Please remove #3 from the minimum experience.

3. The Consultant team should demonstrate their successful design experience with both micro-tunneling and horizontal directional drilling, with the Prime Consultant providing the experience in at least one (1) of the aforementioned trenchless technologies. The Prime Consultant shall provide a list of members of the proposed design team, identifying the overall design manager(s), and the team leaders for key design specialties.

Thank you.

Tyrone,
That question was for large diameter pipeline. E15-WASD-01.

From: Edwards, Daniel J. (WASD)

To: David, Patty (WASD)
Cc: Lopez, Isidoro (WASD); Arteaga, Juan Carlos (WASD)
Subject: RE: E15-WASD-03A/B

Are you sure the correct information for the small diameter pipeline was submitted? The questions appear to pertain to information for the large diameter contract.

Dear Patty,

Please see the two follow up questions below.

1. If less than 3% of the anticipated small diameter pipe design services may need micro-tunneling or concrete pressure pipe, why are they included in Prime Minimum Requirements or why should they be in any requirement at all?
2. Or are these Prime Minimum Requirements mostly intended to reduce the pool of SBE/AEs available to participate in the contract as prime?

“Help stimulate Miami’s economy by supporting Small Businesses”

From: David, Patty (WASD)
Sent: Friday, August 14, 2015 2:18 PM
To: White Jr., Tyrone (ISD); Johnson, Laurie (ISD)
Cc: Lopez, Isidoro (WASD)
Subject: FW: E15-WASD-03A/B

Please see WASD’s responses.

1. We would likely not have very much micro-tunneling with exception to special crossings. My guess would be less than 3%.
2. Since its small diameter pipe, there would be very little in the way of concrete pipe material; maybe some 30-inch gravity. Less than 1%
3. The experience can be met from the individual of the Prime firm and/or subconsultant firm, as applicable.

Please confirm if these questions were related to the small diameter contracts

Thanks

Dan

Importance: High

Good morning Patty,

Please see the questions below submitted from a firm and respond accordingly, thanks.

We have a few questions concerning the Prime Minimum Requirements

1. What percentage of the work of this contract will require **micro-tunneling**, to make it a minimum requirement for the team/Prime?
2. What percentage of the work of this contract will require **concrete pressure pipe**, to make it a minimum requirement for the team/Prime?
3. Can an individual who currently works for my firm and has experience with **micro-tunneling** and/or **concrete pressure pipe** satisfy the minimum requirement of the prime even though the employee gained this experience while working for another company?

Please note most of SBE/AE firms may not meet these two requirements even though they have substantial experience far exceeding all the other requirements for this contract (e.g. refer to our response attached).

Thanks so much and a have a great day.

No, we have never done it in the past. On top of it MOT does NOT require Traffic Engineering Analysis; it is routinely done by Geotech Firms.

The geotechnical services will be handled by the three geo consultants however do you think we need to add 3.04 and 3.07?

Dear Patty,

Please see and respond to the question submitted from a firm below.

The scope of work identified Site investigation and maintenance of traffic plans. However, the technical certifications required for the project do not include 9.01, 9.02 and 3.04 (and possibly 3.07). Please clarify how the County plans to acquire these services without them.

Good afternoon Patty,

The estimated costs of both E15-WASD-03A & E15-WASD-03B are over \$2.5 million. WASD is recommending a .25% SBE/GS Subcontractor goal for E14-WASD-03B however no breakdown of the non-AE services was submitted and E15-WASD-03A did not contain a SBE/GS recommendation. Will there be any goods and/or services associated with these two contracts? If so, can you submit a breakdown of the goods and/or services for each contract.
