To: Honorable Chairman Jose “Pepe” Diaz,
and Members, Board of County Commissioners

Substitute to
Agenda Item No. 2(B)(3)

From: Daniella Levine Cava
Mayor

Subject: Updated Biscayne Gardens Traffic Report – Directive No. 211308

This memo and Traffic Impact Study replace the previously distributed October 18, 2021, memo and Traffic Impact Study in order to reflect additional information received from the Florida Department of Transportation (FDOT) and further input from the Department of Transportation and Public Works.

On July 8, 2021, the Board of County Commissioners (Board) adopted Resolution No. R-668-21 directing the County Mayor or designee to prepare a Study addressing the traffic impacts of proposed and potential residential developments in the Biscayne Gardens neighborhood bordered to the north by Northwest 167th Street, the east by North Miami Avenue, the south by Northwest 158th Street (east of Northwest 2nd Avenue) and Northwest 157th Street (west of Northwest 2nd Avenue), and the west by Northwest 6th Avenue. The stated purpose of this Traffic Impact Study is to identify and make recommendations to address negative impact to traffic that could potentially result from new developments, and traffic concerns in the Biscayne Gardens neighborhood. The resolution directed that the Traffic Impact Study be placed on an agenda of the Board within 90 days of its effective date. Please note that this memo and Traffic Impact Study replace the previously distributed October 18, 2021, memo and Traffic Impact Study in order to reflect additional information received from the Florida Department of Transportation (FDOT) and further input from the Department of Transportation and Public Works.

Traffic Impact Study

Within the last four years, a total of 11 Comprehensive Development Master Plan (CDMP) amendment, zoning, and platting applications have been filed in the Biscayne Gardens neighborhood. A cumulative analysis of applications is generally not conducted in the review of CDMP applications because there is no set timeline for completion of these projects. At the zoning and platting stages, however, the required concurrency studies do include a cumulative analysis of previously approved development order trips. The Department of Transportation and Public Works (DTPW), through their review of these applications and the applicants’ corresponding operational traffic analysis does require improvements to address local conditions and impacts that will result from approval of an application if improvements are warranted. This Traffic Impact Study more broadly evaluates the cumulative impacts of the 11 projects on Biscayne Gardens’ roadway system and recommends strategies to address these impacts.

Because the Biscayne Gardens neighborhood is inside the County’s Urban Infill Area (UIA), development in this area is exempted from meeting transportation concurrency requirements. Further, the CDMP land use policies require the County to give priority to infill development on vacant sites and the redevelopment of underdeveloped urban areas contiguous to existing urban development. The objective of these policies is to encourage transit-oriented development at appropriate locations, with the understanding that the transit mode will eventually supplement shortfalls in roadway capacity. The Biscayne Gardens neighborhood is currently served by ten bus routes. The completion of the Northeast SMART plan corridor, with good transit, bike, and pedestrian connections to and from Biscayne Gardens, should significantly improve multi-modal mobility in the neighborhood.

The cumulative analysis assessing the combined impacts of the eleven projects proposed in this area indicates that all roadways will continue to operate within the adopted Levels of Service standards except for NW 6 Avenue south of NW 159 Street, which needs to be evaluated further to arrive at appropriate solutions. The westbound and northbound traffic backup on NW 2 Avenue and NW 167 Street intersection extends for almost two blocks during peak hours. One of the mitigations for the Montebella project includes the extension of the northbound left turn storage area, which would help reduce backups and delays. Also, one of the recommended improvements associated with the Golden Glades Interchange Enhancement project being conducted by FDOT calls for constructing a ramp that would directly connect eastbound NW 167 Street/Palmetto Expressway to northbound I-95, which is anticipated to improve traffic flow.

Traffic flowing from the Biscayne Gardens area to the east relies on heavily congested NW 2 Avenue. Traffic flows north on NW 2 Avenue and heads east on NW/NE 167 Street. To avoid this traffic flow pattern and provide relief to NW 2 Avenue, there is a need for more east-west continuous roadways which would help traffic flow to the east without utilizing NW 2 Avenue. Connecting NW 161 Street east of NW 2 Avenue would enhance east-west traffic flow, thereby easing the traffic on NW 2 Avenue. Two projects that are currently in the platting process, “The Terraces of Biscayne Gardens” and “The Care Oasis”, will be responsible for providing this connection.

Residents have also expressed concerns that cut through traffic and speeding on local streets is affecting the safety of their neighborhood. This Study recommends a more detailed traffic calming study to be conducted in this area. The Traffic Engineering Division of DTPW can conduct a follow up area-wide traffic calming study for the Biscayne Gardens area, which should take about 6 to 9 months to complete. Additionally, future zoning approvals that increase density or intensity of development in the area should be subject to a condition requiring the applicants to conduct, after the development is occupied, a study to identify needed traffic calming improvements and to commitment to constructing or causing the construction of such improvements if warranted and approved by DTPW, subject to any necessary agreement of affected residents.

If you have questions regarding this information, please contact Lourdes Gomez, AICP, Director of Regulatory and Economic Resources, at (305) 375-2886 or Lourdes.Gomez@miamidade.gov.

1. Introduction

Biscayne Gardens is located in North Miami-Dade County southeast of the Golden Glades Interchange, south of Palmetto Expressway/SR 826 East and east of Interstate-95. It is surrounded in the north and east by The City of North Miami Beach, in the south by City of North Miami, in the west by City of Miami Gardens. The entire Biscayne Gardens area is inside the County's Urban Infill Area (UIA), the County's designated Transportation Concurrency Exception Area (TCEA). The Concurrency Management Program in the Capital Improvement Element (CIE) of the Comprehensive Development Master Plan (CDMP) states that "A proposed development located within the Urban Infill Area will not be denied a concurrency approval for transportation facilities provided that the development is otherwise consistent with the adopted Comprehensive Development Master Plan..." (CIE page IX-17). Traffic concurrency ensures that adequate roadway facilities are available to service the trips generated by the projects. The entire Biscayne Gardens area is exempt from traffic concurrency hence review of the adequate availability of roadway facilities for projects located within this area are not conducted when projects are processed for zoning approvals, but a short-term and long-term roadway impact analysis is done for projects processed for CDMP amendments.

The Biscayne Gardens area is located near three major expressways, Florida Turnpike, Interstate 95, and SR 826/Palmetto Expressway which would provide connectivity for this area to other regions within the County and outside the County. The majority of the roadways in this area are county maintained except for NE 167 Street and NE 6th Avenue which are state maintained. Most of the roadways in this area are local streets, except for NW 2 Avenue (major collector), Miami Avenue (minor arterial), and NE 6 Avenue (minor arterial). NE 167 Street/Palmetto Expressway is a six-lane principal arterial roadway.

Over the last five years several projects mostly residential with increased densities from the currently allowable limits have been processed or are currently under process for land use and zoning approvals. Due to the recent increase in development activity in the area, the District Commissioner Mr. Jean Monestine initiated a resolution (R-668-21) directing staff to conduct a traffic study in the area to assess the future traffic condition arising from these proposed new developments. Generally, when projects come in for land use amendments or for zoning approvals, they are individually evaluated for their impacts on the surrounding roadway network. This study would analyze the cumulative impacts on the roadway system of all the projects that have come in recently.

Figure 2 - Study Location Area – Traffic Analysis

2. Traffic Study Area

The study area per the BCC directive is about 200 acres, which extends north to NW 167 Street, east to North Miami Avenue, south to NW 158 Street and NW 157 Street and west to NW 6 Avenue, as shown in Figure 1. The influence area considered for the traffic analysis was larger than the actual study area identified in the resolution because there were few projects outside the study area and the traffic generated within Biscayne Gardens has a wider circulation area. The project traffic study area was extended to the east to NE 6 Avenue and to the south to NE 151 Street.

