Internship Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

The Miami-Dade County Psychology Internship Program's overall aim is to prepare interns to be health service psychologists at the entry level. This is achieved through a general track, exposing students to a varied population ranging from young children to older adults. Interns work with diverse clients throughout Departmental divisions; cultural and individual diversity is embedded across all programs. The Community Action and Human Services Department is the social services Department of Miami-Dade County and offers clinical experience across the following populations: substance use, pre-school children, older adults and adults with disabilities, and domestic violence and human trafficking survivors. Interns will implement evidence-based interventions throughout their adult and child focus rotations during the internship year. Testing opportunities take place across the rotations to inform treatment and measure progress. Clinical supervisors oversee these service areas, mentoring the interns and exposing them to an array of theoretical orientations. Interns are an intricate part of the programs' multi-disciplinary teams and participate in professional development activities such as staffing, program evaluation, consultation, community outreach, training, and advocacy. This is an opportunity to further enhance communication and inter-professional skills. Interns also work closely with practicum students; they are exposed to a supervisory role with Psychology Trainees through the internship program's Mentor-Practitioner model. There are also opportunities for the interns to participate in providing professional presentations and staff trainings within the Department and community, fostering scholarly inquiry and dissemination of research. Throughout the internship, professional values and behaviors are further developed to help prepare interns to become competent health service psychologists. For detailed information about the internship program, download the Psychology Internship Handbook from the program website, <https://www.miamidade.gov/socialservices/library/psychology-internship-handbook.pdf>.

Does the program require that applicants have received a minimum number of hours of the following at time of application? If Yes, indicate how many:

Total Direct Contact Intervention Hours		No	Amount: 600 (preferred)
Total Direct Contact Assessment Hours		No	Amount: 50 (preferred)

Describe any other required minimum criteria used to screen applicants:

Level 2 background check and drug screen/physical is required of interns. Travel is involved and requires one's own personal transportation. Individual interviews occur with a panel, consisting of Training Committee members, Training Director, and a current Psychology Intern. The interview is a structured interview of approximately one hour in length and offered virtually. In-person interviews will not be offered to ensure health/safety and equity to all applicants (i.e., travel expenses). Interview notifications are sent by email as the internship program utilizes National Matching Services Inc System.
