4.0 Learning and Growth

Objective	Description	Owners
Forensic Imaging Bureau (FIB) Storage Capacity Expansion GG3-2	Current Situation: Current capacity is 25 TB of storage space. It stores all pictures in the original format (RAW) from all our Medical Examiner cases and other work areas starting in 2006. These means an average of 2 TB per year of data. This data by standard operating procedure (SOP) established by ME personnel requires the data to be separated from any access to the internet. These allows for the integrity of the pictures not to be questioned in a court of law. Goal: Replace the existing storage unit with a newer higher capacity storage unit to accommodate current production by three times the current space. Total capacity will be 82TB. The current storage unit will become the online archive unit for the system. This will allow to move non-current data by fiscal year and liberate space from the newer storage unit and keep the data protected.	Rivera-Morales, Jorge (ME)

Objective	Description	Owners
CME Modifications - Electronic Signature GG 3-2	Enhance existing operations for the software department wide to give employees the ability to authenticate their signature with a password code. All reports that are requiring a hand signature will be stamped with the name of the user as an electronic signature.	Rivera-Morales, Jorge (ME)

Initiatives Linked to Objective	Est. Start	Est. End	Type	As Of	%	Status	Owners
