

### SUMMARY OF MIAMI-DADE INTERNATIONAL TRADE IN GOODS: 2013

After a sharp decline in international trade activity during the global recession of late 2007-mid-2009, Miami-Dade international trade sector began its robust recovery in 2009, with significant growth in both imports and exports through 2012. Significant decelerations in the pace of economic growth in the county's major export markets lead to a decline in the current value of exports and total trade in 2013. **Total trade through Miami International Airport and PortMiami topped \$93.1 billion for the 2013, representing a 3.3% decrease from 2012. Imports, however, increased 4.5% to \$41.4 billion, while exports decreased by -8.8% to \$51.7 billion.** Trade activity declined further near the end of 2013. Total imports serviced through Miami-Dade ports in the fourth quarter of 2013 (2013:Q4) fell -10.8% to \$10.2 billion, compared to 2012:Q4. Fourth quarter exports totaled \$13.1 billion, representing a -10.2% decrease from 2012:Q4.

The total volume trade, measured in terms of tonnage, decreased -2.2% to 7.4 million tons of cargo from 2012 to 2013. Imports measured by weight increased 4.7% over the year while exports of goods decreased -9.3% over the year.

### TRADE BY REGION

The data on Miami-Dade's regional trading partners shows large differences in the County's international trade with various world regions. In particular, **Europe** was the County's 4<sup>th</sup> largest

Dr. Robert D. Cruz, Chief Economist (305) 375-1879

Mr. Robert Hesler, Sr. Economic Analyst (305) 374-4811

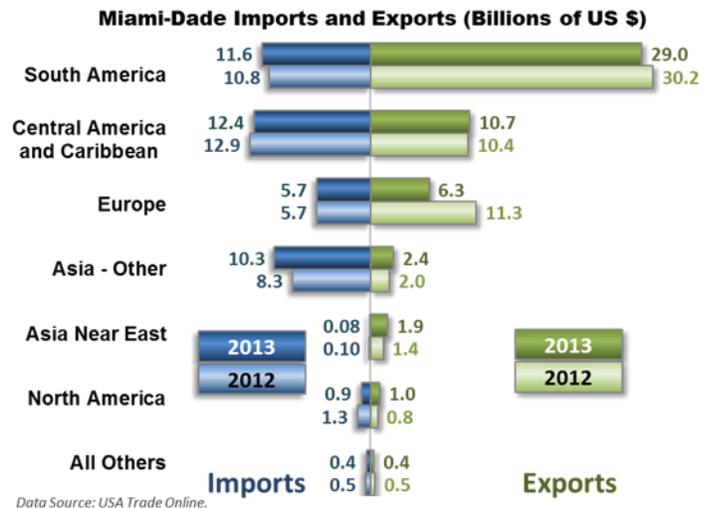

trading region in 2013 and saw the value of total trade decline 30% in 2013 from 2012, with the value of trade **dropping over \$5 billion**. Precious metals and gold in particular, dominate European trade. In 2012 precious metals accounted for 72% of the value of all trade with Europe, but by 2013 that share had dropped to 52%.

The decline in gold prices was the main determinant of the decline in trade with Europe. From 2012:Q1 through 2013:Q4 **the price of gold declined 25%**. This price-driven drop in gold trade accounted for 97% of the total drop in the value of all trade with Europe.

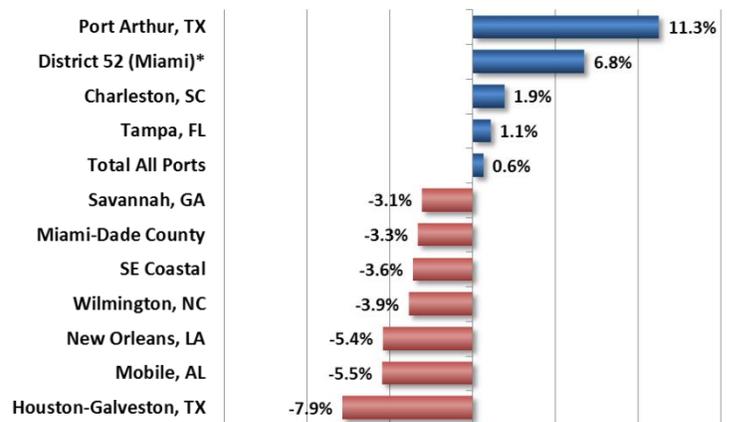

**South American countries** (see the list of countries by region at the end of the report) make up, by far, the largest trading region for Miami-Dade, **accounting for 44% of the total trade value**. Trade with this vital trading partner **declined 1% from 2012 to \$40.6 billion**. Miami-Dade imports from the region, however, grew 7.6% to \$11.6 billion while exports to South America dropped -3.9% to \$29 billion.

