1. INTRODUCTION AND PURPOSE

The Miami-Dade County Department of Transportation and Public Works (DTPW) is pleased to submit this Transit Development Plan (TDP) Annual Progress Report (APR) to the Florida Department of Transportation (FDOT District VI). The timely submission of the TDP ensures that DTPW remains eligible for the State Transit Block Grant Program, which sustains operations funding for the year to come.

The State of Florida Public Transit Block Grant Program was enacted by the Florida Legislature to provide a stable source of state funding for public transportation. The Block Grant Program requires public transit service providers to develop and adopt a TDP. A TDP major update is required every five years and TDP annual progress reports are required in the interim years. TDP updates must be submitted to FDOT by September 1st of each year.

This TDP Progress Report has been prepared in accordance with Florida Administrative Code (FAC) Rule 14-73.001. Transit Development Plans are required for grant program recipients pursuant to Section 341.052, F.S. A TDP shall be the provider's planning, development, and operational guidance document, based on a ten-year planning horizon and covering the year for which funding is sought, and the nine subsequent years.

This TDP, titled MDT10Ahead 2021 Annual Progress Report, presents both funded and unfunded transit needs to create a framework for transit improvements that can be implemented within a 10-year planning horizon, and includes a performance assessment for the targets set in the most recent TDP Major Update. DTPW's last Major Update was prepared in 2019 and was adopted by the Board of County Commissioners and approved by the FDOT, pursuant to resolution R-1375-19.

1.1. Related Plans

The TDP informs and is informed by other Land Use and Transportation Plans in Miami-Dade County. MDT10Ahead identifies the county's long-term transit infrastructure needs, which are used in the development of the Miami-Dade Transportation Planning Organization (TPO) Long Range Transportation Plan (LRTP). The TDP also identifies and presents short-term improvements for implementation through the TPO's Five-Year Transportation Improvement Program (TIP), FDOT's Work Program process, the Citizens' Independent Transportation Trust (CITT) Five-Year Implementation Plan, and Miami-Dade County's FY 2021 Adopted Budget and Multi-Year Capital Plan. These planning documents are listed in this section by planning horizon, longest to shortest.

1.1.1. 2045 Long Range Transportation Plan

Regularly updating the Miami-Dade County Long Range Transportation Plan (LRTP) is a primary activity in Miami-Dade County's transportation planning process, with federal and state requirements for an update of the Transportation Plan every five years. Federal law requires that the LRTP address a minimum of a 20-year planning horizon from the date of the TPO adoption.

The 2045 LRTP was approved by the TPO Governing Board on September 26th, 2019, and includes four planning periods with their own implementation years. Projects identified as plan period I are scheduled for implementation between 2020 and 2025; plan period II between 2026 and 2030; plan period III between 2031 and 2035; and plan period IV between 2036 and 2045. The plan also lists partially funded and unfunded projects as well as projects funded by the private sector, developers and set aside funds.

1.1.2. Transit Development Plan - MDT10Ahead

MDT10Ahead presents both funded and unfunded transit needs in order to create a framework for transit improvements that can be implemented within a 10-year planning horizon. As previously mentioned, DTPW is a recipient of the State of Florida Public Transit Block Grant Program and is required to develop a TDP on an annual basis with major updates required every five years.

The 2019 Major Update, MDT10Ahead, was adopted by the Board of County Commissioners (BCC) on December 17, 2019. The most recent Annual Progress report was approved by FDOT on October 20, 2020.

1.1.3. Florida Department of Transportation Five Year Work Program

The Work Program is the tentative list of projects that will be funded and carried out in District 6 (including Miami-Dade and Monroe counties) during the next five years. Developed annually, it is FDOT's budget for work in Miami-Dade and Monroe counties. Projects are identified and schedules are developed based on priorities and allocated funds.

In each cycle, a new fifth year is added, and the first year drops off as projects are completed. A new project only begins to move forward after it is funded and then placed in the Work Program's fifth year. Each phase of a project generally takes two years to complete. Therefore, some projects could take up to 10 years or more from initiation to completion and would cycle through the Work Program several times. The current Five Year Work Program covers state FY 2021 through FY 2025 (July 1st, 2020 through June 30th, 2025).

1.1.4. State Transportation Improvement Program

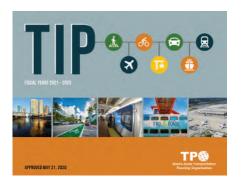

The State Transportation Improvement Program (STIP) is a federally mandated document which includes a list of projects planned with federal participation in the next four fiscal years. The report is based upon the same projects that are listed in the first four years of FDOT's Adopted Five Year Work Program. The STIP is approved annually by Federal Highway Administration (FHWA) at the beginning of each federal fiscal year.

Projects shown in both the Work Program and the STIP are all drawn from the same Work Program Administration (WPA) database. Work Program reports and STIP reports contain the same projects programmed in the WPA database, with different formatting. For a project to be listed in the approved STIP, it must first be included in the WPA database and programmed in the first four years of the Adopted Five Year Work Program. The project must either be included in the Tentative Work Program during the annual Tentative Work Program development cycle, or it must be amended into the Work Program and STIP after it has been adopted on July 1st of each state fiscal year. The current STIP covers state FY 2021-24 (July 1st, 2020 through June 30th, 2024).

1.1.5. Transportation Improvement Program

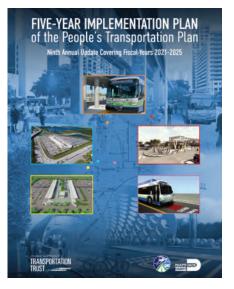

The TIP contains the transportation improvement projects planned for the next five years. All projects receiving federal funds must be included in this plan. Other major projects which are part of the area's program of improvements, but do not receive federal funds, are included in the TIP as part of the planning process.

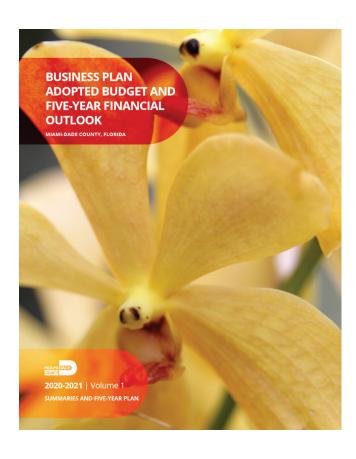

The current 2021 TIP covers federal FY 2021 through FY 2025 (October 1st, 2020 - September 30th, 2025) and was approved by the TPO Governing Board on May 21st 2020. Categories of improvements include Highway, Transit, Aviation, Seaport, and Non-Motorized improvements. All projects and priorities listed in the adopted TIP are consistent with those in the adopted 2045 LRTP.

1.1.6. Citizens' Independent Transportation Trust Five-Year Implementation Plan

The Citizens' Independent Transportation Trust (CITT) 5-Year Implementation Plan documents the current implementation status of surtax-funded People's Transportation Plan (PTP) projects as well as their progress versus the baseline provided in the previous year's initial plan. This includes references to projects from the County's 2020-2021 Proposed Capital Budget. Annual updates to the CITT Implementation Plan document will continue to monitor and report on the implementation of the projects, their adherence to budget and schedule, and any changes to the Plan including project additions, deletions or deferrals. The current Five Year Implementation Plan covers federal FY 2021 through FY 2026 (October 1st, 2021 - September 30th, 2026).

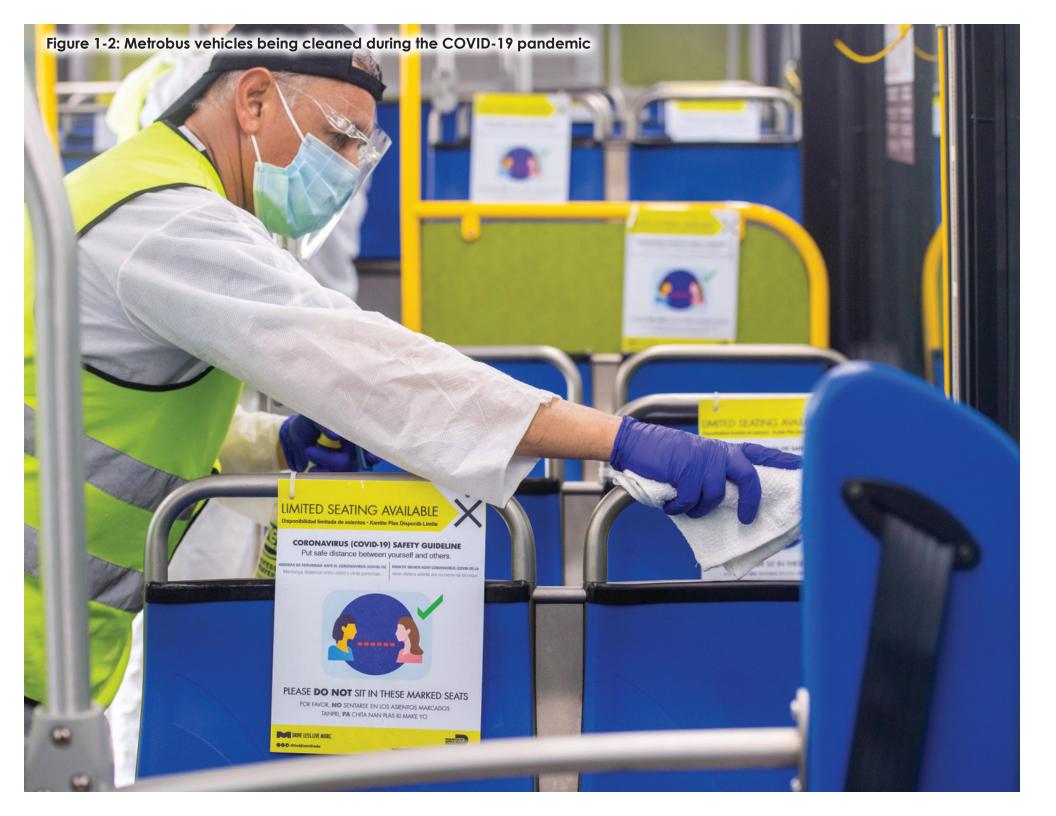

1.1.7. Adopted Budget and Multi-Year Capital Plan

Miami-Dade County has a responsibility to appropriately plan for and strategically manage the funding of public services desired by the community. The annual budget and multi-year capital plan are essentially a plan of activities consistent with the County's Strategic Plan and the resources required to achieve those goals. The County's adopted budget is a powerful financial management tool that helps:

- Prioritize programs and service levels
- Prepare for operational challenges in advance
- Provide appropriate funding to each department
- Create accountability and ensure transparency of the planned use of public funds
- Establish a sound fiscal framework for proper day to day monitoring

Each department's operating and capital budgets are evaluated on an annual basis as one cohesive plan. The County's budget and multi-year capital plan spans six fiscal years, is adopted on an annual basis by the Board of County Commissioners, and conveys the services to be delivered to the community as well as the resources required to provide those services.

The current Adopted Budget and Multi-Year Capital Plan covers FY 2021 (October 1st, 2020 through September 30th, 2021).

2. OVERVIEW OF EXISTING DTPW SERVICES

DTPW operates the 21st largest transit system in the United States¹. With a total service area of approximately 306 square miles that encompasses 34 municipalities and includes service into adjacent Broward and Monroe Counties, DTPW provides an assortment of transit services to meet the mobility needs of its 2.7 million residents and the 11.6 million visitors in 2020 ².

DTPW operates an integrated multi-modal transit system comprised of four modes: motor bus (Metrobus), heavy rail (Metrorail), automated people mover (APM - Metromover), and demand-response service (Special Transportation Services or STS). Overall, DTPW vehicles traveled over 62 million miles providing more than 82 million unlinked passenger trips in 2019; 61.4% of those trips were made on Metrobus, 23.2% on Metrorail, 10% on Metromover, and the remainder on STS, Express Buses, and Vanpools.

In 2020, the department has been led by Department Director Alice Bravo. Table 2-1 lists the operating characteristics of DTPW transit services. The DTPW Departmental Table of Organization is available in Appendix 1.

With more than 3,800 full time employees, DTPW is one of the largest departments in Miami-Dade County government and is responsible for planning and providing public transit services to the entire county.

Department of Transportation and Public Works - Transit Mission Statement:

Plan for, operate, and maintain a clean, safe, reliable, and convenient transportation system that effectively enhances mobility in Miami-Dade County.

American Public Transportation Association 2020 Public Transportation Fact Book, based on unlinked passenger trips and passenger miles traveled

- 1 Source: National Transit Database, Annual Database 2020
- 2 Source: National Transit Database, Department of Transportation and Public Works, 3rd submission, March 2020 6 Metrobus routes (L, S, 3, 11, 27) operate 24 hours per day. One route, 38/Busway MAX, operates 24 hours per day on weekdays only. Two other routes, 246/Night Owl and 500/Midnight Owl, provide hourly bus service approximately between 12:00 am 5:06 AM.
- 4 In addition to the 32 designated bus stops for the two routes, buses pick up passengers anywhere along the routes when hailed.
- 5 Five-minute combined headway (Orange Line and Green Line) during the peak AM and PM travel times from Dadeland South Station to the Earlington Heights Station. The Green Line Metrorail Service operates at 10-minute headways during the peak AM and PM travel times between the Palmetto Station and the Dadeland South Station. Orange line operates at 10-minute peak headways between the Miami International Airport and Dadeland South stations. During weekends and off-peak periods, combined headway is 15 minutes. Single line segments operate with 30-minute headways.
- 6 Includes all modes. Park and Ride Revenue: \$2,114,128; Auxiliary Revenue: \$5,347,627; Other Agency Revenue: \$12,966,090.
- 7 Express Bus fare for routes operating within the County is \$2.25; Routes that travel to other counties (301 Dade-Monroe Express, 302 Card Sound Express, and four 95 Dade-Broward Express routes) remain at the express trip fare of \$2.65. Circulator/Shuttle bus fare is \$0.25.

2.1. Metrobus

Metrobus is DTPW's fixed-route bus service. Metrobus operates seven days a week, 24 hours per day. A total of 73 routes comprises DTPW's regular bus service structure as served by a total fleet of 767 buses, supplemented by 30 contracted routes operating with 55 buses. DTPW's family of Metrobus services includes local, circulator, limited-stop and express routes. Figure 2-1 presents the Metrobus system route map, while Figure 2-2 illustrates the DTPW Metrobus service area coverage. A detailed service schedule for current DTPW operated Metrobus routes is presented in Appendix A.2.

Table 2-2: Metrobus Service Characteristics

| Service Type | Routes | Route Miles |
|--------------|--------|-------------|
| Circulator | 11 | 101 |
| Local | 66 | 1,648 |
| Limited Stop | 7 | 186 |
| Express | 14 | 682 |
| Total | 98 | 2,617 |

Source: Miami-Dade County GIS and Ridership Technical Report

2.1.1. Local Service

Local bus service collects and distributes high-turnover ridership along arterials radiating to and from dense activity centers. This service type is characterized by frequent stops, short and moderate passenger trips, and comparatively low average bus speeds over the course of a route.

2.1.2. Circulator Service

Circulator or shuttle bus service operates short route connections between activity centers, or as a feeder to provide a connection with another transit service. For DTPW, these local community routes include a shuttle connecting to the Hialeah Market Tri-Rail station in Miami-Dade County.

2.1.3. Limited-Stop Service

Limited-stop service skips some stops and only serves designated high ridership bus stops along a route. With fewer stops, limited-stop routes have significantly increased operating speeds when compared to local service. MAX routes serve stops at major transfer points or approximately every one-half mile (in the Miami Central Business District (CBD)) to one mile (in suburban areas) along a route. Route 277, the NW 7th Avenue MAX, is an example of a limited-stop bus service, which operates during the morning and evening rush hours.

2.1.4. Express Bus Service

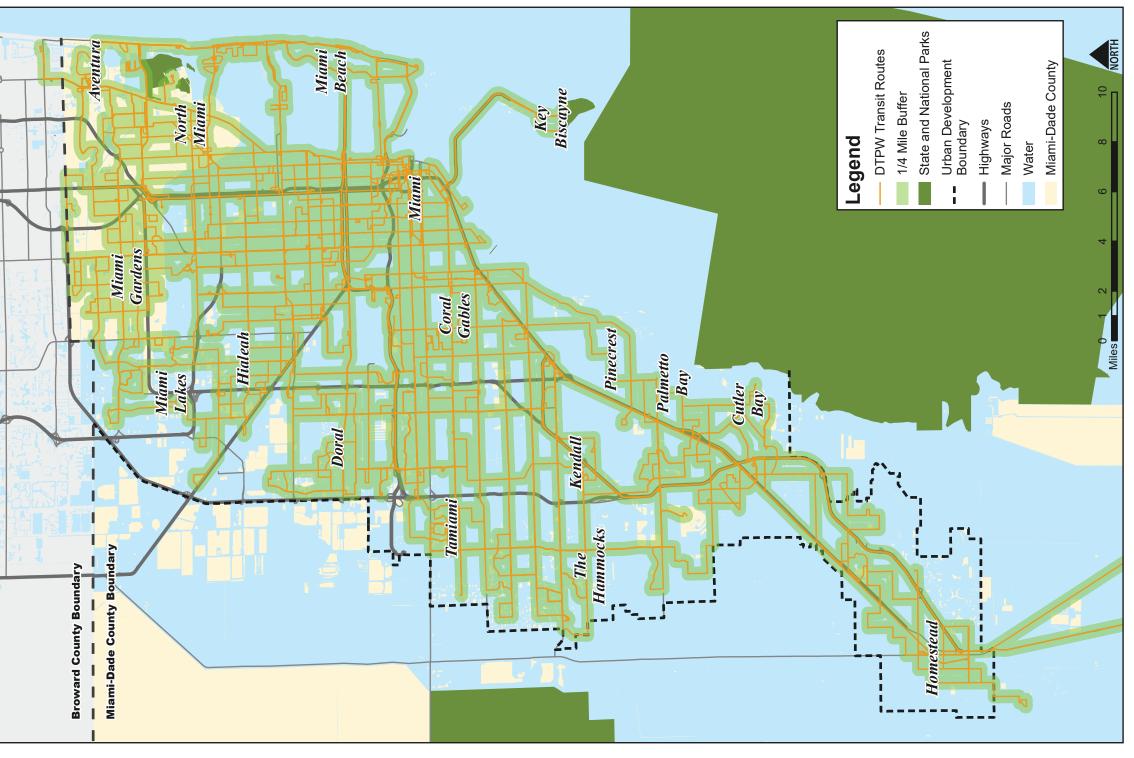

Express Bus service is similar to limited-stop service which has fewer stops and operates at a higher speed than local bus service. Express routes connect outlying areas, with direct service to designated activity centers such as the Miami CBD. These routes usually operate along a freeway or major arterial road to increase the operating speed. The 95 Dade-Broward Express Route that operates within the I-95 express lanes is an existing express service operated by DTPW. Metrobus Route 175 is an express bus route which began service in 2019. It provides service from the new Park & Ride Lot at I-75 and Miami Gardens Drive (near Florida's Turnpike) to Palmetto Metrorail Station via I-75 and SR-826.

2.1.5. South Dade Transitway

A resolution was passed in June of 2016 re-branding what was formerly known as the "South Miami-Dade Busway" to the "South Dade Transitway." The Transitway is a 19.8-mile two-lane, at-grade corridor exclusively for DTPW bus service which runs parallel to U.S. 1 from SW 344th Street in South Miami-Dade to the Dadeland South Metrorail Station. Full size (40-foot) and articulated (60-foot) buses serve 30 stations (including Dadeland North) and six park-and-ride lots along the Transitway. Buses also operate within adjacent neighborhoods and enter the exclusive lanes at major intersections.

The transitway has many travel-time saving features such as exclusive travel lanes, fewer stops, and preferential signal phasing at intersections. To maximize the efficacy of these features, most of the routes operating on the Transitway provide limited-stop service, express service, or have sections that offer limited stop or express service, including routes 31, 34, 38, 52, 252, and 287.

2.2. Metrorail

Metrorail provides passenger service to 23 stations on a 25.1-mile heavy rail electrified line. The system operates on an elevated guideway with transfer points to Tri-Rail commuter rail service, the DTPW Metromover system, and the South Miami-Dade Transitway. DTPW maintains a total fleet of 142 Metrorail vehicles. Daily passenger service starts at approximately 5:00 A.M. from the terminal stations.

The last southbound trains depart the Palmetto and Airport Stations at:

- Palmetto Station, Green Line departs at 11:54 P.M. and arrives at Dadeland South at 12:41A.M.
- Airport Station, Orange Line departs at 12:23 A.M. and arrives at Dadeland South at 12:56 A.M.

The last northbound trains depart Dadeland South Station at:

- Dadeland South, Orange Line departs at 11:45 P.M. and arrives at the Airport Station at 12:18 A.M.
- Dadeland South, Green Line departs at 12:00 A.M. and arrives at the Palmetto Station 12:48 A.M.

Figure 2-3 illustrates the DTPW Metromover system map as of December 2020. The Green Line runs from Palmetto Station to Dadeland South Station, and the Orange Line from the Miami Intermodal Center (MIC) at Miami International Airport (MIA) to Dadeland South Station.

The Orange Line provides direct service between the MIC and Dadeland South Station every 15 minutes during peak hours. The Green Line operates at 15-minute headways during the morning and afternoon peak travel times between the Palmetto Station and Dadeland South Station.

Both lines provide premium transit service with a combined headway of 7.5 to 8 minutes during the peak morning and afternoon travel times from Dadeland South Station to the Earlington Heights Station. Weekend and holiday Green Line and Orange Line service operates with headways of 30 minutes and combine to provide a 15 minute headway from Earlington Heights to Dadeland South Station. DTPW provides a Metrorail Downtown Express Service from Dadeland North to Brickell Station in the morning peak periods and from Brickell to Dadeland North in the afternoon peak periods.

Figure 2-3: Metrorail System Map

2.3. Metromover

The Metromover is an elevated system that serves 21 stations and is comprised of three loops:

- Downtown Miami Central Business District (Inner/Downtown Loop);
- Adrienne Arsht Center and Perez Arts Museum to the north (Outer/Omni Loop) and,
- Brickell area to the south (Outer/Brickell Loop).

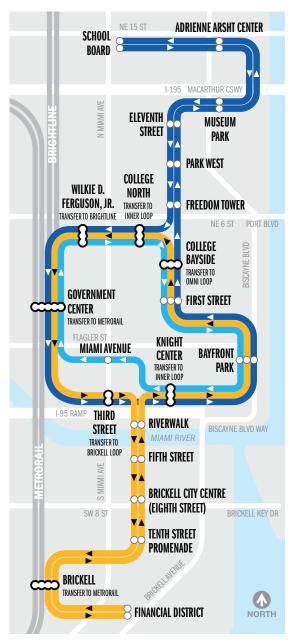

DTPW maintains a fleet of 26 Metromover vehicles and operates with a maximum of two cars per train. Metromover operates free of charge and stops at 21 wheelchair-accessible stations from the School Board area to Brickell, serving major destinations throughout Downtown Miami.

Metromover's Inner/Downtown, Outer/Omni and Brickell loops operate seven days a week and runs from 5:00 A.M. to 12:00 A.M. During the morning and afternoon peak periods, service frequency is every 90 seconds in the central business district and every three minutes during weekends and holidays.

On the Omni and Brickell Loops, service frequency is five minutes during peak periods and six minutes during weekends and holidays.

Figure 2-4 illustrates the DTPW Metromover system map as of December 2020.

Figure 2-4: Metromover System Map

2.4. Special Transportation Services

As mandated by the Americans with Disabilities Act of 1990 (ADA), DTPW operates a demand-response service known as STS, a shared-ride, door-to-door transportation service for certified individuals with disabilities who are unable to utilize the accessible fixed-route transit system.

Service is provided by sedans, vans and lift-equipped vehicles, seven days a week, 24 hours per day. Presently, there are 446 vehicles available for paratransit service transportation. Currently, these vehicles are privately contracted through Transportation America (TA).

As of December 2020, a total of 34,200 eligible clients are enrolled in the STS program including both ambulatory and non-ambulatory clients.

2.5. Services Provided by Private Contractors

DTPW contracts out 30 fixed route bus services, which are operated by America's Transportation (AT) and Limousines of South Florida (LSF), and serves approximately 860 bus stops and 100 directional route miles in Miami-Dade County. AT operates one express bus routes that provides service to Mile Marker 50 in the City of Marathon in Monroe County (Routes 301) and another express bus route that provides service from Florida City City Hall to Key Largo/Ocean Reef Club via Card Sound Road (Route 302). LSF operates 34 bus routes that serve approximately 860 bus stops and 100 directional route miles in Miami-Dade County. The private sector also provides several transit support services, such as:

- Security at Metrorail/Metromover stations, as well as other DTPW facilities;
- Maintenance-type service, such as tires, janitorial, elevators/escalators, etc.;
- Marketing and other similar contracts;
- Planning and technical support;
- Maintenance of bus benches/shelters at no cost to the County; and,
- Bus/rail advertising services

The 30 bus routse contracted in 2020 include Routes 1, 29, 34, 35, 39, 46, 56, 57, 71, 72, 82, 95, A, 115, 135, 150, 155, 202, 210, 211, 212, 217, 248, 267, 272, 286, 301, 302, 344, and 254.

2.6. Miami-Dade Transit Passenger Fare Structure

DTPW's automated passenger fare collection system for Metrorail and Metrobus is known as the EASY Card. Cash fare payments are still accepted on Metrobus, however, Metrobus passengers are encouraged to purchase the DTPW EASY Card to take advantage of discounted transfer fees. Metrorail passengers are now required to purchase and load the contactless DTPW EASY Card. These cards are purchased at a fee of \$2.00 and loaded with appropriate fare amounts for passage. Additionally, transit customers can use the GO App or Contactless payment, Table 2-3 presents the fare structure before fares were suspended from March 2020 to June 2021 due to Covid-19.

Table 2-3: DTPW Fare Structure Summary (Pre-Covid-19)

| | Regular Fare | Discount Fare ¹ |
|--|----------------|----------------------------|
| Metrobus | \$2.25 | \$1.10 |
| Inter-County Express Bus | \$2.65 | \$1.10 - \$1.30 |
| Intra County Express Bus Reg Fare | \$2.25 | \$1.30 |
| Shuttle Bus ² | 25¢ | 10¢ |
| Metrorail | \$2.25 | \$1.10 |
| Metrorail daily parking fee | \$4.50 | Not Applicable |
| Metrorail monthly parking permit ³ | \$11.25 | Not Applicable |
| Metromover | Free | Free |
| Special Transportation Service (STS) | \$3.50 | Not applicable |
| Bus-to-Bus Transfer ⁴ | Free | Free |
| Bus-to-Express Bus Transfer | 95¢ | 45¢ |
| Bus-to-Rail Transfer | 60¢ | 30¢ |
| Rail-to-Bus Transfer | 60¢ | 30¢ |
| Shuttle Bus-to-Bus or Rail Transfer | \$2.00 | \$1.00 |
| Shuttle Bus-to-Express Bus Transfer | \$2.40 | \$1.20 |
| 1-Month Pass | \$112.50 | \$56.25 |
| 1-Month Pass + Monthly Metrorail Parking Permit | \$123.75 | \$67.50 |
| 1-Month Pass - Group Discount 4-99 passes | \$101.25 | Not applicable |
| Regional Monthly Pass | \$145 | \$72.50 |
| 1-Month Pass - Group Discount 100 or more passes | \$95.65 | Not applicable |
| 7-Day Pass | \$29.25 | \$14.60 |
| 1-Day Pass | \$5.65 | \$2.80 |
| College/Adult Education Center Monthly Pass | \$56.25 | Not applicable |
| Golden Passport or Patriot Passport | Free | Free |
| EASY Card (cost of media) | \$2.00 | Not applicable |
| EASY Ticket (cost of media) | Free | Not applicable |
| Transit Mobility | Free | Free |
| Commuter Reduced | Not Applicable | Half-fare |

¹ Discount fare is available for Medicare recipients, most people with disabilities, and students in grades K-12 when using an EASY Card for discount fare rides, which replaces all previous discount IDs and permits. Preschool children can ride Metrobus and Metrorail free at all times with an accompanying adult. Parents or guardians of pre-schoolers are encouraged to present proof of age to bus operators and rail personnel to access the system. EASY Cards are not issued to pre-schoolers.

² DTPW operates six shuttle routes: 132/Doral-Tri-Rail Shuttle, 200/Cutler Bay Local, 211/Overtown Circulator, 212/Sweetwater Circulator, 254/Brownsville Circulator, and 286/North Pointe Circulator. There is no fare for route 132 (Doral-Tri-Rail Shuttle).

³ Only available with the purchase of a monthly pass.

⁴ Transfers are free for passengers traveling in one direction (not for round trips) using an EASY Card or EASY Ticket only within three hours of initial access of system. Passengers paying with cash must pay the full fare each time they board a bus.

2.6.1. Farebox Recovery Ratio

The farebox recovery ratio of a passenger transportation system is the fraction of operating expenses which are covered by the fares paid by passengers. It is calculated by dividing the system's total fare revenue by its total operating expenses. Most transit systems are not fully self-supporting, so advertising revenue, government subsidies, and other sources of funding are usually required to cover total operating costs.

Table 2-4 illustrates DTPW's farebox recovery ratio as reported to the NTD for each mode. Note that DTPW's Metromover is a free fare service and therefore collects no farebox revenue.

Table 2-4: DTPW Farebox Recovery

| Mode | FY 2018 | FY 2019 | FY 2020 |
|-----------|---------|---------|---------|
| Metrobus | 17% | 17.7% | 8.99% |
| Metrorail | 15.2% | 16.7% | 8.22% |
| STS | 10.6% | 10.4% | 8.33% |
| ALL | 15.2% | 15.9% | 8.32% |

Source: National Transit Database, Department of Transportation and Public Works, 3rd submission, March 2021

2.6.2. EASY Card Sales Outlets

EASY Card Sales Outlets are conveniently located throughout Miami-Dade County for transit customers to obtain or load cash value and/or passes onto the EASY Card or EASY Ticket. The DTPW EASY Card Services Division is responsible for training new vendors and managing all EASY Card Sales Outlets, providing DTPW with an average of \$767,866 in revenue. Currently there are over 86 sales vendors throughout Miami-Dade County.

2.7. Transit Mobility (Transportation Disadvantaged) Program

Section 427, Florida Statues and Rule 41-2 FAC, establishes and mandates the creation of the Commission for the Transportation Disadvantaged in the State of Florida. A Community Transportation Coordinator (CTC) in each county is appointed by the Commission for the Transportation Disadvantaged and is responsible for the coordination and provision of cost-efficient transportation services and the elimination of duplication through a coordinated system. In Miami-Dade County, the County government is the local coordinator. DTPW is charged with the responsibility of creating programs, applying for the grants, and coordinating transportation services for the disadvantaged.

Programs such as the Section 5310, Golden Passport, Patriot Passport, and Lifeline Services are also included in the Coordinated Transportation System.

The Transportation Disadvantaged (TD) Program, through a state funded grant, provides EASY Tickets and EASY Cards to transportation disadvantaged (homeless, children and families at risk, vocational training, and rehabilitation) Miami-Dade County residents. The EASY Ticket program provides tickets to qualifying social service agencies to distribute to their clients for use on the Miami-Dade County transit system. Currently there are 52 agencies enrolled in the program. The Transit Mobility EASY Card Program provides annual EASY Cards to individuals who are TD eligible. Currently, there are 5,790 TD Mobility EASY Card Customers.

2.7.1. Section 5310 Program

DTPW actively participates in the Federal Transit Administration (FTA) Section 5310 program by participating in the grant review, evaluation and award process. DTPW, in its role as the CTC, is responsible for the program coordination with local non-profit agencies serving elderly and disabled residents in Miami-Dade County.

2.7.2. Corporate Discount Program

It allows employees to pay for their public transit rides using pre-tax dollars, up to \$270 month (\$3,240/year) in 2019. The CDP provides monthly transit passes on Corporate EASY Cards, good for a month of unlimited rides on Metrobus and Metrorail, at a 10 percent (10%) discount for groups of 4-99 participants, and a 15 percent (15%) discount for groups of 100+ participants. Participants who ride Metrorail can save even more by purchasing their \$11.25 monthly Metrorail parking permit with pre-tax dollars. In 2020, the CDP generated approximately \$2.9 million in revenue. Currently the number of companies enrolled is 197.

2.7.3. College / Vocation School Discount Program

College, university, vocational/technical, and adult education school students can purchase a one-month pass on an Orange EASY Ticket or College Mobile Pass for \$56.25, half the cost of a full price monthly pass. This program is offered to full-time students using DTPW's public transportation system to get to school. As of December 2020, 52 schools are participating in the program generating approximately \$236,481.75 in annual sales.

2.7.4. K-12 Discount Program

Miami-Dade County students in grades K-12 can ride Metrobus and Metrorail at 50 percent (50%) off the regular fare. Pre-schoolers ride free. First time eligible students may obtain a specially encoded EASY Card at no cost by applying online at www.miamidade.gov/transit/fare-k12 for public school students or at https://k12.miamidade.gov/K12EasyCardRegistration/private for private school students. Discounted cards can also be obtained by visiting the Transit Service Center Kiosk located on the second floor of the Stephen P. Clark Center, at 111 NW 1st Street, or Pass Sales Office located at Overtown Transit Village, 701 NW 1 Court, Suite 121. This program is open to any student attending public or private schools in Miami-Dade County. In 2020, there were 845 newly registered K-12 customer accounts.

2.7.5. Golden Passport Office

The Golden Passport EASY Card provides free transportation to senior citizens 65 years and over or Social Security Beneficiaries (SSB) who are permanent Miami-Dade County residents. A Patriot Passport provides free transportation to disabled veterans who are permanent Miami-Dade County residents. Currently, there are 211,684 certified Golden Passport/Patriot Passport customer accounts; this includes 190,118 Golden Passport customers over 65 years of age, 16,685 Golden Passport SSB customers under 65 years of age, and 2,150 Patriot Passport customers.

2.8. Customer Information / Convenience

2.8.1. GO Miami-Dade Transit App (iPhone and Android)

DTPW has deployed real-time iPhone and Android applications for Metrorail/Metrobus/Metromover arrival/departure, route and schedule information. These mobile applications provide DTPW passengers with everything that is currently present on the DTPW mobile web site as well as additional smartphone-specific features in the form of an app to include:

- Service updates & Rider alerts
- Vehicle Trackers
- Metrobus schedules, routes, and stop look-up
- Metrorail and Metromover Station information
- Fare information
- Feedback zone
- Where Am I?
- STS (with access to the STS Connect online service for its clients)
- Live Mapping Nearby (which shows all stops/stations and real-time vehicles around you with the ability to scroll around the County)
- Integration with other apps such as EASY Pay, Pay by Phone, and MDT Transit Watch mobile application for submitting safety concerns in real-time

Using the all-new GO Miami-Dade Transit smartphone application, riders can plan a trip, track a ride, purchase mobile passes, report an incident, and earn points to redeem for rewards with the GO Rewards loyalty program. The app provides users with detailed route information, like schedules and system maps. Also available is a Tri-Rail one-way pass for riders traveling across the County.

Figure 2-5: GO Miami-Dade App

2.8.2. Electronic Transit Rider Alert System / Train Tracker / Mover Tracker / Bus Tracker

DTPW continues to implement customer convenience enhancements to their Rider Alert system that notifies passengers about transit service delays. Registered users receive electronic alerts on detours, route changes, and updates for Metrobus as well as service interruptions for Metrorail, Metromover, Metrobus, and Special Transportation Services. The Rider Alert system also provides the operational status of Metrorail or Metromover station elevators and escalators. Customers must sign-up to receive these electronic alerts to their cellular phones, email addresses, and smart phones. Train Tracker service allows users to see, via the web and on mobile devices, the estimated time of arrival of the next Metrorail train.

DTPW has a real-time Metromover Tracker System, "Mover Tracker" using the web-based technology and is available via computer, smartphone, and tablet. These software applications also provide other useful transit information such as service alerts, rail and mover station information, and elevator/escalator status. Similar systems are active for Metrorail and Buses (Train Tracker and Bus Tracker).

2.9. Maintenance and Storage Facilities

DTPW currently operates three maintenance bus garages to serve a fleet of 767 buses. The DTPW garages are located in various areas throughout the County to provide efficient maintenance and storage services at the following locations:

- Central Facility: 3311 NW 31st Street, Miami, Florida 33142; serving 21 bus routes
- Coral Way Facility: 2775 SW 74th Avenue, Miami, Florida 33155; serving 19 bus routes
- Northeast Facility: 360 NE 185th Street, Miami, Florida 33179; serving 19 bus routes

The Metrorail fleet of 142 rail cars is maintained and stored at William E. Lehman Center: 6601 NW 72nd Avenue, Miami, Florida 33166.

The Metromover fleet of 26 cars is supported by the maintenance facility located at 100 SW 1st Avenue in Downtown Miami.

2.10. Pedestrian Overpasses

To facilitate a safe passenger connection, DTPW maintains pedestrian overpasses throughout its transit system. A listing of the location of these pedestrian overpasses is provided below:

- Douglas Road Metrorail Station Pedestrian Overpass
- Vizcaya Metrorail Station Pedestrian Overpass
- Hialeah Metrorail Station Overpass
- Snapper Creek Expressway and U.S.1 M-Path Overpass
- University Metrorail Station Pedestrian Overpass

2.11. Park-and-Ride Facilities

DTPW currently has over 13,300 available parking spaces, including 34 park-and-ride facilities which serve one or more Metrobus routes. Twenty of those locations are located at Metrorail stops. There are approximately 4,477 parking spaces available at bus-only parking facilities, and approximately 8,916 parking spaces available at metrorail parking facilities. The locations of these available spaces is shown in Table 2-5

Parking usage is highest on the southern portion of the Metrorail line and to the north at the Metrobus Golden Glades park-and-ride facility. Figure 2-7 identifies the location of existing park-and-ride facilities that serve the DTPW system.

Table 2-5: Park-and-Ride Parking Space Counts

| MetroBus Parking Park-and-Ride Lots | Available Parking Spaces |
|--|--------------------------------|
| Transitway/SW 152 th St | 200 |
| Transitway/SW 168 th St | 149 |

Figure 2-7: Existing DTPW Park-and-Ride Facilities

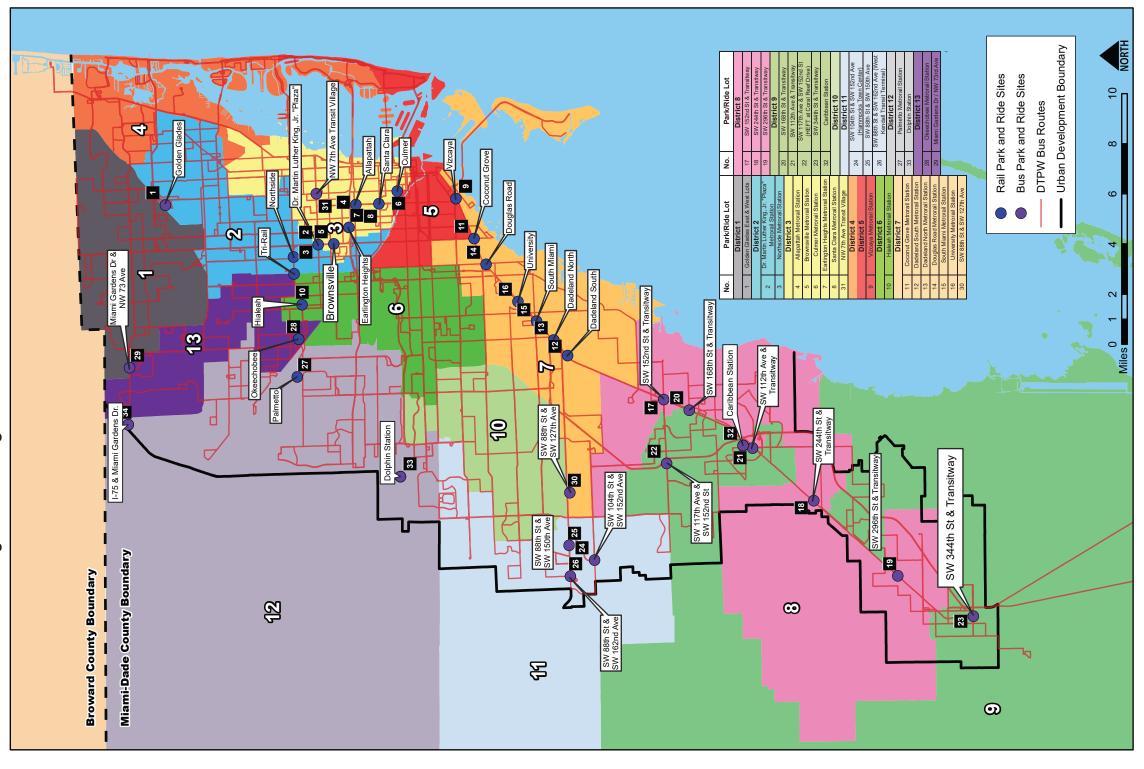

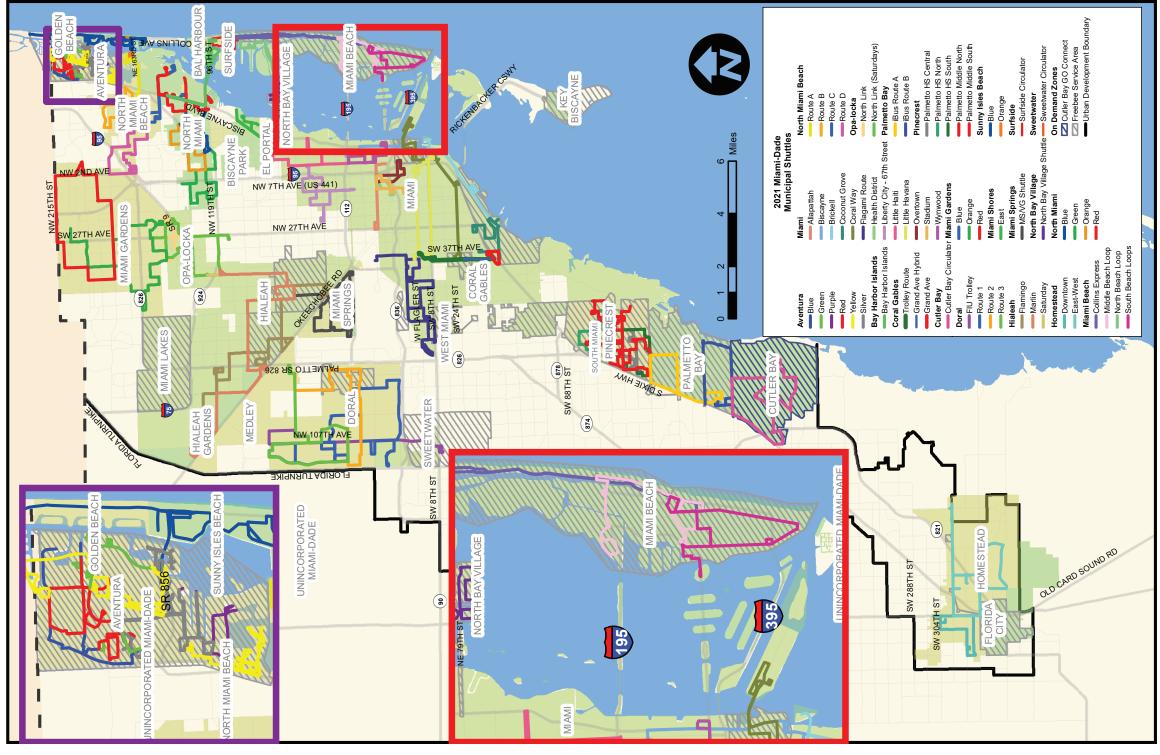

Figure 2-8: Municipal Transit Services in Miami-Dade County

2.12. Municipal Transit Services

DTPW continues to coordinate with local municipalities to avoid duplication of transit services and allow for efficient transit operations that complement one another. Currently, there are 34 municipalities eligible to receive surtax funding with 33 participating in the program (Indian Creek is not participating). Of these 33 municipalities participating in the program, 28 have local transit circulators that supplement DTPW bus routes. Figure 2-8 presents a map of local municipal circulators. The 28 municipalities below operate a circulator, partner with another municipality or partner with DTPW.

- City of Aventura
- Village of Bay Harbor Islands
- City of Coral Gables
- Town of Cutler Bay (Interlocal Agreement (ILA) with DTPW)
- · City of Doral
- · City of Hialeah
- City of Hialeah Gardens (ILA with the City of Hialeah)
- · City of Homestead
- Viallage of Key Biscayne
- · Town of Medley
- City of Miami
- City of Miami Beach (ILA with DTPW)
- · City of Miami Gardens
- Town of Miami Lakes

- Village of Miami Shores
- City of Miami Springs
- · City of North Bay Village
- · City of North Miami
- City of North Miami Beach
- City of Opa-Locka
- Village of Palmetto Bay
- Village of Pinecrest
- City of South Miami
- City of Sunny Isles Beach
- Town of Surfside
- City of Sweetwater
- Village of Virginia Gardens (ILA with the City of Miami Springs)
- · City of West Miami

The collective ridership on these circulators exceeded 5.5 million passenger trips in 2020. The annual ridership of the three largest circulator systems – (1) City of Miami, (2) City of Miami Beach and (3) City of Coral Gables, - collectively totaled 4,327,515 in 2020. These numbers represent a significant loss of ridership due to the Covid-19 pandemic. It should be noted that many of the municipalities operating circulator systems exceed the 20 percent minimum surtax transit expenditure requirement. Appendix A.3 provides a listing of each municipality, respective service operator and website.

2.13. Transit Oriented Development (TOD)

In an effort to increase transit ridership, generate revenue, and create attractive and dynamic station areas, DTPW has partnered with the private sector to implement TOD throughout the Miami-Dade transit system.

2.13.1. Metrorail

Dadeland South Metrorail Station

Projects:

Datran Center I and II (Phases I-III)

- 16-story and 20-story Class A office buildings, 767,803 SF
- 35,000 SF retail, 3500 structured parking spaces, 1000 dedicated to transit patrons

Miami Dadeland Marriott Hotel and Conference Center (Phase II)

• 302 luxury hotel rooms, 336,984 SF

Dadeland Centre (Phase 4A)

 18 story Class A office building, structured parking, 127,353 SF

Dadeland Centre II (Phase 4B)

 15-story Class A office building, ground floor retail, structured parking, 112,000 SF

Location: NW corner Dadeland Boulevard at US 1, Unincorporated Miami-Dade County

Development Area: 4.6 acres

Status: In operation: 1984 (Phases I, II, III), 2005 (Phase 4A)

and 2008 (Phase 4B).

Dadeland North Metrorail Station

Projects:

Dadeland Station (Phase I)

• Big Box vertical retail mall, 859,337 SF

Towers of Dadeland (Phase II)

• 14-story market rate rental residential, 267,448 SF

Motion at Dadeland (Phase III)

• 25-story market rate rental residential, 532,779 SF

Dadeland Vista (Phase B)

• 4-story, 48-unit market rate rental residential, 45,674 SF

Location: SW 84 Street between SW 70 Avenue and US 1,

Unincorporated Miami-Dade County

Development Area: 12.54 acres

Status: Phase I completed 1996, Phase B completed 2000, Phase II

completed 2005, Phase III completed 2019.

South Miami Metrorail Station

Projects: VOX Miami

• Phase I – 3 stories residential, 5 stories parking, 102 student

housing units, 444,064 SF

• Phase II – office building in design

Location: SE corner SW 59 Place and SW 70 Street, City of South

Miami

Development Area: 6.34 acres

Status: Phase I to be completed 2021

Douglas Road Metrorail Station

Project: Link at Douglas

- Core (Phase 1A) 22-story, 312 rental residential units, ground floor retail, 285.375 SF
- Cascade (Phase 1B) 37-story, 374 rental residential units, ground floor retail, 907,000 SF
- Phase 2 22 story office tower in design
- Phase 3 multi-story, 330 rental residential units
- Phase 4 multi-story, 359 rental residential units
- Tenant contribution of \$14,650,000 for Metrorail station upgrades and improvements and contribution of \$600,000 towards Underline at Douglas Road

Location: NW corner SW 37 Avenue/Douglas Road at US 1, City of Miami

Development Area: 4.9 acres

Status: Phase 1A and 1B under construction, 2019 and 2020. All phases completed by 2031.

Coconut Grove Metrorail Station

Project: Grove Central

- Phase I watermain relocation
- Phase II new bus depot
- Phase III 170,000 SF ground floor retail, 402 rental residential units and parking garage with 250 dedicated transit spaces, 647,000 SF gross total
- Phase IV tenant contribution of \$5,000,000 for Metrorail station improvements

Location: NW corner SW 27 Avenue at US 1, City of Miami

Development Area: 5.2 acres

Status: Phases I and II completed 2020. Phase III and IV start 2020 with

completion by 2023

Historic Overtown/Lyric Theatre Metrorail Station

Projects:

Overtown Transit Village North (Phase I)

• 17-story, 309,900 SF office building, 950-space parking garage, 4,000 SF ground floor retail

Overtown Transit Village South (Phase II)

• 21-story, 300,000 SF office building, 334-space parking garage, 7,152 ground floor lobby

Location: NW 1 Court between NW 6 and 8 Streets, City of Miami

Development Area: 2.1 acres

Status: Phase I completed 2006; Phase II completed 2010

Santa Clara Metrorail Station

Projects: Santa Clara Apartments

 Phase I – 9-story, 208-unit affordable housing rental units, surface parking – 219,376 sq. ft.

• Phase II – 17-story, 204-unit affordable housing units, 258 parking spaces in structured garage and 61 ground floor spaces dedicated for transit patrons – 361,325 sq. ft.

Location: NW corner NW 20 Street at NW 12 Avenue, City of Miami

Development Area: 3.3 acres

Status: Phase I completed 2004 and Phase II completed 2006

Allapattah Metrorail Station

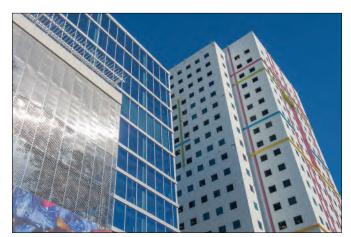

Project: Allapattah Garden Apartments

• 8 garden-style, 3-story affordable housing buildings, 128 units, 135,100 SF

Location: SE corner NW 12 Avenue at NW 36 Street, City of Miami

Development Area: 4.7 acres

Status: Completed 2004

Brownsville Metrorail Station

Project: Brownsville Transit Village

• Mixed-income, 14-story senior and affordable housing, 675,230 sq. ft.

• Phases I-IV consist of 401 units, Silver LEED certification, 6,400 SF retail

• Phase V of 100+ units (44 required)

Location: 5200 NW 27 Avenue, Unincorporated Miami-Dade County

Development Area: 5.8 acres

Status: Phases I-IV completed 2010-2014. Phase V start construction 4Q21 complete

2023

Project: Dr. Martin Luther King, Jr. Plaza Office Building

• 5-story, 172,000 SF office building, 13,500 SF ground floor retail, 631-space garage

Location: NE corner NW 27 Avenue at NW 62 Street, Unincorporated Miami-Dade

County

Development Area: 7.9 acres

Status: Completed 2004.

Northside Metrorail Station

Project: Northside Transit Village

• Four 8-story affordable housing residential buildings with 438 units (219 senior and 219 family), 20,000 SF ground floor retail, 250 dedicated transit parking spaces in multi-level parking garage, Silver LEED Certification. 312,793 sq. ft.

Location: SE corner NW 32 Avenue at NW 79 Street, Unincorporated Miami-Dade County

Development Area: 5.8 acres

Status: Phase I completed 2015, Phase IV in 2020. Phases II and III to be completed by

4th Quarter 2021.

2.13.2. Metrobus

South Miami-Dade Transitway at SW 200th Street

Project: Caribbean Village

 Mixed-use minimum 170-unit affordable housing transit-oriented development, 12,500 SF retail/commercial space, 100 dedicated parking spaces for Transitway patrons

• Phase I - 123 units and Phase II - 47 units

Location: Transitway at SW 200 Street (19755 SW 110 Court), Unincorporated

Miami-Dade County

Development Area: 3.41 acres

Status: Phase I completed 2019, Phase II to be completed 4Q22

Project: Senator Villas

• Low-rise, 23 senior affordable housing units

Location: 8915 SW 40 Street (Bird Road), Unincorporated Miami-Dade County

Development Area: .65 acres Status: Completed in 2019

NW 7th Avenue at NW 62nd Street

Project: 7th Avenue Transit Village

• Mixed-use 176-unit affordable housing transit-oriented development including a 158-space parking garage, transit hub with covered bus bays, swimming pool, community black box theatre, ground floor commercial, Silver LEED certification. 358,003 sq. ft.

• Phase I – 9 stories, 76 residential units

• Phase II – 9 stories, 100 residential units

Location: SE corner NW 7th Avenue at NW 62nd Street, City of Miami

Development Area: 2.5 acres

Status: Phase I completed 2016, Phase II completed 2017

2.13.3. Metromover

Tenth Street Promenade Metromover Station (Brickell Leg)

Project: Development Agreement with adjacent property owner

 1,361 SF under and near station used as ground level access to adjacent private development to include station improvements of \$764,780 including new walkways, ramps, improved lighting, new hardscaping, signage, handrails, bicycle racks, elevator restoration

Location: SE 1 Avenue between SE 10 and 11 Streets, City of

Miami

Development Area: 1,361 SF

Status: Completed 2020

Brickell City Center Metromover Station (formerly Eighth Street) (Brickell Leg)

Project: Ground lease, development-maintenance-easement agreement

- 11,249 SF of County-owned land leased to adjacent private property owner/developer on which a portion of a parking garage was constructed as part of a 9-acre \$1 billion mixeduse development.
- Agreement included \$5 million in improvements to the station including landscaping and hardscaping to three Metromover parcels, open to the public, maintained by developer.

Location: SE 1 Avenue between SE 7 and 8 Streets, City of Miami Development Area: 11,249 SF

Status: Ground lease and agreement commenced 2012, term of 99 years

Freedom Tower Metromover Station (Omni Leg)

Project: Development Agreement, Access and Utility Easements

- \$3.2 million station improvements from private adjacent developer to include new elevator, escalator, renovated stairs, new turnstiles, lighting, landscaping.
- Easements for ingress/egress, utility distribution, air rights for balconies in private development.

Location: NE 2 Avenue between NE 6 and 7 Streets, City of Miami

Development Area: 5,965 SF

Status: Station closed from July 2020-July 2021 for improvements

Adrienne Arsht Center Metromover Station (Omni Leg)

Project: Omni Bus Terminal mixed-use development

Location: SE corner NE 15 Street and Biscayne Boulevard

Development Area: 0.987 acres

Status: On hold

2.13.4. The Underline

Project: The Underline

- 9-phase effort to transform land beneath the Metrorail guideway into a 10-mile linear park, urban trail and living art destination.
- Serve
- Separated
- Improvements
- Recreational

Location: Metrorail right-of-way between the Miami River and

Dadeland South Station

Development Area: 10 miles - 120 acres

Status:

- Phase 1– Brickell Backyard (Miami River to SW 13th Street) completed June 2020
- Phase 2 SW 13th Street to SW 19th Avenue, fully funded, in pre-design planning
- Phase 5 to be built at Douglas Road station by adjacent private developer
- Remaining phases currently unfunded

2.14.1. Broward County Transit (BCT)

The Broward County Office of Transportation operates BCT, a fixed route bus service, which connects with DTPW service. BCT operates 44 routes during weekdays, 31 routes on Saturday and 29 routes on Sundays, with varying service schedules spanning from before 4:35 AM to after midnight on weekdays. A regular one-way fare is \$2.00 while a reduced one-way fare is \$1.00, and an all-day pass is \$5.00. The express bus one-way fare is \$2.65 while the reduced one-way fare is \$1.30. DTPW passengers transferring to BCT will provide the BCT bus operator with the Inter-County Ticket and pay \$0.50. Passengers transferring from BCT to DTPW will provide the DTPW bus operator with the BCT Transfer and pay \$0.60 for a full-fare transfer, \$0.30 for a discounted-fare transfer, \$0.95 for

an express-bus transfer or \$0.45 for a discounted fare transfer. BCT and DTPW have partnered to provide regional bus service between Broward and Miami-Dade Counties. Currently, DTPW buses travel into Hallandale Beach (southern Broward), and BCT buses travel into Aventura, North Miami, Miami Gardens, and the Golden Glades interchange. Bus service from both agencies operates within the I-95 express lanes, connecting northern and central Broward communities with Downtown Miami. BCT operates the 595 Express which connects western Broward communities to the Civic Center and Downtown Miami.

South Florida Regional Transportation Authority (SFRTA)

The SFRTA operates Tri-Rail, a commuter rail service that operates along 72 miles of the South Florida Rail Corridor (SFRC) which spans Palm Beach County, Broward County, and Miami-Dade County. Tri-Rail primarily runs through the eastern urbanized areas of the three counties between the Mangonia Park station in Palm Beach County and the Miami Airport station in Miami-Dade County. Tri-Rail serves 18 passenger stations and averages more than 15,000 boardings per weekday.

Weekday service spans from 4:00 A.M. to 11:35 P.M., with operations of 20 minute to 30 minute headways in each direction during the Peak periods, Off-peak headways are 60 minutes in each direction. Weekend service spans from 5:17 A.M. to 11:45 P.M. with 60 minute headways. Tri-Rail operates a zonal fare system and is

comprised of six equidistant zones. Fares are determined by the sum of zones traveled; the regular base fare for one-way travel is \$2.50, discounted one-way is \$1.25, regular round-trip is \$5.00 and discounted round-trip is \$2.50. On weekends and holidays, daily passes are issued for \$5.00 and discounted is \$2.50. The cost for the Tri-Rail monthly pass is \$110 (\$55.00 discounted for children, seniors, and persons with disabilities). The cost for the Tri-Rail regional monthly pass (Tri-Rail and MDT) is \$155.00 (\$77.50 discounted for children, seniors, and persons with disabilities). Tri-Rail passengers transferring to the DTPW system at a Tri-Rail transfer point are required to pay as presented in the following table:

FARE TYPE TO METRORAIL TO METROBUS TO EXPRESS BUS EASY Card with Cash Value# \$1.20 Full/60¢ Discount 60¢ Full/30¢ Discount 95¢ Full / 45¢ Discount Regional Monthly Pass Free Free Free All other passes# \$1.20 Full/60¢ Discount 60¢ Full/30¢ Discount 95¢ Full/45¢ Discount Paper Ticket Metrorail Fare Express Bus Fare Metrobus Fare

Table 2-6: Tri-Rail to DTPW Transfer Prices

2.14.2. Brightline

Brightline is a private rail service connecting Downtown Miami, Downtown Fort Lauderdale, and Downtown West Palm Beach with approximately 30-45 minutes travel time between each station. Service started in 2018 with prices changing over time according to market tolerance. In 2020 service was been temporarily suspended due to the Covid-19 pandemic. Future growth plans include an additional station on the SMART Plan Northeast Corridor in Aventura, Florida, and an expansion to Orlando, Florida.

2.15. National Connections

2.15.1. Greyhound Intercity Passenger Bus Service

Greyhound operates one station and two additional stops in Miami. The Miami Greyhound Bus Station is located East of MIA Airport, at 3801 NW 21st Street #171, and also operates buses out of the nearby MIC.

An additional Greyhound stop is located at the Mobil Gas Station, 650 Opa-Locka Blvd. Greyhound offers bus service from Miami to all major US cities and more than 1,800 minor cities and towns across the country. Ticket prices currently range from \$11.00 for a trip from Miami to Hollywood, up to \$207 for a trip to Seattle, WA.

The Miami Amtrak station is located at 8303 NW 37th Avenue with an extension running to the MIC. Miami is the southern terminus for the Silver Service / Palmetto Line, which connects Miami to New York Penn Station by way of Philadelphia, Baltimore, Washington DC, Raleigh, Charleston, Jacksonville, Orlando, Fort Lauderdale, and many smaller cities in between. Major connections to East-West running lines are available in Washington DC and beyond. Coach seats are currently available from Miami for prices starting at \$45 for a trip to Winter Haven Florida, up to \$162 to reach the other end of the Palmetto Line at New York Penn Station. Sleeper rooms are currently available for prices starting at \$210 for a trip to Winter Haven, up to \$479 for a trip to New York.

2.15.3. Megabus

Megabus operates in over 100 cities across the Unites States and Canada. In Miami, Megabus departs from the MIC at 3801 NW 21st Street, like many other transit providers. Miami currently is the southernmost Megabus stop in the United States. The service is advertised as a low-cost transportation alternative, with one-way tickets to Tampa available for \$5 and to Atlanta for \$10. The only out-of-state destination available by a direct trip via Megabus is Atlanta; however, transfers from the Atlanta station can reach as far as New York City.

2.16. Conclusion

DTPW operates a multi-modal system that provides regional connectivity to 2.7 million residents and 24.2 million visitors through 98 Metrobus routes, two Metrorail lines, three Metromover loops, and 33 Park-and-Ride lots while coordinating with 33 municipalities which provide their own local transit service. This complex system is connected through a state-of-the-art transit app that brings convenience into the hands of riders. Transit fares are structured to help provide equitable access to all users. DTPW's TOD projects have yielded more than 4,990 residential units with 1,921 of those considered affordable housing. Interconnectivity with regional and national service providers help extend the reach of DTPW's services.

3. CIVIC ENGAGEMENT

Public outreach is a key component of the MDT10Ahead TDP. For this year's report, various approaches were taken to obtain input from Miami-Dade residents. As part of the TDP Major Update, the FDOT approved Public Involvement Plan (PIP) outlines various coordination efforts for DTPW to provide opportunities for public participation and facilitate consensus building for this visioning document.

During a typical APR cycle, DTPW actively engages the public by participating at local events, conducting interactive presentations, and performing outreach activities throughout the DTPW transit service area and within communities across Miami-Dade County.

However this year, despite the waning impacts of the SARS-CoV-2 (Covid-19) pandemic, DTPW was unable to safely conduct the same quantity of in-person outreach activities as a typical year. To ensure that this TDP includes meaningful public input, the agency expanded outreach efforts to increase social media and digital advertising, in addition to limited in-person outreach.

Figure 3-1: Teleconference TDP Presentation to the SFRTA PTAC

This chapter provides a detailed description of the public outreach activities undertaken during the development of this TDP. While DTPW receives continuous feedback from its patrons, the deadline for consideration in this TDP Annual Update was July 31st, 2021. Feedback obtained after this date will be incorporated into the following year's TDP.

3.1. Civic Engagement Goals and Objectives

Civic engagement is an integral component of the TDP development process. The branded name and logo for the plan, MDT10Ahead, was developed to assist stakeholders and the public in recognizing materials and allowing for more efficient communication between the team, the public, and stakeholders. The goals for the MDT10Ahead TDP are presented below and are intended to help ensure that transportation planning decisions are made in consideration of public needs and concerns.

- Goal 1: Early and Consistent Involvement: Involve general public (transit and non-transit users) and other stakeholders early and regularly in the development of the plan.
- Goal 2: Opportunity for Participation: Provide all DTPW riders, citizens, and stakeholders with the opportunity to participate throughout the development of the plan, including those in traditionally under-represented populations, such as persons with disabilities, older adults, or those who have Limited English Proficiency (LEP).
- Goal 3: Information and Communication: Provide all citizens and interested stakeholder agency groups with clear, timely, and accurate information relating to projects as they progress.
- Goal 4: Apply Range of Techniques: Use a broad-spectrum of techniques to gather input from a diverse population within the project areas.

3.2. Stakeholder Coordination

DTPW actively engages transportation stakeholders throughout the development of the TDP. These stakeholders share input, recommendations, and technical guidance on transportation related issues within the TDP. The stakeholders include the Miami-Dade TPO and CITT, as well as citizens from across the County.

3.2.1. CareerSource South Florida (Regional Workforce Board)

CareerSource South Florida serves Miami-Dade County to provide youth, employment, and business enterprise development services. Every year. CareerSource South Florida is provided a digital copy of the Draft MDT10Ahead TDP Annual Update for their review and comment.

3.2.2. Citizens Transportation Advisory Committee (CTAC)

DTPW presented to the CTAC on July 7th, 2021. The CTAC ensures that transportation projects in all stages of the planning process adhere to established visions, goals, objectives, and collective needs of the community. This group is comprised of Miami-Dade County residents appointed by the TPO Governing Board members.

3.2.3. SFRTA Planning Technical Advisory Committee (PTAC)

DTPW presented to the South Florida Regional Transportation Authority (SFRTA) PTAC on August 11, 2021. The PTAC provides planning and technical support to the SFRTA and serves as technical review committee for the SFRTA Transit Development Plan. This group is comprised of one member each from the three county transit agencies: Miami-Dade DTPW, Broward County Transit, and Palm Tran; the Broward Metropolitan Planning Organization (MPO), Palm Beach Transportation Planning Agency (TPA) and the Miami-Dade TPO; the two Regional Planning Councils, South Florida RPC and Treasure Coast RPC, the two FDOT Districts (District 4 and 6), and SFRTA, for a total of 11 members.

3.2.4. Electronic Communication

DTPW promoted TDP public engagement activities and encouraged input through its electronic communication outlets. Notices were posted on the DTPW, TPO, FDOT and CITT websites. DTPW posted information on its Facebook page (www.facebook.com/GoMiamiDade), through its Twitter account (www.twitter.com/GoMiamiDade), and on its Instagram account (www.instagram.com/gomiamidade). Email blasts were also sent out to various distribution lists to solicit public comments. DTPW also used its mobile app to reach passengers. DTPW established a TDP specific email address (MDT10Ahead@miamidade.gov) where individuals submit comments.

DTPW used the Community Information and Outreach Center's (CIAO) electronic (www.miamidade.gov or 311@miamidade.gov) and telephone (311, 305-468-5900, 888-311-DADE (3233), or TTD/TTY 305-468-5402) portals to gather information. If a commenter indicated that the comment was related to the TDP, the information was forwarded by CIAO staff to DTPW staff. Individuals can also call DTPW's customer service line (305-891-3131 or TTD/TTY 305-499-8971) to provide comments.

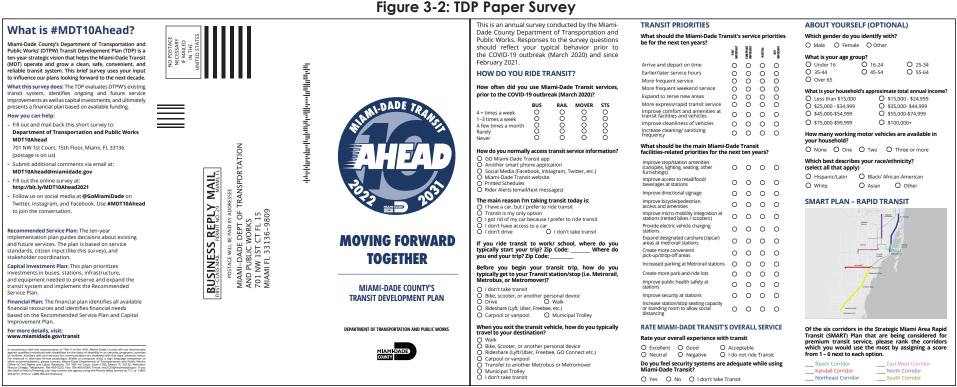

3.3. Survey

DTPW administered a survey between May 1, and July 31, 2021 to collect information on demographics, travel behavior, service needs and priorities of current transit riders and the non-riding public. The survey was made available digitally on the DTPW website, while paper copies were made available at public outreach events and distributed at the Government Center transit station. A full copy of the survey instrument is available in Appendix A-4.

Survey Instrument 3.3.1.

The survey instrument was developed through an in-depth discussion between project stakeholders. The survey questions cover two key areas. The first concentrates on understanding how riders access and utilize the transit system in their pre-Covid travels, and changes needed to ensure future public health and safety on the transit system. The second focus area asks respondents to prioritize improvements to the system by ranking different amenities from "Very Important" to "Not Important." The electronic survey consisted of 24 questions, and the mail-in-paper-based survey contained 15 questions. The survey was made available in English, Spanish and Creole.

Figure 3-2: TDP Paper Survey

3.3.2. Survey Advertising

Due to the social distancing requirement of the Covid-19 pandemic, the survey for this TDP was primarily conducted digitally, with limited in-person survey distribution. Instead of administering the survey at multiple transit stations over an extended period of time, the survey was advertised digitally through social media and internet banner ads targeted to Miami-Dade County residents, with only two days of in-person survey distribution. A print advertisement inviting the public to participate in the survey was published in the Miami Herald newspaper, including the spanish languag El Herald, from July 9 to July 15, 2021.

3.3.3. Social Media

DTPW advertised the survey on its social media accounts (Facebook and Twitter) as part of the effort to solicit feedback from both the riding and non-riding public. Several DTPW transportation partners including the CITT, The Underline, Miami Riders Alliance, and Age Friendly Miami also posted the survey on their social media handles. These posts generated several comments and conversations about riding experiences, suggested improvements, and complaints.

3.3.4. In-Person Distribution

Thanks to the success of vaccination and public safety efforts in South Florida, a limited amount of in-person outreach was performed, distributing surveys at government center transit hub on July 21 and July 23, 2021. Staff distributed surveys in multiple locations, including the metromover platform, metrorail platform, and the plaza where Metrobus vehicles board and alight.

Figure 3-3: Samples of TDP Digital Advertisements

3.4. Civic Engagement Outcomes

DTPW continues its coordinated county-wide efforts to educate and provide early and ongoing public involvement opportunities to the residents of Miami-Dade County, DTPW maintains an outreach program for engaging the public and other stakeholders through various activities and meeting forums. These include the DTPW website and social media outlets, mobile phone applications, posters, bus signs, and television screens. DTPW also reaches a wide variety of patrons through the Special Transportation Services (STS) Golden Passport Program.

In order to promote participation in the TDP development process, DTPW actively engaged the public at various public events. A listing of these events and distribution sites, as well as other outreach events attended by DTPW staff can be found in Appendix A-4. The data collected from the surveys are analyzed and presented in Section 3.5, with detailed data found in Appendix A-4.

Digital Advertising Outcomes 3.4.1.

The digital surveys were advertised on Google Ads and the Miami Herald. By the end of the survey period on July 31, 2021, the survey had been advertised 4.02 million times to Miami-Dade County residents through Google banner ads which received more than 19,200 clicks - a 0.5 percent click through rate, which is approximately double the typical rate for Google banner ads. This resulted in 407 completed surveys. Of the 342 digital survey responses received, 320 were completed in English, 16 in Spanish, and 6 in Creole. Out of 65 paper surveys completed, 36 were in English, 22 in Spanish, and 7 in Haitian Creole.

3.5. Survey Results

A survey administered by DTPW was conducted from May to July 2021 to collect information on demographics, travel behavior, and service needs of current transit riders and the non-riding public. The method used for surveying the public was an electronic and mail-in paper-based survey instrument totaling 24 or 15 questions in length, respectively. Spanish and Creole versions of the survey were also available. A copy of the survey instruments is provided in Appendix A-4.

Passenger travel characteristics and behaviors were identified by questions including:

- Current reason for riding transit
- Current method for reaching and leaving transit
- Travel time to nearest/preferred transit station
- Frequency of transit usage
- Payment type used
- If transfers are made
- Method of accessing transit information
- Trip origination and destination information

Transit priorities/preferences were identified by questions including:

- Ranking 10-year priorities with respect to services, and transit facilities
- Identifying reasons that would encourage increased ridership
- Willingness to pay more for improved services
- Identifying a top corridor for premium transit service
- Ranking top transit destinations
- Support for a proposed increase in the local sales tax to support transit
- Recommendations for service area improvements
- Satisfaction with overall DTPW transit services

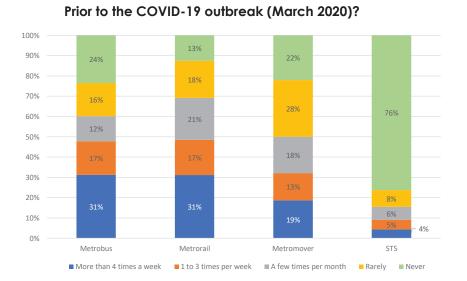

Socio-demographic information was identified by questions including:

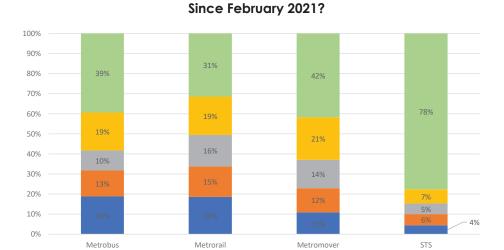

- Household vehicle availability
- Age
- Gender
- Race/ethnic origin
- Household income

Figure 3-4 examines which transit mode respondents used before and after the first year of the Covid pandemic. While STS only recorded a small decline, all other services had a major reduction in ride frequency for individual passengers. Metrorail experienced the most severe decline in rider frequency, likely due to work-from-home lifestyles for downtown office employees limiting green line ridership, and flight restrictions limiting orange line ridership.

Figure 3-4: Questions 1 & 2: How often did you use Miami-Dade Transit services?

■ 1 to 3 times per week

■ A few times per month

Never

■ More than 4 times a week

When asked about service priorities for the next 10 years, respondents indicated that on-time performance was the most important priority, followed by service frequency, expansion into new service areas, and improving cleanliness. Figure 3-5 shows the distribution of these responses.

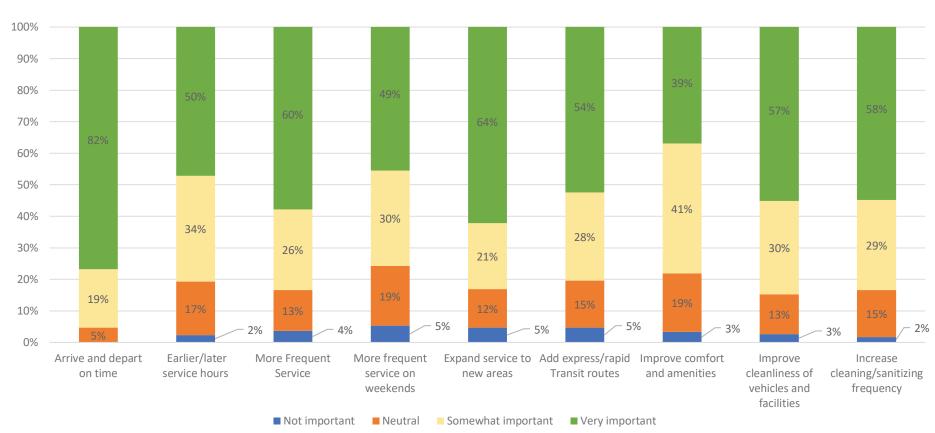

Figure 3-5: Question 10: What should be the main service priority for Miami-Dade Transit for the next ten years?