Within the traffic study area, the following north-south and east-west roadways labeled in Figure 2, serve the traffic circulation in the area:

- NW 6 Avenue from NW 167 Street to Biscayne River Drive
- NW 2 Avenue from NW 167 Street to NW 154 Street
- North Miami Avenue from NW 167 Street to NW 154 Street
- NE 2 Avenue from NW 167 Street to NW 152 Street
- NE 6 Avenue from NW 167 Street to NW 152 Street
- NW/NE 167 Street from I-95 to NE 6 Avenue
- NW/NE 166 Street from NW 2 Avenue to NE 5 Avenue
- NW/NE 165 Street from NW 6 Avenue to NE 5 Avenue
- NW/NE 164 Street from NW 2 Avenue to NE 6 Avenue
- NW/NE 163 Street from NW 2 Avenue to NE 6 Avenue
- NW/NE 163 Street from NW 2 Avenue to NE 6 Avenue
- NW/NE 161 Street from NW 6 Avenue to NW 2 Avenue and from Miami Avenue to NE 6 Avenue
- NW/NE 160 Street from NW 2 Avenue to NE 6 Avenue
- NW/NE 159 Street from NW 6 Avenue to NE 6 Avenue
- NW/NE 158 Street from NW 2 Avenue to NE 6 Avenue
- NW/NE 157 Street from NW 6 Avenue to NW 2 Avenue and from NE 4 Avenue to NE 6 Avenue
- NW/NE 156 Street from NW 2 Avenue to NE 4 Avenue
- NW/NE 154 Street/Biscayne River Drive from NW 6 Avenue to NE 6 Avenue
- NW/NE 152 Street from NW 2 Avenue to NE 5 Avenue
- Memorial Highway from NW 154 Street to NW 151 Street

Figure 3 – Existing Traffic Conditions

3. Existing Traffic Condition Analysis

An area-wide planning-level traffic analysis was conducted to identify existing overall operational deficiencies within the traffic study area. Traffic conditions are evaluated by the segment’s level of service (LOS), which is represented by one of the letters “A” through “F”, with A generally representing the most favorable driving conditions and F representing the least favorable. The peak hour volume counts on major roadways within the study area are collected annually to monitor traffic concurrency and for Miami-Dade Transportation Planning Organization’s travel demand model validation purposes. The study area consists of many local streets which function as local collector roadways. Traffic counts are not collected on all roads within the study area, only the major collectors and arterial roadways have counts collected annually, the remaining roads either do not have counts or have counts collected once or twice in the past. The 2019 traffic counts data was utilized for traffic analysis because the 2020 data was skewed due to impacts from COVID affecting traffic flow. For roadways that did not have 2019 counts, the traffic volume was projected using an average traffic growth rate of 1%. There was no particular growth trend in the area as can be seen in Table 3 for the four roadways that had historical counts. A couple of traffic studies in the area have used a conservative growth rate of one percent, which staff found to be acceptable.

The County’s adopted LOS standards are given in Policy TC-1E in the Transportation Element of the Comprehensive Development Master Plan (CDMP). Table 1 below shows the Adopted LOS for all the roadways within the County.

Table 1 – Adopted LOS Standard for roadways

Facility	Location	*Level of Service (LOS) Standard		
		Transit Availability		
		No Transit Service	20 Minute Headway Transit Service within ½ mile	Extraordinary Transit Service (Commuter Rail or Express Bus)
Local and County Roadways	Between Urban Infill Area (UIA) and Urban Development Boundary (UDB)	LOS D (90% of Capacity)	LOS E (100% of Capacity)	120% of Capacity
	Inside UIA	LOS E	120% of Capacity	150% of Capacity
	Outside UDB	LOS C		
State Roads	Inside UDB	LOS E		
	Outside UDB	LOS C		
*Criteria included in the 2008 Comprehensive Development Master Plan (CDMP). Applicable criteria during the existing conditions analysis.				

The Biscayne Gardens area is within the Urban Infill Area, hence the minimum adopted LOS for all roadways is 'E'. For roadways serviced with mass transit having 20 minutes or less headways the LOS is E+20% (120% capacity). For roadways serviced with extraordinary transit service such as Metrorail, Express Bus Service or Bus Rapid Transit the LOS is E+50% (150% capacity). Table 2 below shows the existing traffic condition of the roadways within the study area. As can be seen in Table 2, all roadways are operating at acceptable levels of service.

Table 2 – Summary of 2019 PM Peak Hour Volumes of roadways within the Study Area

Existing Traffic Conditions Analysis					
Location	Number of lanes	Adopted LOS	Adopted LOS Capacity	2019 PM Peak Volumes	Existing LOS
NW 2 Avenue south of NW 167 Street	4	E+20	3283	1344	D
N Miami Avenue at NW 163 Street	2	E+20	1522	633*	D
N Miami Avenue north of NW 159 St.	2	E+20	1522	594	D
NE 2 Ave at NE 156 Street	2	E+20	1522	251*	C
Memorial Hwy North of NW 135 Street	2	E	1269	704	D
NE 167 Street E/O N Miami Avenue	6	E+20	5508	3045	D
NE 165 Street at N Miami Avenue	2	E	1269	151*	C
NW 163 Street at N Miami Avenue	2	E	1269	144*	C
NE 159 Street east of NE 2 Avenue	2	E	1269	585	C
NE 159 Street east of NE 3 Avenue	2	E	1269	993*	D
N Biscayne River Dr east of NW 6 Ave.	2	E	1269	122*	C
NE 158 Street east of N Miami Avenue	2	E	1269	116*	C
NW 6 Avenue North of NW 159 Street	2	E	1269	377*	C
NW 6 Avenue South of NW 159 Street	2	E	1269	862*	D
NW 159 Street east of NW 6 Avenue	2	E	1269	535*	C

Notes:

1. 2019 Traffic Counts data was used since 2020 counts are skewed because of changes in traffic due to COVID
2. * Indicates that the traffic volume data was collected in the past and is projected to 2019 by utilizing a growth rate of 1%
3. County adopted roadway level of service standard applicable to the roadway segment: D (90% capacity); E (100% capacity); E+20% (120% capacity for roadways serviced with mass transit having 20 minutes or less headways in the Urban Infill Area (UIA)); E+50% (150% capacity for locations with extraordinary transit service)

4. Traffic Growth Trends on Major Roads

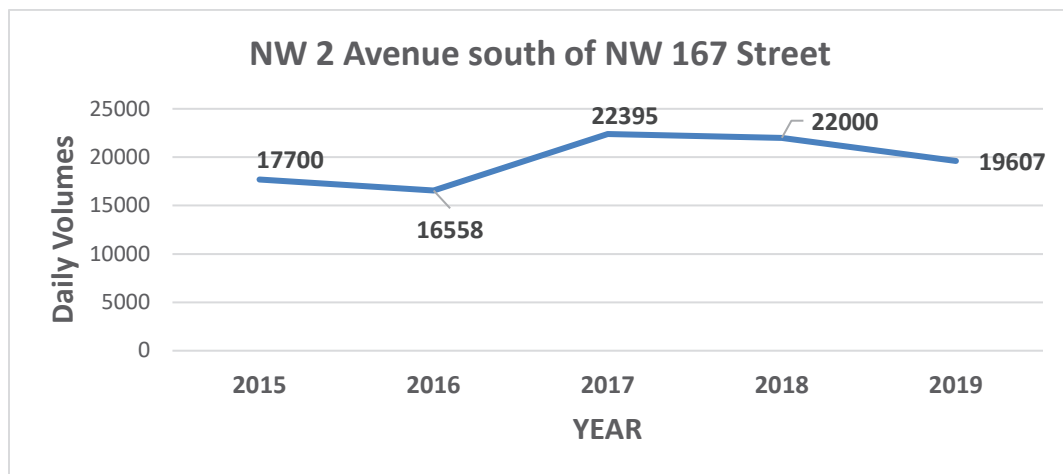

Traffic volume counts on major roadways within the study area are collected annually. Table 3 shows the traffic trend from 2015 to 2019 on the four major roadways in the area. The 2020 traffic counts were not considered because of changes in traffic pattern arising due to impacts from the COVID pandemic.

Table 3 – Traffic Trends on Major Roadways in the Biscayne Gardens Area

Traffic Trends (AADT) on Major Roadways							
Roadways	Lanes	2015	2016	2,017	2018	2019	Growth Rate (%)
NW 2 Avenue south of NW 167 Street	4	17700	16558	22395	22000	19607	2.69%
N Miami Avenue north of NW 159 Street	2	6630	6804	6934	6800	6600	-0.11%
Memorial Hwy North of NW 135 Street	2	6931	7120	7195	8371	8456	5.50%
NE 167 Street E/O N Miami Avenue	6	65500	66500	65000	56000	51500	-5.34%

As can be seen in Table 3, there is no definitive trend in traffic growth rate in the area. Figure 4 shows that the traffic on NW 2 Avenue south of NW 167 Street has increased from 17,700 in 2015 to 19,607 in 2019, the annual average growth rate is 2.69%. NW 2 Avenue is a major thoroughfare which connects Biscayne Gardens to the Golden Glades Interchange.

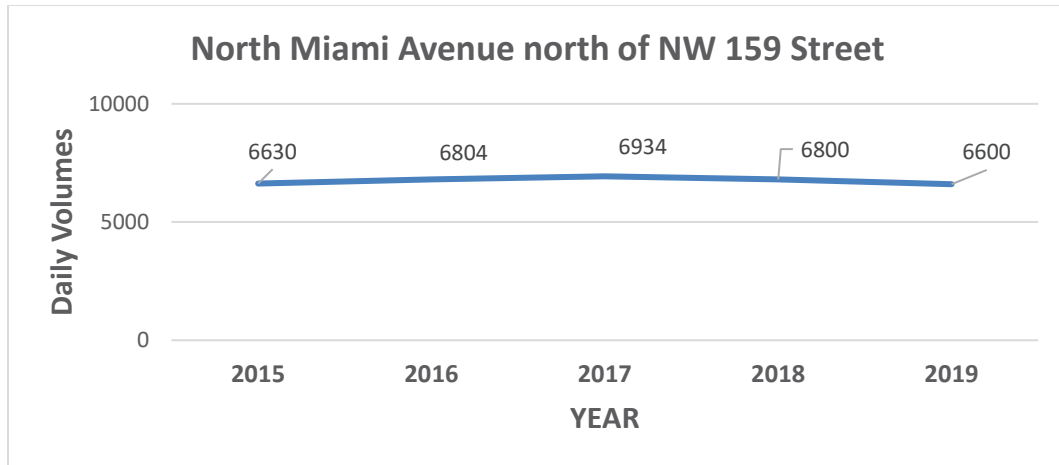

Figure 4 – Traffic Trends on NW 2 Avenue

North Miami Avenue is a two-lane county-maintained minor arterial road. North Miami Avenue is one of the only two roads to have a bridge across Biscayne Canal, hence traffic going south from Biscayne Gardens area mostly use this road and NW 6 Avenue which also has a bridge across Biscayne canal. Figure

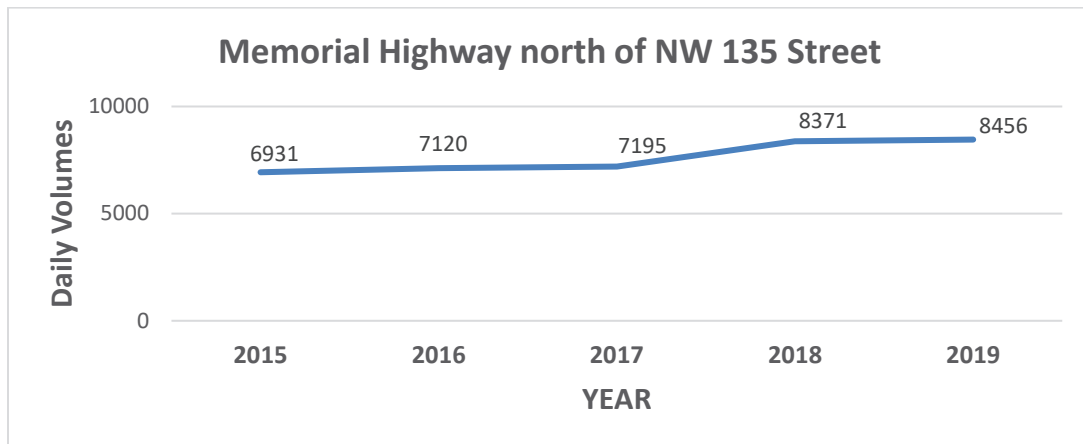

5 shows the traffic trend on North Miami Avenue north of NW 159 Street from 2015 to 2019. The traffic on North Miami Avenue has declined from 6,630 in 2015 to 6,600 in 2019. The traffic is nearly stagnant in the past five years and has declined by 0.11% annually.

Figure 5 – Traffic Trends on North Miami Avenue

Memorial Highway is a two-lane county-maintained major collector road. Figure 6 shows the traffic trend on Memorial Highway north of NW 135 Street from 2015 to 2019. The traffic on Memorial Highway has increased from 6,931 in 2015 to 8,456 in 2019, the annual average growth rate is 5.5%.

Figure 6 – Traffic Trends on Memorial Highway

NE 167 Street/ East Palmetto Expressway is a six-lane state maintained major arterial road. NE 167 Street provides connection for the North Miami area to the Golden Glades Interchange, a major junction where

three expressways meet. Figure 7 shows the traffic trend on NE 167 Street east of Miami Avenue from 2015 to 2019. The traffic on NE 167 Street has declined from 65,500 in 2015 to 51,500 in 2019. The traffic has declined by an annual average rate of 5.34%.

Figure 7 – Traffic Trends on NE 167 Street

5. Cumulative Traffic Impact Analysis

In the last four years from 2018 to 2021 eleven CDMP and Zoning projects have been submitted in the Biscayne Gardens area as shown in Table 4. Not all the projects have been approved by the Board of County Commissioners, some projects are still in the pipeline awaiting approval. When projects come in for CDMP or zoning approval, they are evaluated individually for their impacts on the surrounding roadway network. Only when multiple projects that are in close proximity to each other are submitted in the same amendment cycle, cumulative traffic impact analysis are done. Since the projects in the Biscayne Gardens area came during several years, most of them have been analyzed for their individual impact on the roadway network. Cumulative analysis for projects coming in different years is not done at the CDMP level because there is no set timeline when these projects will move forward and become shovel ready. Except for few exceptions, generally it takes anywhere between five to twenty years before projects approved at the CDMP process move forward for zoning or platting approvals. At the zoning phase, all projects that are not in the exception areas have to meet roadway concurrency, this process is inherently designed to include cumulative analysis, since staff monitor and include previously approved development order trips in this analysis. This makes sense because generally projects submitted for zoning approvals, move from paper to ground within a short period of time. In this study the cumulative impacts of the projects on the roadway system in the Biscayne Gardens area will be evaluated. Also, policies in the CDMP allow for projects to have de minimis impacts on the roadway system. De minimis policy considers project trips up to five percent of roadway capacity acceptable and insignificant. If the impact of the trips from the project exceeds five percent of the roadway capacity, then it is considered as a significant impact. If a roadway is operating below adopted LOS and the project trips impact is insignificant (less than five percent of the impacted roadway's capacity) then the impact is considered acceptable, alternatively if the roadway is operating below adopted LOS and the project trips impact is significant (more than five percent of the impacted roadway's capacity) then the impact is considered unacceptable requiring mitigations. All local governments have a de minimis policy in their code, only the percentage of significance might be different. The purpose of having a de minimis policy is to allow at least a minimum amount of development for each property, otherwise it is considered as a taking. In the past, lack of de minimis policy has been declared by the Courts as taking. Table 4 below shows the location, the proposed development program and the PM Peak Hour trips generated by each project. Figure 8 shows the location and the development program for each of the eleven projects. Figure 9 shows the trips generated by each project that have been submitted in the last five years. The total cumulative PM Peak Hour trips generated by all the projects is 1,299 trips.

Table 4 – Proposed Projects in the Biscayne Gardens Area

CDMP and Zoning Projects in Biscayne Gardens Area from 2018 to 2021				
Project number	Project Name	Location	Development Program	PM Peak Hour Trips
CDMP20190024	FRL Automotive	West of NW 2 Ave. and East of I-95 between NW 161 St. and NW 165 St.	160,824 sft. Retail	510

			TOTAL PM PEAK HOUR TRIPS	1299

Figure 8 – CDMP and Zoning Projects in the Biscayne Gardens Area

Figure 9 – CDMP and Zoning Projects Trip Generation

The site is located on Traffic Analysis Zone (TAZ) 175, the cardinal trip distribution for this TAZ was obtained from the MPO’s 2045 Cost Feasible Plan. The Miami-Dade TPO publishes trip distribution data for the years 2015 and 2045 for each TAZ within Miami-Dade County. The data used for trip distribution is the 2045 cardinal distribution. Using the cardinal distribution, the project traffic was distributed on the surrounding roadway network. Figure 10 below shows the trip distribution percentages that was applied on the trips generated by the projects and assigned to the surrounding roadway network.

