WILLKOMMEN
IN MIAMI!

BENVENUTI A MIAMI!

BEM-VINDO
A MIAMI!

MIAMI!

hello, miami

We are Resilient Greater Miami & the Beaches, a partnership of Miami-Dade County, and the cities of Miami and Miami Beach. We are the only city of the 100 Resilient Cities Network—pioneered by the Rockefeller Foundation—where multiple governments are collaborating to develop a collective voice that will, together, better allow us to plan, prepare, and respond to our community’s challenges. As part of this effort, we reached out to each of the 35 individual governments in the Greater Miami region to listen, learn, and incorporate input directly from community leaders, residents, and subject-matter experts.

Like many metropolitan areas, we recognize our transportation, housing, and socioeconomic challenges; however, we are also aware of the concerns associated with climate change, sea level rise, and other long-term issues. As Resilient Greater Miami & the Beaches, we are working to reduce and mitigate many of these difficulties because Miami, as we know it today, is our home as much as it is yours. As we continue this process, we continue to engage; we continue to invest. We thank our mayors, commissioners, and city managers whose leadership and support make this happen.

We are here to stay. We hope you are, too.

James F. Murley
Miami-Dade County

Jane Gilbert

welcome

This Preliminary Resilient Assessment (PRA) has been created by Greater Miami & the Beaches (GM&B) as part of 100 Resilient Cities (100RC) resilience planning process. It is the culmination of our first phase of listening to and learning from all of you—residents, businesses, and community organizations. It is the foundation for our next step and outlines our most important resilience priorities.

We hope you find this to be a great resource about resilience issues in Greater Miami & the Beaches. We invite to you continue on this journey with us over the next few months as we develop and prioritize actions to increase our resilience.

Participate locally through: www.resilient305.com

Introduction

Introduction

100 Resilient Cities

A **\$100 million effort** launched by the **Rockefeller Foundation** in 2013 to help cities **build resilience to social, economic, and physical challenges**. To respond to impacts of **urbanization, globalization, and climate change**.

The Resilient Cities Network is comprised of **100 cities spanning 40 countries and 27 languages**.

PIONEERED BY THE
ROCKEFELLER FOUNDATION

100 RESILIENT CITIES

- ROUND ONE CITIES
- ROUND TWO CITIES
- ROUND THREE CITIES

Introduction

Greater Miami & the Beaches

Resilient GM&B is a **collaboration among Miami-Dade County, City of Miami, and City of Miami Beach**, created to respond to the region's major challenges.

In 2016, after a very competitive process of more than 400 applicants, GM&B was selected to join 100RC. **With the support of 100RC, we are creating your resilience strategy!**

Introduction

Greater Miami & the Beaches

Together we are... Resilient

Meet some of our team members; join our efforts.

Chief Resilience Officers

Deputy Resilience Officers

Introduction

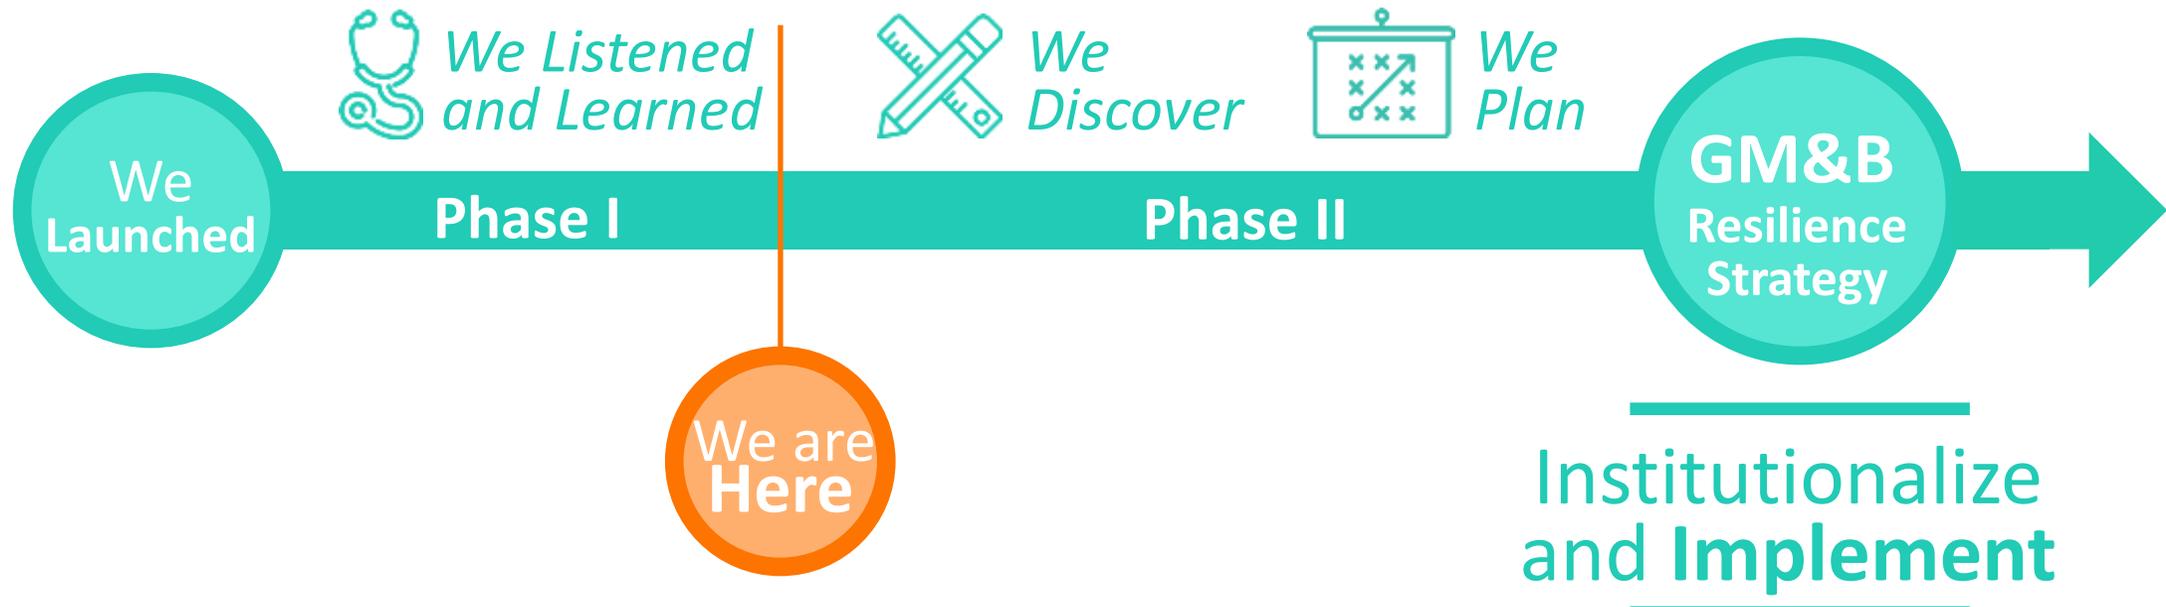

Greater Miami & the Beaches

Our Process

Fall **2016**

Summer **2017**

Fall **2018**

Introduction

Structure

Miami-Dade County, the **City of Miami**, and the **City of Miami Beach** are working together in a partnership of equals to address their common and overlapping resilience challenges and opportunities.

Introduction

GOVERNANCE

Miami-Dade County has a strong mayor form of government. The mayor serves as the chief executive and the Commission is the legislative body.

The **City of Miami** has an executive mayor who appoints a city manager as the chief administrative officer. The Commission is the legislative body.

The **City of Miami Beach** has a council-manager system, where the mayor and six commissioners set city policy and the city manager is the chief executive.

Introduction

FINANCIAL HEALTH

GM&B is **strong financially**.
Balanced budgeting/sound fiscal policy is a priority of current executive leadership in each jurisdiction.

For all three jurisdictions, **property taxes are very large sources of revenue**. This reliance on property taxes means that GM&B's revenue was hit hard by the housing market crash in 2008, but has since steadily recovered.

Introduction

PLANNING

Each jurisdiction has a Planning Department and engages in **comprehensive, functional, and special topic planning**.

The comprehensive plan is the core planning process for each of the three jurisdictions and includes **short- and long-term economic, social, physical, environmental, and fiscal goals**.

All three entities are integrating resilience in their next comprehensive plan updates.

GM&B Today

GM&B Context

Introduction

The 100RC process includes developing the local area context. The context is a **holistic scan of resilience**.

The team developed an actions inventory, collected opinions on resilience, and analyzed demographic data to understand challenges and opportunities.

The following information helps to frame and inform the resilience priorities.

GM&B Context

Shocks + Stresses

Rebounding + Bouncing Forward

Top Shocks

- **Sea level has risen about three inches** since Hurricane Andrew hit and is **expected to rise another three to seven inches** by 2030.
- Much of the development in GM&B is close to sea level. More than 85,000 people and 53,000 homes are located on land **less than three feet above high tide**. More than \$21 billion in assets are at risk.
- Man-made and natural systems, such as beaches and mangroves, will be affected as sea level continues to rise, likely resulting in **increased damage from floods and storms**.

“As sea levels rise, the risks of flooding increase. Higher sea level results in higher high tides, storm surges, and inland flooding due to higher groundwater levels.” —Young professional

GM&B Context

Shocks + Stresses

Flooding

- King tides are becoming **higher** according to tidal gauges.
- While stronger **building codes** have helped protect newer buildings from storm surges, risks are more costly today due to higher water levels and increased development in vulnerable areas.
- GM&B has an **intricate water management system** overseen by local government and the South Florida Water Management District (SFWMD).
- Heavy **rain events** or high water levels can strain stormwater systems and lead to flooding.

King tides occur when the orbits and alignment of the Earth, moon, and sun combine to produce the greatest tidal effects of the year

King tides bring unusually high water levels, and they can cause local tidal flooding. Over time, sea level rise is raising the height of tidal systems.

GM&B Context

Shocks + Stresses

Natural Systems

- Restoration of the **Everglades and Biscayne Bay** is key to providing fresh water, providing natural buffers from flooding, and protecting critical ecosystems.
- Natural systems worldwide are **strained by climate change** and urbanization.
- Two thirds of Miami-Dade County land area are **protected lands**, e.g., National Parks, Marine Sanctuaries, and Water Management Areas. This has resulted in concentrated development.
- **Limited open space** in urban environment can exacerbate flooding risks and limit adaptation options.
- Protections provided by offshore reefs and other **marine systems are degrading** due to ocean acidification and warming.

*“Beach
renourishment
is an economic
issue.”*

—Coastal Mayor

GM&B Context

Shocks + Stresses

Water Management

- **Rising sea levels and groundwater levels** require a delicate balance between retaining and infiltrating freshwater to recharge aquifers and draining freshwater to manage flooding risks, all while trying to improve **water quality**.
- Water, sewer, and drainage systems need to be redesigned, rebuilt, and maintained, with acknowledgement of **accelerating sea level rise** and the potential for higher **storm surges** and heavy rainfall events.
- Seasonal agriculture will continue to require careful **water management**, especially given saltwater intrusion into underground aquifers.

“Trying to identify inexpensive temporary solutions while seeking funding for permanent solutions.” —Inland mayor

“..using infrastructure to build community cohesion...” —Coastal mayor

GM&B Context

Shocks + Stresses

Housing

- **Housing cost burdens have risen dramatically.** Average rents increased 65% (from \$1,505 in 2009 to \$2,501 in 2015).
- In 2014, over 66% of renter households, and over 50% of owner households were **cost-burdened**, making it the **third least affordable housing market** in the nation.
- The local housing market is affected by external, often **seasonal/absentee buyers**.
- Cities of Miami Beach and Miami are **densely populated**.
- Inland communities, such as Doral and Kendall, are experiencing **increased mixed-use development**.
- **Housing rights for tenants are lacking.**

“Foreign investments have been great for the economy but have negatively impacted housing affordability.”

—Inland mayor

“Middle-America sprawl codes are keeping housing prices up.” *—inland mayor*

GM&B Context

Shocks + Stresses

- Homelessness has increased **2%** since 2015 and **9.5%** since the beginning of 2017.
- The Miami-Fort Lauderdale-West Palm Beach metros have one of the **highest foreclosure rates** in the nation.
- Approximately **29,000 new luxury residential** units have been built since 2010.
- Miami-Dade County and Cities of Miami, Hialeah, North Miami, Miami Beach, and Homestead **receive funding from HUD for affordable housing** which is expected to be cut significantly.

Housing

“Many waitlisted for housing assistance.”

—Inland mayor

“There is much fraud and many assessments associated with high-rise developments.”

—Coastal mayor

“There is no housing for young people.” —Inland mayor

GM&B Context

Shocks + Stresses

Mobility

- GM&B is the sixth most **congested** county in the U.S.
- **Connected, reliable transportation is needed** between residential areas and jobs.
- **Perceptions about transit** need to change for more widespread ridership; “transit is for the disenfranchised.”
- **Rideshare is disrupting** existing travel services/patterns.
- Public transit concerns include **safety, cleanliness, and reliability.**

“A better quality of life is tied to more efficient transportation... Young generations want it... People don’t want to rely on private automobiles.”

—Coastal mayor

GM&B Context

Shocks + Stresses

- Pedestrians and bicyclists feel unsafe competing with vehicles.
- Transit **ridership is declining** in many areas.
- Transportation is planned and managed by **multiple organizations**.
- **Funding** is needed for operations and maintenance of transportation infrastructure.

Mobility

*“.. 700,000 cars go through
Coral Gables daily...”*

—Inland mayor

*“Can’t get people to flex on
parking requirements”*

—Inland mayor

GM&B Context

Shocks + Stresses

Economy

- Though unemployment dropped from over 12% to under 5% from 2009 to 2015, 55-61% of Miami-Dade County **earn less than a living income or struggle to pay for basic needs** due to the preponderance of lower wage jobs and high cost of living
- 51% of households have **insufficient liquid savings** to survive for 3 months at poverty level in the event of unexpected job or income loss
- The top three economic engines, **Miami International Airport, PortMiami, and Tourism**, are based on transient services and transient population.
- The **agriculture industry** is a large component of the local economy.
- **GM&B lacks a diversified economy.**
- Job placement can be difficult for **many residents battling barriers such as low education rates and skillsets needed for a changing economy.**

“We need to foster a more diverse economy in less vulnerable areas.”

—Inland mayor

“Agriculture is at the mercy of national policies.”

—Inland mayor

GM&B Context

Shocks + Stresses

- There is **opportunity for more collaboration** amongst social service organizations for streamlining and improved services
- The **homeless population** is no longer just “people on the street”; it also includes recent graduates and an aging population. **15% of the homeless population** is undocumented.
- Five out of ten people make too much to qualify for assistance, but **not enough to live.**
- **Access to quality and affordable childcare** is difficult.
- The Department of Health is concerned about the undocumented **population not accessing health services.**
- The **aging population** struggles to afford their homes, putting stress on extended family.
- Federal, state, and local **funding is uncertain, fragmented and limited.**

Social Services

“We are unable to break the cycle of continued disrepair and poverty.”

—Inland mayor

“Many on fixed incomes are reliant on government support...we fear social unrest if it doesn't meet people's needs.”

—Coastal mayor

GM&B Context

Shocks + Stresses

- Florida schools are **significantly under funded** as compared to other states. The state ranks 48th for funding in the country.
- Miami-Dade County Public Schools (M-DCPS) **graduation rates are increasing**, however has a challenge of **16% not graduating** from high school on time.
- It's a challenge to **attract and retain quality educators due to high costs of living**.
- M-DCPS has the highest **student refugee population** in the country and offer **bilingual education**.
- One in five children attend **private schools** in GM&B.
- As of 2017, there are **no "F" rated schools** in M-DCPS.
- There are **increasingly fewer vocational programs** in public schools.
- M-DCPS is a national leader in magnet schools.

K-12 Education

"Schools are overcrowded in NE Miami-Dade."

—Inland mayor

"Education is a major determinant for relocation of young families."

—Young professional

GM&B Context

Shocks + Stresses

Universities

- Three primary universities are **FIU, University of Miami (UM), and Miami-Dade College (MDC)**.
- The combined enrollment of these universities and other local universities are approximately **240,000 students each term**.
- There is **strong collaboration** amongst the universities to move resilience forward with GM&B.
- **One Community One Goal's Academic Leaders Council** aligns with the business community to align worker availability.
- Florida Climate Institute is a multidisciplinary network of 10 universities that **collaborates to find a better understanding of climate variability** and change.

“Local universities lack investment in the community.”

—Focus group participant

“Recent graduates are finding job placement elsewhere, where they can afford to live.”

—Current student

GM&B Context

Shocks + Stresses

Juvenile Crime

- Although violent crime has decreased, **property crime is increasing.**
- There has been an 80% **reduction in overall juvenile crime** over the last 20 years.
- There is an **increase in firearms** in juvenile age group.
- **There is a lack of accessible and affordable services** to address long term impacts of mental health, substance abuse, and family support services.
- Overall crime is decreasing; however, **isolated pockets** remain in which the majority of juvenile offenders reside.

“Gangs are not based on race or culture, instead on a block-by-block basis.”

—Safety professional

GM&B Context

Shocks + Stresses

- GM&B has the **highest Affordable Care Act enrollment** in the U.S.
- **26% of Miami-Dade County residents are uninsured.**
- Miami is ranked **#2 for the most HIV infections** and **#1 for the most HIV-related deaths** in the U.S.
- In 2015, **21.6% persons under 65 are without health care insurance**; 42% in 2011.
- Refugee Health Assessment Program used to average 300 people per day; the number is declining since **end of the wet foot/dry foot policy.**

Health

“People don’t understand the risk of not having regular health screenings.”

—Health professional

“Many people are more risk tolerant because of the issues they’ve faced in their origin countries.” *—City professional*

GM&B Context

Shocks + Stresses

Health

- State declared a Public Health Emergency for the **opioid epidemic: 236 people fatally overdosed in MDC** from heroin/fentanyl in their blood from 2015 to November 2016.
- **Pool drowning** is the number one cause of death for children under five.
- The 2016 **Zika Virus** outbreak had 350 travel-related cases, 272 locally-acquired cases, and 44 unknown sources.

“We are given money to fight, but not to prepare.”

—Health professional

“The Zika virus cost us millions.” —City professional

GM&B Context

Shocks + Stresses

Storms + Recovery

- **GM&B is vulnerable** to hurricanes and tropical storms.
- National Climate Assessment (2014) predicts **increased intensity and frequency of hurricanes** in the region.
- Increased development and population over the last 11 years without a major storm creates **uncertainties of evacuation, response, and long-term community recovery.**
- Power and **utility redundancy** is critical and unknown.
- **Communication and access** to residents are key.
- Residents and governments **lack funding preparedness.**
- **Storm and flood insurance** rates are increasing.
- **Absentee owners contribute to delayed recovery.**

“Communicating preparedness with residents is a challenge.”

—Coastal mayor

“Need unity throughout the county to address flood insurance.”

—Coastal mayor

GM&B Context

Shocks + Stresses

- **35 local governments** comprise GM&B.
- Intergovernmental **collaboration is not fully leveraged**.
- Harmonization and **alignment of codes and standards** is needed to address real property concerns such as land use, zoning, and sea level rise.
- Organizations need to improve their **knowledge of comprehensive data, plans, and resources**.
- Access and use of sea level rise-related **data is new and emerging** for many local governments and businesses.
- **Improved relationships** in and between governments would allow for stronger initiatives.

Collaboration

“Need centralized tools and structure to support small municipalities.”

—Inland mayor

“We need to cooperate as opposed to compete; we should take a holistic approach to problem solving.” *—coastal mayor*

Actions

This City Resilience Framework is a 100RC Tool to categorize plans, programs, projects, studies, and initiatives. A total of 280 were identified throughout the engagement process. Of those, 100 were prioritized for consideration in future Resilient GM&B efforts, many of which are identified on the following pages.

GM&B Context

Sea Level Rise + Climate Change

Key Actions

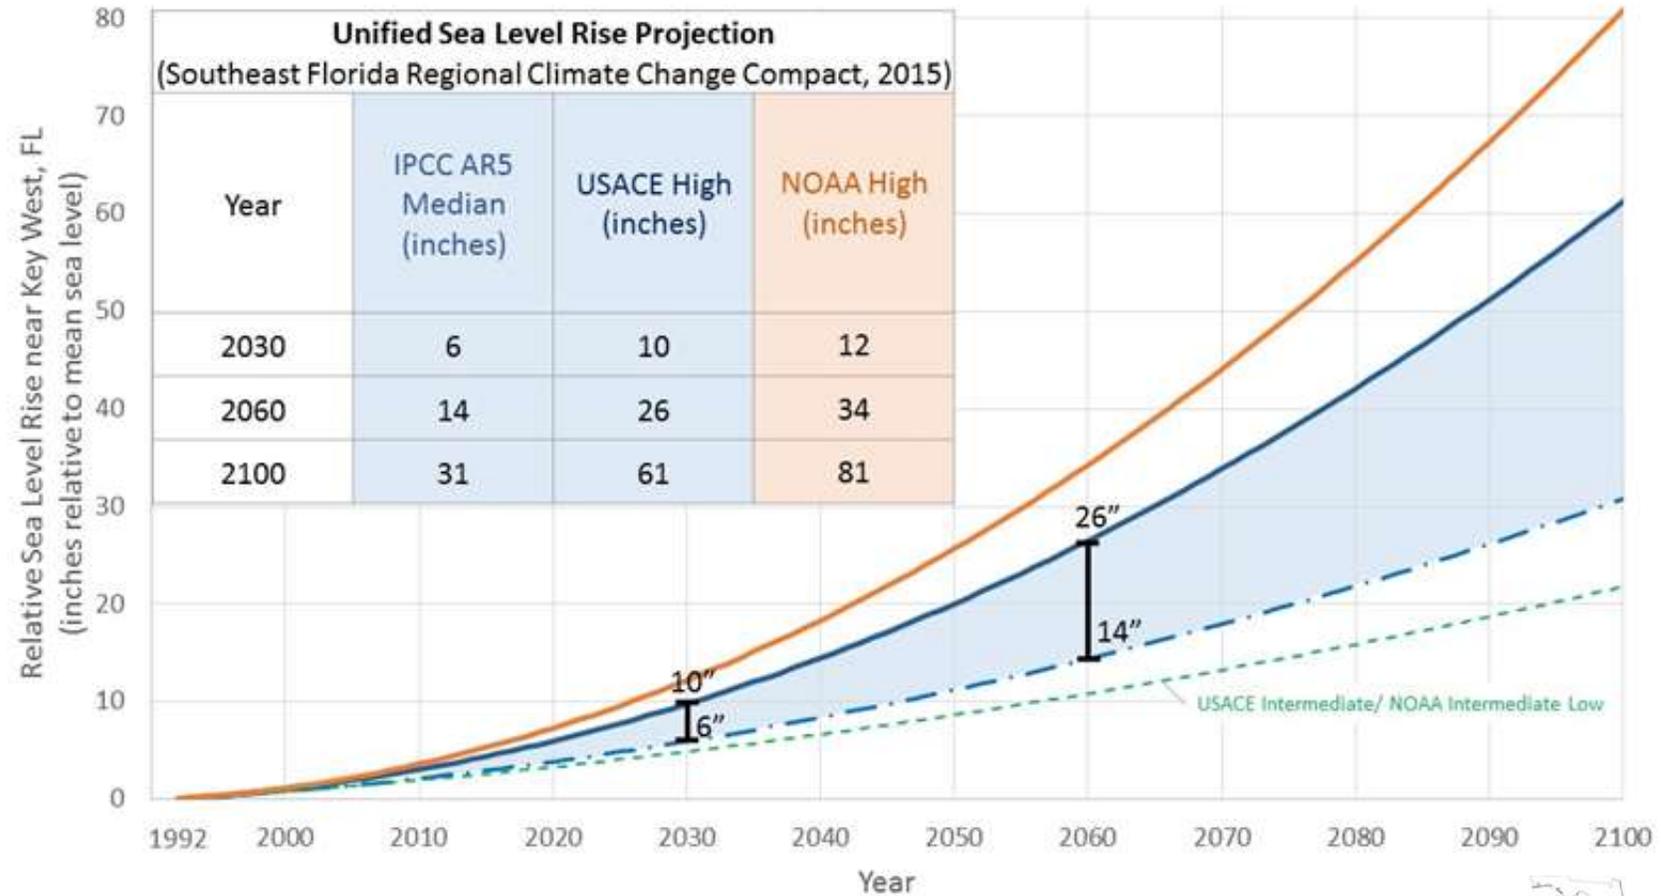

- Adopted a Green **Sustainable Buildings Ordinance for new construction.**
- GM&B partners participate in the National Flood Insurance Program **Community Rating System (CRS)** Program, which recognizes floodplain management activities and have the following scores:
 - Unincorporated Miami-Dade County: 5
 - City of Miami: 7
 - City of Miami Beach: 6

“South Florida and Greater Miami & the Beaches have formed unique and progressive partnerships to plan and prepare for sea level rise and climate change.”

—Coastal Assistant City Manager

Sea Level Rise + Climate Change

- GM&B partners participate in the **Southeast Florida Regional Climate Change Compact**.
- The Compact successfully convened scientists to develop unified **sea level rise projections** for Southeast Florida.

Key Actions

Miami-Dade County Key Actions

- Currently performing a **vulnerability assessment of key infrastructure and capital investments**.
- The Miami-Dade County Water and Sewer Department is investing billions on **improving critical infrastructure**, and sea level rise is a key part of the design criteria.
- Miami-Dade County is developing additional **adaptation strategies** to address sea level rise.
- Miami-Dade County, in partnership with the SFWMD and the U.S. Army Corps of Engineers, works to restore, preserve, and protect the Everglades through the **Comprehensive Everglades Restoration Plan**.

Key Actions

Miami-Dade County Key Actions

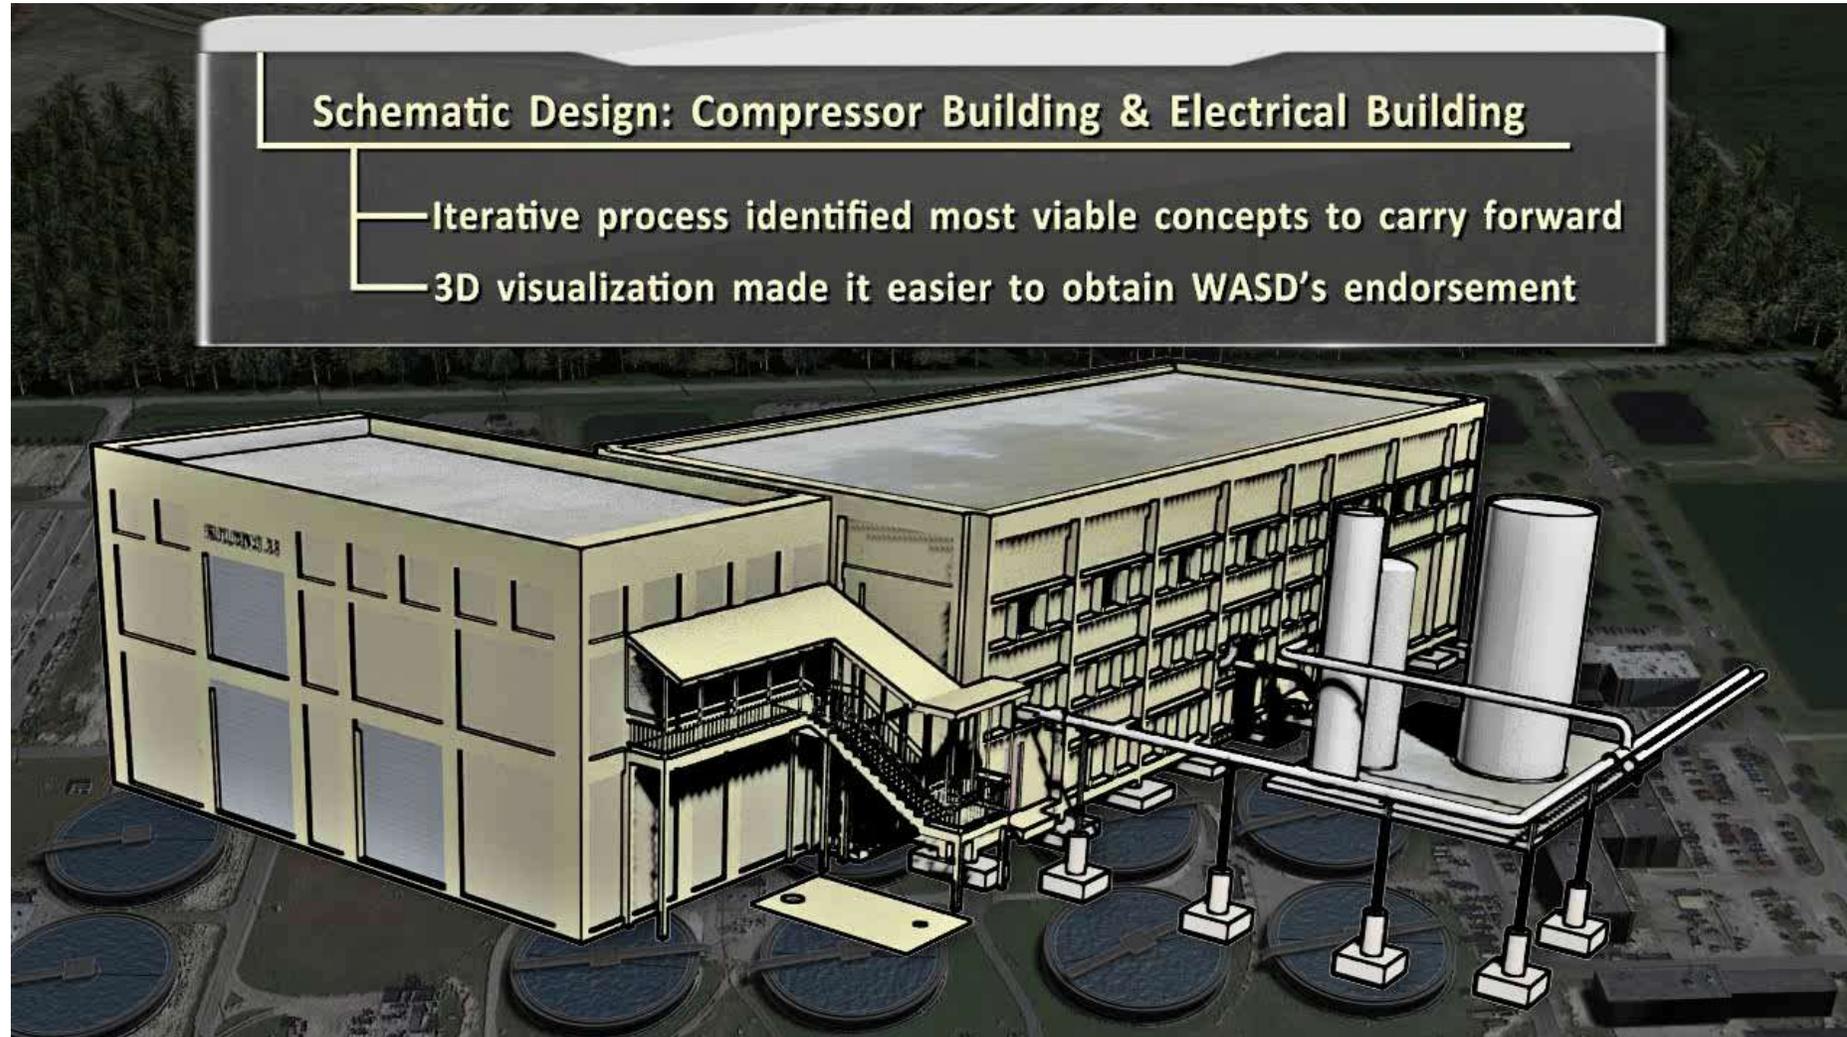

- Currently partnering with the Urban Land Institute on a pilot **Adaptation Action Area** for the Arch Creek drainage basin.
- Currently working with Rand Corporation to **visualize how sea level rise and future land use decisions will impact flooding risks.**
- Working **collaboratively with the South Florida Water Management District** and municipalities to understand how sea level rise will impact the regional canal network.
- Investing in protecting the County's drinking water and actively monitoring and **managing any saltwater intrusion into the aquifer.**
- Created a **Sea Level Rise Task Force** who recommended that the County prepare an Enhanced Capital Plan to increase the resilience of the County's infrastructure.

GM&B Context

Sea Level Rise + Climate Change

Key Actions

BIM model for an electrical building for our South District Oxygen Production Consent Decree Project. It is a brand new building that will store transformers at the bottom and all switchgear at the top, about 16 feet high.

Key Actions

The City of Miami Key Actions

- Establishment of a **Sea Level Rise Advisory Committee** in 2015 and an interdepartmental **Resilient Infrastructure Committee** in 2017.
 - Partnering on a **Resilient Redesign for Shorecrest**.
 - Updating the City of Miami's **stormwater master plan** while implementing stormwater upgrades in highly vulnerable areas.
 - Creating a **rapid action plan for flood risk mitigation** of critical infrastructure.
 - Strengthening flood risk mitigation in the Future Land Use and Coastal Management elements of the City's **Comprehensive Neighborhood plan**.
 - **Proposed Miami Forever General Obligation Bond** includes \$193 million for flood risk mitigation and will be on the ballot in November.
 - The City's zoning code contains several standards aimed at **maximizing natural infiltration** of stormwater directly into the ground.

