

Memorandum

Date: October 7, 2020

To: Gary Hartfield, Division Director
Small Business Development

From: Juan Kuryla, Port Director
PortMiami

Subject: Recommendation for 7360 Miscellaneous Construction Contract Services for Environmental Mitigation Project Berths 9 and H / Project No. 2017-001.02

PortMiami respectfully requests that the Division of Small Business Development (SBD) evaluate Project No. 2017-001.02 - Environmental Mitigation Project Berths 9 and H, to assign Small Business Enterprise (SBE) and Community Workforce Program (CWP) measures, in order to proceed with the advertisement and subsequent bidding of the solicitation.

Environmental Mitigation Project Berths 9 and H: The Work of this Contract comprises the tasks necessary for the removal, relocation, and monitoring of all scleractinia (hard) coral colonies and octocoral (soft) coral colonies that shall be relocated within rip rap from the existing rip rap or bulkhead at proposed Berth 9 and Berth H. Only a portion (approximately 82%) of the permitted estimated number of coral colonies from the rip rap and substrate from Berth 9 will be relocated because only the western 1,014 feet portion of the bulkhead will be constructed. The coral colonies associated with the construction of Berth H will be performed by other Contractors. The relocation site for most of the coral colonies shall be the existing and new artificial reefs at artificial reef site POM A. All listed coral species (e.g., *Orbicella* spp.), *Pseudodiploria* spp., and *Montastraea cavernosa* found on the existing rip rap or bulkhead shall be donated to the coral nursery at Rosenstiel School of Marine and Atmospheric Science. In addition, the work of this Contract also comprises the tasks necessary for the construction and placement of artificial reef modules required for Berth H. The project consists of, but is not limited to, pre-construction coral survey and monitoring; off-site construction of 90 artificial reef modules: loading 90 artificial reef modules onto a barge; placement of 90 artificial reef modules at the artificial reef site POM A; monitoring transplanted coral colonies for one week after transplantation; and any supportive ancillary tasks to successfully complete all phases of the project. The Contractor will be required to obtain a Florida Fish and Wildlife Conservation Commission (FWC) Special Activity License for handling corals.

The construction cost estimate for this project is \$1,639,138.60, which includes 10% contingency.

Due to the specialized and technical scope of services, the SBE goal recommendations are 0.00% for SBE-Construction; 0.00% for SBE-Goods; 0.00% for SBE-Services, and 10.00% for the Community Workforce Program (CWP).

We appreciate your assistance, in order to proceed with the advertisement and subsequent bidding of the project. Should you have any questions, please feel free to contact Mrs. Gyselle Pino, Chief of Contracts, Procurement & Materials Management at (305) 347-4833.