Figure 10 – Trip Distribution for TAZ 175

Cardinal Direction	Percentage of Trips
North-Northeast	17 %
East-Northeast	14 %
East-Southeast	8 %
South-Southeast	13 %
South-Southwest	19 %
West-Southwest	11 %
West-Northwest	7 %
North-Northwest	11 %
Total	100 %

An evaluation of peak-period traffic concurrency conditions as of July 2021, which considers reserved trips from approved development not yet constructed, programmed roadway capacity improvements listed in the first three years of the County’s adopted 2021 Transportation Improvement Program (TIP), and the PM peak hour trips estimated to be generated by all the CDMP and Zoning projects that have been submitted in the last four years, determined that all roadways except NW 6 Avenue south of NW 159 Street have adequate capacity to handle the additional traffic impacts that would be generated by all the projects. Also, as mentioned earlier Biscayne Gardens area is inside the County’s Urban Infill Area (UIA), the County’s designated Transportation Concurrency Exception Area (TCEA), hence it is exempt from traffic concurrency. The “Cumulative Traffic Impact Analysis on the roadways in the study area” Table 5 below shows that all roadways analyzed are projected to operate at acceptable levels of service except for NW 6 Avenue south of NW 159 Street. Most of the roadways, except NW 6 Avenue in the study area are functioning at Levels of Service either ‘C’ or ‘D’ even after including impacts from the 11 projects that have been submitted in the last 4 years. The adopted LOS for NW 6 Avenue south of NW 159 Street is ‘E’ but the roadway is operating at LOS ‘F’.

Table 5 – Cumulative Traffic Impacts on the roadways in the study area

Source: Miami-Dade County Department of Regulatory and Economic Resources and Florida Department of Transportation

Notes: County adopted roadway level of service standard applicable to the roadway segment: D (90% capacity); E (100% capacity); E+20% (120% capacity for roadways serviced with mass transit having 20 minutes or less headways in the Urban Infill Area (UIA)); E+50% (150% capacity for locations with extraordinary transit service)

Figure 11–Projected Traffic Conditions with Cumulative Impacts from proposed projects

6. Transit

Miami-Dade County Transit provides many bus services within and in the vicinity of the Biscayne Gardens area. Golden Glades Terminal which is located Northwest of Biscayne Gardens area is a major transit terminal in Miami-Dade County, it has services connecting to major locations across the County. The Biscayne Garden area is currently served by Metrobus 105 Route E, Route 2, and Route 246. Metrobus 105 Route E provides service with 30-minute headways during the AM/PM peak periods. This route travels north-south along NW 6th Avenue/NW 165th Street, then links with the eastbound and westbound lanes of NW 167th Street/North Miami Beach Boulevard via NW 2nd Avenue, NW 168th Street and N. Miami Avenue. Metrobus Route 2 operates at 60-minute headways. It travels north-south along N. Miami Avenue and then east-west along NW 167th Street/North Miami Beach Boulevard. Metrobus Route 246 operates at 20-minute headways. This route travels from 167 St Metrobus terminal to Downtown Miami along NE 163 St, NW 22 Ave, and NW 12 Ave. The stops include Golden Glades Terminal Park & Ride, Allapattah Metrorail station, Santa Clara Metrorail station, Civic Center Metrorail station, Government Center Metrorail / Metromover station, and Downtown Metrobus terminal.

Miami-Dade County Transit provides six bus routes in the vicinity of the Biscayne Gardens neighborhood. The five bus routes are Metrobus Route 22, Route 77, Route 155, 95 Express Golden Glades, and Route 277. Metrobus Route 22 travels from the 167 St Metrobus terminal to the Coconut Grove Metrorail station along NE 163 St and NW / SW 22 Ave, traveling through Sunshine State Industrial Park. The stops include Golden Glades Terminal Park & Ride, Earlington Heights Metrorail station, and Coconut Grove Metrorail station. Metrobus Route 77 travels from NW 199 St/NW 7 Ave to Government Center Metrorail and Metromover station, along NW 7 Ave. The stops include Golden Glades Terminal Park & Ride, Edmonson Transit Village Metrobus terminal Park & Ride and Culmer Metrorail station. Metrobus Route 155 is a circulator through Biscayne Gardens neighborhood, it travels from Biscayne Gardens Residential Area to the Golden Glades Terminal Park & Ride along NW 7 Ave. 95 Express Golden Glades bus service only operates during peak hours connecting Golden Glades Park & Ride Lot, Civic Center, Veterans Hospital, Jackson Memorial Hospital, Norwood, Earlington Heights Metrorail station, Downtown Miami, and Brickell. Metrobus Route 277 travels from Golden Glades Terminal Park & Ride to Government Center Metrorail / Metromover station along NW 7 Ave with a stop at Edmonson Transit Village Metrobus terminal Park & Ride.

The SMART Plan initiated by Miami-Dade Transportation Planning Organization (TPO) proposes to expand transit options in Miami-Dade County along six (6) critical corridors, of which one corridor called as Northeast Corridor would serve the North Miami area. The Northeast Corridor is about 14.5 miles long, extending from Downtown Miami in the south to City of Aventura in the north. This corridor approximately follows US 1/ North Federal Highway/ Biscayne Boulevard on its south end, and West Dixie Highway on its north end. Of the six SMART Plan corridors, this is the only corridor to possess an active heavy-rail line. The Miami Central Station development, currently under construction in Downtown Miami, will eventually serve as the terminus station for multiple new passenger rail services along this corridor. The TPO has been working with SFRTA and the Florida Department of Transportation (FDOT) to conduct the necessary planning efforts related to this service. Figures 12 below show the six Smart Plan Corridors and Figure 13 below shows the Northeast Corridor alignment with probable stations. The Northeast corridor would be a

major transit project serving the Biscayne Gardens community in the future. The Northeast corridor would have a station at Sunny Isles Boulevard which would be the closest station to serve the Biscayne Gardens area.

Figure 12—SMART Plan Corridors

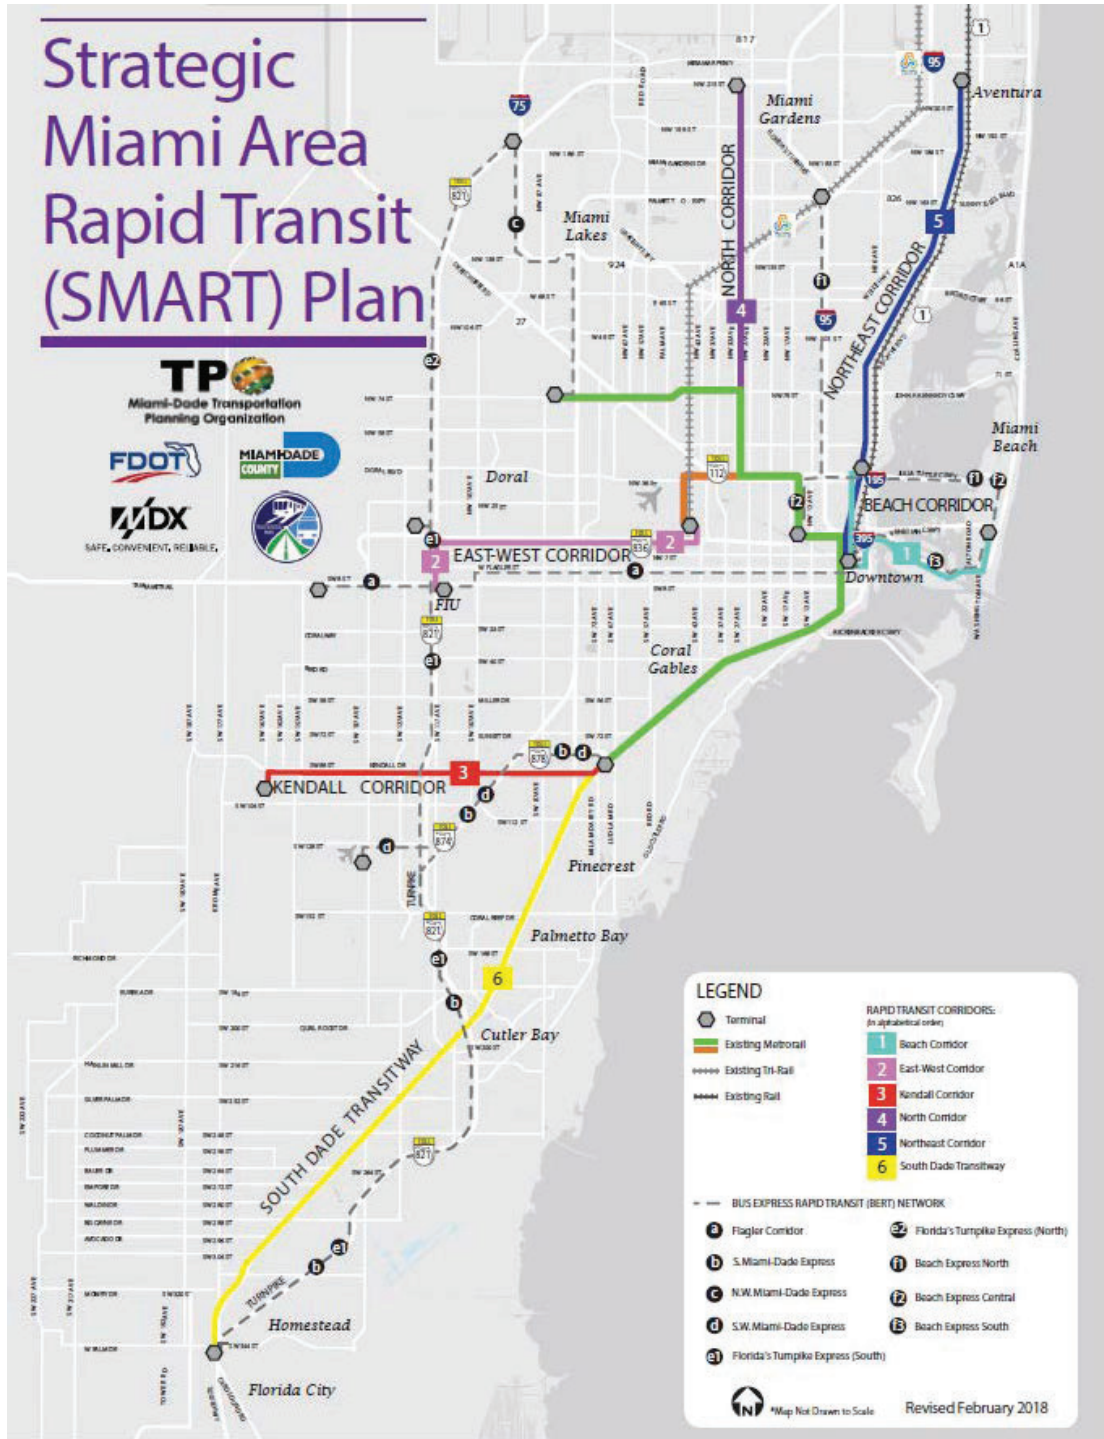

Figure 13–Northeast SMART Plan Corridor

7. Public Involvement

This study was initiated by the District Commissioner Mr. Jean Monestime per Resolution# R-668-21 due a spurt in development activity in this neighborhood in the last few years. Staff from both the Department of Regulatory and Economic Resources and the Department of Transportation and Public Works (DTPW) met virtually and in-person with the representatives of the neighborhood multiple times to understand the concerns of the residents. Also, staff conducted a site visit with the neighborhood representatives on September 3rd, 2021, during the evening peak hours and surveyed the traffic situation on the major roads within the neighborhood. During the site visit staff witnessed that the traffic flow on almost all the roadways were moving smoothly except for the intersection at NW 2 Avenue south of NW 167 Street, the northbound traffic was backed up at the intersection extending three blocks south past NW 165 Street. Residents conveyed that sometimes the backup traffic goes even further south of NW 164 Street. Residents have also sent in pictures and videos of the back up traffic in this intersection, some of the pictures are attached in Appendix F. During the many interactions that staff had with the residents and their representatives, the following issues have been highlighted,

1. The traffic congestion at the intersection of NW 2 Avenue and NW 167 Street is intense during the morning and evening peak hours. The traffic is getting backed up on NW 2 Avenue and extends all the way to the south of NW 164 Street. Majority of the traffic flow in this intersection is northbound and westbound and a small percentage flows towards east.
2. NW 159 Street between NW 2nd Avenue and NW 6th Avenue is congested. The residents are requesting an additional central lane for left turn movements.
3. Residents are concerned about cut through traffic in the Biscayne Gardens neighborhood creating safety issues affecting their quality of life. They feel that traffic calming devices need to be installed on the roadways in the area between NW/NE 159 Street to NW/NE 166 Street and between NW 6 Avenue to NE 2 Avenue.
4. To understand the traffic conditions better, residents have requested for the latest traffic counts to be collected during the peak hours on NW 6 Avenue, NW 2 Avenue, North Miami Avenue, and NE 2 Avenue between NW/NE 159 Street and NW/NE 167 Street.
5. NW 6 Avenue is a two-lane road functioning at or near capacity, the buses on this route stopping for passengers are blocking the traffic flow causing congestion. The existing bus stops on NW 6 Avenue need bus bays so that the buses do not impede the free flow of north and south traffic while stopping to pick up or drop off passengers.
6. Provision of more sidewalks in Biscayne Gardens would create safer streets for pedestrians, but since this neighborhood is in a low-lying area flooding is common resulting in sidewalks not being usable. Hence the residents need more sidewalks combined with mitigation of the flooding in the area.

Also, residents in this area have attended many public hearings of the projects that are being processed for CDMP and Zoning approvals and have expressed their opinions. Representatives from these projects have met with residents separately to understand their concerns and have coordinated on mitigations for project impacts. Residents have objected to some of the projects with high intensity and they have supported some projects with lesser intensities.

8. Summary of Findings

Biscayne Gardens neighborhood is inside the Urban Infill area of the County. The CDMP land use policies require the County to give priority to infill development on vacant sites, and the redevelopment of substandard or underdeveloped urban areas contiguous to existing urban development. Also, CDMP policies encourage moderate to high intensity activity centers, mass transit supportive development, and mixed-use projects in Urban Infill areas to promote energy conservation. The objective of Urban Infill land use policies is to encourage high intensive multiuse developments, that would support transit, pedestrianism, and biking. When an area is planned for dense high intensive developments, just relying on roadways for mobility is not enough, the transit mode should be a major player. The levels of service for roadways in this area have deliberately been kept low with higher thresholds to encourage high intensity developments. Transit should be the key mode for moving people and goods in areas having high intensive developments. Currently there are ten bus routes serving within and in the vicinity of this area. The completion of the Northeast SMART plan corridor with good transit, bike, and pedestrian connections to the nearby station from the Biscayne Gardens area would be a major relief in mitigating the mobility requirements of this area.

The intersection of NW 2 Avenue and NW 167 Street is a major concern for this neighborhood since there's considerable delay for the northbound traffic. It has been observed that the northbound vehicles back up to NW 164 Street during the peak hours. As a mitigation for the Montebella project (located at the northeast corner of NW 159 Street and NW 6 Avenue), DTPW has requested for the extension of the northbound left turn storage area at this intersection to accommodate more northbound left turn vehicles providing relief for the existing stacking of vehicles. The Florida Department of Transportation (FDOT) is currently in the design phase of the 'Golden Glades Interchange Enhancement Project' (Project ID 428358-8-52-1). The project will effectuate to find solutions to relieve traffic congestion in the Golden Glades area, including the establishment of a new connector ramp from eastbound NW 167 Street/SR 826/Palmetto Expressway to northbound I-95 which would provide a major relief for delays in this intersection, providing for more green time for northbound and westbound movements. This new ramp connection between eastbound Palmetto and northbound I-95 would be included by amending the Transportation Improvement Program according to a press release on October 26, 2021, by Miami-Dade Transportation Planning Organization.

