APPENDIX A
Scope of Services1. Scope of Work:

This Agreement is to provide Video Counting Units and Data Processing/Reporting. The Contractor's portable video based traffic data collection systems, or Video Counting Units (VCU), shall be used to conduct different Vehicular, Pedestrian and Bicycle Counts, which also include Traffic Volumes, Turning Movement Counts (TMCs), Vehicle Classification, Vehicle Gap Data, and Travel Time. TMCs represent the various approach movements (left, thru, right & u-turn) that pass through an intersection over a given period of time, and are collected for a variety of purposes at signalized and un-signalized intersections. Service to include hardware, software, support, maintenance and training.

2. Traffic Data Processing:

The Traffic analysts of the Traffic Engineering Division will install the VCUs at any County location that fulfills the requirements for installation such as existing roadside infrastructure including light poles and mast-arms. Data will be retrieved from the VCUs via USB compatible SD card and downloaded, saved and uploaded to the Contractor's data processing site from a laptop or desktop PC.

Once the data has been uploaded, Contractor's media processing department will configure the study and all the movements before processing begins. The media processing team members will assess and provide a deployment/set up rating (1-5 stars), based on what can be seen on the video. Three star ratings or less will be put on hold with a note to TED explaining the risk of reduced accuracy.

After the Contractor initially reviews the video, it will reprocess 12% (randomly) throughout each hour to ensure the AI is working correctly. Contractor will flag any abnormalities in the data for the media processing team to review and will check to ensure 95% accuracy or better benchmark.

For data collection on multiple intersections along the corridor, Contractor's system will red flag any cases where there is a significant drop off in volumes from one signal to the next (+/-5 accuracy). Contractor's media processing team will assess the location environment and time of day around the roadway that could attribute to any drop off or increased traffic flow such as schools, shopping centers, or a sports complex.

3. Equipment Requirements:

- 3.1 The equipment must be completely portable and a single individual should be capable of setting up and operating this equipment. The designed set up and operation of the system must be able to take advantage of existing roadside infrastructure including light poles or mast-arms as well as provide anti-theft features.
- 3.2 The entire system must fit in a full size vehicle (i.e. van which can hold the weight of several VCU's 90 lbs. each): no trailers or externally mounted cargo containers.
- 3.3 VCU equipment must be fully autonomous and cannot require the use of other equipment to perform its designed operation that is not part of the system as purchased, it needs to operate on its own power and cannot require power from an external source that is not part of the system as purchased and must be able to record and store data continuously for a minimum of 48 hours without interruption or operator intervention.

Commented [WM(1):

Please break this down into details of what the \$20K per year is exactly for:

Is this service for the hardware? What type of service? What hardware? My understanding is that hardware covers the physical equipment (Scout and Accessories).

Is this service for the software? What type of service? My understanding is there is no software.

Is the lifetime support at a cost or is this another type of "support"?

Maintenance of what?

Is the training at a cost?

Does service include DataLink usage?

Commented [WM(2):

Is this Section 2 needed/sufficient?

Commented [WM(3):

What is this? What does AI stand for here? Artificial Intelligence?

- 3.4 The collected data must be obtainable from the equipment via USB port-compatible means: e.g. data is stored on an SD card or other USB compatible media that can be plugged into a USB port on a laptop or desktop PC and downloaded and saved and/or uploaded to the data processing site.
- 3.5 The equipment must be capable of recording video traffic data at an intersection, roundabout or mid-block location in urban environments which may include low light conditions.
- 3.6 The video traffic data collected must be capable of rendering traffic information on volume and classification of motorcycles, small, medium and large vehicles and busses, pedestrians, and bicycles. Information rendered must be at least 95% accurate for volume detection and 90% accurate in vehicle classification. Data rendered should be available in turning movement and individual roadway formats.
- 3.7 The video traffic data collected must be capable of providing traffic data information in intervals of 1 minute to 1 hour.
- 3.8 The processed video and traffic data must be accessible via a web-based interface that has tiered password protected access that is controlled by Traffic Data Collection personnel.