When asked about facility-related priorities for the next 10 years, respondents indicated that improving stop amenities, security at transit facilities, and improving signage at transit facilities were the top three priorities for most users. Figure 3-6 shows the total breakdown of all service priorities.

It is important to note that last year, improving public health and safety was top of the list of priorities. This could be attributed to the pandemic. However, with improved cleanliness and other safety measures, improving public health is no longer the top priority for riders for this year.

100% 90% 80% 70% 60% 50% 40% 30% 20% 10% 13% 6% 9% 5% 2% More convenient pidt upldrop off a teas Provide electric vehicle charging stations Increase parting at Methodal stations thrand carbate at Methodal Stations 0% Inthove hictornobility integration Increase seating standing capacity Improve tike pakinel storage Improve access to retail food Implove security Neutral ■ Somewhat important Very important

Figure 3-6: Question 11: What should Miami-Dade Transit's facilities-related priorities be for the next ten years?

Figure 3-7 shows what respondents indicated would induce them to use more transit. The desire for shorter wait times and faster travel to more destinations stood out as the three most popular answers. Notably, more than 50% of respondents would not agree with the statement "I am fine with current service".

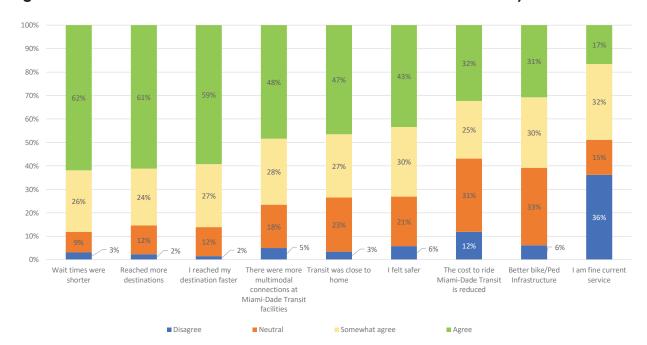

Figure 3-7: Question 12: What Would Make You Use Miami-Dade County Transit Services?

3.6. Concerns and Solutions

asdf

3.7. Conclusion

This chapter of the TDP provided an overview of the outreach techniques used for this Covid-impacted APR, and documented the public feedback obtained. The public feedback is used to inform the TDP project development process, and decisions at DTPW overall. In a typical year, DTPW will jointly focus outreach efforts on digital and in-person efforts. However, due to this year's Covid-19 pandemic, face-to-face outreach was used in a limited capacity. With a focus on digital outreach, feedback was obtained via social media posts and survey responses.

Survey responses were largely consistent with last years results, though a number of notable shifts took place which can be attributed to behavioral changes in reaction to Covid-19. For example, this years results indicate that we have doubled the percentage of people using contactless payments. Other changes may be attributed to shifting cultural practices, such as the growing popularity of bikes and electric scooters, which doubled the number of people using those modes to arrive/depart from their transit station. While one may assume that this is a result of people choosing active transportation to avoid the closed environment of a shared car, reductions were found in both vehiclular and pedestrian arrivals to transit stations. This indicates that some walkers are beginning to use personal electric transportation, which extends the effective capture range of the transit system due to faster, less energy intensive modes of personal transportation for first-and-last mile trips.

4. 2020 PERFORMANCE ASSESSMENT

The Identification of goals and objectives for a transit agency establishes the framework within which the agency will pursue its TDP-inspired vision over time. In the 2019 TDP Major Update, DTPW developed specific goals and objectives with associated target values consistent with the Agency's Mission and Vision. The goals and objectives provide a benchmark for the assessment of various projects and initiatives that are proposed, planned, and implemented throughout the DTPW transit system. This chapter of the annual update analyzes DTPW's progress during 2020 towards achieving the goals set forth in the 2019 TDP Major Update.

The framework for the performance assessment is based on the following definitions:

- Goal A long-term end toward which programs or activities are ultimately directed
- Objective A specific, measurable, intermediate end that is achievable and allows measurement of progress toward a goal
- Target A defined performance indicator for a specific measurement of progress toward an objective

Each target in this chapter is assigned one of three statuses, based upon DTPW's accomplishments during 2020:

- ✓ Yes The target has been met
- In Progress Significant progress has been made towards meeting this target
- X No The target is unmet

Information regarding ongoing progress and project completion dates is included in the narrative sections following each goal table.

4.1. Goal 1 - Improve Transit System Convenience and Reliability

| Goal 1: Improve Transit System Convenience and Reliability | | | | | | |
|--|--|----------|--|----------|--|--|
| Objective Measure Target 2020 Accomplishments Sto | | | | | | |
| 1.1 - Increase miles of transit infrastructure | Infrastructure miles of fixed guideway, exclusive ROW or express lanes in Miami- Dade County | Increase | Transitway: 22 miles Metrorail: 25 miles Metromover: 4.4 miles SR-826 Express Lanes: 12.7 miles SR-836 bus-on-shoulder - 8.5 miles I-95 Express Lanes - 12.2 miles Total: 84.8 miles | √ Yes | | |

4.1.1. Express Lanes and Exclusive Right of Way

4.1.1.1. SR-836 Express Bus

This project provides express transit service along SR 836 and the Homestead Extension of the Florida Turnpike (HEFT). This project will feature three routes:

- Line A provides AM/PM peak-hour service from the proposed Tamiami Station (park-and-ride/transit terminal facility located at SW 8th Street and SW 147th Avenue) to Downtown Miami via SW 8th Street, SW 137th Avenue and SR 836 with a 10 minutes headway.
- Line B will provide all day service from the proposed Panther Station at Florida International University's Modesto A. Maidique Campus (MMC) to the MIC via SW 8th Street, SR 821/HEFT and SR 836 with a 20 minutes headway. The planned long-term improvements for this route is anticipated to be completed by 2022 using 3 new 60-foot alternative fuel buses.
- Line C provides AM/PM peak-hour service from the proposed DolphinStation (NW 12th Street and HEFT) to Downtown Miami via SR 836 with a 10 minutes headway. This route began operations in mid-2020 using 9 new 60-foot alternative fuel buses.

4.1.1.2. SR-826 Express Lanes

Completed in November 2020, this project consists of tolled express lanes along the SR-826/Palmetto Expressway from SR-968/W Flagler Street to NW 154th Street and along I-75 from SR-826/Palmetto Expressway to NW 170th Street. The project is approximately 13 miles in length and will provide continuity to the I-75 Express Lanes, which extends to I-595 in Broward County.

Figure 4-1: SR-836 Bus Lanes

| Objective | Measure | Target | 2020 Accomplishments | Status |
|--|---|---------------------------|---|-------------|
| | Percentage of missed pullouts | 0% (Yearly Improvement) * | Current: 0.35% (Previously: 0.29%) | X No |
| | | Metrorail: ≥ 39,000 miles | 31,677 miles (Previously: 27,029 miles) | X No |
| | Mean distance between service failures | Metrobus: ≥ 4,000 miles | 5,632 miles (Previously: 4,850 miles) | ✓ Yes |
| 1.2 - Improve | | Metromover: ≥ 6,000 miles | 9,953 miles (Previously: 4,450 miles) | ✓ Yes |
| service availability | CAD/AVL installed and functioning on all transit service vehicles | 100% | 100% | ✓ Yes |
| | On-Time Performance | Metrorail:≥95% | 62.7% (Previously: 94.60%) | X No |
| | | Metrobus: ≥78% | 78% (Previously: 70.40%) | ✓ Yes |
| | | STS: ≥ 90% | 92.9% (Previously: 88.80%) | ✓ Yes |
| | | Metrorail:≤1.5 | 2.81 (Previously: 5.05) | X No |
| 1.3 - Improve customer satisfaction with DTPW service | Number of customer complaints per | Metrobus: ≤ 1.5 | 15.81 (Previously: 5.46) | X No |
| | 100,000 boardings (per mode) | Metromover: ≤ 0.5 | 0.6 (Previously: 0.95) | X No |
| | | STS: ≤ 0.5 | 0.19 (Previously: 0.18)** | ✓ Yes |

^{*} While DTPW aspires to deliver zero missed pullouts, this represents an ideal condition which likely can not be achieved. Success is measured by achieving yearly improvement.

^{**} STS measures complaint ratio of total trips, as opposed to number of boardings for the other transit modes.

| Objective | Measure | Target | 2020 Accomplishments | Status | |
|--|--|--|---|-----------------|--|
| 1.4 - Provide riders with more information | Real time ETA signage at multimodal stations and high ridership stops | Completed by November 2019 | Completed | ✓ Yes | |
| | Real time information available for 3rd party app developers, including General Transit Feed Specification (GTFS) and GTFS RealTime (GTFS RT) | Publish and maintain GTFS and GTFS RT feeds | Data feeds available at: https://www.miamidade. gov/global/transportation/open-data-feeds.page | √ Yes | |
| | | Metrorail: 100% | 100% | | |
| | Percent of transit service vehicles with wi-fi capability | Metrobus: 100% | 100% | √ Yes | |
| | , | Metromover: 100% | 100% | | |
| | Enhance real time info on DTPW application | By FY 2020 | Information available in the GO Miami-Dade App | ✓ Yes | |
| | | Metrorail: 65,000 | N/A - Due to Covid-19 precautions (Previously: 62,141) | N/A | |
| | Average weekday boardings per mode | Metrobus: 151,000 | N/A - Due to Covid-19 precautions (Previously: 160,396) | N/A | |
| 1.5. Aliena | | Metromover: 27,000 | N/A - Due to Covid-19 precautions (Previously: 29,081) | N/A | |
| 1.5 - Align transit service | | Metrorail: 360,670 | 329,867 (Previously: 359,148) | X No | |
| coverage with passenger demand | December 11 complete Consider | Metrobus: 2,466,000 | 1,861,096 (Previously: 1,875,711) | X No | |
| | Revenue Hours of Transit Service | Metromover: 110,057 | 97,906 (Previously: 113,317) | X No | |
| | | STS: 1,105,000 | 917,428 (Previously: 1,169,768) | X No | |
| | Committed bus service adjustments / improvements | 80% consistency with adjustments planned in previous TDP | N/A (No adjustments planned for this year - adjustments postponed until the conclusion of the Better Bus Project) | N/A | |

4.1.2. Real-Time ETA signage at Multimodal Stations and High Ridership Stops

As of January 2020, DTPW has completed installation of real-time ETA signage which displays the next train arrival time on multicolor LED displays in all Metrorail Stations and nine Metromover Stations. This data is provided by Computer Aided Dispatch / Automatic Vehicle Location (CAD/AVL) on transit vehicles. The LED signs function in conjunction with a new public address system, providing improved ADA accommodation.

4.2. Goal 2 - Improve Customer Service

| Goal 2: Improve Customer Service | | | | | |
|---|---|--|---|-----------------|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | |
| 2.1 - Prepare and release an annual transit satisfaction survey | Completion of survey | Survey completed annually | 2020 TDP Survey conducted digitally | √ Yes | |
| 2.2 - Conduct regular on-board passenger surveys | Completion and frequency of survey | Survey conducted at least every 5 years Currently: Last completed in April 2013 | Miami-Dade TPO survey planned for 2021 | X No | |
| | Number of outreach activities per year | ≥ 6 | No Outreach activities due to covid-19 (Previously: 56) | N/A | |
| 2.3 - Conduct dedicated transit outreach programming | Promotion of annual survey via social media | Monitor number of social | Facebook: 5 posts, 2,668 Likes, 83 Comments, 269 Shares *First post was sponsored, accounting for 2,500 likes (Previously: 77 likes, 29 Comments and 15 Shares) | | |
| ooneach programming | | media endorsements related to the annual survey | Instagram: 3 posts, 342 Likes, 5 Comments | Yes | |
| | | | Twitter: 8 posts, 12 Likes, 11 Retweets (Previously: 96 likes, 11 conversions and 89 retweets) | | |
| 2.4 - Increase regional coordination | Coordination meetings with BCT, PalmTran and Tri-Rail | ≥ 90% attendance at regional transportation service meetings | SEFTC RTTAC (1 meeting) | X No | |
| | Tri-County Fare System Implementation/ Cross Promotion | Seamless transit fare system in operation by 2020 | Technical specifications and system diagrams have been shared between Miami-Dade and Broward County. Actively working to resolve contractual changes so that work may proceed with the selected vendor. | X No | |

4.3. Goal 3 - Maximize Operational Safety and Security

| Goal 3: Maximize Operational Safety and Security | | | | | | |
|---|--|---------------------------|--|----------------|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | |
| 3.1 - Reduce transit | Bus accident rate per 100,000 miles | ≤ 3.778 per 100,000 miles | 3.76 per 100,000 miles (Previously: 2.31 per 100,000 miles) | √ Yes | | |
| vehicle accidents | Preventable bus accident rate per 100,000 miles | ≤ 1.50 per 100,000 miles | 1.45 per 100,000 miles (Previously: 1.84 per 100,000 miles) | ✓ Yes | | |
| 3.2 - Make transit vehicles and facilities secure environments for customers | Number of transit facilities with camera surveillance | ≥ 54 facilities | 1279 total Cameras (Previously: Metrorail: 22 Stations Metromover: 21 Stations Metrobus: 1 Station) | X No | | |
| | Number of transit vehicles with camera surveillance | ≥ 1,025 transit vehicles | 29 Metromovers 754 Buses 136 Metrorail Trains (Previously: 29 Metromovers 754 Buses 484 Metrorail Train Cars) | X No | | |
| | Number of security post inspections | ≥ 800 per month | 1,244 (Previously: 997 Per Month) | ✓ Yes | | |
| | Number of system-wide NTD Reportable Part One (1) Crimes (Serious) per 100,000 riders (monthly moving average) | ≤ 0.3 per 100,000 riders | 0.49 (Previously: 0.22 per 100,000 riders) | X No | | |
| | Number of system-wide NTD Reportable Part Two (2) Crimes (Petty) per 100,000 riders (monthly moving average) | ≤ 1.62 per 100,000 riders | 0.39 (Previously: 0.22 per 100,000 riders) | ✓ Yes | | |

4.3.1. System-wide Safety and Security Upgrades

DTPW has programmed funding to purchase security equipment to upgrade and install closed circuit camera television (CCTV) systems and its respective software components, and to continue the replacement of fire detection and reporting systems. DTPW's commitment to the safety and security of the DTPW system, patrons, and employees is of the highest priority. In an effort to further complement its existing security infrastructure, DTPW continues to aggressively add state-of-the art technology to both reduce crime and to aid law enforcement in proactively securing and safeguarding the transit system. FDOT Rule 14-15.017(2.2.1), however, prevents DTPW from disclosing these improvements/installations in greater detail.

DTPW will continue to enhance existing security equipment with the addition of 4K technology to the CCTV Systems in Metrorail and Metromover. The second phase of the CCTV project is slated to be complete by July 2021. Metromover will also have a new fire detection and reporting system installed in all Metromover stations and at the Stephen P. Clark Metromover Control Center. This new fire detection and reporting system is slated to be completed by January 2023.

4.4. Goal 4 - Enhance Integration of Transit Services to Support the Economy

| Goal 4 - Enhance Integration of Transit Services to Support the Economy | | | | | | | |
|--|--|----------|--|----------|--|--|--|
| Objective | 2020 Accomplishments | Status | | | | | |
| 4.1 - Increase density of TOD at DTPW Metrorail, Transitway and park-and-ride stations through Public Private Partnerships (P3) | Committed square feet of commercial space in P3 TODs | Increase | 3.634 million (Previously: 3.56 million) | ✓ Yes | | | |
| | ě – | | 5,039 (Previously: 4,990) | ✓ Yes | | | |

4.4.1. Transit Oriented Development Projects

4.4.1.1. Link at Douglas - Douglas Road Metrorail Station

Link at Douglas is a five-tower mixed-use development which broke ground in April 2019. Phase 1A and 1B are now under construction, and all phases will be completed by 2031. Occupying seven acres of land, Link at Douglas will feature 1,375 residential units including a workforce housing component (12%), 76,000 SF of ground floor retail space, 430,000 SF office space, and a public plaza that will connect with The Underline.

As part of the partnership with DTPW, the Adler Group and 13th Floor Investments will contribute more than \$17 million in improvements to the Douglas Road Metrorail station and approximately \$1 million toward the development of The Underline. Link at Douglas is expected to generate approximately \$500 million in new revenue for Miami-Dade County.

4.4.1.2. Northside Transit Village - Northside Metrorail Station

A LEED Silver certified project, the Northside Transit Village will include four 8-story affordable housing buildings with 438 units (219 senior and 219 family), 20,000 square feet of ground floor retail, and a parking garage that includes 250 spaces of park-and-ride parking for transit users. In 2020, the second of four phases was completed, with all four expected to be complete in 2021.

Table 4-1: Existing Transit Oriented Developments

| _ | | | · | | | |
|----------------------|-------------|-------------|----------------|-----------------------|-------------------|-----------|
| | Comm | nercial | | Resid | dential | |
| TOD | Office (SF) | Retail (SF) | Market Rate | Affordable Housing | Senior Housing | Workforce |

| Grand Total | 3,633 | 3,843 | 5,039 | | | |

4.4.1.3. Grove Central - Coconut Grove Metrorail Station

After a water main relocation and construction of a new bus depot in 2020, construction of the primary structure has begun with completion expected by 2023. Grove Central will include 170,000 Square Feet of ground floor retail, with 402 rental residential units and a parking garage that includes 250 dedicated park-and-ride spaces for transit users. The total tenant contribution for Metrorail station improvements is \$5 million.

| Goal 4 - Enhance Integration of Transit Services to Support the Economy | | | | | | | |
|---|--|---------------------------------------|----------------------------------|-------------|--|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | | |
| | Miles of service within 1/4 mile of attractors | Healthcare: 50 miles | 55 miles (previously 64 miles) | ✓ Yes | | | |
| | | Tourist/Special Attractors: 300 miles | 133 miles (previously 141 miles) | X No | | | |
| 4.2 - Provide transit access to major attractors in Miami-Dade County | | Education: 100 miles | 85 miles (previously 93 miles) | X No | | | |
| | | Employment Areas: 40 miles | 214 miles (previously 230 miles) | ✓ Yes | | | |
| | | Retail Centers: 90 miles | 85 miles (previously 90 miles) | X No | | | |

4.5. Goal 5 - Provide Transit Services that Reduce the Impact on the Environment

| Goal 5: Provide Transit Services that Reduce the Impact on the Environment | | | | | | | |
|--|---|---|---|----------------|--|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | | |
| 5.1 - Increase percentage of fleet that uses alternative fuels | Percent of fleet that uses alternative fuels | Increase | 74% (Previously: 63%) | ✓ Yes | | | |
| 5.2 - Incorporate solar panels on DTPW facilities | Complete a study to assess potential of installing solar panels on DTPW-owned facilities | Complete assessment by 2024 | DTPW completed the coordination with FPL for Net-Metering service. Due to delays caused by Covid-19, DTPW will be reviewing available data at the end of 2021 to determine the feasibility of incorporating into multiple locations. | In Progress | | | |
| | Partner with utilities and solar advocacy groups to install solar panels at DTPW facilities | Coordinate to investigate possible programs by 2020 | DTPW is currently investigating solar assisted electric vehicle charging systems with possible pilot in fiscal 2022-2023. | X No | | | |

4.5.1. Alternative Fuels

DTPW has replaced nearly three quarters of its fleet with alternative fuel vehicles in the past few years, including CNG and electric buses. DTPW had an option to purchase up to 42 alternative fuel buses which slated to be in service by January 2022. DTPW will also purchase 65 articulated 60-foot Battery-Electric zero emission buses, and has an option to purchase up to 35 articulated 60-foot Battery-Electric zero emission buses. These new vehicles are slated to be in service by the end of December 2021. The SR-836 Express Bus Service will also include the purchase of 9 new 60-foot alternative fuel buses.

4.6. Goal 6 - Maximize Use of Funding Sources

| Goal 6: Maximize Use of All Funding Sources | | | | | | |
|---|----------------------------------|-----------------------------------|---|-----------------|--|--|
| Objective Measure | | Target | 2020 Accomplishments | Status | | |
| 6.1 - Achieve a sustainable transit financial plan that maximizes existing funding and pursues innovative and new funding sources | Status of transit financial plan | Apply for state and federal grant | Received 6 FTA grants totaling \$434,235,979 Received 18 FDOT grants totaling \$132,572,145. (Previously: \$148,174,975 in FTA agreements and \$22,319,413 in state funding from FDOT) | √ Yes | | |
| 6.2 - Reduction in operations unit cost per revenue mile | Change in cost per revenue mile | Reduce by 2024 | +8.28% : \$11.88 in 2020 vs. \$10.98 in 2019 (Previously: -1.96% from \$11.20 to \$10.98) | X No | | |
| | Change in cost per revenue hour | Reduce by 2024 | +9.19% : \$170.40 in 2020 vs \$156.06 in 2019 (Previously: +4.5% from \$149.31 to \$156.06) | X No | | |

4.6.1. Innovative and New Funding Sources

In 2020, DTPW received 24 different grants, including 6 FTA grants totalling more than \$434 million, and 18 FDOT grants totalling more than \$132 million. These amounts were boosted by pandemic relief funding and the award of the \$100 million FTA grant for the SMART Plan South Corridor.

| Goal 6: Maximize Use of All Funding Sources | | | | | | |
|---|--|--|---|----------------|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | |
| alternative project delivery | Alternate Delivery projects: Public-Private Partnerships, Transportation Infrastructure Finance and Innovation Act (TIFIA), State Infrastructure Bank Loans, Design Build, Operate and Maintain, and Design Build Finance Operate and Maintain | Completion of two projects delivered through alternative methods by 2024 | Golden Glades Multimodal Transportation Facility Design-Build project in partnership with FDOT. Project commenced in 2018 and is scheduled to be completed in 2021. | • | | |
| | | | Ludlam Trail Corridor Engineering under way, construction expected in 2022. Project includes federal, state, and local funding | In Progress | | |
| 6.4 - Increase | Farebox Recovery Ratio | Increase | FY 20: 8.32% (Previously: FY 19: 15.9%, FY 18: 15.2%) | X No | | |
| passenger fare revenue | Conduct a fare policy analysis and evaluate alternate fare models (distance/zone models) | Conduct study | Transit fares suspended for most of 2020 due to Covid-19 | N/A | | |

4.6.2. Design-Build Projects

4.6.2.1. Golden Glades Multimodal Transportation Facility (GGMTF)

The GGMTF project is located in northern Miami-Dade County on two FDOT-owned Park-and-Ride lots adjacent to the cities of Miami Gardens, North Miami Beach, and North Miami. The GGMTF, a design-build project, will consolidate the existing bus transit services at the two Golden Glades Park-and-Ride lots into a single facility adjacent to the Tri-Rail Station. This project will transform the park-and-ride into a state -of-the-art transit terminal with a multi-bay bus facility upgraded walkways, platforms, bicycle/pedestrian amenities as well as other improvements related to transit operations, including internal roads, drainage, lighting systems, fencing, wayfinding, and traffic control signage. The GGMTF will feature a multi-story parking garage, kiss-andride, and plenty of surface parking lots for all types of motorists, including scooters and motorcycles. Other amenities will include bicycle parking and lockers. The complex will also feature a transit hub, future governmental use development building, a break lounge for bus drivers, and future governmental use intercity bus terminal. Construction began in August 2018 and is anticipated to end in December 2021.

4.6.2.2. Ludlam Trail Corridor

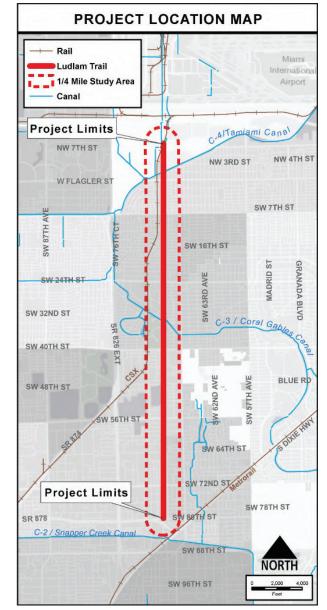

The Ludlam Trail is progressing through a P3 that will transform a 6.2-mile length of the former Florida East Coast railroad corridor from the Blue Lagoon to SR-878 into a bicycle and pedestrian friendly urban park and public space, complemented by trail-oriented development aimed at activating the corridor at strategic locations. The Ludlam Trail will connect over 35,000 people within a half-mile radius to five schools, four parks, and two transit hubs, along with residential and commercial areas. Once fully operational, the Ludlam Trail will form an integral part of the 225-mile planned Miami Loop, a network of planned trails that also includes The Underline, Miami River Greenway and the Perimeter Trail.

