Introduction

This section provides a listing of some available funding sources for various types of mitigation measures. They have been divided into pre and post-disaster availability. There may be other funding opportunities that present themselves and when the LMS Coordinator is made aware of these opportunities they will be shared with the LMS Working Group. This may be used as a guide to help stakeholders identify potential funding sources.

It is the responsibility of the agency pursuing funding to fill out all of the necessary documents and provide the supportive materials. The project list should be updated to reflect any funding that is being pursued or has been awarded.

These funding sites may also render additional funding opportunities:
