South Dade TransitWay Project

- First Bus Rapid Transit (BRT) corridor to be introduced in Miami-Dade County
- Sets new efficiency standard for public transportation
- An innovative precursor to rail (until conditions warrant the need for rail)
- Viable solution for future transportation demands

Project Features

- Introduction of Bus Rapid Transit
- Traffic Signal Preemption (TSP) technology keeps buses moving through intersection
- Gate arms at intersections for added safety
- Improved travel time and reliability
- Iconic BRT Stations

BRT Station Features

- Center platform loading
- Wi-Fi inside station
- CCTV cameras & 24-hour security
- Real-time bus arrival displays
- Protection from elements via a vault-like canopy and air-conditioned vestibule

BRT Service

- Through lane for buses not stopping at BRT stations
- Off-Board fare collection
- ADA compliant level boarding platform
- Improved lighting at and around the station, and the 50-foot pylon

Construction Impacts

Lane closures are anticipated on busway and cross streets

Access to adjacent properties will be maintained at all times

Moderate levels of construction noise and dust will be present

Temporary stations have been constructed as to not interrupt bus service for the riders

Bus lane traffic shifts are anticipated

The Public Information team will coordinate with affected property representatives for access impacts and closures.