Miami-Dade County will construct 80% of the trail segment while the developers will also design and build a half-mile-long segment of the trail and maintain it at no cost to taxpayers. In 2018, the Miami-Dade Commission approved the \$25 million purchase of 80% of the rail corridor and further secured about \$27 million of the \$94 million construction cost.

4.7. Goal 7 - Expand Transit Services

| Goal 7: Expand | l Transit Services | | | |
|--|-----------------------|---|---|-------------|
| Objective | Measure | Target | 2020 Accomplishments | Status |
| 7.1 - Implement the Strategic Miami Area Rapid Tranist (SMART) Plan Rapid Transit Network | Beach Corridor | | 1. TPO Resolution #05-20 selected the LPA for monorail, APM, and LRT in January 2020. 2. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. 3. Board of County Commissioners approved the contract award for the Interim Agreement (IA) for the Beach Corridor Trunk Line. The IA became effective on Oct 31, 2020. | ✓ Yes |
| | East-West Corridor | | TPO Adoption of BRT as the Locally Preferred Alternative in October 2020. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. Dolphin Station Park-and-Ride completed. Express Bus Service (complimentary to BRT) initiated. | In Progress |
| | Kendall Corridor | Progress toward three milestones: 1. Locally Preferred Alternative (LPA); | Curbside Bus Rapid Transit (BRT) was identified as the recommended alternative for the Kendall corridor in 2019. Endorsement of the recommended alternative is expected in Q1 2021. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. | In Progress |
| | North Corridor | 2. Inclusion of the SMART Plan projects in the TDP and other planning documents; 3. Implementation of the projects upon funding availability | Elevated Heavy Rail selected as the LPA by the TPO Governing Board in October 2019. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. Optimized concepts and costs presented to Miami-Dade TPO Governing Board in March 2020. Released an RFP for the design build operate and maintain service for the North Corridor in June 2020 with proposals due by Spring 2021. | √ Yes |
| | Northeast Corridor | | Established framework for negotiations with Brightline. Reached a tentative agreement regarding access fee and other project elements. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. Advanced the NEPA process Began pursuing federal and state funding | ✓ Yes |
| | South Corridor | | 1. FTA and FDOT grant agreements fully executed in September 2020. 2. NTP Issued February 2021, construction scheduled to begin Summer 2021. | √ Yes |

| Goal 7: Expand Transit Services | | | | | | | |
|---|--|--|--|-------------|--|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | | |
| 7.2 - Implement the SMART Plan BERT Network | Flagler Corridor | Progress toward three milestones: 1. Locally Preferred Alternative (LPA) as needed; 2. Inclusion of the SMART Plan projects in the TDP and other planning documents; 3. Implementation of the projects upon funding availability. | Flagler Corridor PD&E study is refining recommended alternatives, expecting TPO endorsement in 2020. Included in TDP Implementation Plan, the TPO TIP, and the 2045 LRTP. | In Progress | | | |
| | South Miami- Dade Express | | BERT Network PD&E study received Notice to Proceed (NTP) March 2019. Park-and-Rides Included in TDP Implementation Plan and the 2045 LRTP. | In Progress | | | |

| 7.3 - Increase service frequency on high demand bus routes | Number of route improvements or adjustments to top 10 routes | Increased frequency on 10% of top 10 routes from previous year | 2019 top 10 Routes b: 119, 112, 11, 77, 27, 120, 38, 9, 3, 8 No route frequency increases in 2020 due to Covid-19 | N/A | | | |

4.7.1. Bus Express Rapid Transit Service

The BERT network is an integral element of the SMART Plan. A BERT Network study is underway and includes a planning and environmental study to determine origins and destinations along the BERT routes, develop a service plan for the routes, analyze potential traffic mitigation strategies to enhance transit operations, develop conceptual plans for new and/or enhanced park-and-ride facilities, and prepare necessary environmental approvals for anticipated FTA funding. The study is anticipated to be completed by early-2021.

Among the BERT routes, some are further advanced than others. Service implementation for Route a is being studied through FDOT. Service for Route c began in November 2019. Service for Route b is anticipated in 2021; while service for the Beach BERT Routes d, e1, f1, f2, and f3 is anticipated for 2023. Service for Route e2 is anticipated in 2027, pending the provision of the park and ride terminal at the Miami Executive Airport. DTPW is in coordination with the Florida Turnpike Enterprise for permission to use the shoulders along the Turnpike under congested traffic conditions. The Turnpike is still currently constructing managed lanes, with an estimated completion date in early 2025.

In order to advance the implementation of Route f1, DTPW is in coordination with the FDOT and the Federal Highway Administration (FHWA) to begin an interim service which is anticipated for Fall 2021. The interim service will use the outside shoulder of the Julia Tuttle Causeway/I-195 to bypass congestion. Ultimately, Routes f1, f2 and other DTPW routes will be able to use the inside shoulder to bypass congestion.

Figure 4-4: Tamiami Station Park-and-Ride

4.8. Goal 8 - Enhance Integration and Connectivity of Transit Systems Across Modes

| Objective | Measure | Target | 2020 Accomplishments | Status |
|--|--|---|--|-----------------|
| 8.1 - Improve local, first/ last mile connectivity and convenience | Incorporate recommendations from the TPO Study First Mile - Last Mile Options with High Trip Generator Employers | Develop action plan to incorporate recommendations by 2024 | 1) Exclusive bus lanes on SR-836 and SR-874/878. 2) Level boarding incorporated into design for South Dade transitway corridor. 3) Installation of Transit Signal Priority (TSP) capabilities under way county-wide. 4) Numerous SMART Plan Demonstration Projects initiated | √ Yes |
| 8.2 - Improve Regional Connectivity | Number of routes connecting to regional transit (MIC, Miami Central, Tri-Rail, Amtrak, and Greyhound services) | Increase Previously: 25 Routes (7, 22, 32, 37, 42, 57, 77, 95, 10, 110, 112, 132, 135, 146, 150, 155, 195, 196, 211, 238, 277, 297, 338, Metrorail, Metromover) | 25 Routes (2, 7, 9, 21, 22, 32, 36, 37, 42, 57, 95 Express Golden Glades, 110, 112, 132, 135, 150, 155, 211, 238, 246, 297, 338, 836, Metrorail, Metromover) | X No |

4.8.1. Transit Signal Priority

Transit Signal Priority (TSP) is an advanced signalization system that provides Metrobus vehicles equipped with real-time tracking technology priority passage through intersections to improve their on-time service.

To date, DTPW has installed 284 smart signals along 10 county corridors as part of a larger five-year, \$11 million Traffic Signal System Modernization Project to improve mobility along the County's ten busiest corridors. Before-and-after studies are showing travel time savings for drivers on these corridors. DTPW is working on an additional \$160 million project to upgrade the rest of the County's traffic signal system which has approximately 3,000 signalized intersections. Improvements will include smart signals and TSP.

The 10 County corridors where smart signals have been installed are:

- NW 36th Street from NW 71st Avenue and NW 84th Avenue.
- Miami Gardens Drive (NW 183rd Street) from Bobolink Drive to NW 87th Avenue.
- NW 163rd Street from NE 19th Avenue to NW 2nd Avenue.
- Indian Creek Drive from 63rd Street to 88th Street.
- Biscayne Boulevard from NE 11th Street to NE 82nd Street.
- West Flagler Street from 43rd Avenue to Milam Dairy Road.

- LeJeune Road from Anastasia Avenue to Minorca Avenue.
- SW 27th Avenue from Bayshore Drive to SW 16th Street.
- SW 88th Street (Kendall Dr.) from SW 112th Avenue to SW 172nd Avenue.
 U.S. 1 from SW 16th Avenue and SW 98th Street.
- U.S. 1 from SW 104th Street and SW 344th street (including the South Dade Transitway between Florida City and the Dadeland South Metrorail station).

| Goal 8: Enhance Integration and Connectivity of Transit Systems Across Modes | | | | | | | | |
|---|---|------------------------------------|--|-----------------|--|--|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | | | |
| | Implement bike share at all Metrorail and Metromover stations | 100% of stations by 2024 | Bikeshare contract terminated, goal will be pursued with future vendors | X No | | | | |
| 8.3 - Improve service accessibility for non-motorized modes and | Integrate bike share payments into EASY network | Complete by 2024 | Bikeshare contract terminated, goal will be pursued with future vendors | X No | | | | |
| users | Increase bicycle/ electric scooter parking at all Metrorail and Metromover stations | 237 installed by 2024 | No new bike lids installed (Previously: 95 Bike Lids at 11 Stations) | X No | | | | |
| 8.4 - Reduce reliance on park-and-ride facilities by providing additional access options to DTPW transit facilities | Establish partnerships first/last mile service providers | 5 partnerships established by 2024 | 2020: Secured partnerships with Via, Uber, Lyft, and Velocia. Previously: Partnered with WAZE for a six month carpool program. Partnered with Uber and Visa to pilot a free open payment on-demand service at Dadeland South for one week. Partnered with Ford to study community feedback to improve first/last mile transit | √ Yes | | | | |

4.8.2. Bicycle Parking at Metrorail Stations

DTPW ordered and received 237 bicycle locker replacements for all Metrorail stations, and in 2020, 95 of the 237 bike lids were installed at 11 Metrorail stations. Table 4-2 provides a list of Metrorail stations where lids have been installed.

Figure 4-5: Bike lids at Okeechobee station

Table 4-2: Bike Lid Installations

| Facility | Bike Lids Installed |
|----------------------------|------------------------|
| Dadeland South Station | 6 |
| South Miami Station | 16 |
| Vizcaya Station | 18 |
| Douglas Station | 6 |
| Tri-Rail Station | 2 |
| Hialeah Station | 10 |
| Okeechobee Station | 5 |
| Earlington Heights Station | 4 |
| University Station | 6 |
| Culmer Station | 12 |
| I-75 Park and Ride | 10 |
| | |

4.9. GOAL 9 - Ensure Equity in Transit Services

| Goal 9: Ensure Equity in Transit Services | | | | | | | | | |
|---|--|---------------------------------------|--|----------------|--|--|--|--|--|
| Objective | Measure | Target | 2020 Accomplishments | Status | | | | | |
| 9.1 - Reduce dependence on STS by improving service for transit dependent population | Increase route miles serving areas with a high density of persons with a disability | Increase by 2024 2018: 399 miles | 411 miles (No change due to Covid-19) | ✓ Yes | | | | | |
| | Increase percentage of DTPW stops that are ADA accessible | Increase by 2024 2018: 48.6% | 48.6% - 3,887 out of 8,000 Contract for an additional 360 stops awarded on May 1, 2020. Completion scheduled May 2023. | N/A | | | | | |
| | Implement travel training program to teach passengers with disabilities how to use fixed route service | Implement training program by 2024 | None | X No | | | | | |

4.10. GOAL 10 - Maintain Existing Transit System in a State of Good Repair

| Goal 10: Maintain Existing Transit System in a State of Good Repair | | | | | | | | |
|--|------------------------------|-----------------|------------------------------------|----------|--|--|--|--|
| Objective | 2020 Accomplishments | Status | | | | | | |
| 10.1 - Increase capital expenditure on Infrastructure Renewal Program (IRP) | 35% (Previously: 19%) | √ Yes | | | | | | |
| | Average Metrobus fleet age | ≤ 7.5 years | 5.8 years (previously 5.4 years)* | ✓ Yes | | | | |
| 10.2 - Reduce Average Fleet Age | Average Metrorail fleet age | ≤ 12 years | 1.6 years (previously 10.0 years)* | ✓ Yes | | | | |
| | Average Metromover fleet age | ≤ 15 years | 10.2 years (previously 9.7 years) | ✓ Yes | | | | |

^{*}DTPW Metrobus and Metrorail replacement programs have contributed to reducing average fleet age with the replacement of aging fleet based on the FTA's bus retirement criteria (500,000 miles/12 years) with new fleet.

4.10.1. Metrorail New Vehicle Replacement

The Miami-Dade Board of County Commissioners (BCC) and the CITT approved the \$380 million procurement of 136 new rail vehicles for replacing the existing fleet in March 2008. The new vehicles, which are being manufactured at the Hitachi Manufacturina Facility in Medley, feature the latest technological advances which will significantly improve passenger comfort, efficient maintenance and operations. The first vehicles were put into revenue service in November 2017 with the additional vehicles being delivered between 2018 and April 2021.

Figure 4-6: Brand New Metrorail Vehicle In Service

4.10.2. Metrobus New Vehicle Replacement

DTPW continues to implement its bus replacement program. Funding for this program is provided through various sources including the PTP, FDOT and Federal funding sources. DTPW's bus fleet is continuously aging, therefore, an aggressive bus replacement plan is in place to ensure compliance with FTA's bus retirement criteria. After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). The procurement of alternative fuel buses for replacements and enhancements is not only an improvement to transit, but also promotes the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

In addition to CNG, DTPW will also acquire its first 75 electric-powered, zero emission buses. The new vehicles are slated to begin service by May 2022, and all vehicles are expected to be delivered during 2022. These vehicles will be the first of their kind in Miami-Dade County's Metrobus Fleet and

Figure 4-7: New DTPW Metrobus vehicles ready for service

complement the ongoing modernization of the fleet. DTPW has an option to purchase up to 42 additional alternative fuel buses. DTPW will also purchase 65 articulated 60-foot Battery-Electric zero emission buses. DTPW has an option to purchase up to 35 articulated 60-foot Battery-Electric zero emission buses. These new vehicles are slated to be in service by third quarter 2022.

4.11. Consistency Analysis

In a typical TDP APR, a list is included of the bus service improvements DTPW is committing to for the following year, as well as an analysis of DTPW's consistency in implementing the committed changes from the previous year. However last year, the list of committed improvements and adjustments was deferred until the completion of the Better Bus Project. Additionally, as a result of the Covid-19 pandemic, no changes were made to DTPW bus service in 2020. Therefore, there is no consistency analysis to be performed for this year's TDP Annual Progress Report.

4.12. Conclusion

Out of 84 targets established in the 2019 TDP Major Update, in 2020 DTPW overcame the challenges of the Covid-19 Pandemic and met 35 targets (42%), and has work currently under way to complete 13 more (15%). 28 targets (33%) were not met, and an additional 8 were not applicable due to the effects of the Covid-19 pandemic.

5. 2021 TRANSIT IMPLEMENTATION PLAN

DTPW has committed to implement many transit improvement projects in Fiscal Year 2020-2021 (October 1, 2020 - September 30, 2021). This chapter contains detailed descriptions of the individual projects and transit initiatives DTPW has committed to during this period. These items include the purchase of new vehicles, the advancement and implementation of SMART Plan corridors, new express bus routes, new transit supportive facilities, improvements to existing service, and infrastructure renewal projects - all intended to maintain, improve, and further expand DTPW services.

For each project, the activity planned for 2021 is highlighted in bold.

5.1. Committed Capital Improvement Plan

Annually, DTPW prepares the Adopted Budget and Multi-Year Capital Plan that lists specific projects related to the expansion and improvement of DTPW's existing services. DTPW has \$792,076,000 allocated for capital projects in the current fiscal year (FY 20-21). Table 5-1 presents the adopted capital budget for the current fiscal year.

Table 5-1: DTPW FY 2020-2021 Adopted Capital Budget (\$000s)

| Project | Category/Funding | FY 20-21 |
|---|----------------------------|-----------|
| Aventura Station | Capital - Funded | \$30,000 |
| Beach Express South | Operations | \$1,152 |
| Bus - Enhancements | Operations | \$8,672 |
| Bus - New South Dade Maintenance Facility | State of Good Repair | \$11,246 |
| Bus - Related Projects | State of Good Repair | \$218,569 |
| Bus - Tracker And Automatic Vehicle Locating System Upgrade (CAD/AVL) | Capital - Funded | \$661 |
| Bus And Bus Facilities | State of Good Repair | \$9,175 |
| Dadeland South Intermodal Station | Vision Plan | \$300 |
| Fare Collection Equipment Projects | State of Good Repair | \$2,264 |
| Federally Funded Projects | | \$107,377 |
| Infrastructure Renewal Plan (IRP) | State of Good Repair | \$12,500 |
| Lehman Yard - Miscellaeous Improvements | State of Good Repair | \$14,458 |
| Metromover - Improvement Projects | State of Good Repair | \$31,632 |
| Metrorail - Stations And Systems Improvements | State of Good Repair | \$42,007 |
| Metrorail - Track And Guideway Projects | State of Good Repair | \$50,550 |
| Metrorail - Vehicle Replacement | State of Good Repair | \$6,084 |
| Metrorail And Metromover Projects | State of Good Repair | \$7,293 |
| Palmetto Intermodal Terminal | Capital - Funded | \$18,930 |
| Park And Ride - Transit Projects | Capital - Funded | \$7,644 |
| Park And Ride - Transitway At Sw 168th Street | Capital - Funded | \$29,829 |
| Safety Improvements - Fdot Projects | State of Good Repair | \$528 |
| Signage And Communication Projects | State of Good Repair | \$10,640 |
| South Dade Transitway Corridor | Capital - Funded | \$134,860 |
| Strategic Miami Area Rapid Transit (SMART) Plan Phase 1 | Capital - Partially Funded | \$14,730 |
| Sunshine Station - Golden Glades Bike/Pedestrian Connector | Capital - Funded | \$5,553 |
| The Underline | Capital - Funded | \$7,438 |
| Track Inspection Vehicle / Train | State of Good Repair | \$7,500 |
| Vision Zero And Safety Improvement Projects | Capital - Funded | \$484 |
| Grand Total | | \$792,076 |

5.2. New Vehicles

5.2.1. Metrorail New Vehicle Replacement

In March 2008, the Miami-Dade BCC and the CITT approved the \$380 million procurement of 136 new replacement rail vehicles. The new vehicles, which are being manufactured at the Hitachi Manufacturing Facility in Medley, feature the latest technological advances which will significantly improve passenger comfort, efficient maintenance, and operations. The first vehicles were put into revenue service in November 2017, with the **final vehicles planned for delivery by July 2021.** As of December 29, 2020, 124 train cars (62 married pairs) have entered revenue service.

5.2.2. New Bus Vehicle Replacement

DTPW continues to implement its bus replacement program. DTPW's currently active fleet includes 489 vehicles acquired in the last 5 years as shown in Table 5-2. These buses make up part of DTPW's efforts to reduce the average fleet age. Additionally, some of the new vehicles represent an expansion of the fleet to provide new service, including the SMART and BERT routes. In 2021, DTPW expects to add 140 40' CNG buses, and one new 40' Electric bus. Details regarding the future bus replacement plan can be found in Appendix 6.

The procurement of alternative fuel buses for replacements and enhancements not only improves transit but also promotes the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus. After evaluating various alternative fuels, DTPW decided to migrate the bus fleet to clean-burning CNG or battery-electric powered vehicles.

Table 5-2: New Vehicles in DTPW Bus Fleet

| Year | Bus Type | # of Vehicles |
|------|---------------------|------------------|
| 2016 | NEWFL 16500 Hybrid | 10 |
| 2016 | Gillig 16100 Diesel | 4 |
| 2017 | NEWFL 17500 Hybrid | 9 |
| 2018 | NEWFL 18100 CNG | 169 |
| 2019 | NEWFL 10100 CNG | 130 |
| 2019 | Gillig 19200 CNG | 32 |
| 2020 | Gillig 20100 CNG | 83 |
| 2020 | NEWFL 20100 CNG | 52 |
| | Total | 489 |

5.3. The SMART Plan

In April 2016, the Miami-Dade TPO Governing Board adopted the SMART Plan, a comprehensive program which identifies six corridors proposed for advancement towards a more complete rapid transit system. The SMART Plan also contains a network of corridors throughout the county for the implementation of BERT service. Since then, implementation of the SMART Plan has become a top priority of DTPW. This section highlights the progress that DTPW intends to make towards completing the SMART Plan in FY 20-21.

In October 2017, the TPO passed resolution #47-17 advancing the North and South Corridors into Priority I in the LRTP and TIP. In 2019, The TPO passed resolution #26-19, extending the limits of the Florida's Turnpike Express (FTE) North BERT Route to connect to the North (27th Avenue) Corridor.

5.3.1. **Beach Corridor**

The Beach Corridor is a 9.7-mile long corridor connecting the Miami Design District through Downtown Miami along MacArthur Causeway to the Miami Beach Convention Center. This corridor is composed of a trunk line connecting the City of Miami and the City of Miami Beach, with one extension to the Midtown/Design District in the City of Miami, and one extension to the Miami Beach Convention Center.

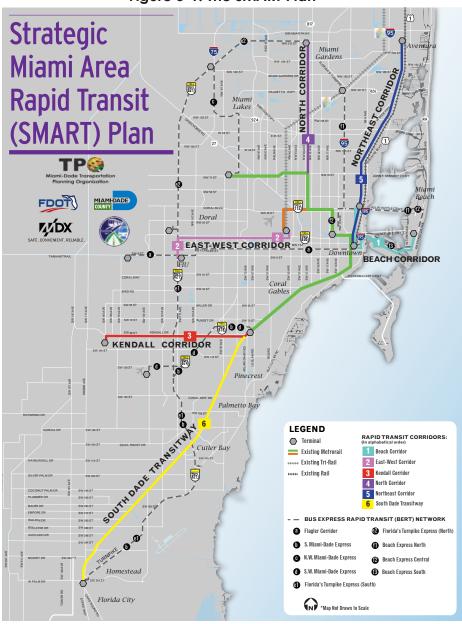

The Beach Corridor PD&E study is funded by multiple agencies including Miami-Dade County, FDOT, City of Miami, and City of Miami Beach. In January 2020, the TPO, following the PD&E recommendation, selected elevated Automated Guideway Transit (AGT) for the trunk line, an extension of Metromover for the Midtown/Design District segment, and dedicated-lane motorbus service on Washington Avenue. In October 2020, Board of County Commissioners

approved the contract award for the Interim Agreement (IA) for the Beach Corridor Trunk Line. The IA became effective October 31. 2020, and **12-18 months** pre-development activities and negotiation are anticipated.

Figure 5-2: Beach Corridor Rendering

Figure 5-1: The SMART Plan

5.3.2. East-West Corridor

The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at the Miami International Airport (MIA), west along the SR-836/Dolphin Expressway, to the Tamiami Terminal Station at SW 8 Street and SW 147 Avenue. This project will also serve major activity centers including Miami International Airport, the MIC, and Downtown Miami while transporting riders to and from major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

On October 22, 2020, the Miami-Dade TPO Governing Board selected the LPA as Bus Rapid Transit (BRT). The LPA includes BRT routes operating within dedicated transit-only lanes, along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension, and on the SR 836 Extension shoulders. Further east, the BRT routes would use dedicated lanes in the center of SR 836, and along NW 7th Street to NW 62nd Avenue, on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the 836 Express Services which already began operating in the Corridor in early 2020.

5.3.2.1. SR-836 Express Bus Service

This project is fully detailed above in section 4.1.1.1. it will provide express transit service along SR 836 and the Homestead Extension of the Florida Turnpike (HEFT) with three routes. Line A will provide premium express transit service from the proposed Tamiami Station (located at SW 8th Street and SW 147th Avenue) to Downtown Miami via SW 8th Street, SW 137th Avenue and SR 836. **The planned long-term improvements for this route are anticipated to be completed by 2024.**

5.3.2.2. East-West Corridor Transit-Oriented Development Master Plan

In June 2016, DTPW submitted a grant application to conduct a TOD study for the East-West Corridor, which was awarded by the FTA in the amount of \$1.2 million (\$960,000 FTA and \$240,000 PTP) under the TOD Planning Pilot program. The Master TOD Plan began in November 2018. A virtual public charette was held in November 2020, and a virtual public design studio was held in March 2021. **The study is expected to be completed in 2021 with a final TOD master plan for the corridor**.

Figure 5-3: SR-836 Express Route Alignments

Figure 5-4: Slides from TOD Master Plan Presentation

5.3.3. Kendall Corridor

The Kendall Corridor project runs 10 miles from the Dadeland North Metrorail Station west along SR-94/Kendall Drive/SW 88th Street to approximately SW 162nd Avenue. This project provides multimodal solutions for severe traffic congestion along Kendall Drive, one of the most congested east-west arterial roadways in Miami-Dade County.

In November 2019, Curbside BRT was identified by the PD&E team as the recommended alternative for the Kendall corridor and was presented at the Public Workshops in December 2019. Lack of local support for a Curbside BRT alternative that contemplates reduction of vehicular traffic lanes has been demonstrated on similar east-west corridors. Therefore, the Department will analyze implementation of a corridor-based bus rapid transit solution that would not require reduction of vehicular traffic lanes along the Kendall Corridor. Corridor-based bus rapid transit will include defined stations, active transit signal priority, queue jump lanes, optimized bus service plan, and distinct branding of stations and vehicles without reducing the number of existing vehicular traffic lanes on Kendall Drive. The Department anticipates going to the TPO Governing Board for an endorsement of the recommended corridor-based bus rapid transit solution in Spring 2021. Upon endorsement by the TPO Governing Board, FDOT will continue into the Tier 3 PD&E analysis to further refine the recommended alternative.