Trade with **Central America and the Caribbean**, 25% of the total value of all trade in 2013, **declined 1% year-over-year to \$23.1 billion**. Imports from the region were off 3.6% to \$12.4 billion while exports to Central America and the Caribbean were up 2% to \$10.7 billion.

The brightest spot in the 2013 trade data is in the countries of **Asia-Other which include China**. The value of **total trade was up 23% from 2012 to 2013 to reach \$12.7 billion** and now represents nearly **14% of all County trade** by value. By comparison, the pace of growth in total trade with Asia-Other exceeded ports like Savannah (+0.9% gain), Tampa (+2.5%) and the aggregate of all Southeast U.S. Coastal Ports (+4.1%). Miami-Dade's imports from **Asia-Other** increased in 2013 by nearly 24% year-over-year to \$10.3 billion, while exports grew 21% to \$2.4 billion.

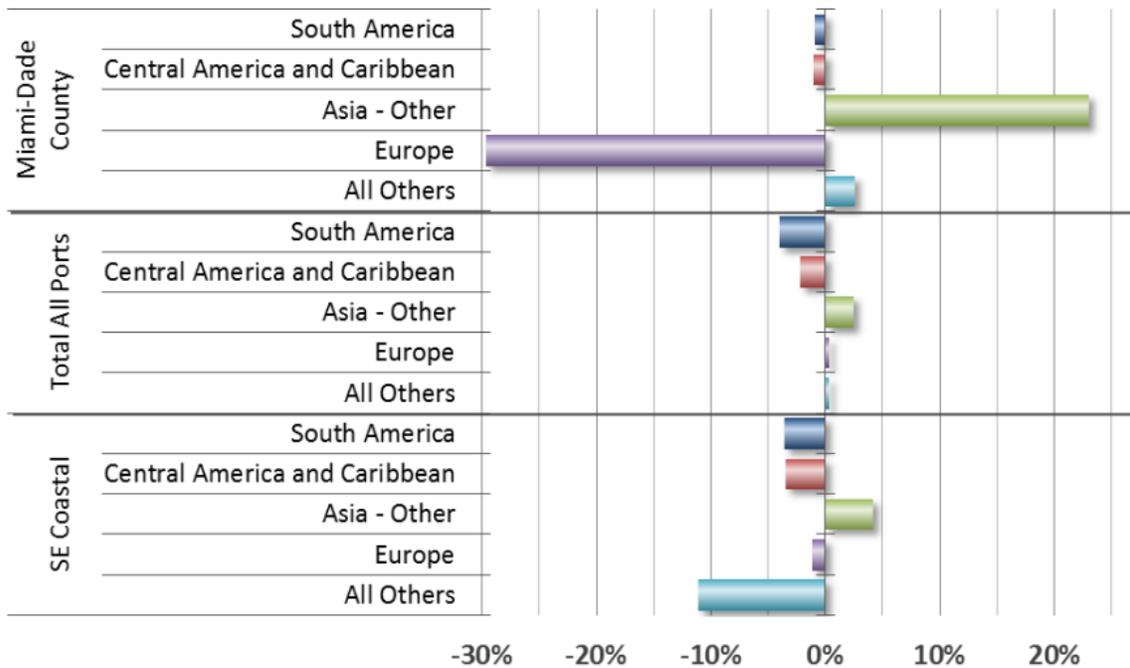

Change in Value of Port Trade: 2012-2013

\*This represents the remainder of Miami District 52 and includes Port Everglades, Fort Lauderdale-Hollywood Int'l Airport, and seaports of West Palm Beach, Fort Pierce and Key West.

COMPARISONS WITH U.S. AND SOUTHEAST

Changes in Regional Trade: 2012-2013

Data Source: USATradeOnline; RER Economic Development Division.