GM&B Context

Sea Level Rise + Climate Change

Key Actions

City of Miami Beach Key Actions

- Established a **Mayor's Blue Ribbon Panel** on Flooding and Sea Level Rise and a Commission Committee on Sustainability and Resiliency.
- Committing to investing half a billion dollars to **raise roads** and improve **stormwater drainage**.
- Updated the **land use and development code** to incorporate climate adaptation and resilience, including increased freeboard, base flood elevation, roadway, ground, and seawall heights.
- Recently completed a **vulnerability assessment for its infrastructure**.
- **Constructing green living shorelines** to complement sea walls.

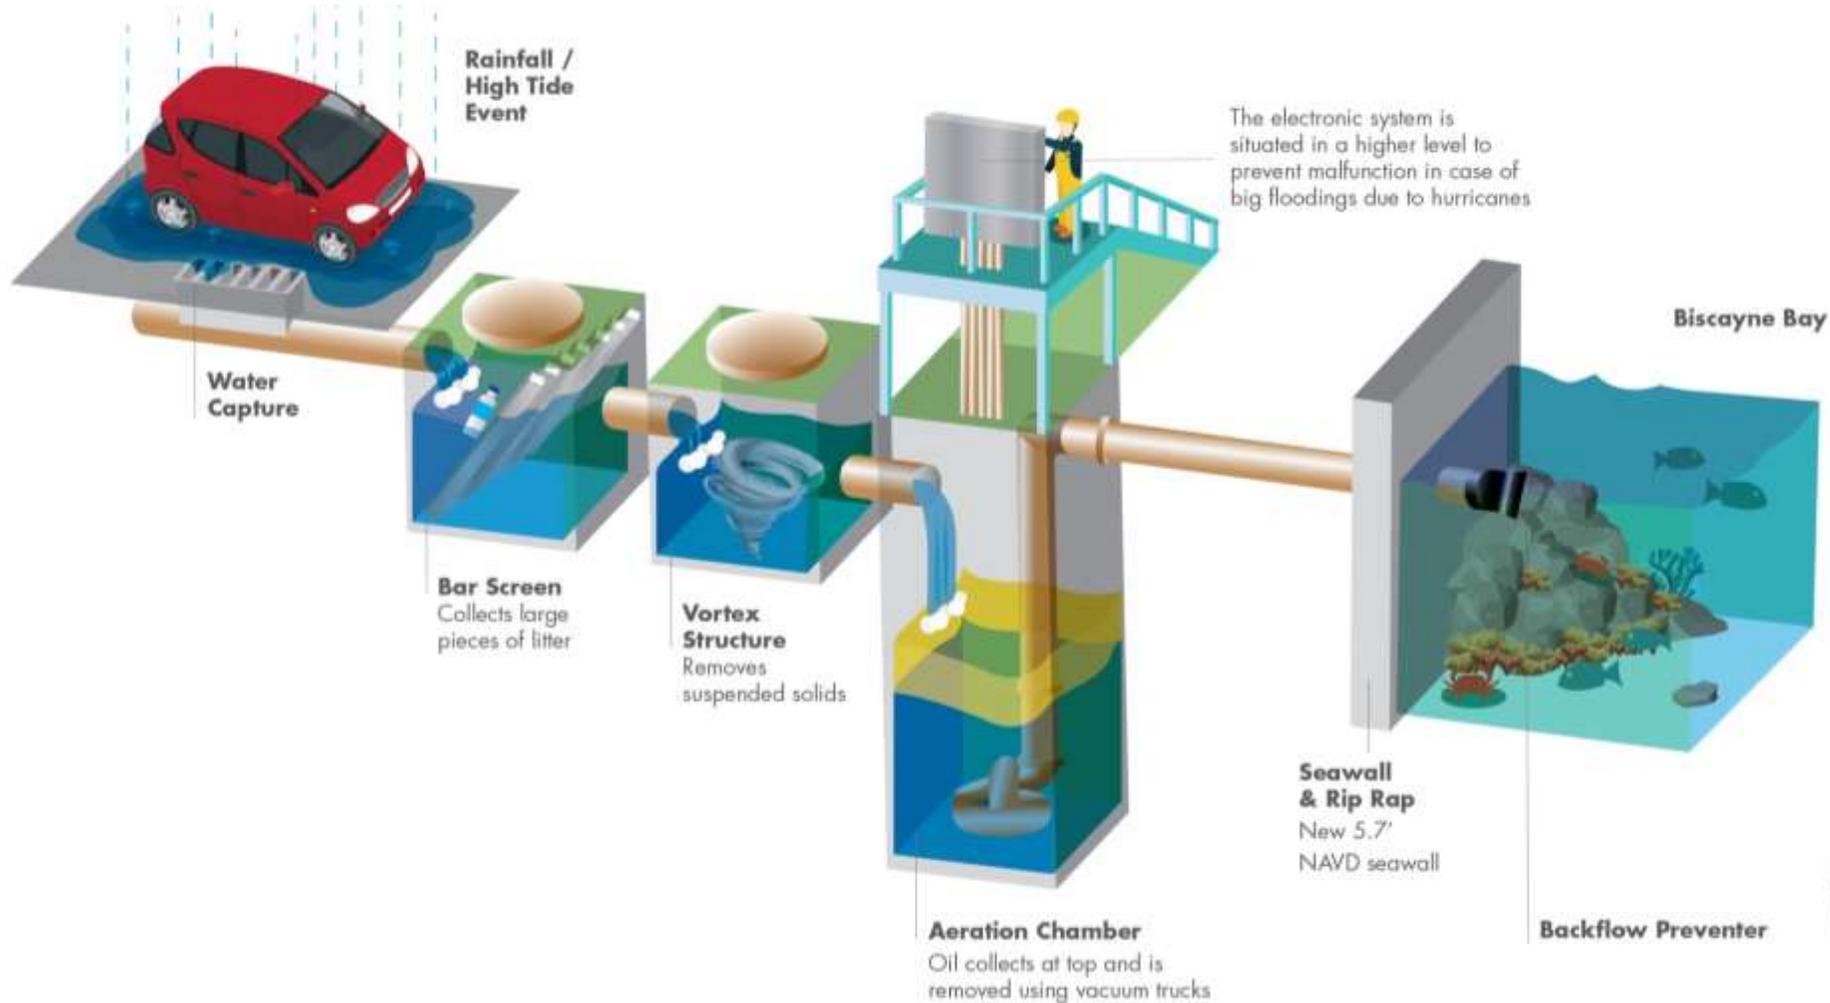

“The City of Miami Beach has made a commitment to adapt to sea level rise, invest in aging infrastructure, and use the best available science to do so.”

—Coastal Assistant City Manager

GM&B Context

Sea Level Rise + Climate Change

Key Actions

Stormwater
Pump Station
UPGRADES

Key Actions

City of Miami Beach Key Actions

- **Maintaining extensive sand dunes** that minimize risk from storm surge and provide habitat.
- Developing **design guidelines for historic preservation** in the face of sea level rise and climate change.
- Developing unique and creative ways to help the community learn more, including an **Adaptation Calculator and dynamic Resilience Open Houses**.
- Conducting dynamic **surface/groundwater modeling**.
- Recently hosted the U.S. Conference of Mayors, and is internationally **recognized for its adaptation projects**.

“Our program delivers quality of life for residents and visitors today and provides for a sustainable and resilient tomorrow.”

—Coastal Assistant City Manager

GM&B Context

Key Actions

- The Miami-Dade County **Homeless Trust 10-year Plan** provides framework to locally end homelessness.
- The Miami-Dade County **Housing Surcharge Tax or MEEK tax** sets aside funding for affordable housing.
- Miami-Dade County Consolidated **Housing and Urban Development (HUD) Plan** outlines goals toward providing access and opportunity to attainable housing, social services, and jobs.
- Miami-Dade County is committed to working on a five-year plan to provide **affordable housing** in partnership with six entitlement cities, including the City of Miami and City of Miami Beach, by June 2018.
- Greater **Miami Chamber of Commerce Housing Taskforce** highlights opportunities for housing affordability.

Housing

Key Actions

- University of Miami's **Miami Affordability Project** is a tool to visualize neighborhood level housing market dynamics.
- The City of Miami Beach initiated **Innovative Housing Conversion Projects**.
- The City of Miami's affordable and attainable mixed-income and workforce **housing benefits ordinances**.
- **The City of Miami's Miami 21** is a form-based zoning code guide based on principles of New Urbanism and Smart Growth
- **Florida International University (FIU) Metropolitan Center** is an urban policy think tank and solutions center.
- **Liberty Square Rising** revitalization initiative is for the redevelopment of the Liberty Square Public Housing Project.
- Adopted a volunteer **Property Assessed Clean Energy Programs (PACE)** program.

GM&B Context

Key Actions

- Transit Planning Organization (TPO) completed a 2040 **Long Range Transportation Plan**.
- Miami-Dade County **Strategic Miami Area Rapid Transit (SMART) Corridor Plan** identifies six major corridors for proposed mobility solutions.
- **TPO's Land Use Study** determines how mobility networks interact with land uses.
- **TPO's Transportation Improvement Program (TIP)** identifies a list of upcoming transportation projects over a four-year period.
- Miami-Dade County **Metrorail Car Replacement Program** is a phased implementation plan to replace Metrorail Cars.

Mobility

GM&B Context

Key Actions

- Multiple, highly used Municipal **Trolley + Circular Systems** are operated and funded by the local governments.
- **Underline Project** is a planned 10-mile neighborhood park, urban trail, and living art destination underneath the existing Metrorail line.
- The City of Miami Beach Transportation Master Plan has a **Pedestrian First Strategy** component.
- City of Miami Beach built the city's first **protected bike lane** in Miami-Dade County.

Mobility

GM&B Context

Key Actions

- Miami-Dade County **Homeless Trust** oversees the **Homeless Plan** and provides funding support to provider organizations.
- City of Miami **A Comprehensive Center for Exceptional Student Services (ACCESS) Program** provides free individual tax assistance at parks and Neighborhood Enhancement Team (NET) Offices.
- **Career Centers** at Lindsey Hopkins and Camillus House.
- Summer Youth **Financial Empowerment & Employment Program**.
- City of Miami **Homeless Assistance Program (MHAP)** provides services to the homeless.

Social Services

GM&B Context

Key Actions

- United Way's **Asset Limited, Income Constrained, Employed (ALICE) Report** establishes populations in economic danger.
- **Beacon Council's One Community, One Goal Initiative** provides a roadmap for economic success.
- **CareerSource** works directly with business to connect them with people in need of jobs.

Social Services

GM&B Context

Key Actions

- Consortium for a Healthier Miami-Dade to act as a catalyst for healthy living.
- The Children's Trust funded **school-based health clinics**.
- The Miami-Dade County **Healthcare Preparedness Coalition** serves as a forum of healthcare organizations and supporting agencies.
- The Miami-Dade County **substance abuse task force** combats the ongoing drug epidemic.

Health

GM&B Context

Key Actions

- The **MetroLab** partnership with local universities is studying ways to help local government combat mosquito-borne illness.
- Miami-Dade County **funding operation model for mosquito control** improved to address Zika.
- **Mosquito repellent** was provided to vulnerable populations by local government organizations.
- Media and neighborhood **outreach campaigns about Zika** awareness were held.

Health

GM&B Context

Key Actions

- GM&B partners have **active social media** presences to distribute information and monitor potential risks.
- Miami-Dade County's **juvenile assessment center (JAC)** works to address and intervene prior to re-offense.
- Miami-Dade County is a leader in-state for **civil citations of juvenile offenders to avoid jail and offer rehabilitative services.**
- M-DCPS ended **out-of-school suspensions, reducing juvenile crime.**
- **The Children's Trust Together for Children Initiative** is a coalition formed to promote and address youth safety.
- Education, mentoring, and workforce development initiatives were formed with **5000 Role Models and Big Brothers Big Sisters.**

Juvenile Crime

GM&B Context

Key Actions

- After Hurricane Andrew, the **South Florida Building Code** transformed construction standards to ensure buildings stand up to storms. It was adopted by the entire **State of Florida**.
- **GM&B** has advanced **Urban Search and Rescue** teams, ready to deploy in the event of a major disaster recovery.
- **Local Mitigation Strategy (LMS)** Workgroup meets quarterly to coordinate and move disaster preparedness and mitigation funding.

Emergency Management

GM&B Context

Key Actions

- City of Miami's **72-hour initiative** prepares the community for hurricanes, terrorism, and active shooter events.
- American Institute of Architects Miami **Sea Level Rise (SLR) Task Force** are identifying opportunities to strengthen the Florida Building Code.
- City of Miami Beach **land use codes have been updated to take SLR projection into account and plan for climate adaptation.**
- The countywide **Recovery Plan** addresses policies that promote an all-hazards disaster recovery process amongst all stakeholders.

Emergency Management

GM&B Context

Intergovernmental Collaboration

Key Actions

- GM&B partners are members of the **Southeast Florida Regional Climate Change Compact**. Municipal working groups meet about important topics.
- **Seven50** is a blueprint for development in Southeast Florida and takes sea level rise into account.
- **Several leadership groups meet routinely, including: the Miami-Dade County Manager's Association, the Planners Technical Committee (PTC), and the Miami-Dade Police Chiefs Association.**
- GM&B partners are translating **resilience planning into budgeting and strategic planning.**

GM&B Context

Intergovernmental Collaboration

Key Actions

- Miami-Dade County **League of Cities** unites common interests of governments within the county.
- The Miami **Urban Area Working Group (UAWG)** establishes Urban Area policy and **Urban Areas Security Initiative (UASI)** funding allocation.
- Miami-Dade County **LMS Workgroup** meets quarterly to discuss disaster preparedness and mitigation funding.
- The **Transportation Planning Organization (TPO)** meets regularly to coordinate federal funding and prioritize capital projects.

GM&B Context

Case Study

Miami-Dade County is vulnerable to a variety of hazards and the Comprehensive Emergency Management Plan establishes the framework for the County and its 34 municipalities to address these risks. The Plan outlines the intergovernmental roles and responsibilities. Each municipality is independently responsible for the safety of its residents and visitors with mutual aid support from the County.

The Local Mitigation Strategy (LMS) Working Group is made up of a broad stakeholder group including federal, state, and local government; private enterprise; private and public schools, colleges, and universities; hospitals; and not-for-profits. The Working Group meets quarterly to update the strategy which includes a countywide list of funded and unfunded projects which are tracked to monitor progress on risk mitigation and comprehensively address the impact the current and future hazards.

In addition to the LMS working group, the Whole Community Engagement Group is convened quarterly by The County's Emergency Management with representatives of the municipalities, universities/colleges and other County partners. The group is convened to discuss current issues, best practices, and inform and solicit feedback on current plans.

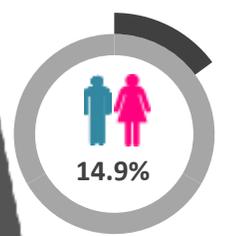

GM&B Context

Transient + Aging Population

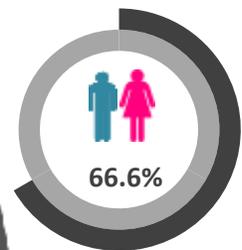

ANNUAL POPULATION: GM&B has **2.7 million people** with **52% foreign-born**; 21% under age 18 and 15% over age 65; the **average age is 36 years old** and is expected to increase to 40 by 2030.

Stakeholder Engagement

Stakeholder Engagement Introduction

The Stakeholder Engagement part of resilience strategy development is **proactive and inclusive** to reflect all parts, ages, ethnicities, cultures, and income levels of a community. Our efforts range from simply informing to listening, consulting, and collaborating—with goal of **empowering the whole community** to have a voice in building resilience.

This section contains a **summary of stakeholder assessment** via meetings, focus groups, online questionnaires, social media, and summaries.

Stakeholder Engagement

Key Issue Topics

Social Services

- Awareness of services (by users and by providers)
- Collaboration (data sharing, resources, tracking)
- Cultural diversity

Natural Systems

- Quality (Everglades, Biscayne Bay)
- Integration (urban, preservation)
- Agriculture

Planning + Zoning

- Collaboration among Miami-Dade County and all cities
- Land use standards
- Data sharing
- Lack of economic diversity

Public Safety

- Juvenile crime
- Cybersecurity
- Disaster response

Stakeholder Engagement

Key Issue Topics

Housing

- Rent-regulated housing; affordability bands
- Location and quantity of availability
- Non-resident buyers driving up housing costs

Transit

- Public perception of public transit
- Transit reliability, ease of use, safety
- Multimodal options (safe, connected)

Water Resources

- Water quantity and quality (aquifer, sea level rise)
- Shoreline nourishment
- Utility infrastructure (water, sewer)

Education + Youth Development

- Funding per child
- Truancy + graduation rates

Health Services

- Health pandemic (Zika, yellow fever)
- Preventive care in amongst vulnerable populations
- Major health issues (HIV, drug use)

What is Resilience?