5.3.4. North (NW 27th Avenue Premium Transit) Corridor

The North Corridor project is approximately 10 miles long, running from the Dr. Martin Luther King Jr. Metrorail Station northward along NW 27th Avenue to NW 215th Street. The PD&E study for the North Corridor began in 2016. In December 2018, the TPO Governing Board selected an Elevated Fixed Guideway transit system as the LPA for the North Corridor, based on the recommendation of the PD&E team. In October 2019 the TPO Governing Board selected Heavy Rail Transit as the preferred transit technology, with a directive for the TPO Executive Director to coordinate with FDOT and County staff to further refine the analysis for the various technological modes to include localized financial, operations and maintenance data and to report the revised analysis to the TPO Governing Board. In April 2020, the Governing Board accepted a report by DTPW on alternative transit technologies for NW 27th Avenue and has a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. The process is anticipated to take approximately 12 months. FDOT placed its North Corridor PD&E study on hold after consulting with the FTA.

FDOT is ready to resume and complete the PD&E study after the DTPW study is completed and the final transit technology, track alignment, elevated structure type, and maintenance/storage facility needs are determined.

5.3.5. Northeast Corridor

The Northeast Corridor is a regional connection that links Miami-Dade County with neighbors to the north via the Florida East Coast (FEC) railway. It extends northward approximately 14 miles from the County's Central Business District in Downtown Miami, connecting with Aventura, North Miami, North Miami Beach, and Miami Shores. FDOT District 4 is managing the PD&E study and is currently finalizing plans. A Mid-town station has been identified by the SFRTA. Regional passenger rail service to the Aventura Station can be considered as the first phase of the service. Brightline has committed to providing regional transit service to the Aventura Station by 2022. Currently DTPW is leading the discussions with Brightline regarding agreements required in order to provide the proposed commuter rail service for the NE Corridor. A framework for negotiations with Brightline has been

Figure 5-5: Miami Central Station, the Southern Terminus of the Northeast Corridor

established. DTPW is also working on clearing NEPA and pursuing federal and state funding for the capital investment required for this corridor.

5.3.6. South Dade Transitway Corridor

The South Corridor runs approximately 20 miles from the Dadeland South Metrorail Station along the existing Transitway to the SW 344th Street Parkand-Ride/Transit Terminal Facility. DTPW initiated a PD&E Study to evaluate premium transit solutions in this corridor in April 2017. The TPO selected the LPA on August 30, 2018 as BRT. The project team has started coordination with the FTA on submitting a Small Starts Grant application for the South Corridor BRT project. The estimated total project capital cost is \$300 million. Miami Dade County and FDOT have both committed \$100 million each to fund design and construction, while the project team successfully secured \$100 million from the FTA Small Starts Grant program. BRT is scheduled to begin operation by January 2023. The contract for design-build services was awarded by the Board of County Commissioners on September 3, 2020, NTP was issued in February 2021, and **construction is now under way.** Renderings of the proposed stations are shown in Figure 5-8.

5.3.7. BERT Routes

The BERT Network consists of nine express bus routes which reinforce and support the SMART Plan rapid transit corridors. Route A, the Flagler corridor, is the subject of a PD&E study by FDOT. The remaining BERT corridors are being studied by DTPW to advance the NEPA study for the BERT network Route B through F3:

- South Miami-Dade express (Route B)
- Northwest Miami-Dade express (Route C)
- Southwest Miami-Dade express (Route D)
- Florida's Turnpike express south (Route E1)

- Florida's Turnpike express north (Route E2)
- Beach express north (Route F1)
- Beach express central (Route F2)
- Beach express south (Route F3)

The PD&E study by FDOT for Route A is being conducted to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler from SW/NW 107 Avenue to the Government Center with branches along SW 8 Street and NW 12 Street. Viable alternatives analyzed as part of this study include: Bus Rapid Transit (BRT) along curbside lanes, BRT along curb lanes with a center reversible auto lane. In April 2019, the Curbside Business Access and Transit (BAT) Lanes alternative was identified as the recommended alternative for the Flagler corridor. FDOT has conducted a series of meetings with elected officials, stakeholders and communities along the corridor and presented the recommended alternative to the TPO Governing Board on July 18, 2019. A workshop with TPO Board members was held January 30, 2020 where FDOT was asked to further analyze the implementation of reversible auto lanes along the Flagler corridor. FDOT conducted a study on the implementation of reversible lanes along segments of the corridor as a traffic mitigation measure. The additional analysis on reversible lanes has been completed, and the Department anticipates going to the TPO Governing Board for an endorsement of the recommended Curbside BAT lanes alternative in Winter 2021. Upon endorsement by the TPO Governing Board, FDOT will continue into the Tier 3 PD&E analysis to further refine the recommended alternative.

Among the BERT routes, some are further advanced than others. Service implementation for Route a is being studied through FDOT. Service for Route c began in November 2019. Service for Route b is anticipated in 2021; while service for the Beach BERT Routes d, e1, f1, f2, and f3 are anticipated for 2023. Service for Route e2 is anticipated in 2027, pending the provision of the park and ride terminal at the Miami Executive Airport. DTPW is in coordination with the Florida Turnpike Enterprise for permission to use the shoulders along the Turnpike under congested traffic conditions. The Turnpike is still currently constructing managed lanes, with an estimated completion date in early 2025.

In order to advance the implementation of Route f1, DTPW is working in coordination with the FDOT and the Federal Highway Administration (FHWA) to begin an interim service. The interim service, scheduled for implementation in 2021, will use the outside shoulder of the Julia Tuttle Causeway/I-195 to bypass congestion. Ultimately, Routes f1, f2 and other DTPW routes will be able to use the inside shoulder to bypass congestion.

5.4. Other New Facilities and Services

5.4.1. South Dade Bus Maintenance Facility

With the implementation of the SMART plan, the County inventoried the availability of garages located within the south Miami-Dade area of the County for bus maintenance facilities and determined that the closest maintenance facility to the South Miami-Dade area is the Coral Way facility; which has reached its capacity and is approximately 30-miles away from the southern county line of Miami-Dade. This new maintenance facility will improve Transit's operational efficiency by decreasing the tum around time for placing buses back in revenue service. **The acquisition for this site is pending inter-departmental transfer**; which is expected to be completed by March 2021.

5.4.2. The Underline Phase I - Brickell Backyard Project

The future 10-mile Underline corridor, running below the Metrorail from the Miami River to Dadeland South Metrorail Station, Kiss and Ride facility, is creating a linear mobility corridor that will enhance connectivity to 8 Metrorail Stations, Hospitals, Universities, and business. It will act as first and last mile connectivity and improve safety for pedestrians and bicyclists. Friends of The Underline selected a design consultant to develop the vision for the corridor, which is demonstrated in the Framework Plan, and design of Phase 1 of The Underline. The project is structured in 3 Phases. Phase 1, The Brickell Backyard, located in the most densely populated area, was completed in **2021**. Phase 1 is 1/2 mile long and extends from the Miami River to SW 13th Street. Phase 2 is 2.14 miles long and extends from SW 13th Street to SW 19th Avenue. Phase 2 design was completed, and construction is expected to start in September 2021 and be completed in July 2023. Phase 3 is the longest of all phases. It is 7.36 miles long and extends from SW 19th Avenue to Dadeland South Metrorail Station Kiss and Rider facility. This phase is currently under procurement and it completion is expected in 2026.

Figure 5-6: Rendering of Completed Underline Phase 1

5.5. Committed Bus Service Adjustments

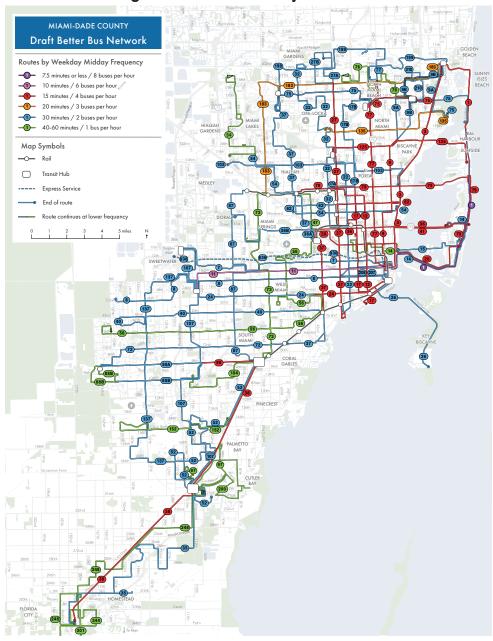

In an effort to continually match service capacity with ridership demand, DTPW routinely revises the existing bus route network to better meet the evolving transportation needs of Miami-Dade County. These revisions seek to improve the operational efficiency of the overall transit system. In a typical year, these adjustments are planned and committed to in the TDP – however for 2020, these adjustments have been deferred until the conclusion of the Better Bus Project.

5.5.1. The Better Bus Project

This project is a partnership between Miami-Dade County and Transit Alliance Miami, a local non-profit organization that advocates for "walkable streets, bikeable neighborhoods, and better public transit". The purpose of the Better Bus Project is to redesign the county DTPW bus system, and three municipal trolley systems (City of Miami, Miami Beach and Coral Gables). The project explored two different approaches: one focusing on maximizing ridership, and another focused on maximizing the coverage of the transit system. A costneutral hybrid of these two approaches was presented to the BCC Transportation and Finance Committee in November 2019. A draft plan was presented to the BCC in October 2020 where they directed staff to take the next steps towards implementation. A final draft plan with additional enhancements is expected to go to a public hearing in September 2021. If approved, implementation could begin as early as spring 2022.

Between 2018 and 2020 there were over 100 outreach events, workshops and presentations including community meetings, portable transit outreach and more – this outreach resulted in the Transit Alliance reaching over 2,600 people in person, obtaining over 4,400 survey responses, and over 1,000 text conversations with riders. Subsequent DTPW public outreach ensued on the final draft plan in spring 2021 during the COVID-19 pandemic. Outreach comprised five virtual meetings; reaching over 1,000 people at bus stops/stations, a text message line and phone line; and receiving over 2,000 survey responses.

Figure 5-7: Better Bus Project Draft Network

5.6. Committed Infrastructure Renewal Program (IRP) Projects

Table 5-3 presents committed IRP projects for FY 2020-2021. These commitments are based on a process by DTPW which identifies, evaluates, prioritizes, and programs capital improvement projects that are necessary in order to maintain the existing transit system in a state of good repair. Many of these projects are multi-year efforts which will not reach completion during FY 20-21. DTPW has a fixed allocation of \$12.5 million dollars for IRP projects every year, and the current total multi-year cost of all IRP projects is approximately \$30,279,000.

Table 5-3: FY 2020 - 2021 IRP Projects (\$000s)

| IRP Project Number | IRP Project Name | Scope | Total IRP Funding |
|--------------------------|---|--|-------------------------|
| CIP126 | Emergency Exit at William Lehman Center | Widening of current exit to facilitate in and out emergency vehicle traffic at Palmetto Yard. Active project. | \$ 680 |
| CIP171 | Metrorail and Metromover UPS Rooms HVAC Installation | Install new HVAC systems to provide cooling capacity for all UPS rooms on Metrorail and Metromover. Active project. | \$ 1,682 |
| CIP201 | Roadway Signs in the Vicinity of twenty-three (23) Metrorail Stations CIP201 | The scope of work includes, but is not limited to, installation and/or replacement of directional/guide signs on roadways and highways in the vicinity of the twenty three (23) metrorall stations. DTPW is proceeding with preparation of plans to obtain permits and implement improvements. The first phase of the project involved conducting field assessments of the roads to determine the inventory of existing signs and proposed signs. This first phase has been completed. | \$ 2,225 |
| CIP230 | BERT Route b Park & Ride at Tamiami Executive Airport CIP230 | The proposed project is required to perform environmental analysis to construct a surface Park-and-Ride at the Tamiami Executive Airport. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route d Southwest Miami-Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project, develop concept plans and complete preliminary cost estimates in coordination with the Tamiami Executive Airport and the Kendall Parkway Project Team. Once these tasks are complete, the next steps towards construction will be leasing agreements and advancing the design. The requested amount is based on previous conceptual plan development efforts. | \$ 100 |
| CIP231 | BERT Route b Park & Ride at SW 288th Street (SMART BERT) CIP231 | The proposed project is required to perform analyses to construct a surface Park-and-Ride in the vicinity of the intersection of the Turnpike and SW 288th Street. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South Miami-Dade Express. The BERT study team has identified a proposed location for the facility. The requested Budget is to complete the planning/environmental analysis of the project, develop concept plans and complete preliminary cost estimates. Once these tasks are completed, the next steps will be land acquisition and advancing the design. The requested amount is based on previous conceptual plan development efforts. | \$ 150 |

Table 5-3 (Continued): FY 2020 - 2021 IRP Projects (\$000s)

| IRP Project Number | IRP Project Name | Scope | Total IRP Funding |
|--------------------------|---|---|-------------------------|
| CIP232 | BERT Route b Park & Ride at SW 152nd Street & Turnpike CIP232 | The proposed project is required to perform environmental analysis to construct a surface Park-and-Ride with approximately 150 parking spaces, Kiss and Ride, Bicycle and Pedestrian facilities at the Turnpike and SW 152nd St. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South Miami-Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project. The requested amount is based on conceptual plans. | \$ 150 |
| CIP233 | BERT Route b Park & Ride at SW 211 Street CIP233 | The proposed project is required to perform environmental analysis to construct a surface Park-and Ride in the vicinity of the intersection of the Turnpike and SW 211th Street. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South-Miami Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project, develop concept plans and complete preliminary cost estimates. Once these tasks are completed, the next steps will be land acquisition and advancing the design. The requested amount is based on previous conceptual plan development efforts. | \$ 150 |
| IRP096 | Rail Public Address System Replacement | Replace existing Public Address System at all Metrorail Stations. The Scope of Work includes the replacement and upgrade of all electronic components in the Paging chain. The distribution wiring will also be upgraded. Active project. | \$ 2,592 |
| IRP107 | Hydraulic Mobil Column Bus Lifts (Additional) | Provide 24 sets of four hydraulic column lifts with 70' required communication cables and 60' power cords for DTPW Bus Maintenance. Active project. | \$ 1,118 |
| IRP109 | Emergency Back up Generators | Installation of electrical generators and transfer switches at Central Bus, NE and Coral Way. Active Project | \$ 440 |
| IRP171 | Upgrade Chiller Units at Lehman Center | Replace two existing Trane water cooler 110 ton, R-113 chiller units, 3 chilled water pumps and all related controls, piping, valves, wiring etc at the William Lehman Center Facility. Active project. | \$ 650 |
| IRP215 | Metrorail Bathrooms | Repair and renovate public restrooms at the 30-year-old Metrorail stations. Active project. | \$ 1,865 |
| IRP233 | Replacement of Diamond Frogs at Culmer Crossover | Replacement of Diamond Frogs at the Culmer Metrorail Station. Active project. | \$ 900 |

Table 5-3 (Continued): FY 2020 - 2021 IRP Projects (\$000s)

| IRP Project Number | IRP Project Name | Scope | Total IRP Funding |
|--------------------------|---|---|-------------------------|
| IRP234 | Railcar Cleaner Platform Replacement Project | Upgrade the existing Cleaning Platform located at the William Lehman Center. The existing wooden platform is in need of constant repair. Active project. | \$ 2,790 |
| IRP236 | Purchase of 2 HY-Rail Crew cab Trucks | Purchase support vehicles for the Track and Guideway maintenance division. Active project. | \$ 190 |
| IRP255 | Replacement of Tactiles and Barriers at Metromover Stations | Provide detectable warning safety edge tiles and between-car barrier (BCB) system in compliance with the DOT ADA regulations. Each station features two 80 LF Platform Structures and require tiles and BCB on both sides of the platform. The scope includes labor, materials, tools, appliances, equipment and other means of construction for performing and completing the work. Active project. | \$ 440 |
| IRP260 | Fueling Terminal Modernization | Upgrade fueling terminal to IP Base. Active project. | \$ 250 |
| IRP265 | Traffic Signal Prioritization Expansion to Congestion Mgmt. Plan / Real-Time Connected Vehicles | Recapitalization of the MetroBus on-board equipment that provides passengers with free Internet access and connectivity for business traffic such as Fare Collection, CCTV, and CAD/AVL data. This project replaces field equipment that has been in continuous operation in MetroBus vehicles for the last 7 years and expands the deployment of the entire fleet. Active project. | \$ 1,196 |
| IRP267 | Purchase Rail Wheel Press Machine | Purchase of a new Railcar Wheel Press Machine needed to support the (136) rail cars the department is procuring to replace the existing railcar fleet. Project completed in FY 20-21. | \$ 981 |
| IRP270 | Metromover Vehicles HVAC Compliance Overhaul & Mover Building A/C Replacement | Mover vehicle air conditiong HVAC system and Mover Building A/C replacement in order to comply with EPA requirement as the use of Freon 22 will be banned by EPA by the year 2020. Active project. | \$ 2,143 |
| OSP209 | Data Closets Uninterruptible Power Supply (UPS) Replacement | Replace Data Closets Uninterruptible Power Supply (UPS). Active project. | \$ 323 |

Table 5-3 (Continued): FY 2020 - 2021 IRP Projects (\$000s)

| IRP Project Number | IRP Project Name | Scope | Total IRP Funding |
|--------------------------|---|---|-------------------------|
| OSP234 | Rail EAMS Work Order Module | Infor EAMS software tool to implement Work Order module that will be integrated with the existing warehouse module. Active Project | \$ 700 |
| IRP263 | Automated Fare Collection Cloud Migration | Implement enhancement and regional expansions to the Automated Fare Collection System (AFCS) based on the existing Contract 8481-2/22-1. The contract includes an option to purchase additional equipment and service for expansions and modifications. Active project. IRP funding has been expended | \$ 3,000 |
| IRP276 | Metrorail Platform Cabling Replacement | Replacement, disposal and reinstallation of the infrastructure and cabling necessary to support the Emergency Transfer Switch, Emergency Telephone, End Gate Intrusion Alarm and Blue Light at 17 Metrorail Stations. Active Project | \$ 2,805 |
| IRP306 | Renovate Lehman Center 2nd Floor (Administration) | New office partitions , desks, chairs upgrade phone system etc. Active project. | \$ 850 |
| IRP321 | Lehman Curve N41 Realignment | Correct Civil Design and alignment of Curve #41 in the Lehman Yard Maintenance facility. The work will involve the realignment of the existing track layout to a 300 foot radius. The curve is currently out of service and cannot be used until the curve geometry is corrected. The existing track bed and substrate will be modified to accept the new track layout. The third contact rail will also be aligned to match the 300 foot running rail radius. Alt power, control and communications cabling will also be modified to accommodate the new track and third-rail layout. The finished track bed will be tamped and concrete ties installed as required prior to laying the new running and third rails. The new track will be tested before being accepted to ensure that all control lines and traction power connections function per the intended design. Active Project | \$ 1,649 |
| IRP329 | Bus Garage And Employees Parking Lot Light Fixtures Upgrade | Install light fixtures at Coral Way, Northeast and Central bus garages and employees parking lot Active Project | \$ 260 |
| Total | | | \$ 30,279 |

6. TEN YEAR IMPLEMENTATION PLAN

This section identifies DTPW's ten-year program of projects. Through these projects, DTPW enacts a strategy to improve the existing transit system, implement new metrobus routes, advance premium transit corridors identified throughout Miami-Dade County, and discontinue unproductive routes. DTPW will continue to focus on providing a clean and attractive system for passengers, improving on-time performance, and utilizing the best available technology to provide customers with a fast and efficient transit experience. The chapter is organized as follows:

First, the principal initiative to improve transit in Miami-Dade County is the SMART Plan. The SMART Plan includes six proposed rapid transit corridors whose details are included in Table 6-1, and nine BERT Network routes which are listed in Table 6-2. Both the rapid transit corridors and BERT Network are shown on Figure 6-1, while Figure 6-2 highlights the BERT Network routes for clarity. The SMART Demonstration Program supports the SMART Plan corridors by providing first/last mile transit service to the corridors, as shown on Figure 6-3. The six SMART Plan rapid transit corridors are described with their implementation schedule in Table 6-3.

Next, DTPW's ten-year implementation plans are organized into three categories – Operations, Capital, and State of Good Repair. Operations and Capital projects are divided into separate lists for funded, partially funded, and unfunded projects.

Funded and Unfunded Transit Operations projects are listed in Table 6-4 and illustrated on Figure 6-4. Funded Capital projects are listed in Table 6-5 and illustrated on Figure 6-5. Partially Funded Capital projects are listed in Table 6-6 and illustrated on Figure 6-6. Unfunded Capital projects are listed in Table 6-7 and illustrated on Figure 6-7. State of Good Repair projects, including those which are part of the IRP, are listed in Table 6-8.

6.1. SMART Plan

In the long term, DTPW, SMART Plan partners, and stakeholders are working to change the approach to mobility by creating a system that offers multiple transportation options throughout the county. There are limited opportunities to widen and/or build new roads. Therefore, the need to extend mass-transit represents the balanced approach necessary to address roadway congestion and connect communities to educational and employment centers; which ensures that the community continues to grow and thrive far into the future. The goal is to make Miami-Dade County a car-optional community by ensuring that mass-transit options are available everywhere in the County and region.

Table 6-1 presents a list of SMART Plan Rapid Transit Corridors, and Figure 6-1 illustrates the location of the Rapid Transit Corridors, as well as the BERT Network corridors. The six rapid transit corridors which are included in the SMART Plan are described on the following pages.

6.1.1. Rapid Transit Corridors

6.1.1.1. Beach Corridor

The Beach Corridor is being studied as part of the Strategic Miami Area Rapid Transit, or SMART Plan, which identifies the development of six rapid transit corridors that directly support the mobility of our future population and employment growth. The Beach Corridor project will serve the cities of Miami and Miami Beach along a 9.7-mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands.

In May 2017, DTPW initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions between Downtown Miami and the City of Miami Beach via I-395 and I-195. In January 2020, the TPO selected elevated automated rail transit for the trunk line, automated people mover for the Midtown/Design District and Bus/Trolley in dedicated lanes on Miami Beach as the locally preferred alternative (LPA), as recommended by the PD&E. In October 2020, Board of County Commissioners approved the contract award for the Interim Agreement (IA) for the Beach Corridor Trunk Line. The IA became effective on Oct 31, 2020. Twelve to eighteen months of pre-development activities and negotiation of the final project development are anticipated.

Figure 6-1: Beach Corridor Monorail Rendering

6.1.1.2. East-West Corridor

The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at the Miami International Airport (MIA), west along the SR-836/Dolphin Expressway, to the Tamiami Terminal Station at SW 8 Street and SW 147 Avenue. It provides multimodal solutions for severe

traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. This project will also serve major activity centers including Miami International Airport, the Miami Intermodal Center (MIC), and Downtown Miami while transporting riders to and from major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

In April 2017, DTPW initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions along the SR-836/Dolphin Expressway. The East-West corridor is being studied as part of the Strategic Miami Area Rapid Transit, or SMART Plan, which identifies the development of six rapid transit corridors that directly support the mobility of our future population and employment growth. On October 22, 2020, the Miami-Dade Transportation Planning Organization (TPO) Governing Board selected the Locally Preferred Alternative (LPA) as Bus Rapid Transit (BRT). The LPA includes BRT routes operating within dedicated transit-only lanes, along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension, and on the SR 836 Extension shoulders. Further east, the BRT routes would use dedicated lanes in the center of SR 836, and along NW 7th Street to NW 62nd Avenue, on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the 836 Express Services which already began operating in the Corridor in early 2020.

East-West Corridor Transit-Oriented Development (TOD) Project

In June 2016, DTPW was awarded grant funding through the Federal Transit Administration (FTA)'s TOD Planning Pilot Program to conduct a comprehensive planning effort that will inform transit planning in the East-West Corridor. This study is scheduled for completion in Spring 2021.

Figure 6-2: East-West Corridor BRT Station Rendering

6.1.1.3. Kendall Corridor

The Kendall Corridor project is 10 miles from the Dadeland North Metrorail Station west along SR 94/Kendall Drive/SW 88th Street to approximately SW 162nd Avenue. This project provides multimodal solutions for severe traffic congestion along Kendall Drive, one of the most congested eastwest arterial roadways in Miami-Dade County. The project facilitates the highest demand movement of passengers to and from West Kendall to Downtown Miami.

In 2016, the Florida Department of Transportation (FDOT), District Six, initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions for Kendall Drive. A project kick-off meeting was held in late 2016. In November 2019, Curbside BRT was identified as the recommended alternative for the Kendall corridor and was presented at the Public Workshops in December 2019. In February 2020, the TPO requested FDOT to further analyze the implementation of reversible lanes along the Kendall Corridor. The additional analysis on reversible lanes was completed in November 2020.

