

**MIAMI-DADE COUNTY, FLORIDA
NOTICE TO PROFESSIONAL CONSULTANTS
MIAMI DADE WATER AND SEWER DEPARTMENT
DESIGN SERVICES FOR THE IMPLEMENTATION OF A PUMP STATION
IMPROVEMENT PROGRAM
PROJECT NO. E13-WASD-03**

The County Mayor, Miami-Dade County (County), pursuant to Chapter 287.055, Florida Statutes, Sections 2-8.1 and 2-10.4 of the Miami-Dade County Code, Implementing Order 3-34, and Administrative Order 3-39, announces that the Miami-Dade Water and Sewer Department (WASD) will require professional engineering services from five (5) qualified consultants to provide design services for the implementation of a Pump Station Improvement Program (PSIP). The Consultant will complete all design work and construction documents required to complete the pump station remedial action plans as required by the Consent Decree between Miami-Dade County and United States Environmental Protection Agency (EPA), the United States Department of Justice (DOJ) and the State of Florida Department of Environmental Protection (FDEP).

WASD has a Pump Station Improvement Program ("PSIP") for upgrading the wastewater collection and transmission system ("WCTS") that includes pump stations and force mains pursuant to which each pump station has to be certified as capable of meeting a nominal average pump operating time ("NAPOT") of less than or equal to ten (10) hours per day. Pump stations exceeding the NAPOT criteria must have a Remedial Action Plan ("RAP") and no building permits can be issued for connections to the WCTS upstream of that station until the RAP is completed.

The scope of services required by the Consultant includes, but is not limited to the following:

- Preparation of all documents required for construction such as:
 - Property surveys.
 - Geotechnical reports.
 - Engineering drawings.
 - Technical specifications.
 - Cost estimates.
- Obtain all permits required to carry out the projects.
- Review all shop drawing submittals associated with the projects.
- Process requests for information and change order requests during the construction phase.
- Provide support, including site visits, during the construction phase.
- Perform final project certification with the permitting agencies once the project is completed.

RECEIVED
DEPT. BUSINESS DEV.

2013 SEP 12 AM 7:34

Minimum Requirements:

Prime Consultants must be experienced in all phases of wastewater engineering, including permitting, collection and transmission of wastewater, sewage pump stations, design and construction. Prime Consultant is required to have experience with the design of a least five (5) pump station projects, to include the following:

- One (1) that involved a combination pump station and force main project, and
- Two (2) pump stations designed per WASD standards within the past fifteen (15) years that has been constructed for or conveyed to WASD.

Respondents shall also provide a brief description of each project along with contact information for the owner, where the Department may verify project information.

Respondents shall also provide a description of at least five (5) projects that is relevant to the scope of work specific to their proposed responsibilities for each proposed subconsultant within the last fifteen (15) years.

WASD intends to retain five (5) qualified firms under five (5) separate Non-Exclusive Professional Services Agreements. The term for each contract is five (5) years with one (1) one-year option-to-renew. Total compensation for this solicitation is fifteen million dollars (\$15,000,000.00). Maximum compensation for each agreement is three million dollars (\$3,000,000.00), plus contingency in accordance with Ordinance 00-65. No minimum amount of work or compensation will be assured to the retained consultant. The County reserves the right to re-use the work products of the retained consultant and to retain other consultants to provide the same or similar services at its sole discretion. The consultant coordinator for this project is _____ who may be contacted via e-mail at _____ or fax at _____ with copy to the Clerk of the Board.

TECHNICAL CERTIFICATION REQUIREMENTS

Prime

- 6.01 Water and Distribution and Sanitary Sewage Collection and Transmission Systems
- 6.02 Major Water and Sanitary Sewage Pumping Facilities

Prime/Subconsultants

- 9.01 Drilling, Subsurface Investigations and Seismographic Services
- 9.02 Geotechnical and Materials Engineering Services
- 11.00 General Structural Engineering
- 12.00 General Mechanical Engineering
- 13.00 General Electrical Engineering
- 15.01 Land Surveying
- 16.00 General Civil Engineering
- 17.00 Engineering Construction Management Services

**CBE Goal
BREAKDOWN LIST**

	%	CBE

Good Morning Laurie,

Per our conversation this morning, we are requesting the following revisions listed below to the original submittal. I have also attached the revised NTPC for your records. This may change the CBE goals recommended previously.

Please contact me if you have any questions.

Patty,

Add 9.01 and 9.02 to the Technical Certifications section with 1% each total and 1% each under CBE. Also, eliminate 10.01. To maintain 100% and 40% make 6.02 38% total and 8% CBE. Additionally, in the Minimum Requirements section, change the eight (8) years requirement to fifteen (15) years. Thanks,

Rolando M. Roque, P.E., Chief

Mr. Walters:

Thanks for your fax of yesterday. A few questions & comments:

1. Does this project allow JV?
2. How is it that the letter does not identify 9.01, 9.02, when the scope of work identifies geotech reports?
