From: Carlos A. Gimenez
Mayor

Resolution No. R-411-20

Subject: Resolution Approving the Certification of Financial Responsibility Pursuant to Rule 62-528.435(9) of the Florida Administrative Code for Deep Injection and Dual Zone Monitoring Wells at the County's Future South Miami Heights Water Treatment Plant

RECOMMENDATION

It is recommended that the Board of County Commissioners (Board) approve the attached resolution that approves the Certification of Financial Responsibility (attached hereto as Exhibit A) pursuant to Rule 62-528.435(9) of the Florida Administrative Code in order to comply with the requirements necessary for a Florida Department of Environmental Protection (FDEP) Class I Operational Permit.

This Certification of Financial Responsibility confirms that the County has the financial resources necessary to close, plug and abandon one existing Class I underground injection well and one existing related dual zone monitoring well located at the South Miami Heights (SMH) Water Treatment Plant located at 11800 S.W. 208th Street, Miami-Dade County, Florida. This certification is a requirement of FDEP's permit application and approval process for a Class I Injection Well. The FDEP permit will allow the Miami-Dade Water and Sewer Department (WASD) to operate the deep injection well (DIW) system in the future. The related dual zone monitoring well is an auxiliary requirement.

SCOPE

This item is of countywide significance as part of the County's water supply planning. The injection well and monitoring well are located in District 9, which is represented by Commissioner Dennis C. Moss.

FISCAL IMPACT/FUNDING SOURCE

There is no fiscal impact related to Board approval of this Certification of Financial Responsibility. There will only be a fiscal impact if a well is plugged and abandoned. In the event any of the wells need to be plugged and abandoned, the estimated cost for each well is itemized on Exhibit B. If necessary, the funding source for plugging and abandoning a well will be sewer operations and maintenance revenue.

TRACK RECORD/MONITOR

WASD's Assistant Director of Planning and Regulatory Compliance, Josenrique Cueto, P.E., will oversee WASD's process of maintaining the Certification of Financial Responsibility to ensure compliance with the requirements of the FDEP Class I Operational Permit.

BACKGROUND

The SMH Water Treatment Plant is the proposed location of the future South Miami Heights Reverse Osmosis Water Treatment Plant. Construction of the deep injection well and dual zone monitoring well

were completed in 2017 as part of a study to obtain geologic and hydrogeologic data to evaluate the feasibility and potential for the possible use of the Floridan Aquifer water supply source at SMH. In the future, the DIW system will be utilized for the concentrate disposal of the future Reverse Osmosis Water Treatment Plant process. Construction of the DIW system was permitted under FDEP Class V Exploratory Well Permit 0324479-001-UC/5X, which expired on July 24, 2019. In order to operate the DIW system in the future, WASD must obtain a FDEP Class I Operational Permit.

In accordance with Rule 62-528.435(9) of the Florida Administrative Code, in order to obtain the FDEP Class I Operational Permit, the County must demonstrate it has the financial responsibility and resources necessary to close, plug, and abandon the underground injection operations. The Certification of Financial Responsibility confirms the County's ability to comply with Rule 62-528.435(9) of the Florida Administrative Code.

CERTIFICATION OF FINANCIAL RESPONSIBILITY

The County of Miami-Dade, a unit of local government of the State of Florida, hereby certifies that it has unconditionally obligated itself to have the financial resources necessary to close, plug, and abandon its Class I underground injection well(s) and related monitoring wells, as required by Chapter 62-528, Florida Administrative Code. It is further understood that the cost estimate to conduct plugging and abandonment, established on June 26, 2019, shall be updated (30) months after the date of permit issuance and this obligation shall incorporate accumulated inflation costs. An increase exceeding 10 percent compared with the amount stated below shall require submission of an updated certification form.
