade Police Department (MDPD)

3.3.1 COLORFAST

The fabric threads and material utilized in the manufacture of these patches must be colorfast.

3.3.2 BACKING

The backing of these patches shall not contain any glue or similar substance. It is the intention of Miami-Dade County to sew the patches on the uniforms.

3.3.3 QUALITY OF DESIGN

A major factor in awarding this contract will be the quality of the product, in particular, the detail and accuracy of design.

3.3.4 EMBROIDERED EMBLEM SPECIFICATIONS

a. BACKGROUND MATERIALS

The background material must be of factory first quality vat dyed 7 ½ oz / yd, 8 ½ oz/yd 65% polyester – 35% cotton twill weave, 3/1 construction, cured and preshrunk (resin impregnated and oven cured, color fastness). Seconds will NOT be acceptable.

b. EMBROIDERING

The solid switched background field must be a running stitch field. The embroidery thread must be of the finest quality rayon or polyester. Switch scale must be of sufficient density as to preclude the “bleeding” (or see through) of the background material and uneven matting of color elements. There must be sufficient underlay stitching to give full three dimensional height relief appearance to these emblems. Double thread or any different thread deniers or ply’s will not be permitted in any part of these emblems. Single thread stitching in the deniers and ply’s above must be used throughout. All lettering must be embroidered with 90/2 or 100/2 thread.

c. OVERLOCKED MERROWED EDGE

The over locked marrow edges must consist of seven separate threads: Five threads for the top and two cotton threads for the underneath (or back side) of the emblems. Less than seven threads in the edges will NOT be permitted. The density must be at least twenty threads per inch.

SECTION 3
TECHNICAL SPECIFICATIONS

EMBROIDERED PATCHES

d. FINISHING

A ten mil polyethylene film sheet must be heat bonded with vacuum to the reverse side of the emblems before die cutting. Sufficient heat must be applied to cause the film to melt and bond to the fabric and bobbin threads. The film must be capable of withstanding temperatures in excess of 300 degrees F in alkaline solution and must be non-soluble in all commercial laundering fluids. The films must be applied in such a manner as to preclude the crushing, flattening or depressing of the three dimensionality or high relief of the embroidery, caused by the application of pressure during the bonding process. The film sheet must be applied to the span of loomed emblems, prior to die cutting.

THIS PROCESS OR ANY OTHER MAY NOT BE SUBCONTRACTED. The film backing must completely engulf all the raised elements on the reverse (back) side of the emblems and fill all depressions. All emblems must be die cut with forged steel dies to the exact shape and geometry of the approved design.

e. WORKMANSHIP

All emblems must show a clear cut execution and must be clean, neatly made with full tension on all threads. They must be capable of laying completely flat on a smooth surface. Threads may not buckle nor show underlay/stitching when emblems are bent. There must be no broken stitches in the emblems nor may any stitches be out of proper alignment. No parts of the emblems may be mended. All emblems must conform to the quality standards of these specifications in all characteristics. No distortion of the exterior shape of the emblem is allowable.
