How to Create a Planting Plan in Google Maps Live

Please note, if you are planning on planting more than 10 species as a part of this project, you will need to submit two (or more) Google Live Planting Plans (Maps), as there is a 10-layer limit per map.

CREATING A MAP

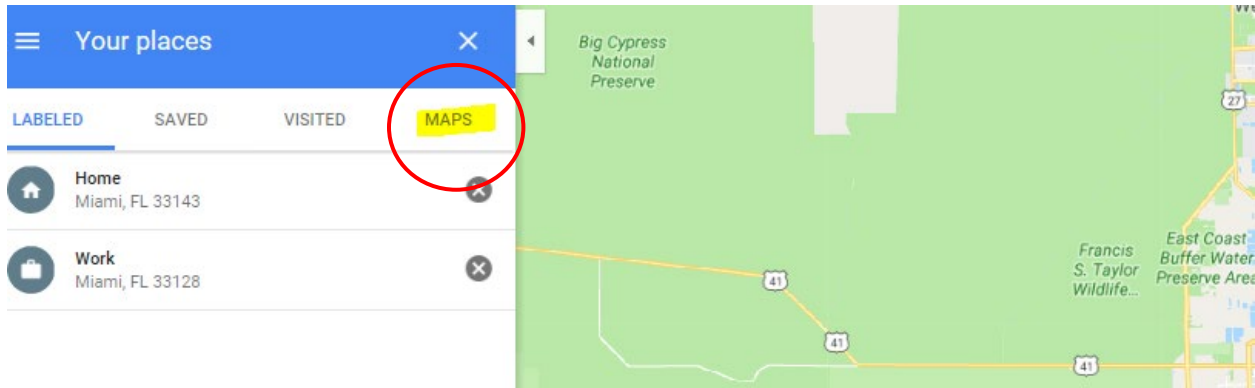

- 1- Go to google.com/maps
- 2- Sign-in (or create a google account)
- 3- Click on the three bars on the top right and choose “Your places”

PLOTTING TREE BY SPECIES

1- To add a tree species, click on “add layer”

2- Click on “Untitled layer” and name the specie.

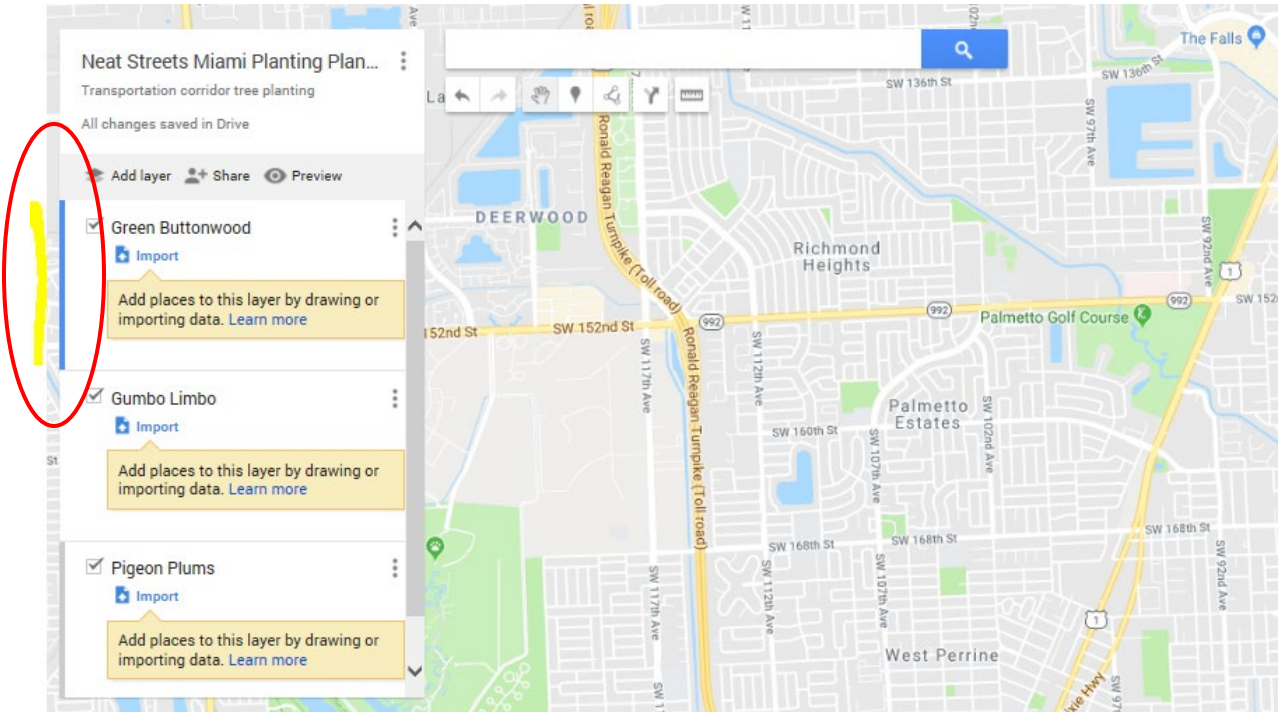

*** Repeat steps 9 and 10 until all species have been entered***

3- Copy the link and paste in your application.

The screenshot shows a web form titled "Planting Plan" on a JotForm platform. The form is displayed on a desktop view. At the top, there is a URL bar showing "https://form.jotform.com/201275695t" and a "Fill Form" button. The form content includes a section titled "Planting Plan" with a text box containing instructions: "For instructions on how to create a Planting Plan in Google Live Maps, please click [here](#). Please note, if you are planning on planting more than 10 species as a part of this project, you will need to submit two (or more) Google Live Maps / Planting Plans, as there is a 10-layer limit per map." Below this is a section titled "Submit Planting Plan / Google Live Map Link(s)" with a large empty text input field, which is circled in red. Further down is a section titled "Existing Tree Canopy and Income Level" with a sub-section "Target area's existing tree canopy by block group" and a text input field containing "Example: 15%". The JotForm logo and a "Create your own JotForm" button are visible at the bottom.