COASTAL PORTS

The total value of trade in goods from all world regions increased at the national level (all U.S. ports combined) by 0.6% from 2012 to 2013, but Miami-Dade total trade trailed the nation with a decrease of -3.3%. Exports across the nation were up 2.1% in 2013, but export shipments from Miami-Dade were down by -8.8%. Nationally, imports were down -0.4% compared to an increase of 4.5% in Miami-Dade. There were two significant distinctions between Miami-Dade and national trade. The first was in the increase in national exports of refined petroleum which actually decreased in Miami-Dade’s port. The second was the large relative decrease in the value of gold exports from Miami-Dade, which represent a much larger component of county trade compared to its significance at the national trade level.

Miami-Dade’s trade performance in 2013 was very much like that of other U.S. Southeast coastal ports. Total trade of goods decreased by a little more than Miami’s, down -3.6% for all SE ports combined. Exports from SE coastal ports fell -0.2% year-over-year while imports were off -6.3%. The ports in Broward, Palm Beach and Monroe Counties, (**District 52 excluding Miami-Dade**) grew, in terms of trade value, at faster

pace than in Miami-Dade (+6.8% vs. -3.3% in Miami-Dade). The increase in the quantity of petroleum shipped through Port Everglades and the increase in the value of aircraft shipped overseas from Fort Lauderdale-Hollywood International Airport were the main factors for the comparatively faster growth the rest of District 52.

Although Miami-Dade's total trade with South America declined by -1%, all the SE coastal ports combined saw trade with South America decrease by -3.6%. Imports from South America to all Southeastern coastal ports were down -8% while exports to South America were up slightly, 0.2%. All U.S. ports saw South American trade decrease by -4%, with imports off -7.5% and exports dropping -0.4%. Miami-Dade County handled 16.5% of all U.S. trade in goods with South America in 2013, up from 16% of the national total in 2012. County airport and seaport (combined) also expanded its share of South American trade shipped through all SE Coastal ports, accounting for 22.6% of all South American trade through SE Coastal ports in 2013, up from 22% the previous year.

Miami-Dade County trade in goods with Central America and the Caribbean was down -1.1% from 2012. Imports from the region were off -3.6%, but exports increased 2.1%. By comparison, southeast coastal trade with the region was down -3.5% with imports down -9.8% and exports up 1.5%. U.S. total trade with Central America and the Caribbean was off -2.1% with imports from the region down -8.6%, but exports up 2.9%. Miami-Dade County accounted for 23.8% of all U.S. trade in goods with this region in 2013, up slightly from 23.5% in 2012. Miami-Dade again increased its share of total trade to the region from SE coastal ports modestly to 31% in 2013 from 30% a year earlier.

Miami-Dade's next largest region in terms of the value of total trade in 2013 was Asia-Other. The value of total trade increased 23% (\$2.4 billion) from 2012 to 2013. Imports were up 24% and exports were up 21% year-over-year. Nationally the value of trade with this region was up 2.5% (imports -1.7%; exports - 4.3%) over the same time period. Miami-Dade County's share of national trade with this region grew to 1.1% in 2013 from 0.9% in 2012. Southeast coastal ports saw trade with Asia-other grow 4.1% (imports +4%; exports +4.4%) over last year and the county's share of the total to 6.9% in 2013 from 5.8% the previous year.

The values of trade with Europe experienced the greatest divergence in trends between Miami-Dade and southeastern coastal and national ports occur. Total trade of goods between Miami-Dade and Europe decreased nearly 30% from 2012 to 2013. The value of imports was down -0.3% while exports were off -44%. As noted above, nearly all of this decrease resulted from a drop in the price of gold. Nationally, trade with Europe increased slightly, 0.4%, (imports - 1.1%; exports - -0.6%). Miami-Dade's share of European trade of goods declined from 2.2% in 2012 to 1.5% in 2013. Trade between Europe and all southeast coastal ports decline -1.1% (imports - 0.9%; exports - -3.7%) and the county's share decreased to 5% in 2013 from 7% the previous year.

