Subject: Action Item: ANNOUNCING NEW ADAP FORMULARY DRUG - JULUCA® - Available now
Importance: High

Good Afternoon,

We are pleased to announce the addition of Juluca® to the Ryan White Part B ADAP formulary. Starting today, county pharmacy staff are now able to order Juluca® through the central pharmacy's PFS system, and ADAP staff will be able to authorize prescriptions for Juluca® through the ADAP Provide system. ADAP clients with insurance coverage are also able to access Juluca® through the ADAP contracted pharmacy network.

Juluca® is indicated as a complete regimen for the treatment of Human Immunodeficiency Virus type 1 (HIV-1) infection in adults to replace the current antiretroviral regimen in those who are virologically suppressed (HIV-1 RNA less than 50 copies per mL) on a stable antiretroviral regimen for at least 6 months with no history of treatment failure and no known substitutions associated with resistance to the individual components of JULUCA®.

For those interested, full prescribing information may be found here:

https://www.accessdata.fda.gov/drugsatfda_docs/label/2018/210192s001lbl.pdf

To view the current ADAP Formulary listing, please see the attached link:
