Delta Max 2000 Portable Power Station	EcoFlow	Delta		4			1	1	The EcoFlow Delta Max 2000 is a powerful battery powerhouse that is green, quiet, and capable enough to juice up high wattage appliances. You will love using this power station to power up your electronics and tools. Use it for fieldwork, camping, events, construction, parties, gatherings, and a power backup at home. It packs a 2,106 watt-hour capacity and delivers 2,400 watts of power, which is more than enough for high power devices and electronics such as power tools, large-screen TVs, toasters, mini-fridge, and speakers. It comes with an X-Boost that can deliver up to 5,000 watts of surge power for power hungry tools. The Delta Max 2000 also includes USB-A and USB-C outlets for mobile devices. You can bring this power station on distant adventures and have power. Have it in your home as a power backup, or carry or use it anywhere. The EcoFlow Delta Max is somewhat portable, measuring only 19.6" inches L x 9.5" inches W x 12" inches H, or the size of a large cooler. It weighs only 48 lbs. It can be easily carried by one person and transported in a car. You can bring it on road trips! The EcoFlow Delta Max 2000 is the world's fastest charging portable station. Hook it in the house's wall outlet, and it will reach from 0% to 80% in just 65 mins with X-Stream charging. Just plug it when empty, and it will be ready to use in just a short while. Or, you can charge it with the car outlet or two 160-watt solar panels, and it will be full in four to eight hours. It is powered by the latest NCM lithium batteries, which are lightweight, have a very high power capacity, and have excellent longevity (more than 800 cycles to 80% capacity). The unit, when fully charged, has a shelf life of one year. The EcoFlow Delta Max 2000 comes with (6x) 120V AC outlets, (4x) USB-A outlets, (2x) fast-charge USB-C outlet, (2x) DC5521 outlets, and (1x) 12-volt car outlet. The unit has a complete set of safety features, including over-voltage, overload, overheat, short circuit, low temperature, low voltage, and overcurrent protection. It charges to full quickly, and you can also charge the power station with solar panels. The device also connects to a mobile phone app to monitor the watt usage and charge levels.