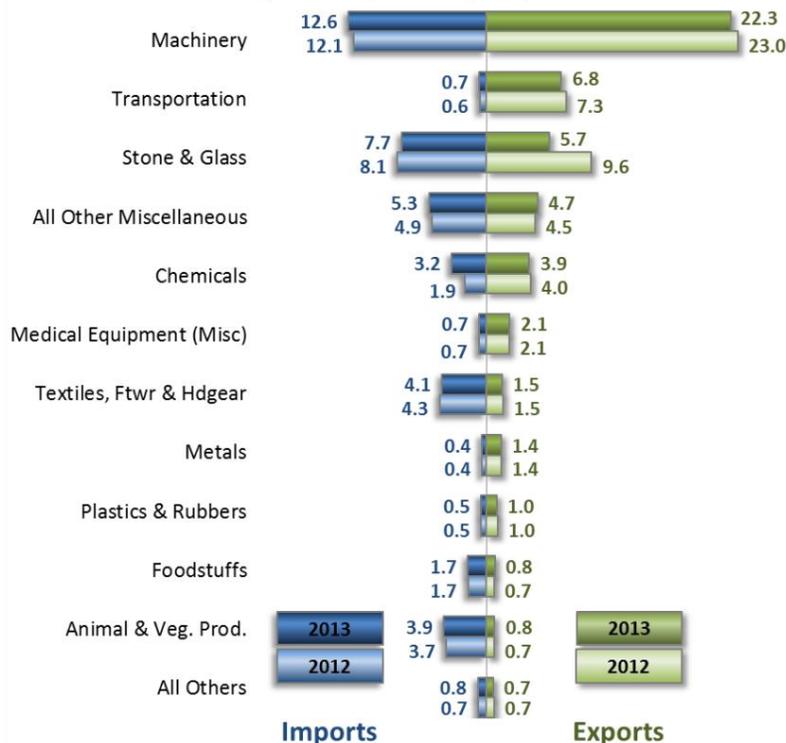

Although trade with the top regional trading partners slowed for Miami-Dade County in 2013, Miami-Dade performed as well or better than the southeastern regional and national ports did collectively. The only

exception was the price effect of gold on trade with Europe. Trade with South America and Central America and the Caribbean dropped slightly in Miami-Dade but the declines were greater across the southeast coastal ports and nationally. Trade with Asia–other increased dramatically in Miami-Dade and also increased somewhat at the other SE coastal ports. And, while European trade dropped dramatically in Miami-Dade, the data does not suggest that it moved to other competing ports.

**TRADE BY COMMODITY**

There were few notable shifts in the value of trade by commodities from Miami-Dade’s airport and seaport viewed in terms of broad commodity groups. The top three categories of commodities account for 60% of all Miami-Dade trade. All three categories were down year over year. Machinery, which is mostly data processing and communications equipment, circuit boards and office equipment and parts, accounted for 37% of traded goods in 2013 (\$34.9 billion). Machinery shipments fell -0.5% from 2012 to 2013. Shipments of transportation commodities accounted for 13% of exports from Miami-Dade and 8% of total traded goods (\$7.5 billion). Over 70% of this category’s total exports in 2013 were aircraft, engines, and parts. Exports of transportation commodities fell by nearly 7% while imports increased by approximately 15%..

**Miami-Dade Imports & Exports (Billions of \$)**  
(Ranked by 2013 Exports)

Data Source: USA Trade Online. RER Economic Development Division.

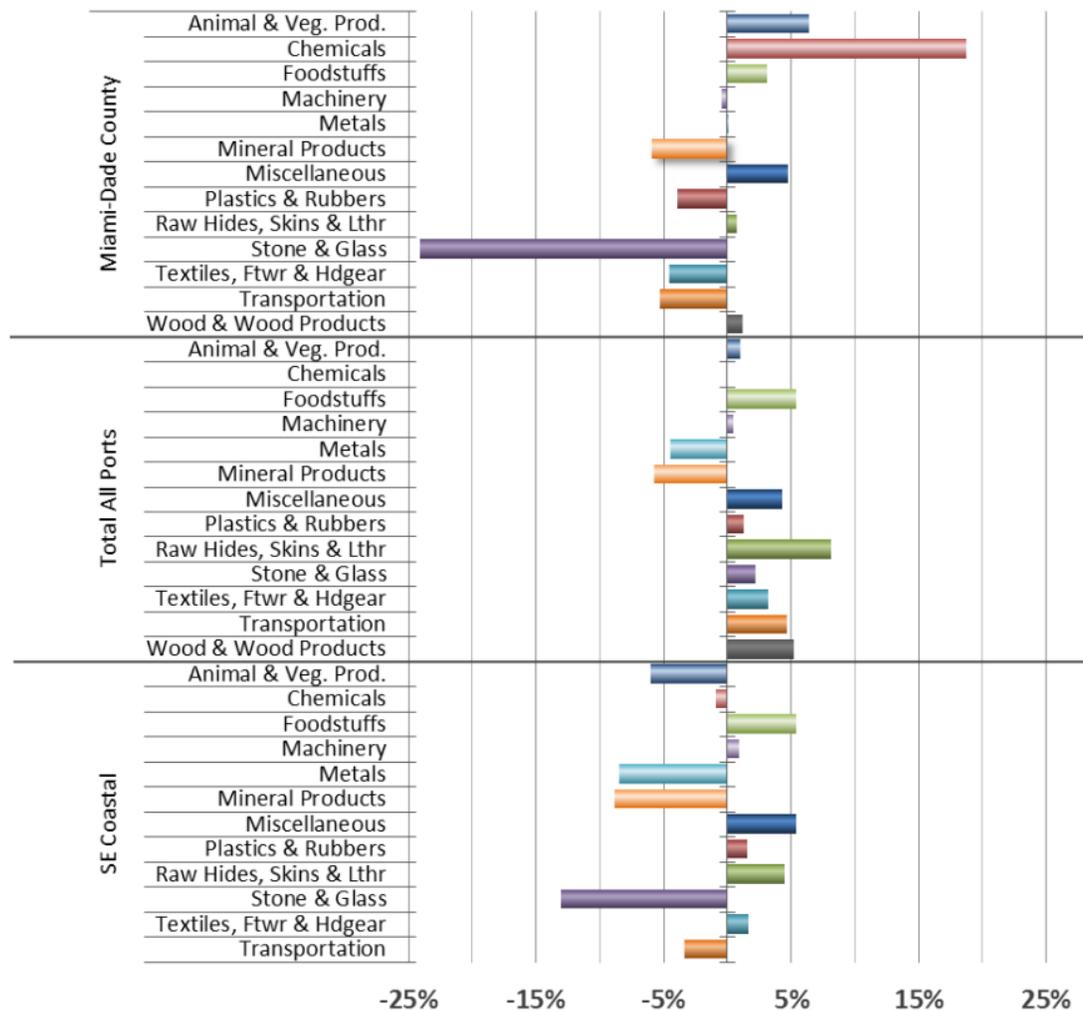

The third category of traded commodities was the aforementioned stone & glass group that includes gold and other precious metals. This accounts for 14% of total trade and 11% of exports (\$13.5 billion). The total value fell over -24% in 2013 as gold prices took a sharp decline.

While total trade of machinery declined in Miami-Dade County, it increased for both the southeastern coastal ports and nationally. While it decreased by approximately \$150 million (-0.5%) in Miami-Dade, it increased for the nation as whole (+\$4.3 billion, +0.5%). Among the aggregate of SE coastal ports, trade shipments of

machinery increased about \$1.6 billion (+0.9%). Nationally the trade of transportation commodities increased approximately \$24 billion (+4.7%) while falling about \$425 million (-5.4%) in Miami-Dade. Southeastern ports saw trade of transportation commodities drop about \$3.2 billion (-3.4%).

Trade shipments of stone and glass commodities increased at the national level by about \$3.6 billion (+2.2%). Among SE coastal port trade in stone and glass decreased about \$3.6 billion, and fell by about \$4.3 billion in Miami-Dade. Looking only at precious metals and stone, within this category, nationally there was a decrease of about \$130 million (-0.2%) compared to a drop of nearly \$4 billion among SE ports and about \$3.9 billion in Miami-Dade.

**Changes in Trade - Commodities: 2012-13**

Data Source: USATradeOnline; RER Economic Development Division.