Stakeholder Engagement Key Findings

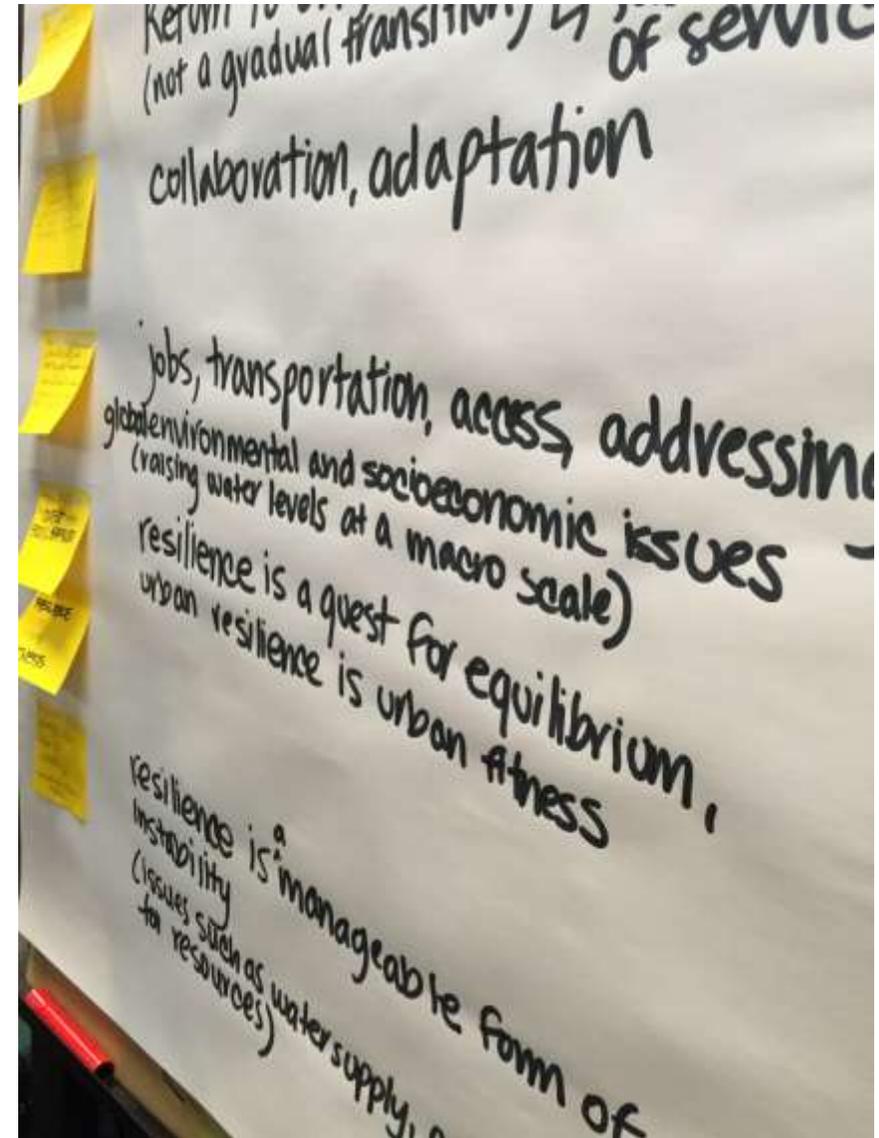

“Adaptability in the built environment... buildings that can withstand shocks and stresses.” —Architect, Private Sector

“Be prepared, now.” —Engineer, Public Sector

“Urban Resilience is the capacity of individuals, communities, institutions, businesses, and systems within a city to survive, adapt, and grow no matter what kinds of chronic stresses and acute shocks they experience.” —100RC

*“The ability to recover from acute or chronic stresses.”
—Emergency Management, Public Sector*

“Proactive and engaging all stakeholders to create a plan that resolves issues.” —Community Programs, Non-profit

Perceptions Assessment

Stakeholder Engagement Stakeholder Input

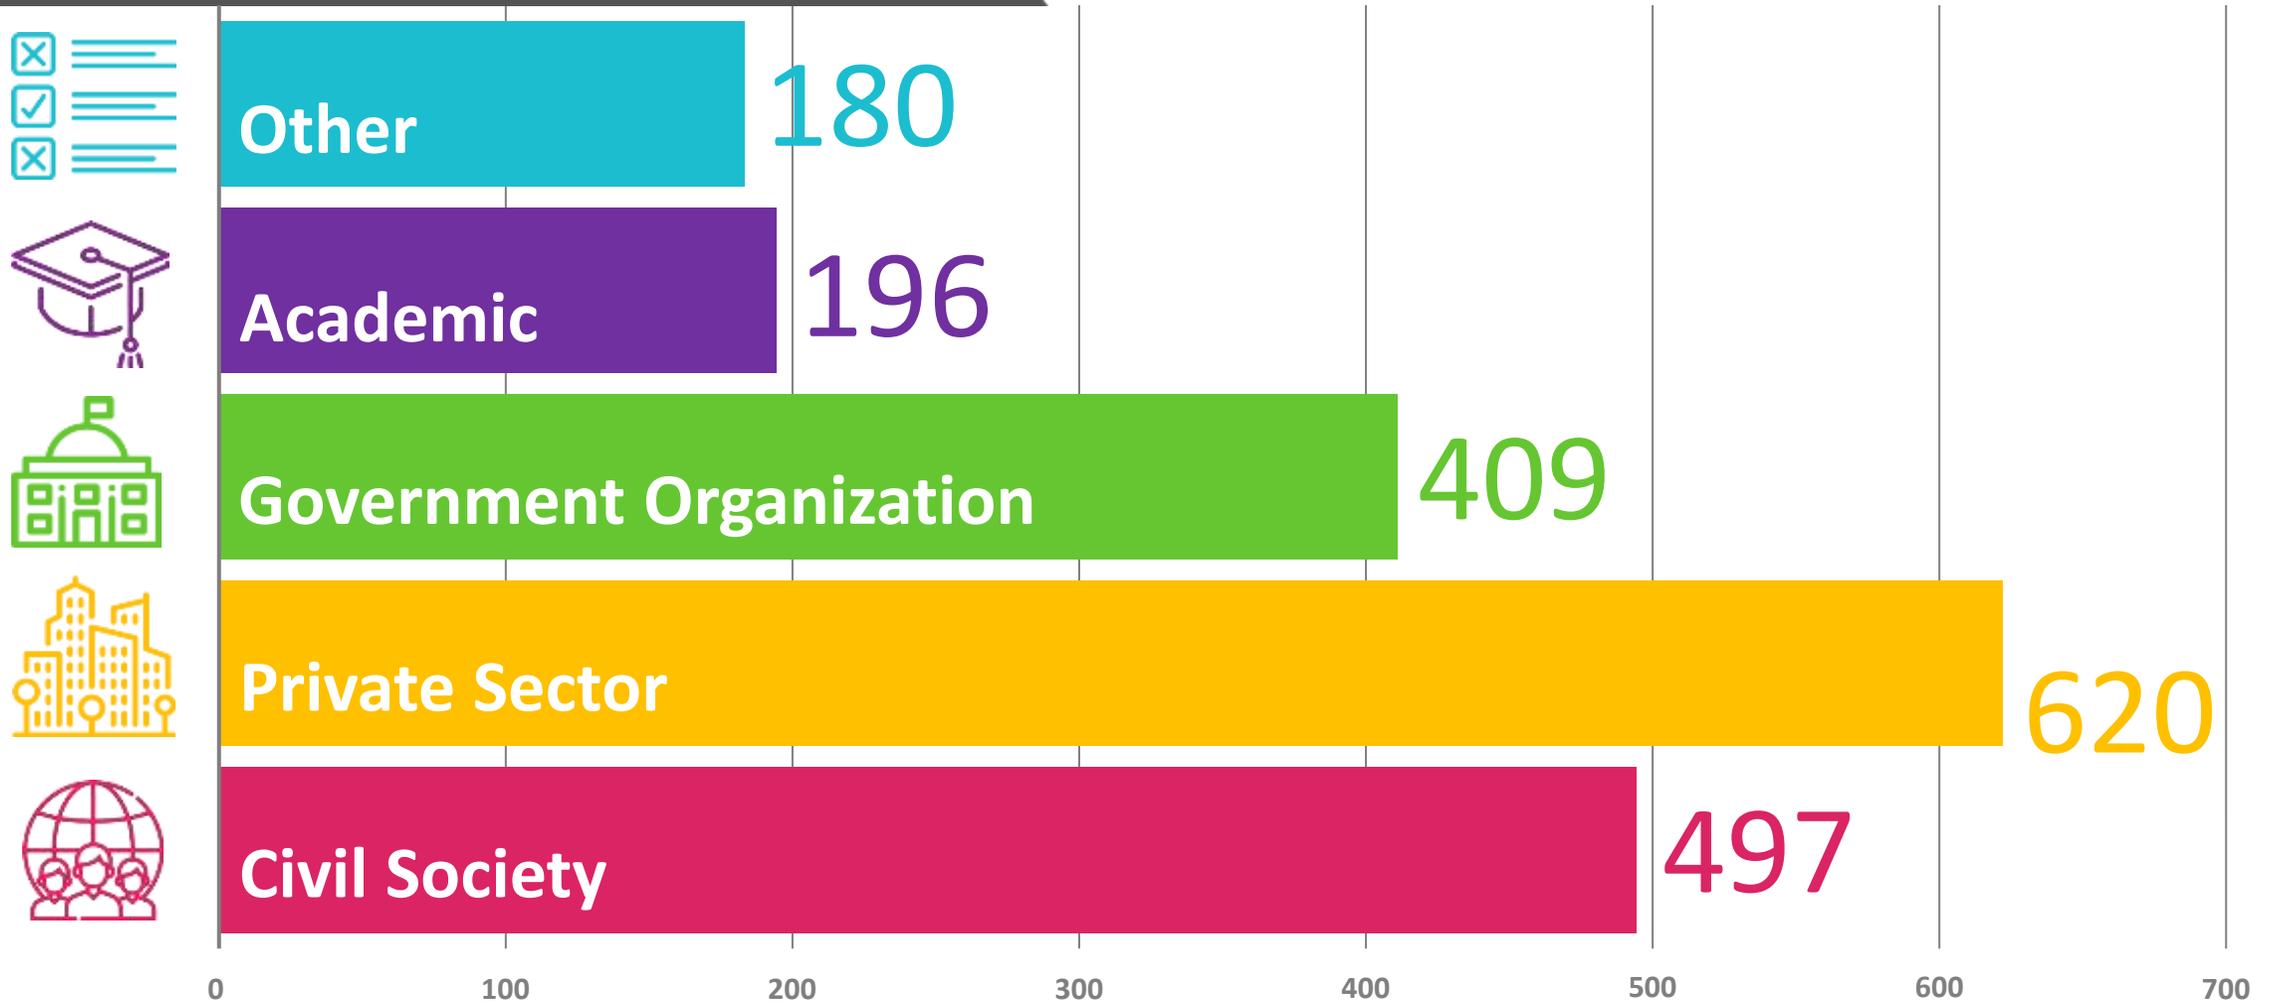

Perceptions

This City Resilience Framework gauges perceptions of primary resilience drivers. Workshop, meeting, and focus group participants from government, private, and civic sectors performed a strengths and weaknesses assessment on our services to identify gaps and opportunities.

Response by Profession

Questionnaire Responses 2031 Total Respondents

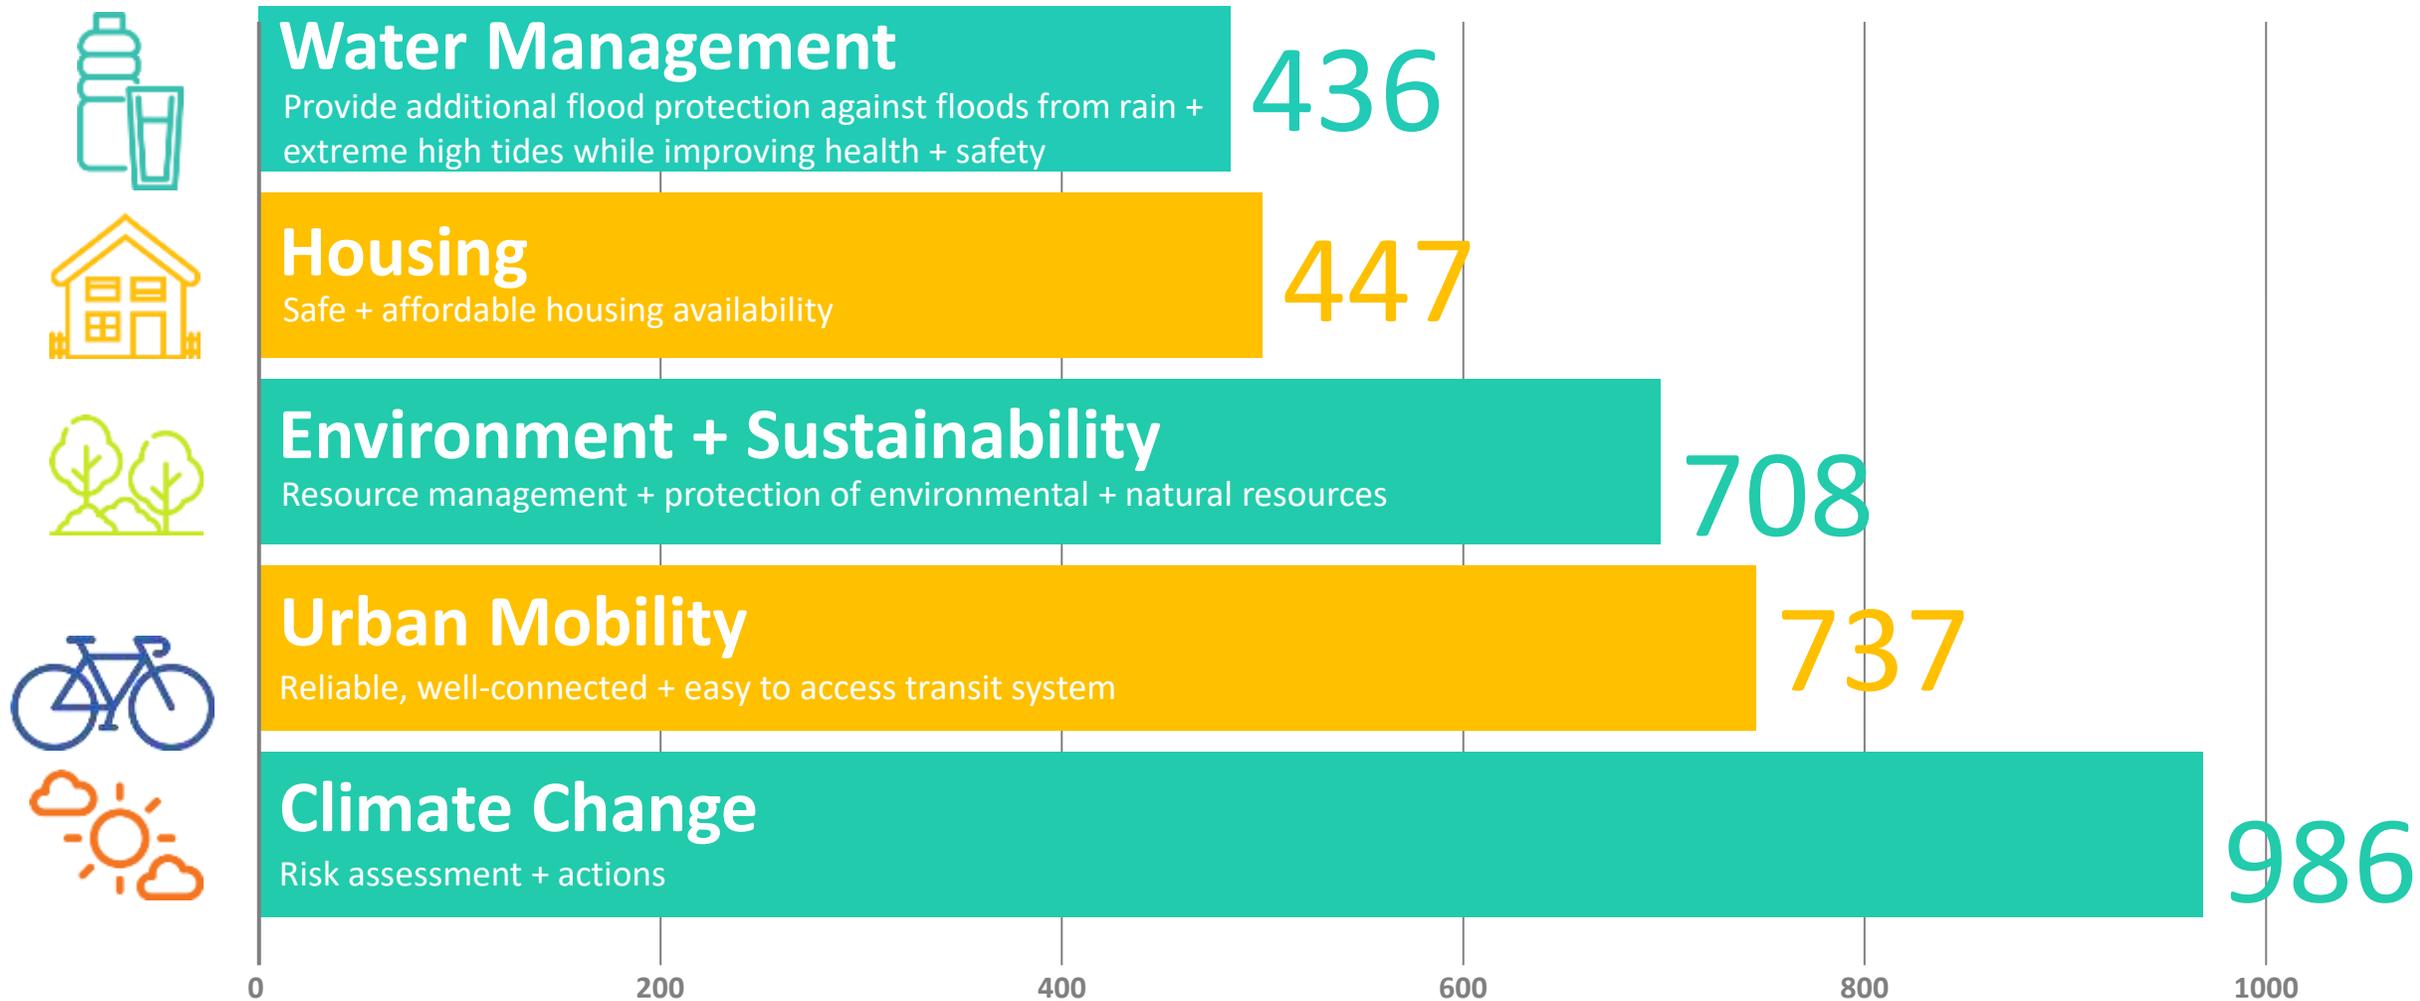

An online questionnaire was created and live for two months and received a total of 2031 responses

Response by Priority; Top 5 out of 18

Questionnaire Responses Key Priorities for Strategy

Which issues should be prioritized in our 20-year resilience strategy?

