

GREEN Miami-Dade County Matching Grant

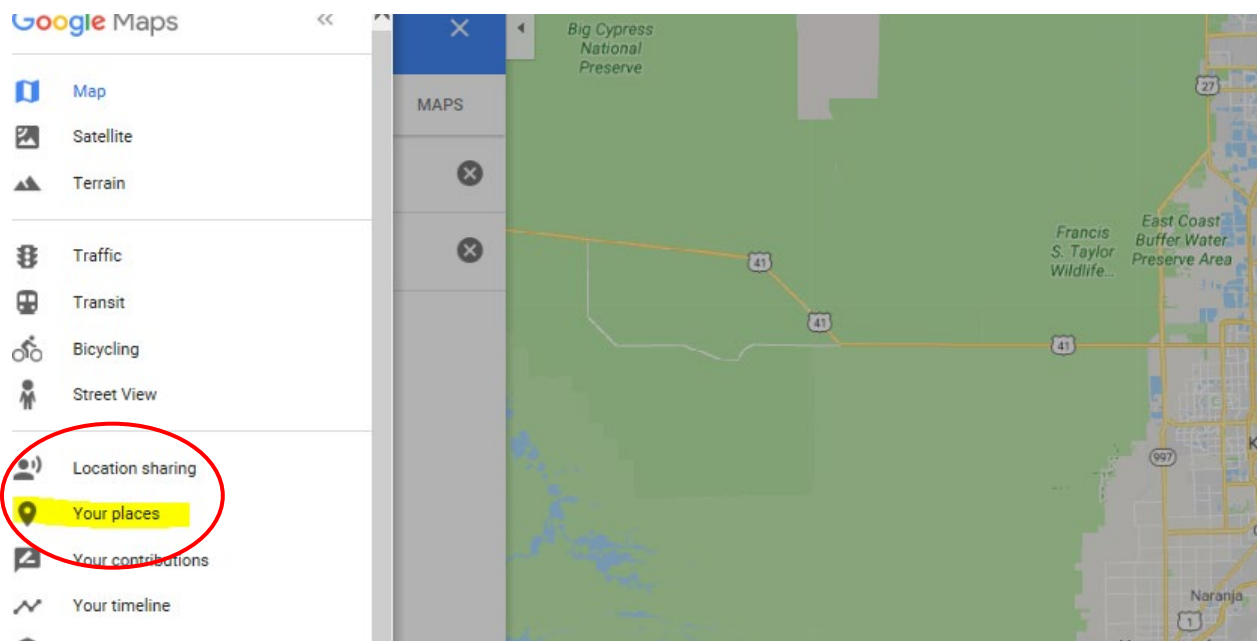

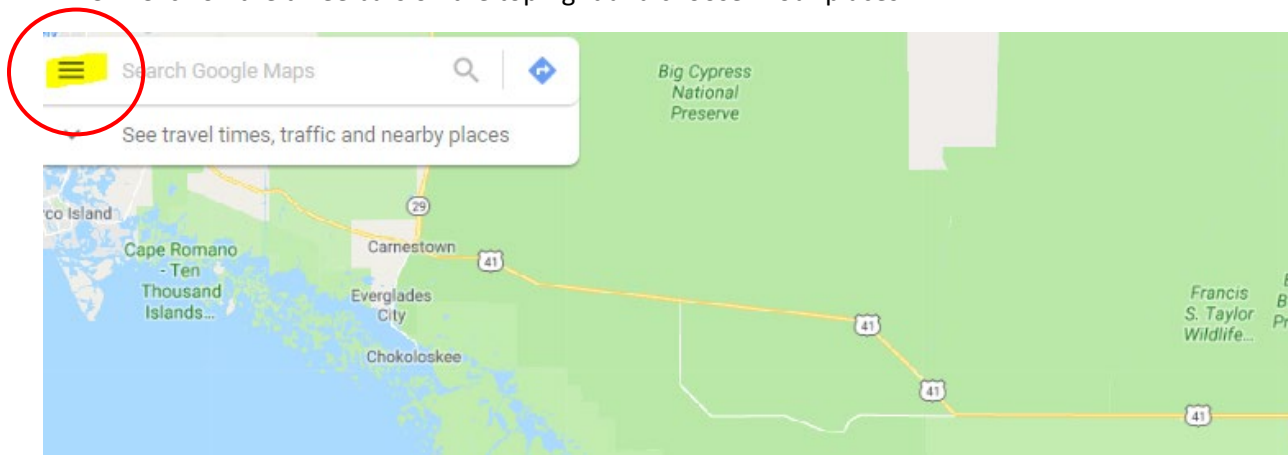

How to Create a Planting Plan in Google Maps Live

Please note, if you are planning on planting more than 10 species as a part of this project, you will need to submit two (or more) Google Live Planting Plans (Maps), as there is a 10-layer limit per map.

CREATING A MAP

- 1- Go to google.com/maps
- 2- Sign-in (or create a google account)
- 3- Click on the three bars on the top right and choose “Your places”

3- Copy the link and paste in your application.

A screenshot of a JotForm titled "Planting Plan". The form is displayed on a desktop view, as indicated by the "Desktop" tab being selected in the top right corner. The form has a green header bar with the URL "https://form.jotform.com/201275695t" and a "Fill Form" button. The main content area is divided into two columns by a green vertical bar on the left. The right column contains the form fields. The first section is titled "Planting Plan" and contains a text box with instructions: "For instructions on how to create a Planting Plan in Google Live Maps, please click [here](#). Please note, if you are planning on planting more than 10 species as a part of this project, you will need to submit two (or more) Google Live Maps / Planting Plans, as there is a 10-layer limit per map." Below this is a section titled "Submit Planting Plan / Google Live Map Link(s)" which contains a large, empty text input field. This field is circled in red. Below the input field is a section titled "Existing Tree Canopy and Income Level" which contains a text box labeled "Target area's existing tree canopy by block group *" with an example value of "15%". The JotForm logo is visible in the bottom left corner, and a footer bar at the bottom contains the text "Now create your own JotForm - It's free!" and a "Create your own JotForm" button.
