Memorandum

Date: October 19, 2010
To: Honorable Chairman Dennis C. Moss
and Members Board of County Commissioners
From: George M. 
County Manager
Subject: Ordinance changing the boundaries of the City of Sweetwater and amending the charter by providing for the annexation of certain lands

As noted in the item approved by the Board of County Commissioners (BCC) at the June 3, 2010 meeting relating to the City of Sweetwater's proposed annexation, the annexation area's taxable value for the 2009 Tax Roll is \$1.022 billion. Based on the FY 2009-10 City of Sweetwater millage rate of 3.9252 mills, the ad valorem revenues attributable to the annexation area would be \$3,812,790. At the current Unincorporated Municipal Service Area (UMSA) millage rate of 2.0083 mills, the ad valorem revenues attributable to the annexation area would be \$1,950,786. The expected tax increase to the entire annexation area would be \$1,862,004. It is important to note that the average homeowner would pay an additional \$252 in taxes if this annexation is approved.

The proposed annexation area, as part of UMSA generates an estimated \$2,923,256 in revenue. The County spends an estimated \$3,490,547 per year providing services such as police, public works and planning and others to that area. Therefore, the net revenue gain to the UMSA budget is an estimated \$567,292 positive fiscal impact to the County. It is important to note that while UMSA spends approximately \$3.5 million in providing services to the area, if the annexation is approved there are expenses that may continue to occur.

A portion of the annexation area is part of the Airport West CBI. When looking only at the CBI area, there is a negative fiscal impact resulting in a net loss to UMSA of approximately \$674,628. Although initially the annexation as a whole will have a positive fiscal impact to UMSA, eventually, as the vacant lots are developed within the Commercial Business Industrial (CBI) area, the impact may become negative. The CBI portion of the annexation area consists of 935 real estate folios of which 693 are vacant parcels. The future taxable value of the vacant parcels, based on the average taxable value of the developed parcels today, have the potential to possibly generate an additional \$218 million in taxable value if developed in the same manner as the existing developed parcels. At today's UMSA millage rate of 2.0083, this would result in an additional \$440,000 in ad valorem revenues and additional revenues attributable to developed property.