An online questionnaire was created and live for two months and received a total of 2031 responses

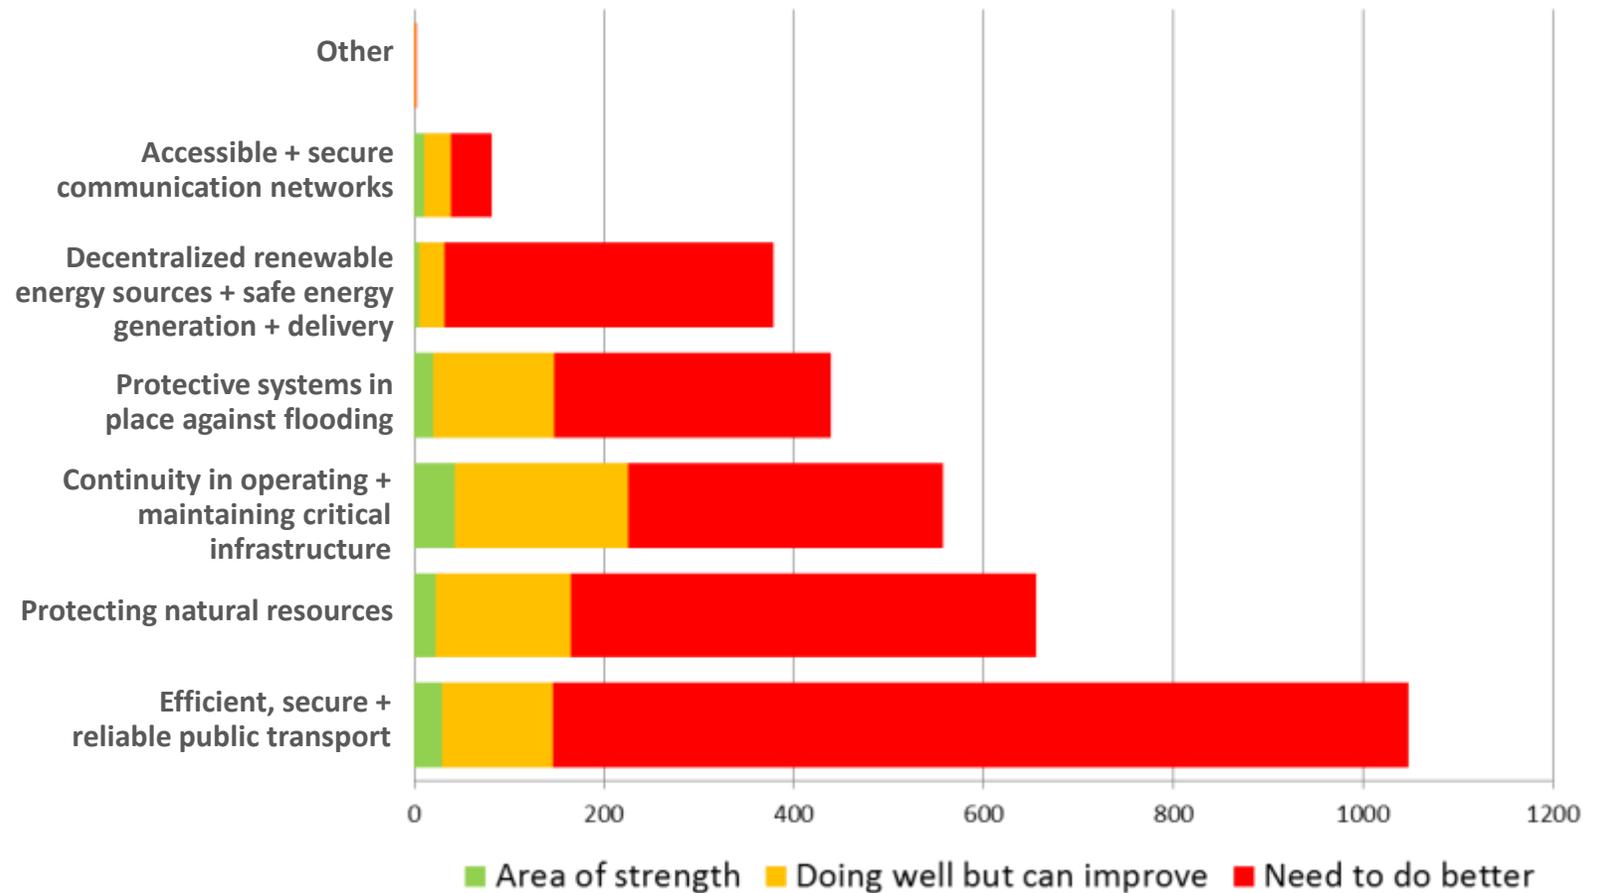

Infrastructure + Environment

Questionnaire Responses Key Findings

Choose two factors that you feel are most important and rate how you think we're performing.

Infrastructure + Environment

Protects and enhances natural and man-made assets; ensures critical services operate in times of need; and provides a free flow of people, information, and goods.

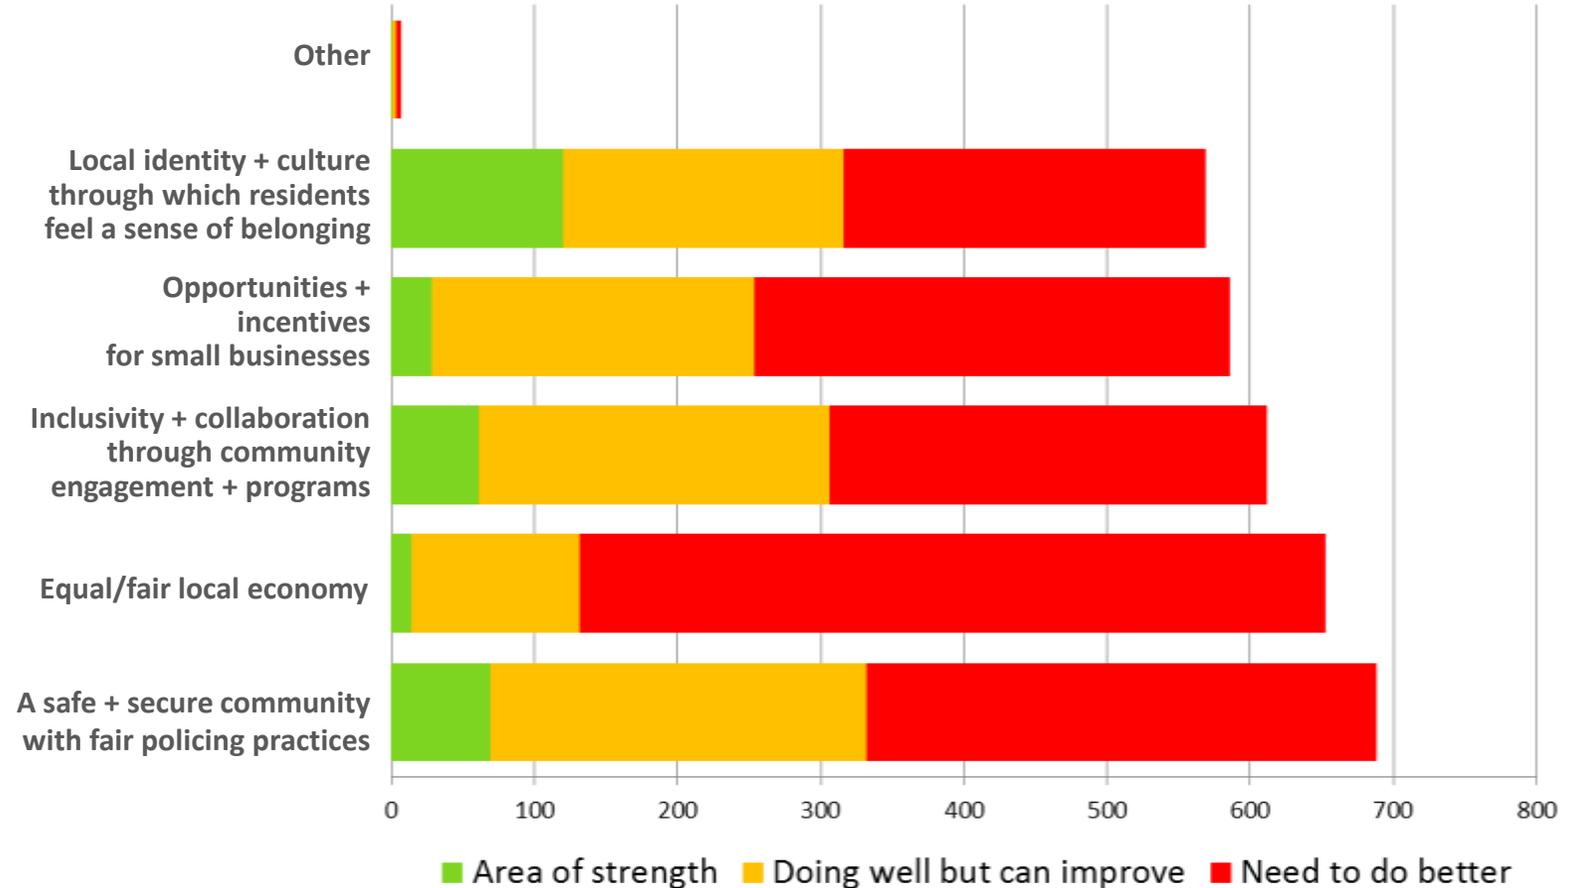

Economy + Society

Questionnaire Responses Key Findings

Choose two factors that you feel are most important and rate how you think we're performing.

Economy + Society

Promotes social unity and the empowerment of its residents; ensures social stability, security, and justice; and fosters economic prosperity.

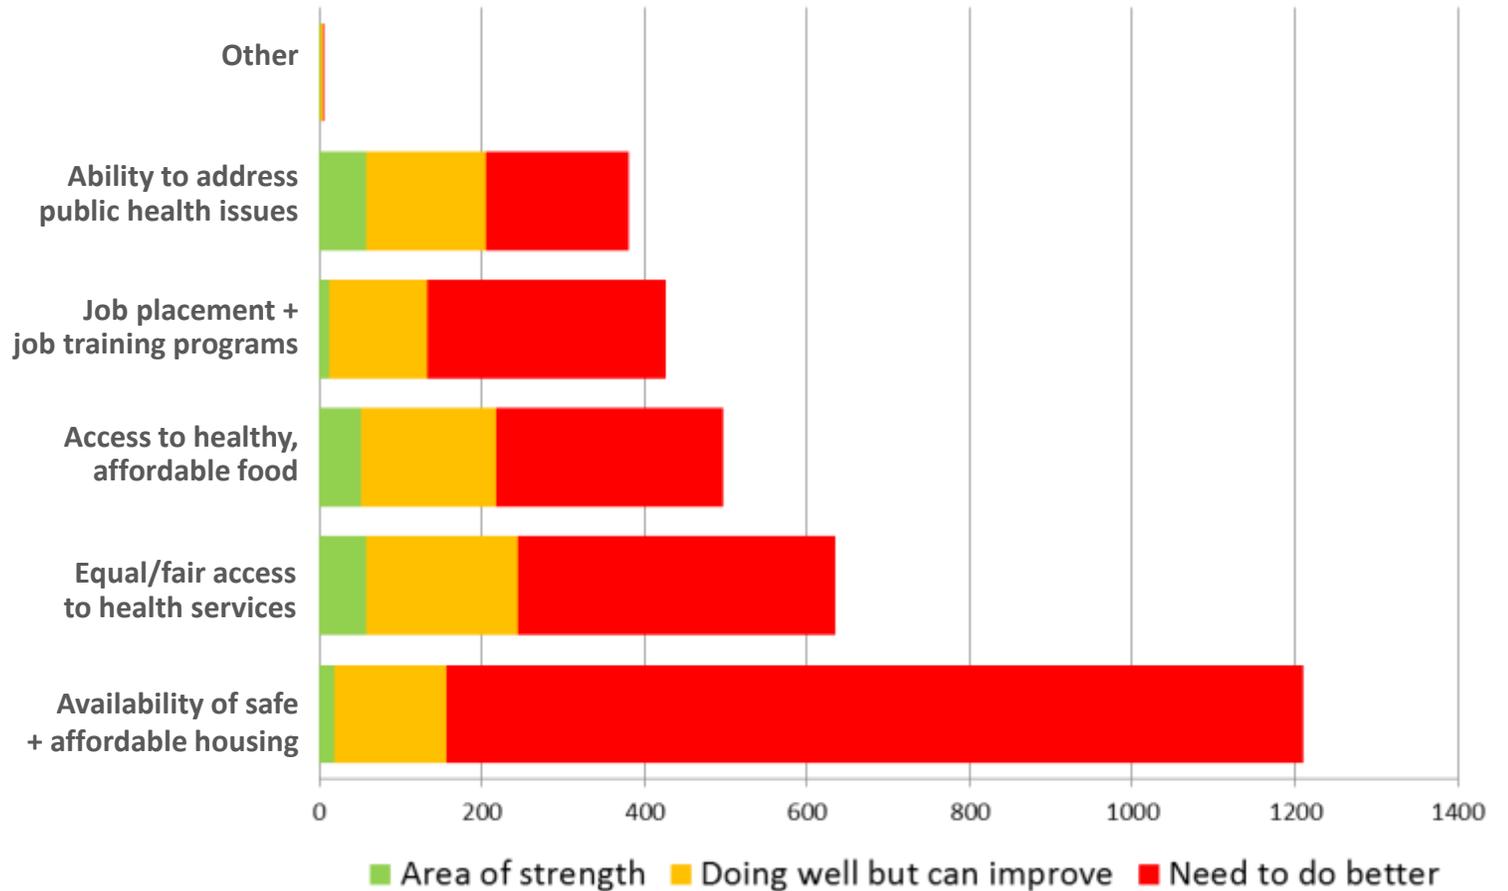

Health + Wellbeing

Questionnaire Responses Key Findings

Choose two factors that you feel are most important and rate how you think we're performing.

Health + Wellbeing

Addresses the basic needs of the population including housing and healthcare, and provides its people with access to jobs and opportunities.

