Section 24-12. Variances and extensions of time for compliance.

(1) The Environmental Quality Control Board shall have the power and authority to grant or extend from time to time variances and extensions of time for compliance with the requirements of this chapter to new or existing facilities, equipment and processes. Such variances or extensions may be granted to specific facilities, equipment, or processes or to a class. The Environmental Quality Control Board may grant such variances or extensions only if it is affirmatively established by competent factual data and information that strict compliance with the requirements of this chapter is impossible or inappropriate because of conditions beyond the control of the person or persons involved, or that strict compliance would result in substantial curtailment or closing down of plant, project or operation which would be detrimental to the public interest, or that the particular operation is essential for the public health or the national security, or that no technically feasible, economically reasonable means of compliance are available to the person or persons involved, or that the variance or extension will not be detrimental to the public health, welfare and safety and will not create a nuisance and will not materially increase the level of pollution in this County, or that a more unhealthy condition will occur if a variance or extension is not granted. Variances and extensions of time shall be considered and acted upon in accordance with the provisions of Sections 24-4, Section 24-12, 24-13 and the provisions of Section 24-8(5)(b).