The existing traffic conditions analysis show that all the roadways in the Biscayne Gardens area are operating at acceptable levels of service. It must be noted that the adopted LOS for this area is low with higher thresholds since the County actively encourages high intensity developments for the Urban Infill areas. The cumulative analysis assessed the combined impacts of the eleven projects proposed in this area indicates that all the roadways would operate at acceptable LOS except for NW 6 Avenue south of NW 159 Street which would fail. Also, NW 159 Street east of NW 6 Avenue is nearing capacity due to the additional traffic created from the proposed projects located along this street. It should be noted that although these roadways are deficient, the Capital Improvement Element (CIE) of the CDMP states that "a proposed development located within the UIA will not be denied a concurrency approval for transportation facilities ... ". Therefore, it is recommended that DTPW further study this area for possible solutions.

Traffic flowing from the Biscayne Gardens area to the east rely on the heavily congested NW 2 Avenue. Traffic flows north on NW 2 Avenue and heads east on NW/NE 167 Street. To avoid this traffic flow pattern and provide relief to NW 2 Avenue, there is a need for more east-west continuous roadways which would

help traffic flow to the east without utilizing NW 2 Avenue. One roadway which is discontinuous is NW 161 Street, it extends from NW 6 Avenue to NW 2 Avenue then there is a break between NW 2 Avenue and Miami Avenue and then it extends east to NE 2 Avenue. Connecting this road east of NW 2 Avenue would enhance east-west traffic flow, thereby easing the traffic on NW 2 Avenue. Two projects namely 'The Terraces of Biscayne Gardens' and 'The Care Oasis' that are currently in the platting process will be responsible for providing this connection of NW 161 Street east of NW 2 Avenue. A road closure petition requesting that this road remain discontinuous was recently submitted however the request was denied by staff and the BCC.

Through the public coordination meetings, residents expressed concerns about the existing traffic conditions and the increase in accidents due to speeding and cut through traffic. It is important to point out that the capacity of local residential streets is 3,000 vehicles per day, approximately 300 vehicles in the peak hour. The Public Works Department has a set procedure for the installation of traffic calming measures at locations that meet certain requirements, such as high traffic volumes and speeding. Coordination with the Traffic Engineering Division of DTPW is suggested to further study this area in order to address the residents' concerns pertaining to speeding and safety requiring traffic calming solutions. Additionally, future zoning approvals that increase density or intensity of development in the area should be subject to a condition requiring the applicants to conduct, after the development is occupied, a study to identify needed traffic calming improvements and to commitment to constructing or causing the construction of such improvements if warranted and approved by DTPW, subject to any necessary agreement of affected residents.

In conclusion, the majority of the roadways in the Biscayne Gardens area are currently functioning at acceptable levels of service. The intersection at NW 2 Avenue and NW 167 Street is experiencing excessive backups and delays. The proposed improvement to extend the northbound left-turn storage lanes along NW 2 Avenue at NW 167 Street and connecting NW 161 Street to NW 2 Avenue would provide relief to NW 2 Avenue by helping reduce the traffic congestion. The cumulative analysis assessing the combined impacts of the proposed eleven projects has identified that NW 6 Avenue south of NW 159 Street would fail and NW 159 Street east of NW 6 Avenue would be nearing capacity. The study recommends Department of Transportation and Public Works (DTPW) to do further detailed evaluations in this area to find solutions for these two significantly impacted roadways. In order to address the residents' concerns and requests for traffic calming devices, it is necessary for DTPW to conduct an area wide traffic study and provide solutions if warranted. Biscayne Gardens is inside the Urban Infill area where the County actively encourages high intensity developments. Transit should be a major carrier of trips in dense areas, currently ten transit routes are operating in this area and the proposed completion of the Northeast SMART Plan corridor would assist in providing additional transit services helping meet the mobility needs of this area.

RESOLUTION NO. _____ R-668-21

RESOLUTION DIRECTING THE COUNTY MAYOR OR COUNTY MAYOR’S DESIGNEE TO CONDUCT AN ENGINEERING STUDY RELATED TO FLOODING IN THE AREA OF THE COUNTY GENERALLY KNOWN AS BISCAYNE GARDENS, TO IDENTIFY BOTH SHORT TERM AND LONG-TERM SOLUTIONS TO THE PROBLEMS THAT RESIDENTS MAY BE EXPERIENCING; DIRECTING THE COUNTY MAYOR OR COUNTY MAYOR’S DESIGNEE TO CONDUCT A TRAFFIC IMPACT STUDY WITH RESPECT TO PROPOSED OR POTENTIAL DEVELOPMENTS IN THE SAID AREA; AND REQUIRING REPORTS

WHEREAS, at this Board’s Comprehensive Development Master Plan (“CDMP”) meeting on Thursday, December 17, 2020, public comments were received from residents in relation to applications to amend the CDMP for three properties that lie in close proximity to Northwest 2nd Avenue and within the area generally known as Biscayne Gardens (“Biscayne Gardens”); and

WHEREAS, many of the residents who spoke expressed concerns regarding flooding in Biscayne Gardens; and

WHEREAS, many of the residents who spoke also expressed concerns regarding the negative impact to traffic that could result from any proposed or potential developments in Biscayne Gardens; and

WHEREAS, mitigating flooding risks and managing traffic congestion are of the utmost importance to this Board; and

WHEREAS, section 1.01(A)(1) of the Home Rule Charter vests this Board with the power to provide and regulate arterial, toll, and other roads, bridges, tunnels, and related facilities and develop and enforce master plans for the control of traffic and parking; and

WHEREAS, providing this Board with studies on flooding and the negative impact to traffic that could potentially result from new developments in Biscayne Gardens would help inform the conversation of how to better address the flooding and traffic congestion concerns in the said area,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that this Board:

Section 1. Directs the County Mayor or County Mayor’s designee to conduct an engineering study related to flooding in the area of the County generally known as Biscayne Gardens, and more specifically, within the area bordered to the north by Northwest 167th Street; to the east by North Miami Avenue; to the south by Northwest 158th Street (east of Northwest 2nd Avenue) and Northwest 157th Street (west of Northwest 2nd Avenue); and to the west by Northwest 6th Avenue (the “study area”), to identify both short term and long-term solutions to the problems that residents may be experiencing.

Section 2. Directs the County Mayor or County Mayor’s designee to conduct a traffic impact study with respect to any proposed or potential developments in the study area.

Section 3. Directs the County Mayor or County Mayor’s designee to prepare reports regarding the engineering and traffic impact studies referenced in sections 1 and 2 above. The County Mayor or County Mayor’s designee shall place the completed reports on an agenda of the Board pursuant to Ordinance No. 14-65 within 90 days of the effective date of this resolution.

The Prime Sponsor of the foregoing resolution is Commissioner Jean Monestime. It was offered by Commissioner **Rebeca Sosa**, who moved its adoption. The motion was seconded by Commissioner **Joe A. Martinez** and upon being put to a vote, the vote was as follows:

	Jose "Pepe" Diaz, Chairman	aye	
	Oliver G. Gilbert, III, Vice-Chairman	aye	
Sen. René García	aye	Keon Hardemon	aye
Sally A. Heyman	absent	Danielle Cohen Higgins	aye
Eileen Higgins	aye	Joe A. Martinez	aye
Kionne L. McGhee	absent	Jean Monestime	aye
Raquel A. Regalado	aye	Rebeca Sosa	aye
Sen. Javier D. Souto	aye		

The Chairperson thereupon declared this resolution duly passed and adopted this 8th day of July, 2021. This resolution shall become effective upon the earlier of (1) 10 days after the date of its adoption unless vetoed by the County Mayor, and if vetoed, shall become effective only upon an override by this Board, or (2) approval by the County Mayor of this resolution and the filing of this approval with the Clerk of the Board.

MIAMI-DADE COUNTY, FLORIDA

INTRODUCTION

This memorandum describes the computerized process developed and the assumptions used to produce the directional trip distribution from each Traffic Analysis Zone (TAZ) and to present the results in the attached Appendices. The computerized process was designed to provide a summary of the daily vehicle trips split into eight cardinal directions for each of the 1,506 internal Southeast Regional Planning Model (SERPM) TAZs representing the Miami-Dade urban area. The summary generated by the process provides an estimate of travel in each cardinal direction for each individual zone using the sketch planning technique described below.