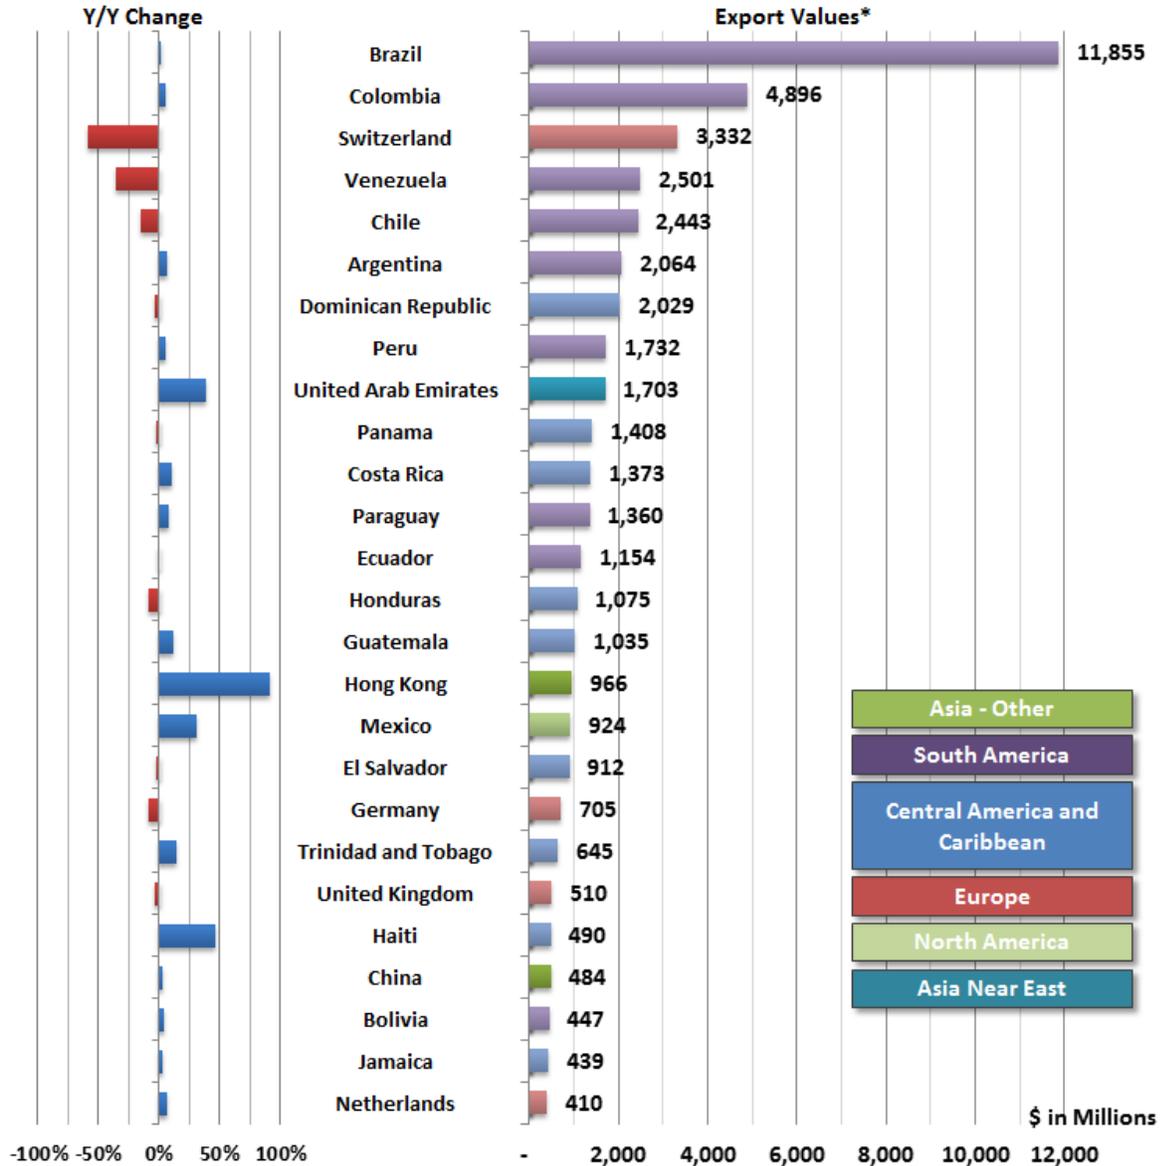

The following pages show tables and charts of the trade data in a variety of ways: weight by region and commodity, top countries by export and import, comparisons with regional and national ports, and general overview graphic of the trade data for Miami-Dade County.
