RESOLUTION NO. _____

RESOLUTION URGING THE FLORIDA LEGISLATURE TO
PROVIDE INCREASED FUNDING FOR STORMWATER
PROJECTS TO ADDRESS FLOODING

WHEREAS, stormwater infrastructure is infrastructure designed to drain water from impervious surfaces after rainfall and mitigate against flooding, while also mitigating against pollution and promoting the seepage of water underground to recharge our drinking water supply; and

WHEREAS, the inadequate management of stormwater could have significant adverse impacts on residents and local businesses due to the financial, economic, and quality-of-life disruptions caused by flooding; and

WHEREAS, recent severe rainfall and flooding events that caused significant damage to private property, including but not limited to the multiple flooding events that took place in South Florida this year, have underscored the critical role that stormwater infrastructure plays not just in Miami-Dade County, but throughout the State of Florida; and

WHEREAS, it is therefore imperative that local governments continue to invest in stormwater infrastructure by maintaining or upgrading current infrastructure, as appropriate; and

WHEREAS, by promoting quality of life and helping protect residents' and businesses' financial and economic investments, better functioning stormwater management systems could benefit local communities and the State of Florida at large; and

WHEREAS, through appropriations and grant programs, the Florida Legislature has in the past provided funding to support stormwater projects to address flooding; and

WHEREAS, due to the heightened risk that flooding poses for our community, this Board wishes to urge the Florida Legislature to provide increased funding for stormwater projects to address flooding,