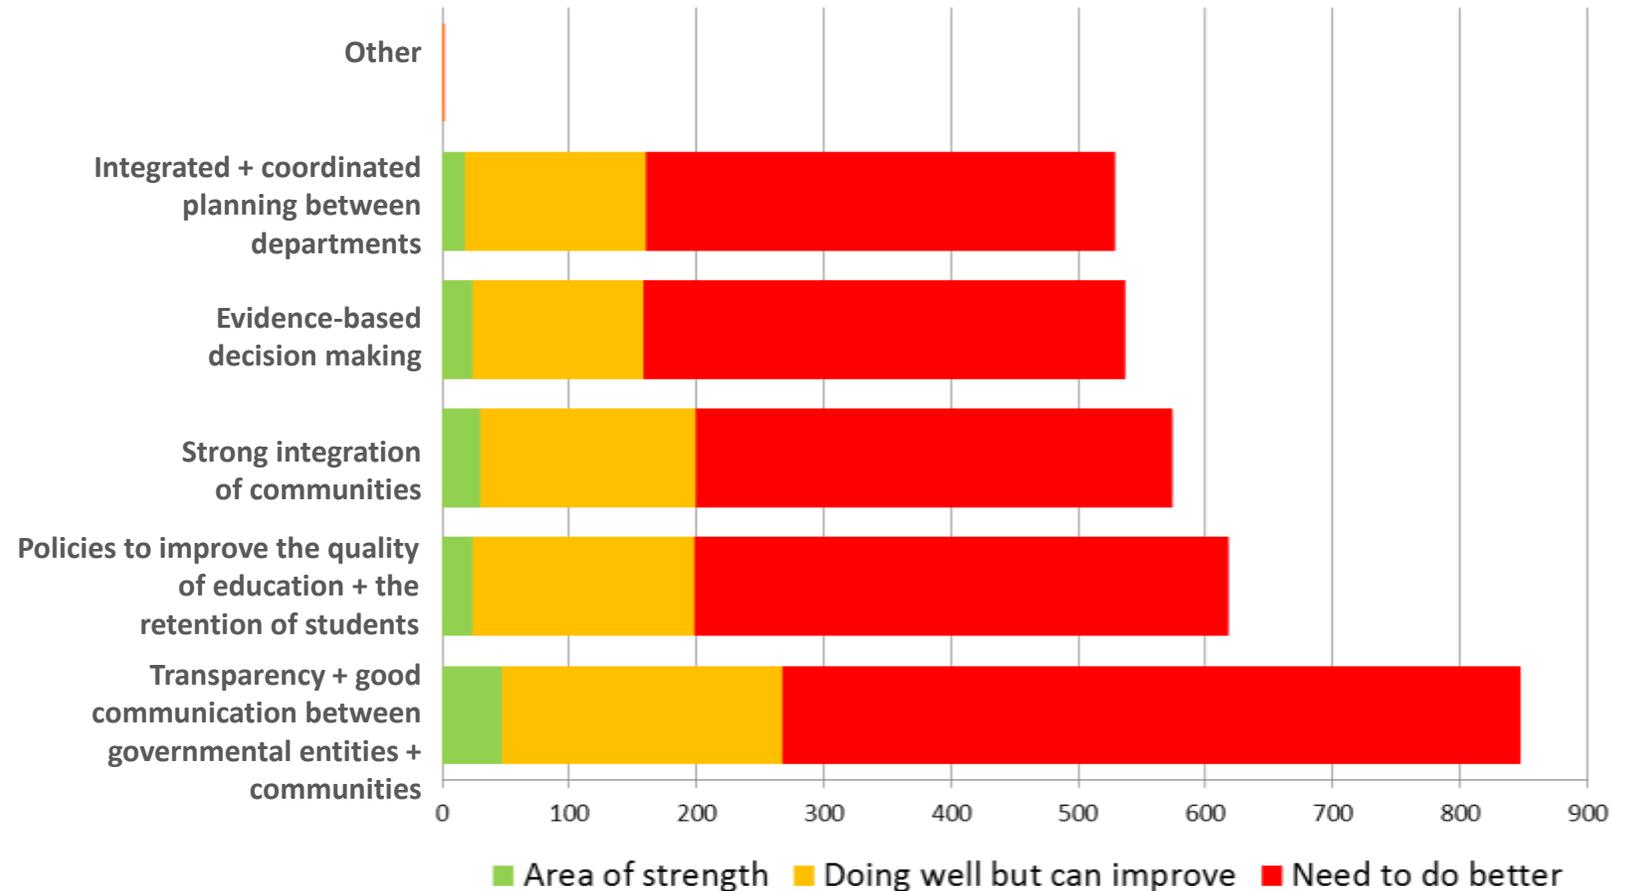

Leadership + Strategy

Questionnaire Responses Key Findings

Choose two factors that you feel are most important and rate how you think we're performing.

Leadership + Strategy

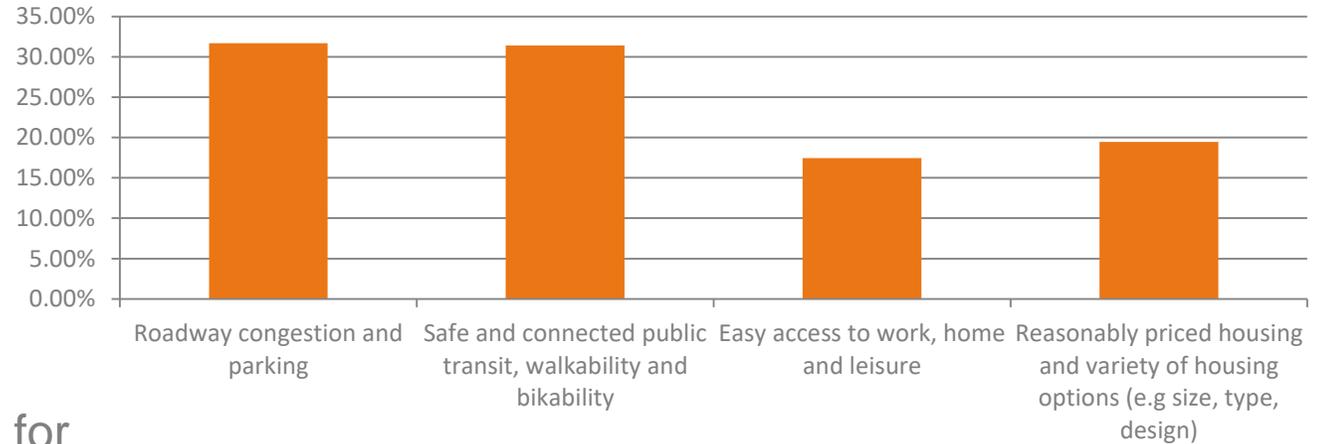

Promotes effective and efficient management; empowers a broad range of stakeholders; promotes long-term integrated planning.

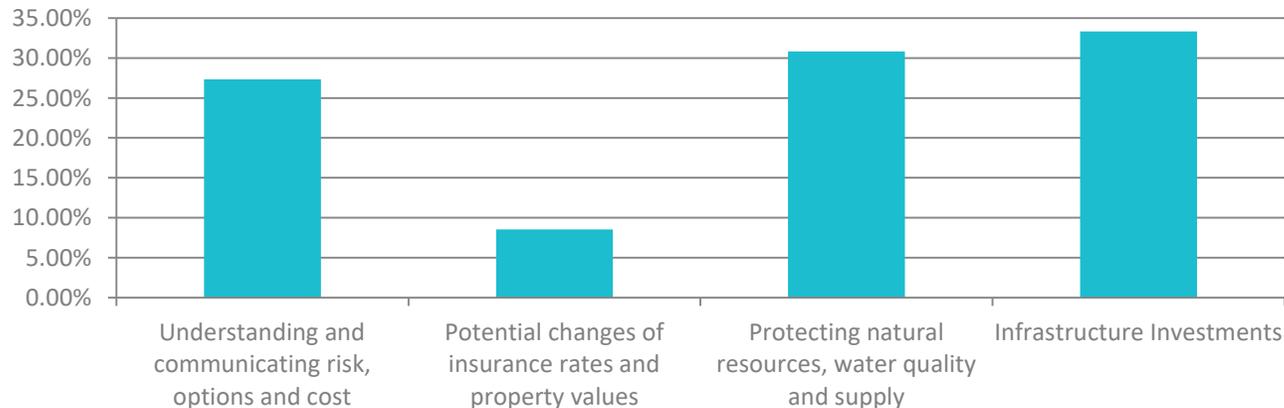

Infrastructure Investment

Questionnaire Responses Understanding Priorities

What is most important to you in terms of mobility and housing?

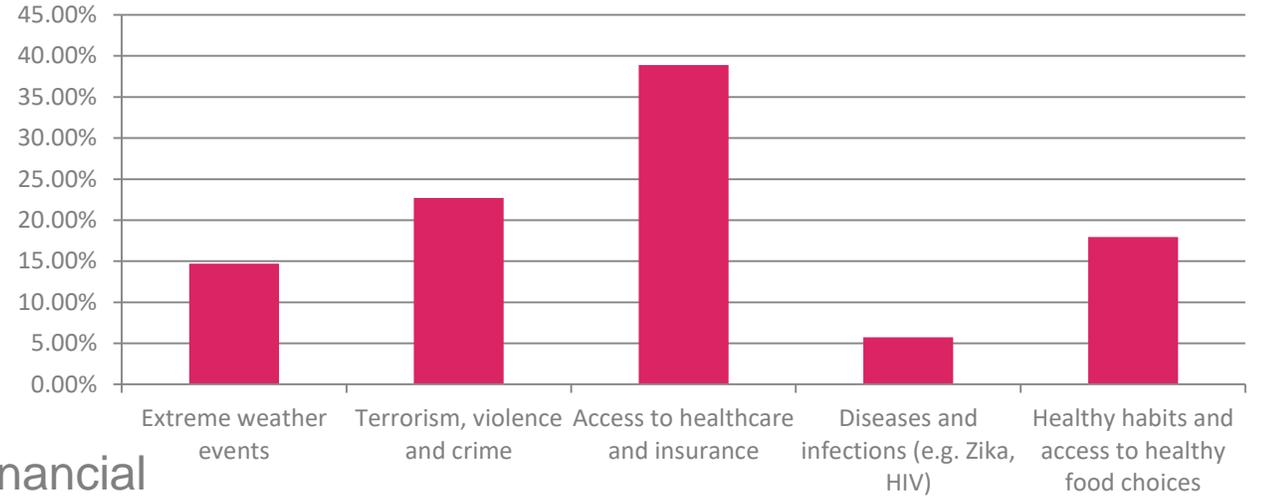

What do you think should be more important for adapting to sea level rise, flooding and storm surge?

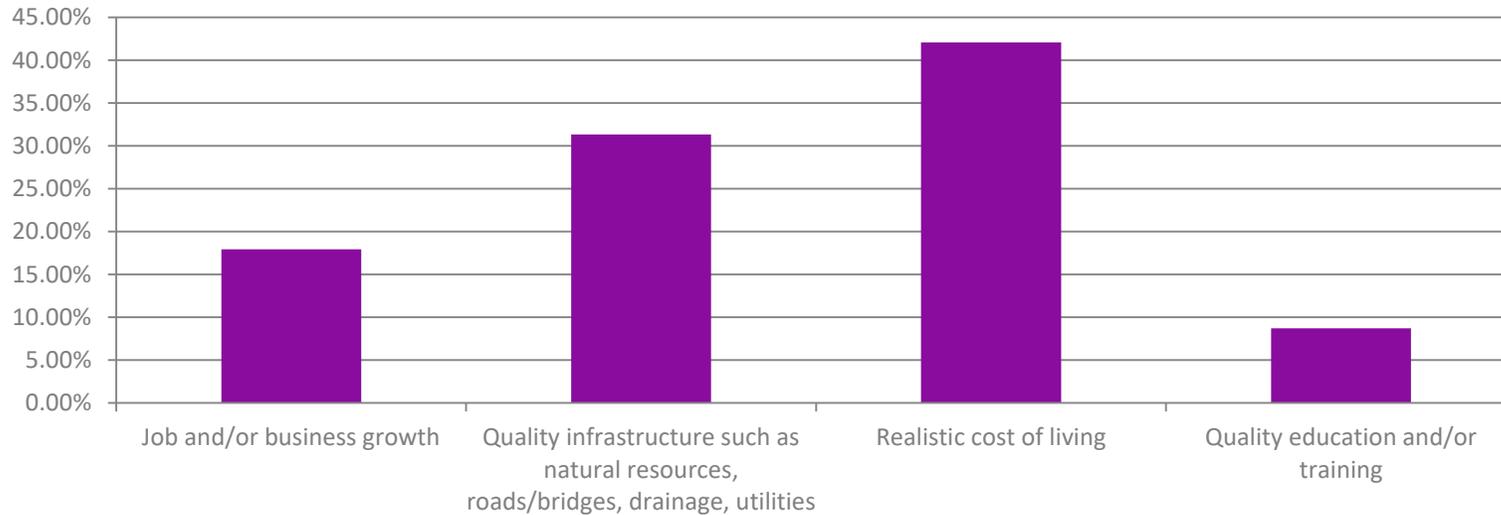

Human Investment

Questionnaire Responses Understanding Priorities

What is your top health and safety priority?

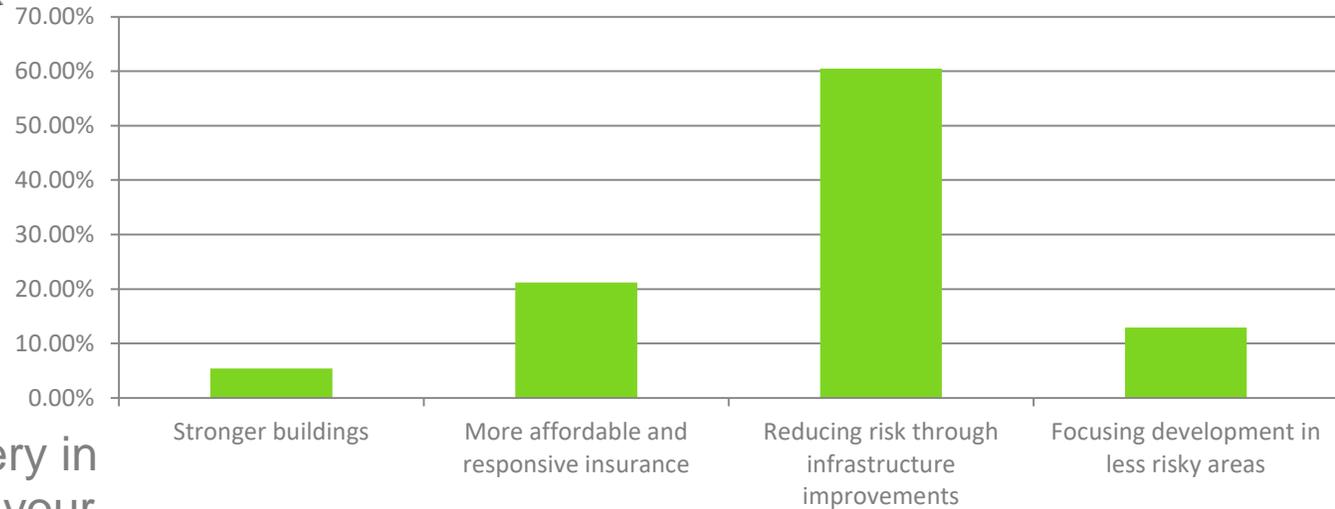

What would ensure you and your family's financial success and longevity in GM&B for future generations?

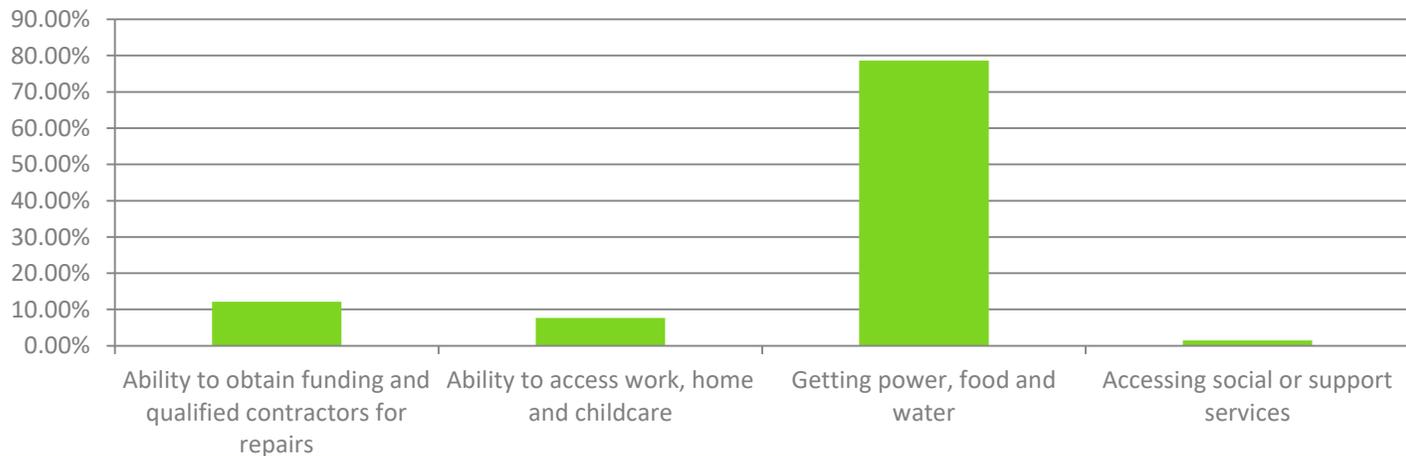

Recovery Investment

Questionnaire Responses Understanding Priorities

What should government start to plan for now to prepare and recover from a potential disaster?