Results of the reversible lanes analysis demonstrate that reversible lanes are not feasible on the Kendall Corridor. Lack of local support for a Curbside BRT alternative that contemplates reduction of vehicular traffic lanes has been demonstrated on similar east-west corridors. Therefore, the Department will analyze implementation of a corridor-based bus rapid transit solution that would not require reduction of vehicular traffic lanes along the Kendall Corridor. Corridor-based bus rapid transit will include defined stations, active transit signal priority, queue jump lanes, optimized bus service plan, and distinct branding of stations and vehicles without reducing the number of existing vehicular traffic lanes on Kendall Drive.

The Department anticipates going to the TPO Governing Board for an endorsement of the recommended corridor-based bus rapid transit solution in Spring 2021. Upon receiving the endorsement, FDOT is expected to continue into the Tier 3 PD&E analysis to further refine the recommended alternative.

Figure 6-3: Kendall Corridor Project Map

6.1.1.4. North Corridor

A PD&E study is being conducted to evaluate the implementation of a premium transit service Bus Rapid Transit (BRT), Heavy Rail Transit (Metrorail), and appropriate variation of Heavy Rail Transit Rail At-Grade) along NW 27 Avenue from NW 215 Street (Countyline Road) to approximately NW 38 Street and from the Miami Intermodal Center (at Miami International Airport) to NW 27th Avenue via SR 112 (Miami Airport Expressway). The study focuses on implementation of a premium transit service and infrastructure along SR 9/SR 817/NW 27 Avenue. The study will also include public onstreet transit stations/stops as well as public and/or private facilities located adjacent to or off-corridor where potential park-and-ride and/or transit terminals (including the Miami Dade College North Campus) will be considered.

Three viable alternatives have been developed and presented to the public. Each of these represents the three modes running within the existing roadway. BRT would operate in the curb lanes. Heavy rail whether at-grade or elevated would run over the centerline of the roadway. The study is developing the detailed engineering criteria and evaluating the environmental impacts that would result from implementation. Cost estimating, ridership forecasting, and traffic impacts are all being evaluated. On December 6, 2018, the Miami-Dade Transportation Planning Organization (TPO) Governing Board adopted as the Locally Preferred Alternative (LPA) an elevated fixed guideway transit system. Following this action, Miami-Dade County requested that FDOT evaluate three alternative technologies: 1.) Monorail; 2.) Automated Peoplemover; and 3.) Maglev.

In October 2019, the Miami-Dade County Transportation Planning Organization (TPO) selected elevated heavy rail transit as the Locally Preferred Alternative (LPA) for the North Corridor. On April 23, 2020, the Governing Board accepted a report by Miami-Dade County's Department of Transportation and Public Works (DTPW) on alternative transit technologies for NW 27th Avenue and has a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. The process is anticipated to take approximately 12 months. FDOT placed its North Corridor PD&E study on hold after consulting with the Federal Transit Administration (FTA). FDOT is ready to resume and complete the PD&E study after the Miami-Dade Department of Transportation and Public Works study is completed and the final transit technology, track alignment, elevated structure type, and maintenance/storage facility needs are determined.

Figure 6-4: Potential Transit modes for the North Corridor: from left to right, Monorail, Maglev, Automated Guideway, and Heavy Rail

6.1.1.5. Northeast Corridor

The Northeast Corridor project is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward County line and is one of the busiest transit corridors in the region. It extends approximately 14 miles through the historic core of the County developed along the Florida East Coast (FEC) railroad and links Aventura, North Miami, North Miami Beach, and Miami Shores with the County's Central Business District located in Downtown Miami. Regional passenger rail service to the West Aventura Station is considered the first phase of the Northeast Corridor. In 2019, the County approved using PTP funds to design and construct the West Aventura Station. Brightline has committed to providing regional passenger rail service to the West Aventura Station by 2022. Currently DTPW is leading the discussions with Brightline regarding agreements required in order to provide the proposed commuter rail service for the NE Corridor. The commuter rail service plan is 30-minute peak headway and 60-minute off-peak headway for both directions during weekdays and 60-minute headway during weekends.

A framework for negotiations with Brightline has been established. DTPW is also working on clearing NEPA and pursuing federal and state funding for the capital investment required for this corridor.

Figure 6-5: MiamiCentral Station in Downtown Miami

6.1.1.6. South Dade Transitway Corridor

The South Dade Transitway Corridor will run approximately 20 miles from the Dadeland South Metrorail Station along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami.

DTPW initiated a PD&E Study to evaluate premium transit solutions in this corridor in April 2017. The TPO Governing Board selected the LPA on August 30, 2018 as Bus Rapid Transit (BRT). The estimated total project capital cost is \$300 million. Miami Dade County and FDOT have both committed \$100 million each to fund design and construction, while the project team successfully secured \$100 million from the FTA Small Starts Grant program. BRT is scheduled to begin operation by Winter (Jan) 2023. Once completed, BRT will provide rail-like travel time, iconic stations, level boarding through all doors, and pre-paid fares for speedy access. BRT will also provide enhanced safety features and other upgrades along dedicated lanes with multilayered service lines on the Transitway.

On June 4, 2021, DTPW officially broke ground on the Transitway Corridor.

Figure 6-6: South Corridor BRT Station Rendering

Table 6-1: Miami-Dade County's Strategic Miami Area Rapid Transit (SMART) Plan

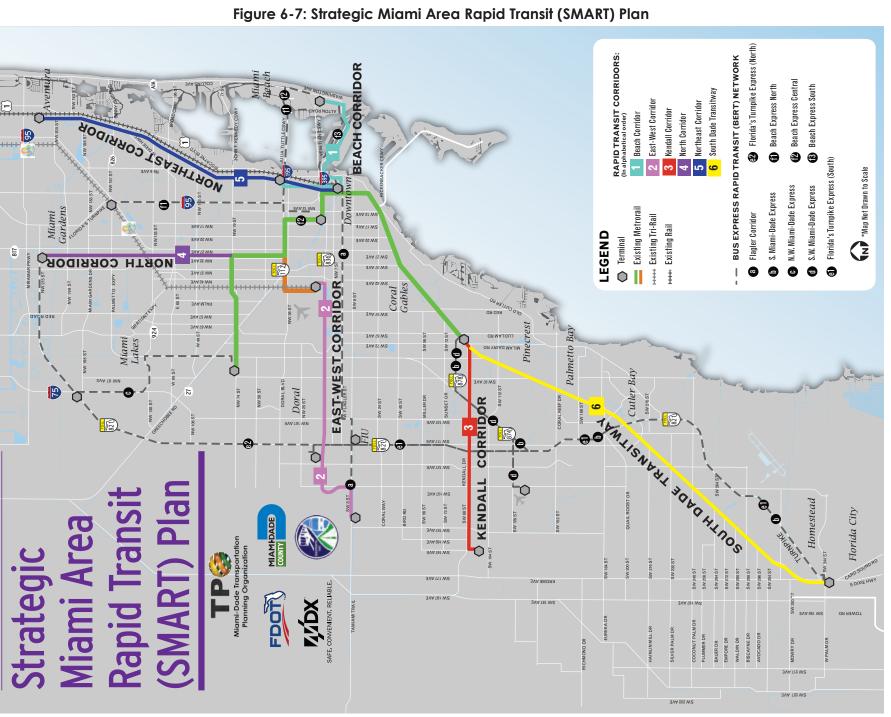

| Corridor Name | Limits | Length (miles) | Lead Agency | PD&E Phase Funding | Design and Const. Phase Est. Cost | Status |
|--|---|----------------|-----------------|-------------------------|---|---|
| Beach Corridor | Miami Beach Convention Center to Midtown Miami (at or near NE 41st Street and NE 2nd Avenue | 9.7 | DTPW | DTPW (PTP) \$12 M | \$672 M Bay Crossing / Trunkline (Monorail) \$408 M Design District Metromover Extension (APM) | LPA adopted in January 2020 Anticipated NEPA completion date for Bay Crossing / Trunk Line: February 2022 Anticipated NEPA completion date for Design District Metromover Extension: Fall 2022 Interim Agreement for the Trunk Line approved in Oct 2020 |
| East-West Corridor | Miami Intermodal Center (MIC) to Florida International University (FIU) | 14 | DTPW | DTPW \$12.9 M | \$281 M (BRT) | TPO Resolution #34-16 authorized the development of the PD&E (Study began March 2017; Study completed 2020) PD&E Funding Source: 100% CITT TPO Resolution #38-20 selected the LPA in October 2020 |

Notes: \$3M of PTP funds have been committed as TPO consultant support for SMART Plan PD&E activities (Project S3001590) SMART Plan costs are not inflated on an annual basis, due to their inclusion in the FTA grant application process.

Annual Progress Report

6.1.2. Bus Express Rapid Transit (BERT) Network

The Bus Express Rapid Transit (BERT) Network is a system of nine proposed express bus routes that are part of the SMART Plan as shown in Figure 6-1. Through the BERT Network, DTPW and FDOT will provide reliable and convenient express bus service connecting commuters to and from the six SMART Plan Rapid Transit Corridors and major employment centers. The BERT Network is designed for commuters with limited stops over long distances, providing a money-saving, stress-free transportation option. The network is generally comprised of:

- Nine express bus routes connecting to SMART Plan premium transit corridors,
- Operating along existing expressways and roadways with Transit Signal Priority (TSP),
- With limited stops,
- Service to major origins/destinations,
- Frequency from 10 20 minutes,
- and a robust system of Park-and-Rides including both existing locations and numerous new proposed locations.

Among the BERT routes, some are further advanced than others.

- The PD&E study for Route a, the Flagler Corridor, is being let by FDOT, with expected completion in Fall 2021.
- Route c, the I-75 NW Miami-Dade Express, began service on November 18, 2019;
- Route b is anticipated to begin service in 2021;
- Routes d, e1, f1, f2, and f3 are anticipated to begin service in 2023;
- Route e2 is expected to begin service in 2027.

BERT Routes f1 and f2 will utilize a Bus-On-Shoulder (BOS) operation, allowing the bus to use the shoulder to bypass congestion along the Julia Tuttle Causeway/I-195. To facilitate the BOS operation, FDOT will increase the width of the inside paved shoulders, reduce the widths of the center and inside travel lanes and reconstruct the inside shoulder. FDOT's infrastructure improvements are anticipated to begin in Summer/Fall 2022. Bus service for Routes f1 and f2 is anticipated in 2023.

A pilot service for Route f1 is anticipated to begin in 2021, it will use the outside shoulders along the Julia Tuttle Causeway / I-195 to allow buses to bypass congestion during the AM and PM peak periods.

Table 6-1 lists additional information on the BERT network. Figure 6-2 shows the location of the BERT Network routes.

6.1.2.1. Flagler Corridor

A PD&E study is being led by FDOT to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler from SW/NW 107 Avenue to the Government Center with branches along SW 8 Street and NW 12 Street. Viable alternatives analyzed as part of this study include: Bus Rapid Transit (BRT) along curbside lanes, BRT along curb lanes with a center reversible auto lane. In April 2019, the Curbside Business Access and Transit (BAT) Lanes alternative was identified as the recommended alternative for the Flagler corridor. FDOT has conducted a series of meetings with elected officials, stakeholders and communities along the corridor and presented the recommended alternative to the TPO Governing Board on July 18, 2019. A workshop with TPO Board members was held January 30, 2020 where FDOT was asked to further analyze the implementation of reversible auto lanes along the Flagler corridor. FDOT conducted a study on the implementation of reversible lanes along segments of the corridor as a traffic mitigation measure. On January 28, 2021 the Miami-Dade TPO Governing Board endorsed Business Access Transit Lanes for the segment of Flagler east of 24 Avenue and directed FDOT to not consider repurposing of existing travel lanes.

The PD&E team is now refining a hybrid solution as directed by the TPO Governing Board that includes BAT lanes east of 24 Avenue and TSM&O improvements along the remaining segments of the corridor. The study is scheduled for completion by Winter 2022.

Figure 6-8: Tamiami Station, which will serve as an integral part of the Flagler Corridor

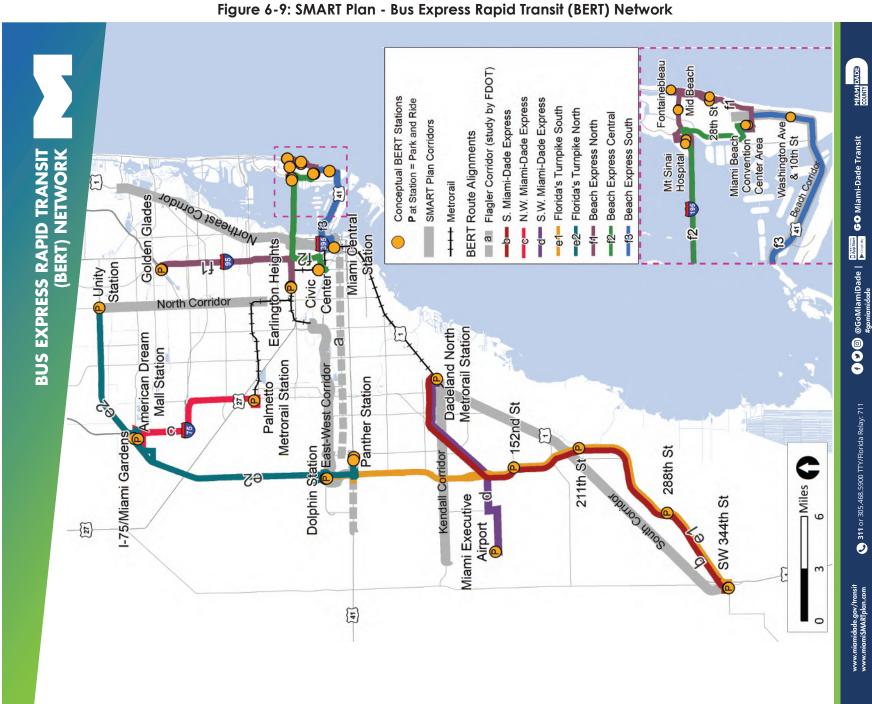

Table 6-2: SMART Plan - Bus Express Rapid Transit (BERT) Network

| BERT | Duning | | | Project | Cost (| \$000s) | Total |
|--------------------|---|---|--|-------------------|--|-----------------|---------------|
| Network Route # | Project Name | Destinations | Project Description | Length (Miles) | Capital Cost Est. | O&M (Annual) | # of Buses |
| а | Flagler Corridor | Tamiami Station/SW 147th Avenue to Downtown Miami; Dolphin Station to Downtown Miami; Panther Station to Downtown Miami | In 2016, FDOT initiated a PD&E study to examine implementation of BRT service and infrastructure improvements along SR 968/Flagler Street from SR 821/HEFT to SR 5/US-1/Biscayne Blvd. The primary study objective is to evaluate the implementation of a cost-effective, high-ridership BRT system within the SR 968/ Flagler Street Corridor that is to be part of an overall interconnected premium transit network. On January 28, 2021 the Miami-Dade TPO Governing Board endorsed Business Access Transit Lanes for the segment of Flagler east of 24 Avenue and directed FDOT to not consider repurposing of existing travel lanes. The PD&E team is now refining a hybrid solution as directed by the TPO Governing Board that includes BAT lanes east of 24 Avenue and TSM&O improvements along the remaining segments of the corridor. The study is scheduled for completion by Winter 2022. DTPW is coordinating the bus purchase component of this project. FDOT's share of the project is \$5 million, while DTPW's is \$2.011 million. The total Design cost is estimated to be \$315 million. | 20 | \$2,011 (DTPW) \$5,000 (FDOT) | \$528 | 10 |
| b | S Miami- Dade Express | SW 344 St. Transitway Station/Dadeland North Metrorail Station | Will provide express bus service from the SW 344th Street Park-and-Ride along the Transitway to the Dadeland North Metrorail Station. Headways will be 10 minutes during peak hours and 30 minutes between 9:30am -3:00pm. Project will also include park-and-ride lots located SW 152nd St and Turnpike, SW 211th St and Turnpike, and SW 288th St and Turnpike, plus needed roadway updates. Service is anticipated to begin in 2021. | 25.3 | \$21,840 | \$5,294 | 17 |
| С | NW Miami- Dade Express | American Dream Mall Station / I-75/Miami Gardens Dr Station / Palmetto Metrorail Station | Will provide express bus service from the American Dream Mall Station to the I-75/Miami Gardens Dr Station to the Palmetto Metrorail Station. Headways are 10 minutes during peak hours. Service began in November 2019. | 9.5 | \$3,240 | \$967 | 4 |
| d | SW Miami- Dade Express | Miami Executive Airport/ Dadeland North Metrorail Station | Will provide express bus service from the Miami Executive Airport to the Dadeland North Metrorail Station. Headways will be 10 minutes during peak hours. Project will also include a park-and-ride lot located at Miami Executive Airport, plus needed roadway updates. Service is anticipated to begin in 2023. | 9 | \$4,320 | \$1,223 | 5 |
| el | Florida's Turnpike Express (South) | 344 St. Transitway Station/ Panther Station/Dolphin Station | Will provide express bus service from the SW 344th Street Park-and-Ride/Transit Terminal Facility along the Tumpike to Panther and Dolphin Stations. Headways will be 10 minutes during peak hours and 30 minutes during off-peak hours. Project will also include a park-and-ride lots located at SW 152nd St and Turnpike, SW 211th St and Turnpike, and SW 288th St and Turnpike, plus needed roadway updates. Service is anticipated to begin in 2023. | 30.5 | \$12,960 | \$4,538 | 14 |
| e2 | Florida's Turnpike Express (North) | FIU Panther Station/Dolphin Station/Miami Gardens Station/American Dream Mall Station/Unity Station | Will provide express bus service from the FIU Panther Station to the Dolphin Station, I-75/Miami Gardens Dr Station and the American Dream Mall Station. Headways will be 15 minutes during peak hours and 30 minutes during off-peak hours. Final stop at Unity Station. Service is anticipated to begin in 2027. | 25.6 | \$5,400 | \$2,039 | 6 |
| f1 | Beach Express North | Golden Glades Multimodal Transportation Facility/ Earlington Heights Metrorail Station/Mt Sinai Transit Terminal/Miami Beach Convention Center | Will provide express bus service from Golden Glades Multimodal Transportation Facility to the Earlington Heights Metrorail Station, the future Mt Sinai Transit Terminal, and the Miami Beach Convention Center. Headways will be 10 minutes during peak hours and 20 minutes during off-peak hours. Saturday and Sunday service will also provide headways of 20 minutes. Service span will be from 5:00am to 12:00am. Project will also include a park-and-ride lot located at Mt. Sinai, plus needed roadway updates. Service is anticipated to begin in 2023. | 20 | \$23,400 | \$7,664 | 18 |
| f2 | Beach Express Central | Civic Center Metrorail Station/Miami Beach Convention Center | Will provide express bus service from Civic Center Metrorail Station to the Miami Beach Convention Center. Headways will be 15 minutes during peak hours and 30 minutes during off-peak hours. Service span will be from 5:30am to 12:00am. Project will also include a park-and-ride lot located at Mt. Sinai, plus needed roadway updates. Service is anticipated to begin in 2023. | 8 | \$5,400 | \$2,074 | 6 |
| f3 | Beach Express South | Miami Central Station/ Miami Beach Convention Center | Will provide express bus service from Miami Central Station to the Miami Beach Convention Center. Service will run all day seven days a week with 15 minute headways. Saturday and Sunday service will provide headways of 20 minutes. Service Span will be from 5:00am to 12:00am. Service is anticipated to begin in 2023. | 6.7 | \$5,400 | \$3,387 | 6 |

Note: \$2M of PTP funds have been committed for a planning study which addresses the entire BERT Network (Project S3001340) (Excludes Flagler Corridor as it is an FDOT project)

^{*} O&M number reflects enhancements only, and does not include funds to run the route, as the schedule is still in development.

Annual Progress Report

6.2. SMART Demonstration Program

The Miami-Dade TPO in partnership with FDOT, Miami-Dade County, SFRTA, and local municipalities, have coordinated to identify and implement a program of demonstration projects that advance elements of the SMART Plan, including the BERT Network. These projects must have a duration of three years or less. If deemed successful, sponsoring agencies are committed to continue funding the projects.

Phase I of the program was adopted by the TPO board in June of 2018, and is included in the Adopted Work Program for fiscal years 2020-2024. Phase II was adopted in October 2019, and is included in the Tentative Work Program for fiscal years 2021-2025. These projects are listed in Table 6-3, and their locations are illustrated in Figure 6-3.

Table 6-3: SMART Demonstration Program

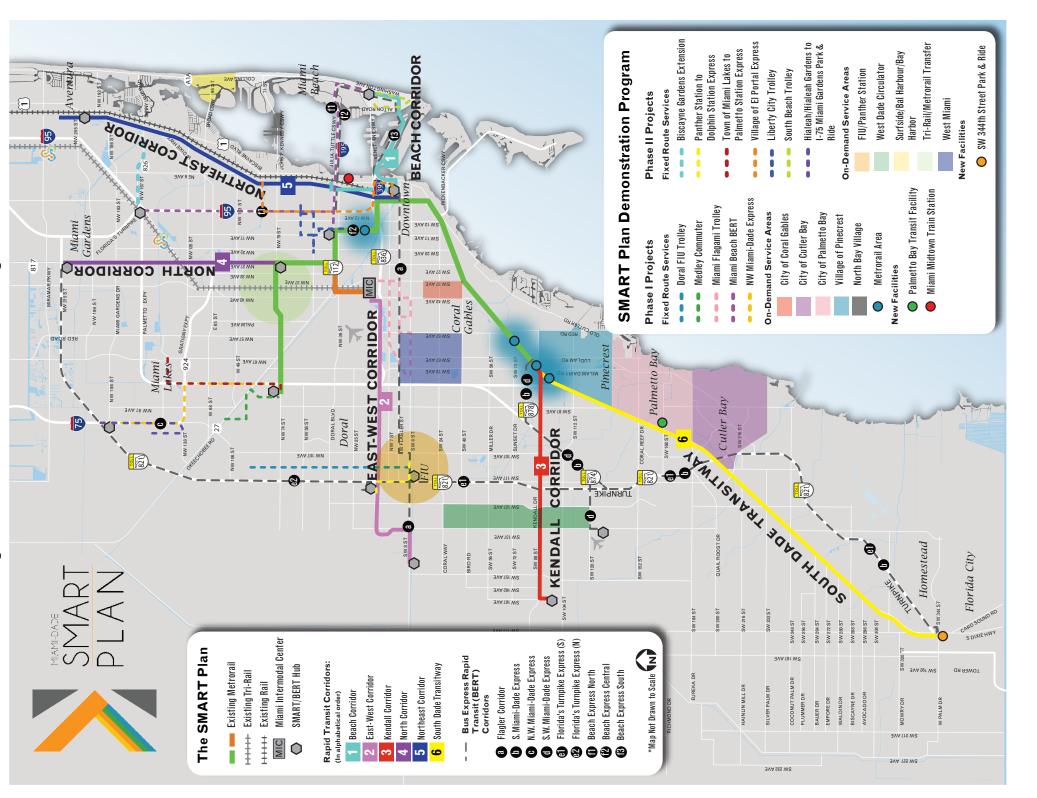

| Phase I Projects - In Service | | | | | |
|--|---|--------------|--|--|--|
| Sponsor | Project | Date | | | |
| City of Miami | Flagami Trolley Service | July 2018 | | | |
| City of Doral | Doral FIU Trolley Service | Sept. 2018 | | | |
| City of Coral Gables | On-Demand Flex Service | January 2019 | | | |
| Village of Pinecrest | On-Demand Response Service | January 2019 | | | |
| North Bay Village | SMART Feeder Route | July 2019 | | | |
| Village of Palmetto Bay | On-Demand Transit Service | July 2019 | | | |
| Village of Palmetto Bay | Transit Facility | July 2019 | | | |
| Phase I Projects - Postponed due to COVID-19 | | | | | |
| Town of Medley | Central Commuter Route | TBD | | | |
| Town of Cutler Bay | On-Demand Service | TBD | | | |
| DTPW | Civic Center Metrorail Station On-Demand Service | TBD | | | |
| DTPW | South Miami Metrorail Station On-Demand Service | TBD | | | |
| DTPW | Dadeland North Metrorail Station On-Demand Service | TBD | | | |
| DTPW | Dadeland South Metrorail Station On-Demand Service | TBD | | | |
| SFRTA | NE Corridor Midtown/Design District Station | TBD | | | |

| Phase II Projects - In Service | | | | | | |
|---------------------------------------|--|--------------------------------|--|--|--|--|
| Sponsor | Project | Date | | | | |
| City of Miami Beach | South Beach Trolley Service | January 2018, adjusted 2019 | | | | |

