

TARIFF NO. 010

ORIGINAL

PAGE 53

**SECTION ELEVEN
GENERAL INFORMATION**

**ISSUED JANUARY 1, 1994
EFFECTIVE MARCH 31, 1994**

FMC SUBRULE: 34-G01

FOR EXPLANATION OF SYMBOLS, SEE PAGE 0-A (AFTER TITLE PAGE)

General Information		
<p>The Miami Harbor embraces the artificial basins, slips and channels that have been dredged along the bay front of Miami and in the bay and through the waters of Biscayne Bay to the ocean, and is located generally at Latitude 25-46' No. Longitude 80-10'W.</p>	<p>MIAMI HARBOR</p>	<p>800</p>
<p>The entrance to the main channel is directly east of the City of Miami, approximately 4.5 miles. The sea buoy marking the channel entrance through the reef is about 2 miles offshore. The entrance is an artificial cut 1,000 feet wide, known as Government Cut, dredged across the southern end of Miami Beach. It is protected by jetties and is well marked. A channel has been developed to a control depth of 44 feet, and 500 feet wide on the sea end to the jetties and 500 feet wide with a control depth of 42 feet to the turning area on the east tip of Lummus Island thence into Fisherman's Channel along the gantry berth area for a distance 4,100 feet. The Fisherman's Channel continues westward for 8,000 feet at depth 25 feet. The main channel along the northside of Lummus and Dodge Islands is 500 feet wide with a 36 foot control depth which continues westward across Biscayne Bay to the main turning basin.</p>	<p>MAIN CHANNEL</p>	<p>802</p>
<p>From Government Cut, the Fisherman's Channel has been dredged with a control depth of 42 feet for the easternmost 4,100 feet and a control depth of 25 feet for 8,000 feet to the west. Minimum width of 500 feet, Fisherman's Channel provides a direct connection to the wharves on the south side of Dodge and Lummus Islands and the mouth of the Miami River. At the extreme west end of Fisherman's Channel, a 1,000 foot turning basin is dredged to a control depth of 25 feet to facilitate turning movement of ships to and from the Miami River. At the wide point of the Fisherman's Channel, a 900-foot wide turning basin is provided at the location of the east channel slip.</p>	<p>FISHERMAN'S CHANNEL</p>	<p>806</p>
<p>The main turning basin is 1,700 feet north and south and 1,650 feet east and west, with a control depth of 36 feet.</p>	<p>MAIN TURNING BASIN</p>	<p>808</p>
<p>An additional turning basin is located in the triangular area between the main channel and the north side of Fisher Island and is dredged 42 feet to provide a turning basin at the junction of the main and Fisherman's Channels.</p>	<p>FISHER ISLAND TURNING BASIN</p>	<p>810</p>
<p>Miami River has channel dredged to 15 feet at high water, 150 feet wide for a distance of 3 miles above the mouth, thence 125 feet wide to a point 4.1 miles above the mouth; thence 90 feet wide to a point 5-1/2 miles above the mouth, and is connected to the Fisherman's Channel on the south side of Dodge and Lummus Islands.</p>	<p>MIAMI RIVER</p>	<p>812</p>