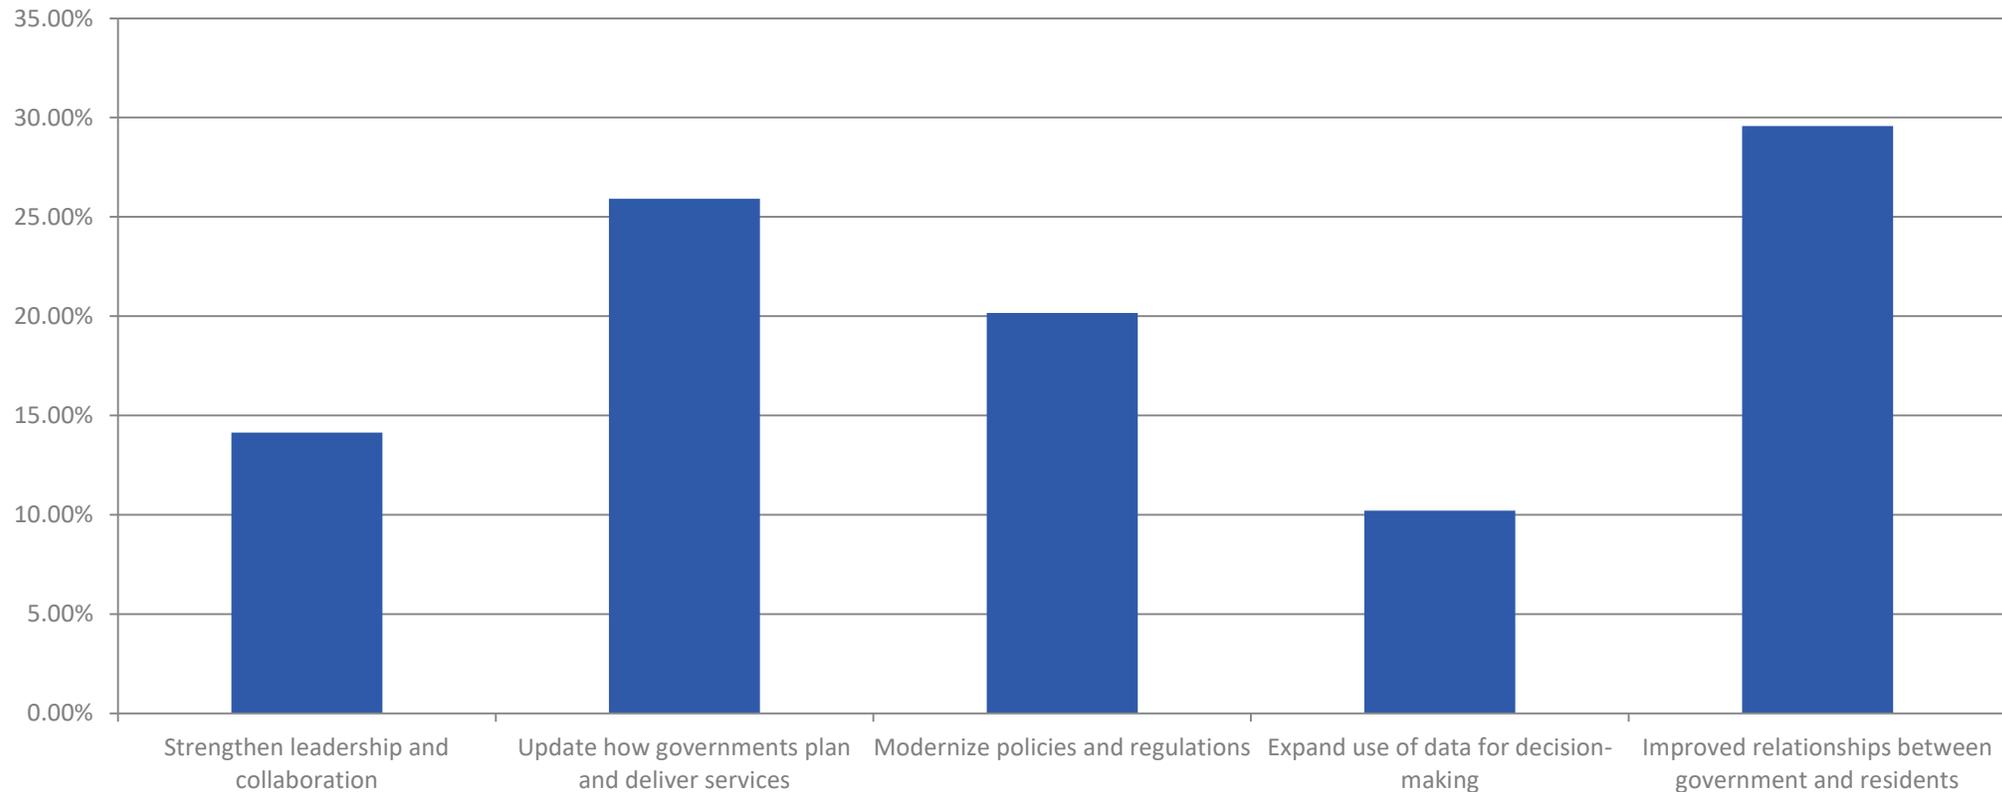

What is most important to you for quick recovery in the event of a disaster like a storm (assuming your friends and family are safe)?

Collaborative Investment

Questionnaire Responses Understanding Priorities

How can local government best address the priority areas previously mentioned?

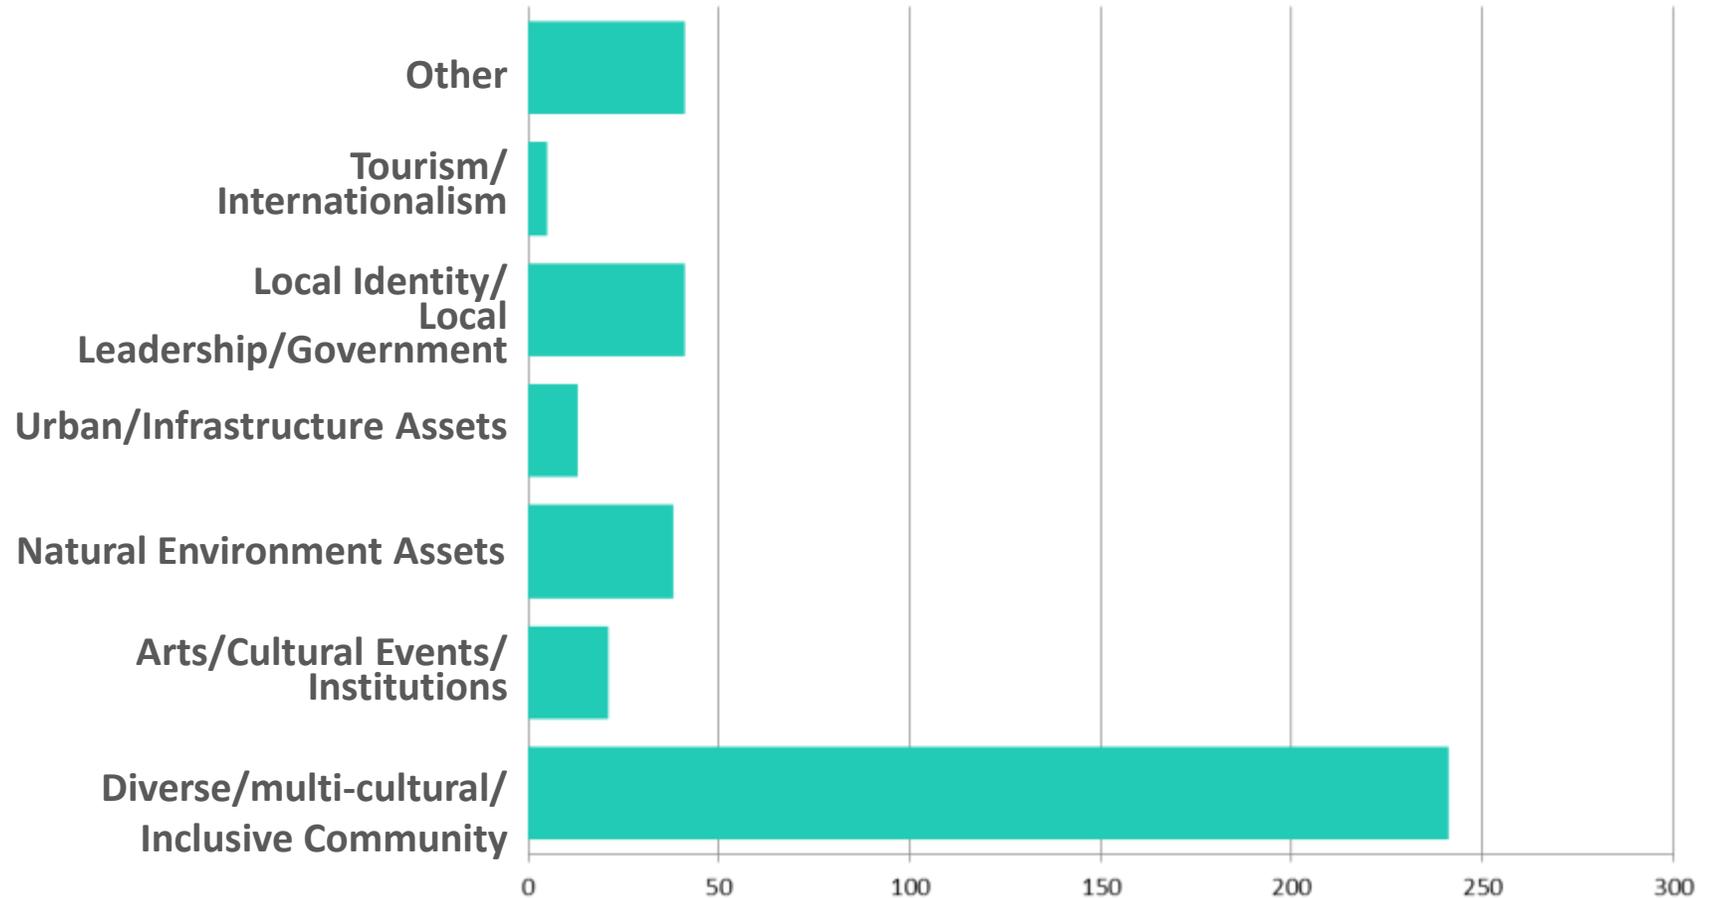

Personal Investment

Questionnaire Responses Key Findings

What makes
you **proud**
of our
community?

**This is a sample set, categorizing 400 of the approximately 1,100 responses.*

Personal Investment

Questionnaire Responses Key Findings

What makes
you **proud**
of our
community?

*“I'm proud of our clean beaches, new bike lanes, city bikes, programs for the community...improving schools, a government that cares for growing this city forward!”
—Real estate professional*

“Its growth in the arts and performing arts and creation of major world class festivals.” —Visitor

“I love the diversity of our people and our beautiful natural resources.” —Non-profit professional

“The natural environment and the cosmopolitan feel of our community.” —Tourism + entertainment professional

“Our open arms to people from other countries, especially those facing danger and socioeconomic hardship in their home countries.” —Tourism + entertainment professional

Discovery Areas

RESILIENT
GREATER MIAMI
& THE BEACHES

Discovery Areas

The Resilient GM&B team has engaged residents and organizations to **prioritize Discovery Areas for further investigation.**

The Discovery Areas outlined in the following pages are the **framework for our next body of work.** They will help us **understand risk, recognize connections, and focus on data.**

Here is what we have learned:

Building On Our Strengths

Discovery Areas

We are proud of our rich cultural diversity. This is one of our greatest strengths. Diversity with real dialogue and strong relationships result in great opportunities.

We are a **series of neighboring communities** with distinct challenges and opportunities from neighborhood to neighborhood or from one side of the highway to the other. We crisscross each other from Little Havana to Homestead.

How do we stop and connect? **How do we empathize and uplift?** How do we create a cohesive GM&B community of communities? A beautiful mosaic or quilt – that can stand alone, **but is so much stronger together?**

We propose six Discovery Areas.

Discovery Areas

RESILIENT GREATER MIAMI & THE BEACHES

Living with Water:

Innovative Infrastructure Investments

Advancing + Adapting:

How We Live + Move

Building Prosperity:

An Economy for All

A Thriving Community:

Safe Neighborhoods
+ Healthy Neighbors

Robust Recovery:

PREPlanning for
POSTRecovery

Leadership for Tomorrow:

Staying Ahead
of the Curve

Cross-Cutting Themes

Discovery Areas

The six Discovery Areas are inter-related. Our systems need to be modernized and moved away from typical silos to more collaborative, creative, and entrepreneurial solutions. We therefore propose **three Cross-Cutting Themes** across each Discovery Area.

Cross-Cutting Themes

- Too many of us are struggling just to find living-wage jobs, affordable housing, and feel safe in our neighborhoods, therefore we need to address **Social Equity** head on.
- These complex matters require a multidisciplinary approach and must incorporate **Innovation and Technology**.
- As an **Intergovernmental Collaboration** from the start, GM&B has an opportunity to seek solutions that involve multiple public and private sector partners.

Discovery Areas

Living with Water

Innovative Infrastructure

SITUATION: Southeast Florida is vulnerable to sea level rise due to its **low elevation**, **unique geology**, and the **density of coastal development**. However, there are many **opportunities for innovative adaptation** with mangroves, dunes and parks, and innovative building materials and designs.

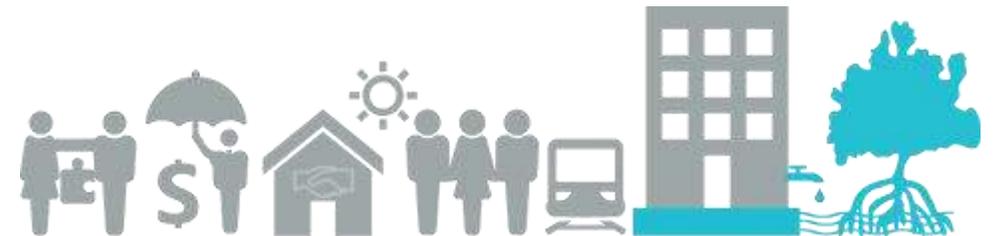

INTENT: This discovery area will focus on **investing in natural and man-made infrastructure** to rise above and learn to live with water to create a more resilient community in the face of storms and sea level rise.

Connecting Context to Discovery

Living with Water Innovative Infrastructure

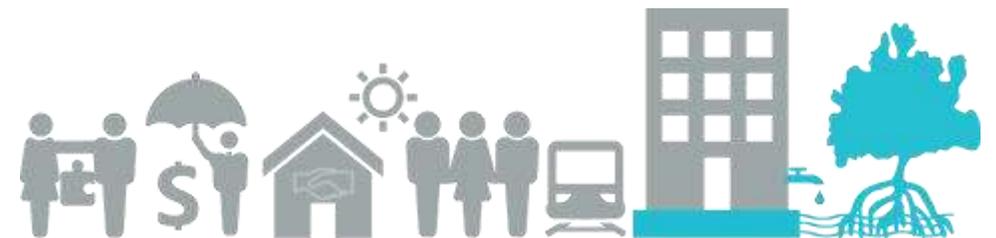

While we are a **subtropical region**, famous for our **connections to water**, we are also a low-lying region, **vulnerable to flooding, sea level rise** and **coastal erosion**. We are leading **innovative infrastructure investment** in some areas, but **aging infrastructure** is a both a concern and an **opportunity to rebuild in better ways** that **enhance our people and environment**.

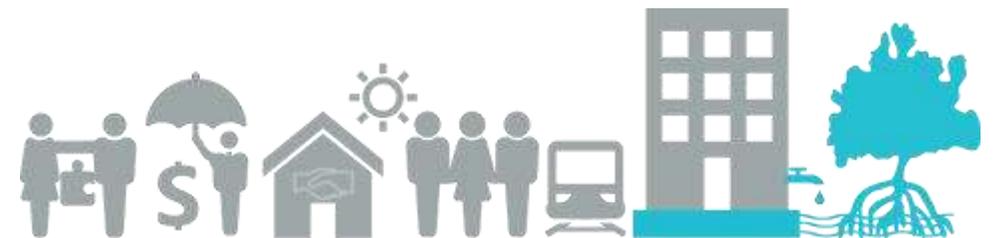

Connecting Context to Discovery

Living with Water Innovative Infrastructure

We can build upon vulnerability assessments, architectural innovation, solutions that **incorporate gray and green infrastructure**, the **strong Florida Building Code** that requires construction to withstand Category 5 hurricanes. We can point to the **Southeast Florida Climate Change Compact** as a testament to **collaborative leadership** for climate change, but **social equity** needs more work. **Climate change, environment and water management** were top priorities in our questionnaire.