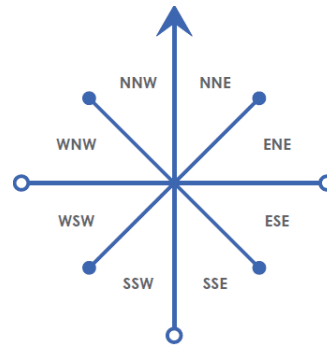

DIRECTIONAL TRIP DISTRIBUTION PROCESS

The directional trip distribution process was structured as a stand-alone, post-process utility for the Southeast Regional Planning Model (SERPM). The current SERPM v8.0 was developed within the Florida Standard Urban Transportation Model Structure (FSUTMS), using Cube Voyager and the Coordinated Travel – Regional Activity Based Modeling Platform (CT-RAMP) software. The directional trip distribution process is based on a FORTRAN program utility once developed to post-process previous SERPM versions within FSUTMS/Cube Voyager, prior to the incorporation of CT-RAMP, to summarize vehicle trip cardinal distributions. A new process has now been developed as a SERPM v8.0 post-process comprised of just Cube Voyager scripts with the use of an Access database for converting / summarizing some of the CT-RAMP outputs.

There are several inputs required by the cardinal based directional trip distribution process which fall into three main categories including the number of SERPM internal transportation analysis zones (TAZs); the “X-Y” geographic coordinates file, which describes the location of each TAZ / zonal centroid; and a summarized matrix of the daily vehicle trips including those created from the CT-RAMP outputs in its portion of the model chain and other trips external to the CT-RAMP process.

The directional trip distribution process is designed to identify and summarize the trip direction of travel from each internal TAZ to all other possible destination TAZs. Trips associated with each of the TAZ pairs are assigned to one of eight cardinal directions. Each cardinal direction consists of a 45-degree wedge of the compass as formed by the intersection of eight major compass bearings and are defined as follows:

- NNE - between North and Northeast
- ENE - between East and Northeast
- ESE - between East and Southeast
- SSE - between South and Southeast
- SSW - between South and Southwest
- WSW - between West and Southwest
- WNW - between West and Northwest
- NNW - between North and Northwest

The cardinal direction of each TAZ pair (trip interchange) is defined as a simple crow-flies orientation based upon the differences in X and Y coordinates for each TAZ of the trip interchange using the origin TAZ as the starting reference point. Once the direction of each trip interchange is determined for a given TAZ, the daily vehicle trips of that trip interchange as summarized from the SERPM trip matrixes are then assigned to one of the eight cardinal directions listed above. Next the process then summarizes the total number of vehicle trips by cardinal direction and then calculates the percentage of vehicle trips by direction of the total vehicle trips leaving from each origin TAZ. Intrazonal trips, trips assigned to stay within the same TAZ, are not factored into the percentage calculation for this analysis.

It should be noted, as stated above, that the directions of travel from a given TAZ to all other TAZs are determined only by the orientation of their centroid locations. This process does not consider the actual travel path to determine trip directions between TAZs. This important aspect of the program should be considered when using the output summary, specifically when analyzing an explicit TAZ trip interchange pair and the intuitive direction of travel immediately leaving a TAZ of origin. It should also be noted that the process is only used to calculate the direction of trips originating from a given zone.

PROCESS APPLICATION

A production run was made using the cardinal directional trip process for the Year 2015 validated model network and 2015 summarized total daily vehicle trip table. The output for the directional trip distribution for the Year 2015 validation simulation is provided in **Appendix A**. The directional trip distribution process can also be used for any of the future year simulation runs for analyzing the effects of changes in land use and transportation systems from that of the Base Year validation. **Appendix B** contains the cardinal distribution report for the 2045 Cost Feasible Plan network.

2015 BASE YEAR SERPM V8.0 VALIDATION NETWORK

Golden Glades Interchange Enhancement Project Documents

Golden Glades Interchange Enhancement Project (GGI) Timeline

COST/CONSTRUCTION SCHEDULE

Estimated cost: \$600 million. Construction is expected to begin in September 2021 and last about five years.

AFFECTED MUNICIPALITIES

- City of Miami Gardens
- City of North Miami
- City of North Miami Beach

POTENTIAL IMPACTS

Work will be done in phases to reduce the effects of construction to the community. Daytime and nighttime work is anticipated. Traffic control phasing and lane closure information will be developed throughout the design process. Lane closure information will be posted on the Department's website.

PUBLIC PARTICIPATION

FDOT has embarked on a community outreach process designed to ensure the public has an opportunity to be informed about the projects and is able to provide feedback. The process will actively encourage and facilitate the involvement of the general public, citizen groups, interest groups, elected and appointed officials, environmental resource agencies and other stakeholders. Opportunities to comment include communication with project staff and attending public meetings.

For more information on the Golden Glades Interchange Enhancement Project, please contact Community Outreach Specialist Sandra Bello by telephone at Office: (305) 640-7373/Cell: (305) 510-0827 or via e-mail at Sandra.Bello@dot.state.fl.us. You may also contact Project Manager Fabiana Gonzalez-Batista, P.E. at Fabiana.Gonzalez@dot.state.fl.us. Additional information on the project may be found at: www.fdotmiamidade.com.

FACT SHEET

FLORIDA DEPARTMENT OF TRANSPORTATION
Golden Glades Interchange Enhancement Project
District Six, Project Identification Numbers:
428358-1-52-01, 428358-4-52-01, 428358-5-52-01 & 428358-8-52-01
Florida's Turnpike Project Identification Numbers:
437053-1-52-01, 437053-2-52-01, 437053-3-52-01, 437053-4-52-01 & 437053-5-52-01

PROJECT AREA

The project area consists of the following five major facilities: State Road (SR) 9A/I-95, SR 826/Palmetto Expressway, Florida's Turnpike, SR 9 and SR 7/US 441/NW 7 Avenue.

OVERVIEW

The Florida Department of Transportation (FDOT) District Six and Florida's Turnpike Enterprise are developing the design of several roadway projects within the Golden Glades Interchange (GGI) in Miami-Dade County.

The proposed enhancements to the GGI Interchange include several miles of roadway and ramps. The overall project will help increase the regional connectivity to this major interchange.

WHY THE PROJECT IS NEEDED

The improvements represent a master plan to enhance safety and mobility within the GGI. The interchange currently experiences heavy congestion, carrying more than 400,000 vehicles each day. By the year 2040, the traffic within the interchange is expected to increase by about 50 percent. Congestion will only get worse if no improvements are made.

PROJECT BENEFITS INCLUDE:

Enhanced connectivity between SR 9A/I-95, SR 826, Florida's Turnpike, SR 9 and SR 7/US 441/NW 7 Avenue

