RESOLUTION NO. _____ R-777-24

RESOLUTION DECLARING NOVEMBER 11, 2024, THROUGH NOVEMBER 15, 2024, AND THE SECOND FULL WEEK OF NOVEMBER EACH YEAR THEREAFTER, AS PINE ROCKLANDS CONSERVATION WEEK; AND DIRECTING THE COUNTY MAYOR OR COUNTY MAYOR’S DESIGNEE TO CONDUCT PUBLIC AWARENESS AND EDUCATION CAMPAIGNS REGARDING THE IMPORTANCE OF MIAMI-DADE COUNTY’S PINE ROCKLANDS

WHEREAS, pine rocklands are a biodiverse and globally critically imperiled type of forest found only in South Florida and the Caribbean, and indeed less than two percent of this type of forest is found outside of Everglades National Park; and

WHEREAS, pine rocklands exhibit a unique and diverse plant community of more than 450 types of native plants, and more than 10 percent of the plant species that are found there are endemic, meaning that they are found nowhere else in the world; and

WHEREAS, pine rocklands support more than 20 federally protected, imperiled species, including the Miami tiger beetle, which is found nowhere else on Earth, and the Florida bonneted bat, which is the rarest bat in the United States; and

WHEREAS, biologists also recently discovered the pine rockland trapdoor spider; and

WHEREAS, protecting Miami-Dade County’s pine rocklands could help prevent the extinction of dozens of endangered and threatened species found only in Florida; and

WHEREAS, Miami-Dade County’s Department of Regulatory and Economic Resources, Division of Environmental Resources Management (“DERM”) implements the County’s Environmentally Endangered Lands (“EEL”) Program, which manages more than 84 natural area preserves covering more than 28,000 acres of various native plant communities, including over 1,630 acres of pine rocklands; and

WHEREAS, there are, in addition, still over 340 acres of pine rockland habitat on the EEL Program Acquisition List, meaning these sites have been identified for potential purchase by and inclusion in the EEL Program; and

WHEREAS, forested areas reduce the urban heat-island effect, which is caused by dense concentrations of pavement and buildings that absorb and retain heat; and

WHEREAS, protecting and expanding pine rockland forests could help Miami-Dade County counteract the urban heat-island effect by decreasing energy costs, air pollution, and heat-related illness and death; and

WHEREAS, pine rocklands also offer residents and visitors convenient opportunities for rest, reflection, and recreation because they are interwoven into Miami-Dade County's communities; and

WHEREAS, because the protection, conservation, and preservation of pine rocklands will redound to the overall benefit of Miami-Dade County's residents and visitors alike, this Board wishes to declare a Pine Rocklands Conservation Week and raise public awareness and education regarding the importance of Miami-Dade County's pine rocklands,