- **Coordinated and Committed Planning:** How do we proactively plan, coordinate, and use consistent data and communications strategies across governments and the private sector to address sea level rise risks?
- **Funding:** How do we utilize existing budgets and leverage innovative financing and funding mechanisms to equitably implement adaptation projects and improvements to aging infrastructure?
- **Natural Systems:** How do we use emerging science to plan for and manage sea level rise impacts on coastal erosion and natural ecosystems?

An aerial photograph of a busy street lined with palm trees. The street is filled with cars, and many people are walking on the sidewalks. The scene is captured from a high angle, looking down the length of the road.

Advancing + Adapting

How we live and move

SITUATION: Residents spend too much time **commuting**, and **struggle to find reasonably priced housing** that fits their needs. We are the **Gateway to the Americas** with the one of the largest **international airports** and the **top cruise port in the U.S.**, wages are lower than the national average, and housing costs are high.

INTENT: This discovery area will focus on **improving livability, affordability, and connectivity** in GM&B.

Connecting Context to Discovery

Advancing + Adapting How we live and move

We have strong, well-developed, **international transportation assets** with well-developed supporting networks for goods. However, for **people trying to get from home to work**, our public transit and roads are **overtaxed and unreliable**. We are densely populated, geographically large, and a high growth region, which places stresses on **housing access and affordability** and causes even more **traffic & transportation** stress. International investment makes our real estate more expensive than **local communities** can afford. **Transportation and housing** have been top concerns through stakeholder engagement.

- **Equity:** How can we work with the SMART Plan consortium to integrate **social equity issues** such as ensuring adjacent neighborhoods to the corridors **include affordable housing and mixed use development**?
- **Integrate:** How do we integrate **innovative housing and job opportunities** into **future transportation** planning activities, **while addressing existing social equity issues**, diversifying existing housing stocks, and avoiding future risk from flooding and sea level rise?
- **Collaborate:** How do we **improve intergovernmental collaboration** among public and private entities producing affordable housing to **promote the production of mixed-income and mixed use developments**?

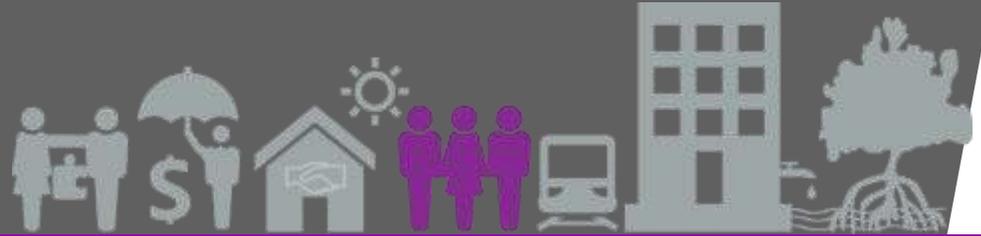

Building Prosperity An Economy for All

SITUATION: Our **economy lacks diverse**, highly paid and living wage jobs. Our **poverty rate is above the national average**. We are a **city of immigrants** with a constant influx of people moving here for a better life.

INTENT: The discovery area will focus on **workforce development, expanding and diversifying job supply, and education**.

Connecting Context to Discovery

Building Prosperity An Economy for All

We are an international tourism destination, but our **economy is over reliant on lower paying service oriented jobs**. Our economy would benefit from diversity that offers higher paying wages to help people better afford high housing costs. **Educational attainment is improving** however schools have difficulty attracting teachers due to **high cost of housing**, and education is challenging given GM&B's **complex demographics**. **52% of Greater Miami and the Beaches is foreign born**. Overall, our focus groups across diverse **communities** felt that our greatest weakness is GM&B's ability to **“support livelihoods and employment.”**

- **Priorities:** How do we ensure that our economic and workforce development programs are addressing the dramatic disparities that exist between our racial and ethnic groups?
- **Innovation:** How could technology, private, civic and government sector **partnerships** help our workforce development programs to better **address the needs of our most vulnerable?**
- **Opportunity:** How do we **leverage the major investments in infrastructure to ensure local and inclusive access** to the resulting business and job opportunities?

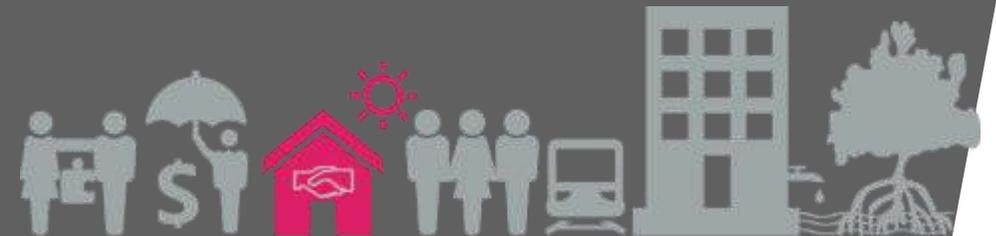

A Thriving Community Safe Neighborhoods + Healthy Neighbors

SITUATION: Significant pockets of our community suffer from **violence, crime, addiction, and poor health**. Climate change and globalization have intensified public health concerns to South Florida such as **Zika**.

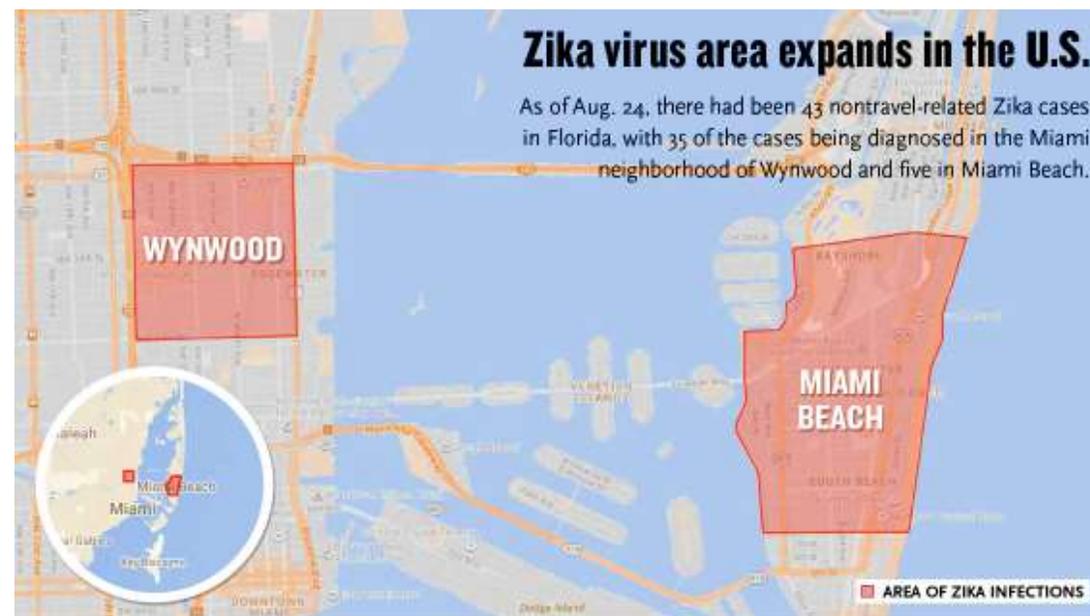

INTENT: This discovery area will **examine these issues of safety, youth violence, pandemics, and public health**.

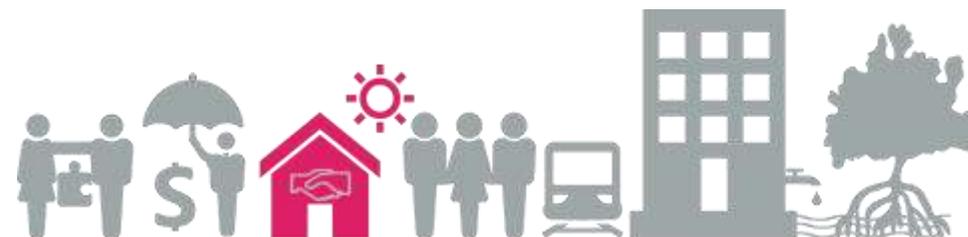

Connecting Context to Discovery

A Thriving Community Safe Neighborhoods + Healthy Neighbors

Our geographic location, climate, and position as an **international port city**, makes us highly vulnerable to **international crime, drug activity**, and vector-borne illnesses like **Zika**. Our **poverty rate is higher than the national average**, and is made worse by the chronic lack of affordable housing. We also face **high rates of endemic crime** especially in communities with high rates of **poverty and associated socioeconomic indicators**.

Source: *The Miami Herald*

Pending Questions for Phase II

A Thriving Community Safe Neighborhoods + Healthy Neighbors

- **Advance:** How do we elevate, accelerate, and integrate the work products of our university and other partners to better prepare our systems to prevent, respond to, and recover from changes in public health due to climate change, globalization, and urbanization?
- **Equity:** How can we prioritize neighborhood enhancements, engagement and access to opportunity in neighborhoods experiencing high incidences of violent crime and poverty?
- **Intervention:** What sort of cross sector, data-driven and/or technology-based interventions could be effective to respond to the root causes of the opioid and HIV epidemics?

Robust Recovery

PREPlanning for POSTDisaster

SITUATION: We are **vulnerable to hurricanes and flooding** but well-known throughout the nation for our **advanced emergency management.**

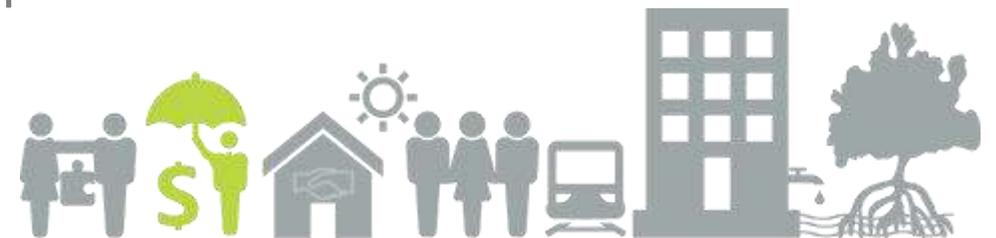

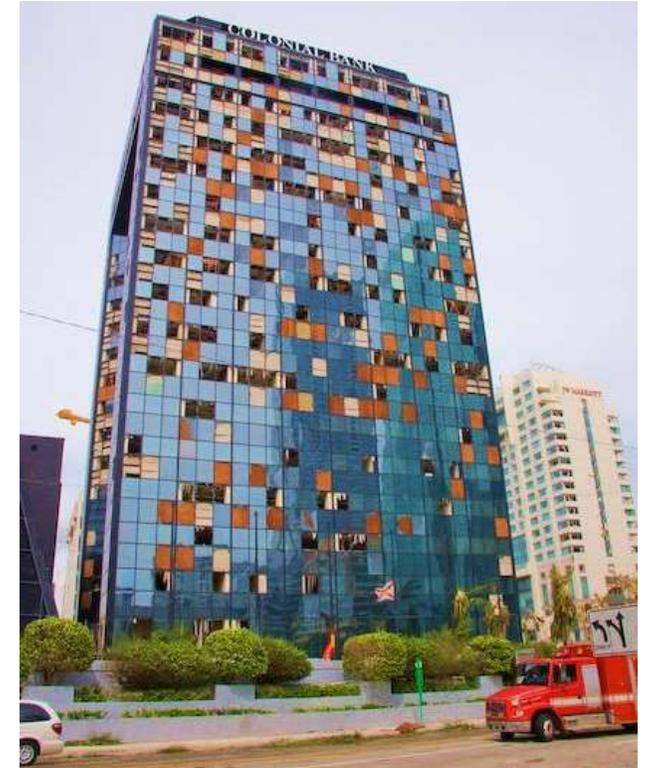

INTENT: This discovery area focuses on **how to change our culture and policies, systems, and insurance structures** now for faster, more affordable, and smarter recovery in the event of a disaster.

Connecting Context to Discovery

South Florida is vulnerable to **hurricanes and flooding** but these risks have strengthened our **emergency management**, preparation and response systems . We have learned that building upon this strong foundation will accelerate **robust recovery**. In order to **help neighborhoods** recover quickly and **equitably**, we need to **strengthen private and public sector commitments**, focusing our attention on **collaboration and innovation** to protect **our greatest assets: our people and our places**. Financially, we must design our **recovery contracts, finances, and insurance** to reduce the financial and human impacts of **shocks** and **stresses**. As we envision risk reduction in the future, we must **consider new land use approaches**. Greater Miami and the Beaches desire to bounce forward, not just bounce back.

Robust Recovery PREPlanning for POSTDisaster

Pending Questions for Phase II

Robust Recovery PREPlanning for POSTDisaster

- **Structure and Systems:** What plans and policies can we put in place now for post-disaster rebuilding to **protect our tax base** and allow for **fast and smart response and recovery**? What systems and services do we need and how are these systems interdependent?
- **Culture & Social Equity:** How do we create a **culture of pre-disaster readiness and planning** among individuals, businesses, and governments? How do we create **customized tools** targeted to **diverse audiences with distinct needs**?
- **Disaster Finance & Innovation:** What kind of financing mechanisms do organizations and residents need to rebound quickly? How can we improve **insurance affordability** to ensure that adaptive measures are reflected in **reduced risk, and to optimize recovery** through insurance and financing for governments, residents, and businesses?

“Our goal is to bounce forward, not just bounce back.”

—Coastal Assistant City Manager

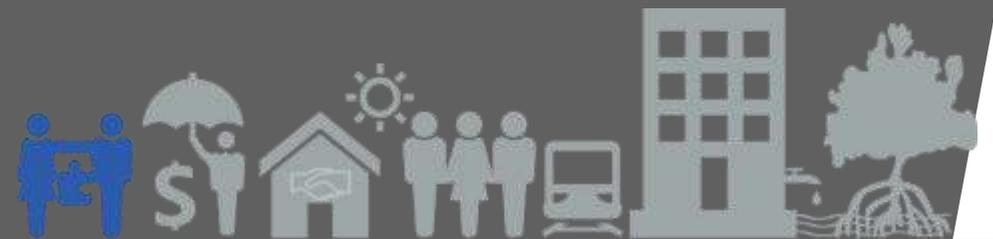

Leadership for Tomorrow

Staying Ahead of the Curve

SITUATION: We have **2.7 million people** and growing, **35 mayors**, approximately **1.2 million registered voters**, **12 million tourists**, and more than 2000 square miles.

INTENT: This discovery area will focus on **how to build consensus, collaboration, and courage** across organizations and communities to address shocks and stresses and **turn challenging systems designed for the past upside down.**

@FIUinstagram

Connecting Context to Discovery

Leadership for Tomorrow Staying Ahead of the Curve

The GM&B **collaboration is comprised of three separate government entities**. GM&B also has 31 additional municipalities as well as state and federal partners to determine the best ways to address complex shocks and stresses such as: **transportation, housing, economic shocks, and poverty**. GM&B has strong partnerships to address sea level rise and disasters such as the Southeast Florida Climate Change Compact, **the Local Mitigation Strategy, and the Urban Areas Security Initiative**. However, **our complex dynamic often creates a collaborative Rubik's cube**.

- **Collaboration:** How do we **modernize** the way government does business, given the threats we face? How do we **create, organize, and commit** a culture of interdisciplinary and interjurisdictional **collaboration** around resilience? How do we use GM&B as the model for better city-county coordination? How do or can cities better access the county to know what projects are happening and how cities can help and participate? What legislative changes are needed to achieve more integrated practices?

- **Data & Innovation:** How we expand and innovate sophisticated use of data in government operations such as **open data, performance management, chief innovation officers, and smart cities** to inform the decision-making process? How do we build **smart decision-making** for resilience?
- **Engagement & Social Equity:** How do we expand **effective public participation** with all residents, businesses, and community groups?

Next Steps

Next Steps

Areas for Discovery Toward a More Resilient GM&B

Fall **2016**

Summer **2017**

Fall **2018**

We are Here

Institutionalize and Implement

We will investigate the pending questions in the six discovery areas to help identify actions for a robust Resilience Strategy.

Acknowledgements

thank you

This PRA is a milestone that could not have been completed without the diversity and passion of our community. Thank you to our partners in this journey—and we look forward to your roles evolving from shaping the Discovery Areas to be part of the resilience strategy implementation.
