MEMORANDUM

Agenda Item No. 11(A)(3)

TO:

Honorable Chairwoman Audrey M. Edmonson

and Members, Board of County Commissioners

DATE:

June 4, 2019

FROM:

Abigail Price-Williams

County Attorney

SUBJECT:

Resolution directing the County

Mayor to assess the feasibility of developing floating solar power plants on water bodies in Miami-Dade County, and to provide a

report

Resolution No. R-611-19

The accompanying resolution was prepared and placed on the agenda at the request of Prime Sponsor Commissioner Daniella Levine Cava.

Abigail Price-Williams
County Attorney

RESOLUTION NO. R-611-19

RESOLUTION DIRECTING THE COUNTY MAYOR OR DESIGNEE TO ASSESS THE FEASIBILITY OF DEVELOPING FLOATING SOLAR POWER PLANTS ON WATER BODIES IN MIAMI-DADE COUNTY, AND TO PROVIDE A REPORT

WHEREAS, Miami-Dade County has a history of supporting policies to improve energy efficiency and reduce carbon dioxide (CO2) emissions; and

WHEREAS, for example, on December 14, 1993, this Board unanimously approved a plan entitled "A Long Term CO2 Emissions Reduction Plan for Miami-Dade County," which calls for various goals to reduce CO2 emissions countywide; and

WHEREAS, pursuant to Resolution No. R-1431-08, the County became a signatory to the National Association of Counties' (NaCo) "Cool Counties Climate Stabilization Declaration," and pledged to reduce countywide CO2 emissions by 80 percent by 2050; and

WHEREAS, solar energy is the most viable renewable energy source available within Miami-Dade County; and

WHEREAS, maximizing the opportunities for solar power generation through rooftop and utility scale solar will be critical to Miami-Dade County's energy future; and

WHEREAS, floating solar power plants present a unique opportunity in Miami-Dade County, where many artificially created lakes may provide an environmentally acceptable place to offer utility scale solar solutions; and

WHEREAS, floating solar power plants are becoming increasingly popular around the world because their unique design may address multiple efficiency and urban planning issues, including protecting open space and farmland; and

WHEREAS, floating power plant systems can shade the water and reduce evaporation by up to 70 percent, meaning that a single three-acre storage pond covered with solar panels could save over four million gallons of water each year; and

WHEREAS, because the solar power plants are situated on water instead of land, the cooler air at the surface also helps to minimize the risk of solar cell performance atrophy, which is often related to long-term exposure to warmer temperatures, meaning that the solar equipment itself may enjoy a longer life; and

WHEREAS, in recent years, large-scale floating solar power plants have been brought on line and opened in Turkey and China; and

WHEREAS, floating solar power plants are also currently being installed at the utility-scale in the United Kingdom, China, Japan, Korea, and Thailand, and tested in the Netherlands, Taiwan, and Singapore, among other countries; and

WHEREAS, according to one recent report, the global floating power plant market is expected to grow from an estimated \$889.6 million in 2017 to \$1.44 billion by 2022; and

WHEREAS, a 2019 report by the US Department of Energy National Renewable Energy Laboratory, entitled "Floating PV: Assessing the Technical Potential of Photovoltaic Systems on Man-Made Water Bodies in the Continental U.S.," identified significant potential for floating solar power plants within the United States; and

WHEREAS, floating solar power plants present an emerging renewable energy opportunity for Miami-Dade County; and

WHEREAS, accordingly, this Board wishes for an assessment to be undertaken as to the feasibility of developing floating solar power plants here,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that this Board directs the County Mayor or designee to assess the feasibility of developing floating solar power plants on water bodies in Miami-Dade County, and to provide a report. Such report shall address, at a minimum, the potential for floating solar power plants to be placed on artificially created water bodies, such as rock mine lakes and other disconnected water bodies throughout Miami-Dade County, as well as explore opportunities to streamline regulatory reviews, and foster private sector competition to facilitate the deployment of floating solar power plants here. The report shall be provided to this Board within 180 days of the effective date of this resolution, and shall be placed on an agenda of the Board pursuant to Ordinance No. 14-65.

The Prime Sponsor of the foregoing resolution is Commissioner Daniella Levine Cava. It was offered by Commissioner

José "Pepe" Diaz

, who moved its adoption. The motion was seconded by Commissioner

Rebeca Sosa

and upon being put to a vote, the vote was as follows:

Audrey N	A. Edmonson, (Chairwoman	aye	
Rebeca	a Sosa, Vice Ch	airwoman	aye	
Esteban L. Bovo, Jr.	aye	Daniella Levine C	ava aye

Joe A. Martinez	aye	Jean Monestime	aye	
Dennis C. Moss	aye	Sen. Javier D. Sou	ito abso	ent
Xavier L. Suarez	aye			

Agenda Item No. 11(A)(3) Page No. 4

The Chairperson thereupon declared the resolution duly passed and adopted this 4th day of June, 2019. This resolution shall become effective upon the earlier of (1) 10 days after the date of its adoption unless vetoed by the County Mayor, and if vetoed, shall become effective only upon an override by this Board, or (2) approval by the County Mayor of this Resolution and the filing of this approval with the Clerk of the Board.

MIAMI-DADE COUNTY, FLORIDA BY ITS BOARD OF COUNTY COMMISSIONERS

HARVEY RUVIN, CLERK
