Product Control Advisory

Expedited NOA Review

All Product Categories

The Product Control Division is proud to announce the expansion of its expedited services to all categories of products. With the original introduction of an expedited program for glazed products in July 2001, this extension allows any NOA application filed to be requested for expedited services.

As a continued commitment to improve the way we serve our clients, manufacturers can take advantage of this optional service by simply checking off the "Expedited" box on the Product Approval application. By marking the box on the application, the manufacturer agrees to pay all costs incurred by our Office in the process. These costs are in addition to those stated in the current fee schedule, and cover charges paid to the consultants.

Manufacturers, who currently have an application submitted to our Office may also take advantage of this new option by simply writing us a letter requesting the "Expedited Review Process" and agreeing to cover any additional cost.

The "Expedited Review Process" requests will be handled in order of submittal. Under this "Expedited Review Process", a substantial reduction in the review turn around time is anticipated; a reduction of 30 days or more is expected.

The product Control Division looks forward to the success of this program and appreciates the opportunity to continue serving the industry.