4. Processing Rates:

There is no subscription to use DataLink or Traffic Data Online web based tools. The processing rates stated herein (Appendix B) are firm and fixed for 24 months. After the 24 month period, Contractor may request and the County may consider an adjustment to price based on verifiable documentation of Contractor's customer-wide rate increase. The County reserves the right to reject any price adjustments submitted by Contractor.

5. Repairs and Replacement Parts:

Parts prices stated herein (Appendix B) will remain fixed and firm for 36 months. Replacement parts may be necessary for damaged equipment covered under warranty or due to vandalism, theft or misuse, not covered under warranty. Contractor's advanced replacement parts program will expedite the repair process to ensure equipment is back in operation quickly. Contractor is not responsible for replacing or fixing equipment due to vandalism, theft, or misuse.

6. Warranty:

- 6.1 One (1) Year Limited Warranty from date of delivery, whereby the Hardware shall be free from defects in materials and workmanship, and function substantially in accordance with applicable documentation. Hardware consists of the physical equipment (Scout VCU and Accessories). Batteries are not included or covered under standard warranty.
- 6.2 One (1) Year Extended Warranty upon expiration of Limited Warranty, whereby the Hardware shall be free from defects in materials and workmanship, and function substantially in accordance with applicable documentation. Hardware consists of the physical equipment (Scout VCU and Accessories). Batteries are not included or covered under extended warranty.
- 6.3 Correcting Defects Covered Under Warranty - Contractor shall promptly correct deficiencies, without cost to the County, within [redacted] calendar days after the County notifies the vendor of such deficiencies in writing.

Commented [WM(6):

Please advise. This may warrant a conversation between TED and Miovision.

6.4 Correcting Defects Covered Under Warranty - If Contractor replaces any piece of Hardware during the term of a warranty period, the warranty on such replacement piece of Hardware shall expire at the end of the applicable warranty period for the original piece of Hardware. Contractor may use refurbished portions of Hardware in replacement, provided such parts are of equal value.

6.5 In addition to the Limited and Extended warranty, it is hereby agreed and understood that all repairs and replacement parts supplied by Contractor shall be warranted for a minimum period of ninety (90) calendar days after the repairs and/or parts have been received and accepted by the County.

6.6 All warranty requirements shall remain in force for the full period identified above; regardless of whether Contractor is under contract with the County at the time of defect. Any payment by the County on behalf of the goods or services received from Contractor does not constitute a waiver of these warranty provisions.

7. Support and Training:

Contractor shall provide lifetime support and resources which include deployment recommendations and hardware/software webinar training for new employees. Support days and hours are Monday to Friday 07:00 - 17:00 EST.

7.1 Contractor will provide deployment recommendations or calibration services. TED will send their location coordinates to Contractor, who will then provide a PDF summary displaying where the camera should be installed and at what angle (displaying the field of view). Contractor will provide an online resource of information for equipment set-up.

7.2 Contractor's support team shall assist with remote diagnostics to help TED troubleshoot and install replacement parts. Contractor will provide an online resource of information for ongoing maintenance.

7.3 Contractor will provide a resource of online training videos and online chat boxes on the DataLink platform. If for any reason, the videos are not sufficient, TED can call Contractor's support team to request a webinar-based training session at no additional cost. Contractor's support team may try to troubleshoot TED's issue or question on the spot.

7.4 Contractor shall provide free support for Scout Hardware during the life of the product.

8. Invoicing and Payment:

Pursuant to Section 2-8.10 of the Code of Miami-Dade County, this Contract is subject to a user access fee under the County User Access Program (UAP) in the amount of two percent (2%). Contractor shall invoice the Contract price and shall accept as payment thereof the Contract price less the 2% UAP as full and complete payment for the goods and/or services specified on the invoice. Refer to Article 39 of the Agreement.

Commented [WM(7)]:

Is TED ok with this? Stated in their proposal

Who determines "equal value"? Does TED want to approve the refurbished items prior to Miovision installing them?

Commented [WM(8)]:

So Miovision does not provide 24hr/7day support? Is TED ok with that? What happens outside of this timeframe (i.e. emergency)?