Enhanced multimodal use for both transit and freight

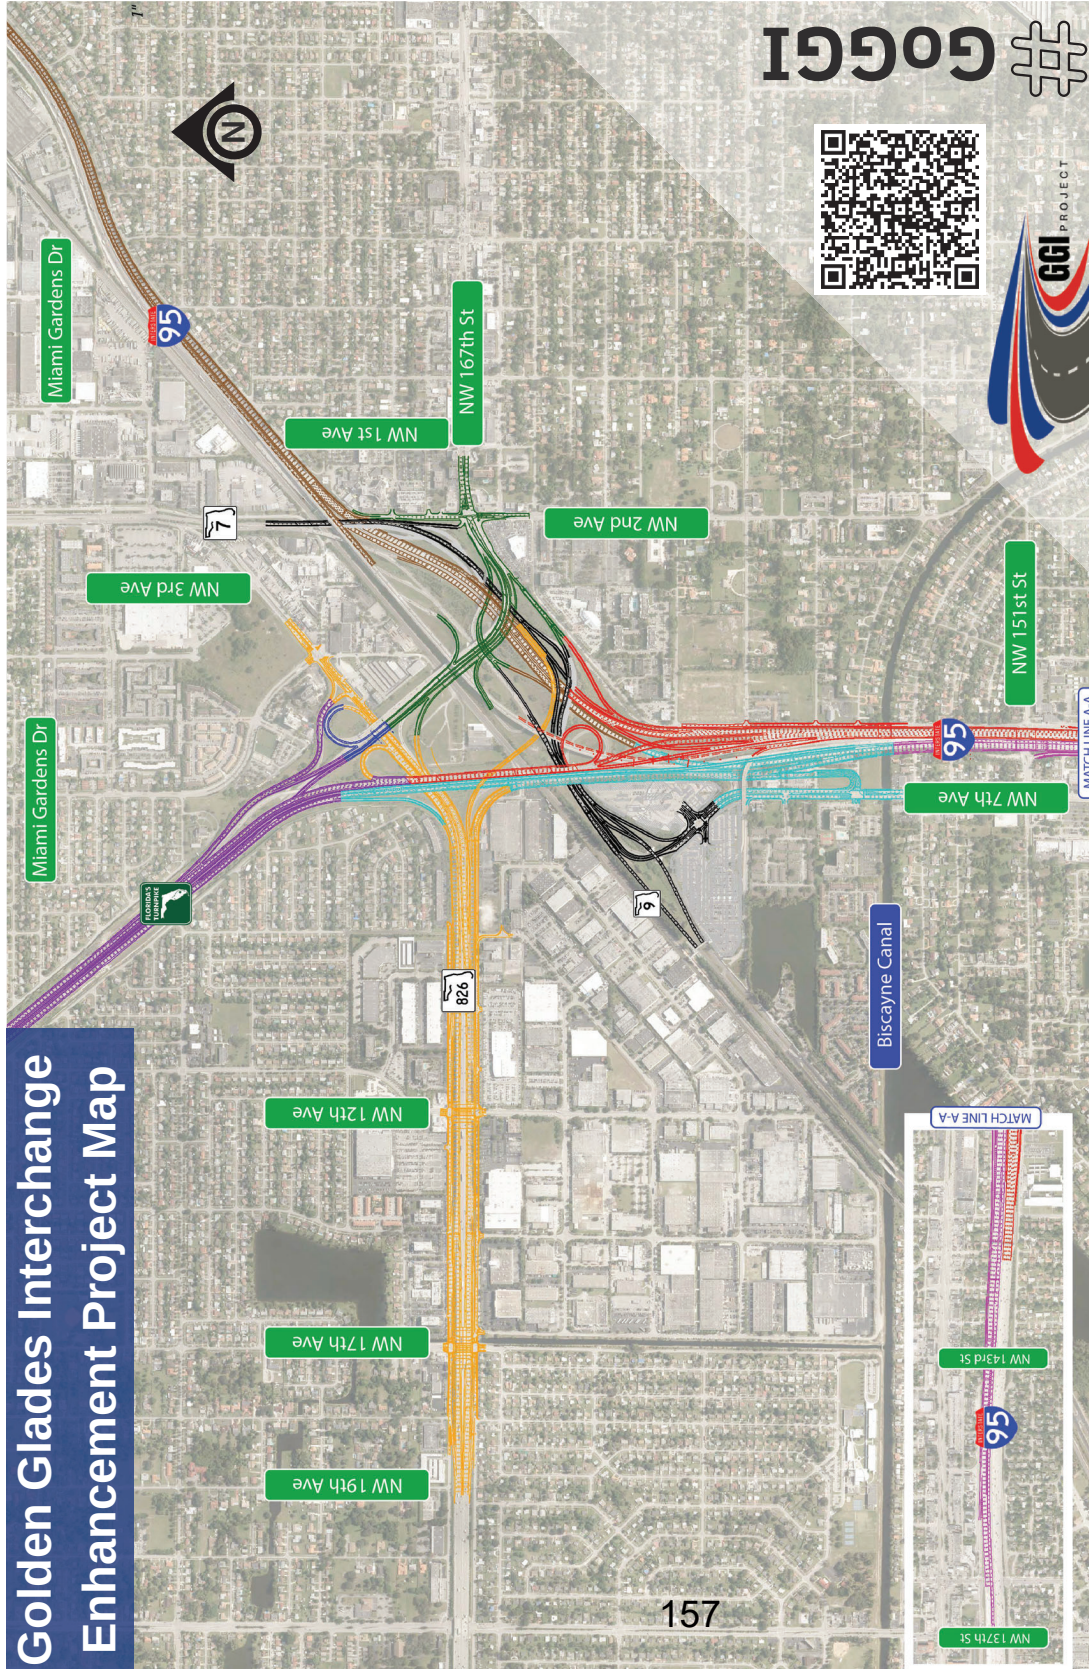

Enhanced emergency access and incident response times

A direct connection ramp from eastbound SR 826/Palmetto Expressway to northbound I-95

Golden Glades Interchange Enhancement Project Map

428358-1

- Rebuilding the Palmetto Expressway between NW 17 Avenue and the GGI to accommodate a future I-95 Express Lanes connection
- Providing a direct connection flyover ramp from eastbound Palmetto Expressway to northbound I-95
- Providing protected U-Turns underneath the Palmetto Expressway bridges located at NW 17 Avenue and NW 12 Avenue
- Relocating NW 12 Avenue entrance ramp to I-95

428358-4

- Rebuilding and realigning various ramps throughout the interchange to meet current standards

428358-5

- Rebuilding and widening northbound and southbound I-95 from the GGI to Miami Gardens Drive to accommodate future express lanes

428358-8

- Rebuilding Florida's Turnpike Connector at the intersection of NW 2 Avenue and NW 167 Street

437053-5

- Constructing new express lanes along the Turnpike's median to provide a direct connection to the existing northbound and southbound I-95 Express Lanes
- Rebuilding ramp connections to meet current standards

437053-4

- Rebuilding and widening I-95 to provide a direct connection from northbound I-95 Express Lanes to Florida's Turnpike

437053-3

- Widening southbound I-95 from Biscayne Canal to NW 135 Street to accommodate an additional lane for the southbound Turnpike Connector
- Rebuilding the pedestrian bridge at NW 147 Street to enhance pedestrian safety for Thomas Jefferson Middle School, Biscayne Gardens Elementary and the surrounding communities
- Rebuilding toll gantry

437053-2

- Rebuilding the westbound Palmetto Expressway bridge and entrance ramp to enhance access from Florida's Turnpike

437053-1

- Widening the southbound lanes of the Turnpike Connector to accommodate two lanes from Florida's Turnpike and three lanes from eastbound Palmetto Expressway to southbound I-95
- Providing a direct express lane connection from Florida's Turnpike to the southbound I-95 Express Lanes
- Relocating the SR 7 exit ramp of southbound I-95

Subject: Miami-Dade TPO Welcomes Announcement Regarding the Golden Glades Interchange (GGI) Reconstruction Project
Date: Tuesday, October 26, 2021 4:01:39 PM

FOR IMMEDIATE RELEASE

MEDIA CONTACT:
ELIZABETH ROCKWELL
305-375-1881
elizabeth.rockwell@mdtpo.org

**MIAMI-DADE TRANSPORTATION PLANNING ORGANIZATION (TPO)
WELCOMES ANNOUNCEMENT REGARDING THE GOLDEN GLADES
INTERCHANGE (GGI) RECONSTRUCTION PROJECT**

(MIAMI-DADE COUNTY, October 26, 2021) – Miami-Dade TPO Governing Board Chairman, Oliver G. Gilbert III, and Miami-Dade TPO Governing Board Member, Jean Monestime, welcome the announcement from the Florida Department of Transportation District Six (FDOT D-6) for the anticipated reprogramming and funding of the GGI Reconstruction Project. TPO Chairman Gilbert and Board Member Monestime have successfully advocated for the much-needed safety, congestion reduction, and traffic operational projects in the GGI to improve Miami-Dade County residents' access and connectivity to jobs, education, and regional travel.

The GGI processes one of the highest volumes of traffic in the region, and both Chairman Gilbert and Board Member Monestime have prioritized the request for funding to advance the multiple GGI improvements needed in our county, including capacity improvements for future growth, enhanced connections between I-95, the Florida Turnpike, NW 167th Street Connector, as well as establishing a new connection between eastbound SR 826/Palmetto Expressway to northbound I-95. Another critical improvement advocated by Chairman Gilbert and Board Member Monestime is the reconstruction of SR 7 and SR 9 arterial roads to improve traffic operations, safety, and enhance connections to I-95 and the new Golden Glades Multimodal Transportation Facility (GGMTF).

The Miami-Dade TPO looks forward to working with FDOT D-6 to amend the Miami-Dade County's Transportation Improvement Program (TIP) to add this project in the coming months.