| | | | | Capital Cost Estimate | Annual O&M Estimates | TPO Project Numbers | Other Project Numbers |
| | | | FUNDED | | | | |
| 1 | SR 836 Express Bus A Line Express | Tamiami Station (SW 8th Street at SW 147th Avenue) to Downtown Miami Government Center | Premium express transit service along SR 836 from Tamiami Station (SW 8th Street at SW 147th Avenue) to the Downtown Miami Intermodal Terminal (NW 1st Street at NW 1st Avenue) via SW 8th Street, SW 137th Avenue and SR 836. Headways will be 10 minutes during the AM/PM peak-hour. Service hours (peak period only) are weekdays 6:00am to 9:00am and 3:00pm to 7:00pm. DTPW is coordinating with MDX to potentially operate this service. | \$31,900 | \$3,627 | TA4389701 TA4310773 TA21 | P6730101 \$3001044 |
| 2 | SR 836 Express Bus B Line Express | Panther Station (FIU at SW 109th Avenue and SW 8th Street) to the Miami Intermodal Center (MIC) | Premium express transit service between Panther Station at FIU's MMC and the Miami Intermodal Center (MIC), via SW 8th Street, the HEFT and SR 836. This route will operate all day with 20 minute headways. Service hours are 6:00am to 10:00pm on weekdays. DTPW is coordinating with MDX to potentially operate this service. | Total cost included as part of Line A | \$2,253 | TA4389701 TA4310773 TA21 | P6730101 \$3002065 FM 446684-1 |
| 3 | SR 836 Express Bus C Line Express | Dolphin Station (NW 12th Street at NW 122nd Avenue) to Downtown Miami Government Center | This route would provide premium express transit service along SR 836 from the proposed park-and-ride/transit center Dolphin Station (NW 12th Street and HEFT) to the proposed Downtown Miami Intermodal Terminal (NW 1st Street and NW 1st Avenue). This route will operate during peak periods only. Service headways will be 10 minutes during the AM/PM peak-hour | Total cost included as part of Line A | \$3,240 | TA4389701 TA4310773 TA21 | P6730101 |
| | | | Funded Transit Operations Projects FY 2022 - FY 2031 TOTAL COST (\$000s) | \$31,900 | \$9,120 | | |
| | | | UNFUNDED | | | | |
| 4 | Kendall BRT | From West Kendall Transit Terminal (Kendall Drive and SW 162 Avenue) to Dadeland North Metrorail Station | Implement Express Bus Service | \$67,938 | \$1,594 | Unfunded | None |
| 5 | Beach Express North (BERT) | Golden Glades Multimodal Terminal (GGMTF)/ Earlington Heights Metrorail Station/Mt Sinai Transit Terminal/Miami Beach Convention Center | Express bus service from GGMTF to the Earlington Heights Metrorail Station, the future Mt Sinai Transit Terminal, and the Miami Beach Convention Center. Headways will be 10 minutes during AM/PM peak/30 minutes during off-peak. Saturday service headways will be 20 minutes during peak/30 minutes in off-peak; Sunday service headways will be 40 minutes during peak hour/60 minutes in off-peak hours. A service span from 5:00am to 12:00am. Service will include 10 new articulated buses. Project is now partially funded for 3 years. | \$18,222 | \$8,091 | Plan Period I #1 | None |
| 30 | Beach Express Central (BERT) | Civic Center Metrorail Station/Miami Beach Convention Center | Express bus service from Civic Center Metrorall Station to the Miami Beach Convention Center. Headways - 10 minutes during peak hours/20 minutes during off-peak. Service span will be from 5:30am to 12:00am. Service will include eight (8) new articulated buses. | \$5 <i>,7</i> 01 | \$2,190 | Plan Period I #2 | None |
| 6 | Beach Express South (BERT) | Miami Central Station/Miami Beach Convention Center | Express bus service from Miami Central Station to the Miami Beach Convention Center. All day service with 10 minute headways. Service Span will be from 5:00am to 2:00am. Service will operate with 12 articulated buses. | \$6,841 | \$3,576 | Plan Period I #3 | None |
| 7 | SW Miami-Dade Express (BERT) | Miami Executive Airport/Dadeland North Metrorail Station | Express bus service from the Miami Executive Airport to the Dadeland North Metrorail Station. Ten minute headways during peak hours. | \$4,561 | \$1,292 | Plan Period I #19 | None |
| 8 | Florida's Turnpike Express (North) (BERT) | FIU Panther Station to I-75/Miami Gardens Station | Express bus service from the FIU Panther Station to Dolphin Station, the I-75/Miami Gardens Dr Station and the American Dream Mall Station. 15 minute headways during peak hours/30 minutes during off-peak hours - will include four (4) new articulated buses. | \$5,701 | \$2,153 | Plan Period I #5 | None |
| 9 | Florida's Turnpike Express (South) (BERT) | 344 St. Transitway Park-and-Ride facility to Dolphin Station | Express bus service from the SW 344th Street Park-and-Ride/Transit Terminal Facility along the HEFT to Panther and Dolphin Stations. 10 minute headways during peak hour/30 minutes during off-peak hours - will operate with 10 new articulated buses. | \$12,542 | \$4,791 | Plan Period I #6 | None |
| 10 | South Miami-Dade Express (BERT) | SW 344 St. Transitway Station/Dadeland North Metrorail Station; SW 288 St./HEFT to Dadeland North Metrorail Station | Express bus service from the SW 344th Street Park-and-Ride on Transitway to the Dadeland North Metrorail Station as well as from SW 288 St/HEFT to the Dadeland North Metrorail Station. 10 minute headways during peak hours/30 minutes between 9:30am -3:00pm. Service will operate with 9 articulated buses. | \$14,823 | \$5,589 | Plan Period I #9 | None |
| 11 | Douglas Rd (SW/NW 37 St) Enhanced Bus | US 1 at Douglas Rd (SW/NW 37 St) Metrorail | Incremental improvement on PTP corridor | \$20,587 | \$5,279 | Unfunded | None |
| 12 | Palmetto Express Bus (West) | Tamiami Station (SW 8th St/ SW 147th Ave) to Palmetto Intermodal Terminal | Express bus service on express lanes with 10 minute headways during the AM/PM peak-hour - will include six (6) new articulated buses. | \$2,011 | \$4,519 | Unfunded | None |

6.4. Funded Capital Projects

Table 6-5 presents a list of funded capital and infrastructure improvement projects which will be implemented within the MDT10Ahead planning horizon over the next ten years.

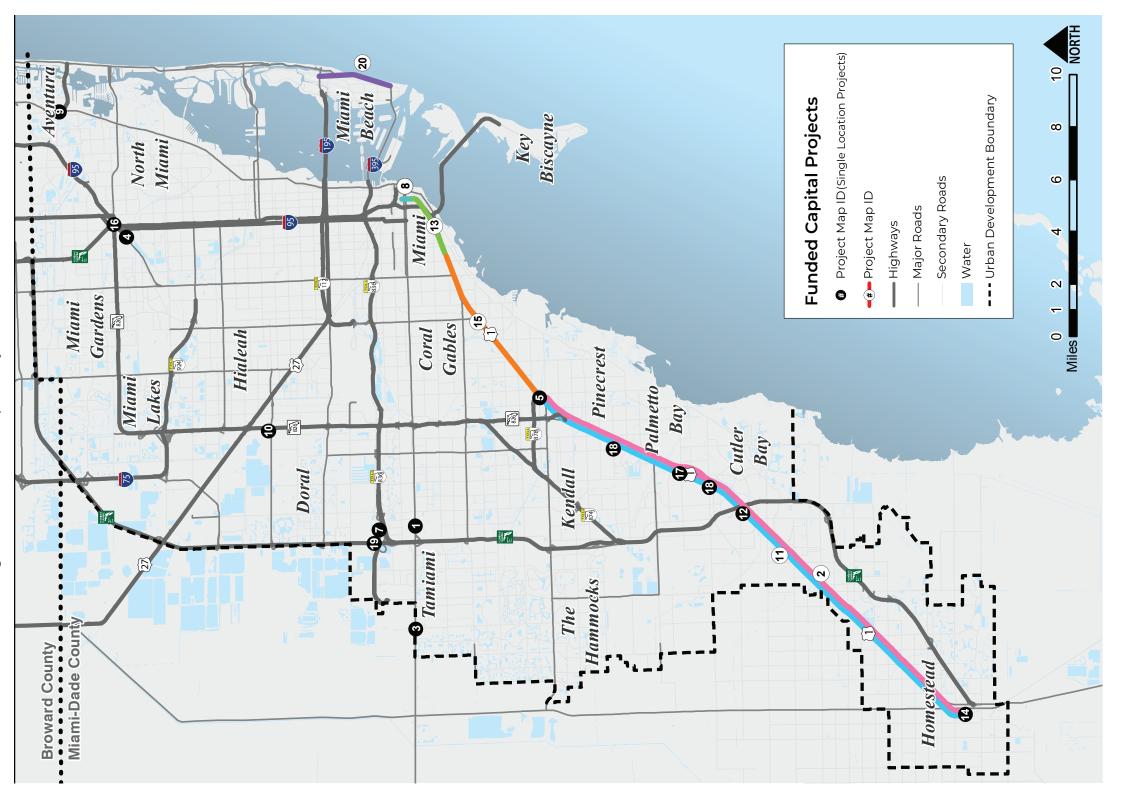

Table 6-5: Funded Capital Projects FY 2022 - 2031

| | | | | 2020 Cost - | (\$000s) | 2045 LRTP | |
|------------|--|---|---|-------------|---------------|---|-------------------------------------|
| Map ID# | Project Name | Location | Project Description | | Annual O&M | Priority and TPO Project Numbers | Other Project Numbers |
| 1 | Panther Station | Florida International University's (FIU) Modesto A. Maidique Campus (MMC) | Florida International University (FIU) constructed a parking garage along SW 8th Street with ground floor space reserved for a future transit center. This new facility will provide eight bus bays to accommodate the relocation of the existing DTPW routes from the current bus terminal located near SW 107th Avenue and SW 17th Street. | \$11,487 | TBD | Not in LRTP TA000102 | P6730101 \$3002065 |
| 2 | TOD Master Plan for the South Corridor | South Corridor | TOD planning along the SMART Plan's South Corridor to boost smart economic development and mobility through mixed-use development around transit stations. | \$1,300 | TBD | Not in LRTP | P672670 \$3002562 |
| 3 | Tamiami Station | SW 8th St and SW 147th Ave | Convert an eight acre vacant parcel of land at SW 8th Street and SW 147th Avenue into a park-and-ride facility for the SR 836 Express routes with up to 493 parking spaces. | \$15,175 | \$205 | Not in LRTP TA000101 & TA4310771/72 | P6730101 \$3001044 |
| 4 | Design Criteria Package for the Golden Glades Multimodal Transportation Facility (GGMTF) Technology Components | Golden Glades Interchange | GGMTF is a new transit center that will consolidate existing bus transit services at Golden Glades into a single facility adjacent to the Tri-Rail Station. The center will include a multi-story parking garage, a new multi-bay bus terminal facility, upgraded sidewalks, walkways, platforms, bus bays and all improvements related to transit operations, including internal roads, drainage, lighting systems, fencing, internal directional and traffic control signage. Other amenities will include bicycle parking and lockers. The complex will also feature a transit hub, retail space, and a break lounge for bus drivers. The total project cost, funded by FDOT is approximately \$56.3 million. | \$9,880 | \$883 | Plan Period II #23 LRTP Project Code: DT2516846 | P200000984 \$3002115 |
| 5 | Dadeland North Metrorail - Elevators | 8300 S Dixie Hwy | DTPW is adding two elevators to the existing parking facility at Dadeland North - both elevators will be located at the north end of the structure. DTPW is currently in the consultant selection process for design services. The estimated project completion date is May 2021. | \$8,462 | \$0 | Not in LRTP | P200000104 \$3001034 |
| 6 | Transitway at Quail Roost Dr (200 Street Station) Park- and-Ride | Transitway and Quail Roost Dr/ SW 200th Street | Developer to build: Phase 1: 116 surface parking spaces; Phase 2: 150-space parking garage | \$4,988 | TBD | Private and Developer projects | P671610 \$3001027 |
| 7 | NW 12th Street Roadway Improvements (Bus-Only) Project for Dolphin Station | Along NW 12th Street between 122nd Avenue and 114th Avenue | This project includes widening and resurfacing along NW 12th Street to add bus-only lanes from NW 122nd Avenue to NW 114th Avenue. These new bus-only lanes will allow buses to bypass traffic congestion along this segment of NW 12th Street and will thereby reduce travel time for buses traveling between the Dolphin Station Parkand-Ride/Transit Terminal and Dolphin Mall. This roadway project is an integral component of the Dolphin Station Park-and-Ride/Transit Terminal Facility. | \$10,745 | TBD | Not in LRTP | P671610 \$3001030 |
| 8 | The Underline Phase I - Brickell Backyard Project | from the Miami River to SW 13th Street | The future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Metrorail Station, will create a linear mobility corridor that will enhance connectivity, increase mobility, and improve pedestrian and biking safety for residents and visitors. In 2015, Friends of The Underline, selected a design consultant to develop the Vision and Master Plan for this project. Currently the project is structured in nine phases for development as funding becomes available. The Underline Phase I is known as the Brickell Backyard and extends from the Miami River to SW 13th Street, approximately a ½ mile long. The off-road dedicated bicycle path is located along the west side of the Metrorail structure from the Miami River to SW 8th Street and between the Metrorail Station and SW 13th Street. This phase is currently under construction. Construction started on November 1, 2019 and completion is expected on June 2020. | \$16,524 | TBD | Not in LRTP as single project NW00055 TA000103 | P2000000133 \$3000175 |
| 9 | Aventura Station | Biscayne Boulevard at 197th Street | Construct Park-and-Ride facility with 100 surface parking spaces | \$76,496 | TBD | Plan Period II #21 MDT216 | P2000001322 \$3002565 CIP 224 |
| 10 | Palmetto Intermodal Terminal (Smart Terminal) | SR 826/Palmetto Expressway at NW 74th Street | This project includes the purchase of a semi-vacant 11.8 acre parcel of land located immediately south of the Palmetto Metroral Station for the purpose of constructing the Palmetto Intermodal Terminal. The project also includes the design and construction of a 1,000 space parking garage including long-term and short-term parking, kiss-and-ride, pool-and-ride, and a minimum of a 12-bus bay terminal. | \$20,570 | \$873 | Unfunded TA24 | P2000000680 \$3002129 |
| 11 | South Dade Transitway | South Dade Transitway from SW 344th Street Park-and-Ride to Dadeland South Metrorail Station | nplement Gold Standard BRT along the Transitway | | \$36,972 | Plan Period I #10 TAMDT286 | P200000973 \$3002043 |
| 12 | Transitway at SW 112th Ave Park-and-Ride (Phase 2) | Transitway and SW 112th Avenue | Currently 450 parking spaces are available at this location. This project will upgrade existing facility to provide passenger amenities, bus terminals and additional parking spaces. | | \$41 | Plan Period I #13 new105 | P671610 \$3001029 |
| 14 | Transitway at SW 344th St Park-and-Ride | Transitway and SW 344th Street (SMART Terminal) | DTPW has identified a need to expand the existing end-of-the-line transit terminal/park-and-ride facility at SW 344th Street in order to meet future demand for parking along the South Miami-Dade Transitway. This project will increase the number of parking spaces by 96 to a total of 344. The necessary right-of-way acquisition for this project is funded, but the design and construction costs are being developed. | \$11,320 | \$257 | Plan Period II #32 new101 | P671610 \$75317 |

| Map ID# | Project Name | Location | Project Description C | | Annual O&M | Priority and TPO Project Numbers | Other Project Numbers |
| 16 | Sunshine State Industrial Park Kiss-and-Ride Connector / Transit Terminal Facility (BERT) | NW 159th Dr (adjacent to the Golden Glades Multimodal Transit Facility) (SMART/BERT Terminal) | DTPW, in coordination with the city of Miami Gardens and FDOT, proposed construction of a kiss-and-ride / transit terminal facility on the west side of the South Florida Rail Corridor (SFRC) just north of the Golden Glades Tri-Rail Station, with a connection via a fully covered and illuminated pedestrian/bicycle overpass. Metrobus as well as City of Miami Gardens trolleys would serve facility. Right-of-way acquisition is required. | | \$62 | Plan Period I #87 | P200000984 \$3002114 |
| 17 | Transitway at SW 168th St (Richmond Dr) Park-and-Ride | South Dade Transitway at SW 168th Street (Richmond Dr) | Upgrade the existing park-and-ride facility in two phases. Phase 1 includes adding approximately 90 additional surface parking spaces. Phase 2 includes a modernized 450-space parking garage with enhanced amenities. | \$61,458 | \$41 | Plan Period I #15 MDT187 TA201920 | P671610 \$3002157 |
| 18 | US 1 at SW 136 ST and Quail Roost | US 1 at SW 136 ST and Quail Roost Intersections | FDOT project intersection safety improvements | \$1,003 | TBD | Not in LRTP | P2000001472 \$3002773 |
| 19 | Dolphin Station Transit Terminal | NW 12th St at HEFT | This project includes construction of a park-and-ride lot at the existing Dolphin Station. | \$13,429 | TBD | Not in LRTP | P671610 \$3001026 |
| 20 | Beach Express South - Transit- Only Lanes | Along Washington Ave on Miami Beach from 5th Ave to Dade Blvd (Beach Express South) | Design and construction of transit-only lanes. Project includes exclusive bus lanes, signing, new thermoplastic markings, colored asphalt passenger shelter bulb outs, minor drainage improvements and updated traffic controls. | \$9,600 | TBD | Not in LRTP | P2000001205 \$3002256 |
| 13 | The Underline Phase II - Hammock Trail | from SW 13th Street to SW 19th Avenue | e future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Station, will create a linear mobility corridor that will enhance onnectivity, increase mobility, and improve pedestrian and biking safety for residents and visitors. Phase 2 is approximately 2.14 miles long and extends from SW 13th erect to SW 19th Avenue. The Design/Build Criteria Package was finalized in July of 2018. The Design/Builder was selected. Design has been finalized and the project is alizing the permitting phase. Construction start is expected September 2021 and its completion is expected in July 2023. | | \$2,465 | TAMDT291 MDT291 | P2000000133 \$3001571 |
| 15 | Underline Phases III - IX | from SW 19th Avenue to Dadeland Boulevard | Phase 3 is currently under procurement. The design Consultant finalized the Design Criteria package which constitutes 30% design. Advertisement for the design/builder vas May 2021 and award of contract is expected in May of 2022. This phase extends fro SW 19th Avenue to Dadeland South Metrorail Station Kiss and Ride facility. It is 1.36 miles. The project must be completed and closed out by September 1, 2026. | | \$15,816 | Plan Period I #55 DT4441981 | P200000133 \$3002666 CIP 235 |
| N/A | East West Corridor Transit Oriented Development (TOD) Project | Generally along SR-836 between the MIC and FIU | The East-West Corridor is one of six premium transit corridors included in the Strategic Miami Area Rapid Transit (SMART) Plan as endorsed by the Miami-Dade TPO Governing Board. DTPW will conduct a comprehensive planning effort that will inform transit and land use planning in the East-West Corridor, a 12-mile corridor linking the Miami Intermodal Center with Florida International University and the western communities of Miami-Dade County. In June 2016, DTPW submitted a grant application to FTA under the TOD Planning Pilot Program. In October 2016, FTA awarded \$960,000 to DTPW for this project. DTPW is currently finalizing a draft scope of services for this project. | \$1,200 | TBD | Not in LRTP | P672670 \$3001347 |
| N/A | Automated Fare Collection System | Countywide | Procurement of state-of-the-art fare collection equipment that meets overall and property specific requirements for security, functionality, and fare media interoperability. | \$69,016 | TBD | Not in LRTP | P6730051 \$68742 CIP058 |
| N/A | Metrorail Refurbishment | Dadeland South Metrorail Station, Government Center, Civic Center and Earlington Heights. | To enhance Metrorail stations in order to elevate the quality of the service by providing the customer with comfort and convenience. | \$76,420 | TBD | Not in LRTP | P2000000104 \$3000139 CIP134 |
| N/A | Parking Counters at Metrorail Parking Garages | Metrorail Station Parking Garages | Installation of a parking space counting system at 7 Metrorail stations to include Dadeland North, Dadeland South, Earlington Heights, South Miami and Okeechobee, Dr. Martin Luther King Jr., Santa Clara | \$600 | TBD | Not in LRTP TA000107 | P2000000104 \$3001007 |
| N/A | Bus Tracker and Automatic Vehicle Locating System Update (CAD/AVL) | 111 NW 1st St, Miami, Florida/ Countywide Network Update | Continue network upgrade to infrastructure to support real-time Bus Tracking System and replace existing Computer Aided Dispatch (CAD) / Automatic Vehicle Locator (AVL) System | | TBD | Not in LRTP | P673800 \$75991 |
| N/A | Parking Space Counter | Various Metrorail Stations | Installation of a parking space counting system at additional Metrorail stations | | TBD | Not in LRTP | P2000000104 \$3002566 |
| N/A | Vision Zero Projects | Countywide | The Vision Zero program is a systematic appraach to implementing safety countermeasures and policies to reducewith the goal of ultimately eliminatingfatalities and serious injuries related to mobility in Miami-Dade County. | | TBD | Not in LRTP | P2000001296 \$3002401 |
| | | | Funded Capital Projects FY 2022 - FY 2031 TOTAL COST (\$000s) | \$909,488 | \$57,615 | | |

| Map ID# | Project Name | Location | Project Description | | Annual O&M | and TPO Project Numbers |
| 1 | South Dade Park-and-Ride/Terminal at SW 152nd Street (Coral Reef Dr) and SR 821 (HEFT) - SMART Terminal | SW 152nd Street(Coral Reef Drive) / HEFT | Expand the existing 2 bay / 200 space park-and-ride facility. Construct new parking garage with 500 parking spaces and four bus bays. | \$15,045 | \$46 | Plan Period II #27 MDT176 |
| 2 | Transitway at SW 104 St Park-and-Ride | Transitway and SW 104th St | Lease park-and-ride facility with 100 parking spaces | \$0 | \$53 | Plan Period I #12 MDT114 |
| 3 | Direct Ramps to Dolphin Station Transit Terminal Facility | SR 821 (HEFT) Express Lanes to Dolphin Station Transit Terminal Facility | Construct direct access ramps to connect the SR 821 (HEFT) Express Lanes to Dolphin Station Transit Terminal | \$52,260 | TBD | Unfunded XA83634 |
| 4 | NE 151st Street and US 1 (Biscayne Boulevard) Park-and-Ride / Transit Terminal | NE 151 Street and Biscayne Blvd | Construct park-and-ride (100 spaces) and transit terminal (four (4) bus bays) in anticipation of premium transit service on Biscayne corridor. | N/A | \$11 | Unfunded Not in InteracTIP |
| 5 | South Dade Park-and-Ride | HEFT and SW 288th St | Purchase land for the construction of a Park-and-Ride facility. | \$34,967 | \$42 | Plan Period II #31 new113 |
| 6 | Miami Gardens – MIC Express | Miami Gardens Station (Miami Gardens Mall) to MIC | Express bus service from Miami Gardens Station to MIC - will include four (4) new articulated buses. | \$2,217 | \$2,956 | Unfunded |
| 7 | American Dream Mall Transit Terminal | East of HEFT and west of I-75 between NW 170th St and the intersection of I-75 and HEFT | Construct Transit Center with 10 bus bays, 2 layover bus bays, passenger waiting areas, bus operator comfort station, ticket vending and other transit amenities. The construction and operating and maintenance costs are privately funded. | N/A | \$0 | Private and Developer projects |
| 8 | Okeechobee Metrorail Station Pedestrian Bridge | Okeechobee Metrorail Station | Construct pedestrian bridge over the canal parallel to Okeechobee Road to connect Miami Springs area. | \$10,547 | N/A | Unfunded |
| 9 | Downtown Intermodal Terminal (SMART/BERT Terminal) | 112 NW 3rd Street | Construct new Terminal with approximately 27 bus bays, customer service and passenger waiting areas w/seating, TVMs, video displays, restrooms, security office, support areas (driver comfort area), janitor/supply closet, supervisor booth, 8 parking spaces for transit staff, bicycle parking/station, kiss-and-ride area. Also includes a conversion of NW 1st Street to bus drop-off area with 7 saw tooth bus bays, taxi/jitney areas, landscaping, lighting, and unified directional signage. | TBD | TBD | Private and Developer projects |
| 10 | Zoo Miami Station | Zoo Miami Park at SW 152 Street | Lease 100 parking spaces | N/A | \$53 | Unfunded |
| 11 | West Kendall Transit Terminal Improvements | SW 88th St and SW 162nd Ave | Improve bus hub, add Kiss-and-Ride and expand parking facility to 500 structured parking spaces. | \$14,390 | \$46 | Unfunded |
| 12 | Metromover Brickell Loop Extension | From Financial District Metromover Station | Extension of Metromover service in the Brickell area. | \$282,943 | TBD | Unfunded |
| 13 | Metromover Omni Loop Extension | From School Board Station | Extension of Metromover service in the Omni area. | \$480,506 | TBD | Unfunded |
| 14 | Senator Villas Park-and-Ride | SW 40th St between SW 89th Ave and SW 89th Ct | truct a 23-unit affordable senior housing apartment building with an on-site enhanced bus stop and privately funded Park-and-Ride ive access to and convenience of transit. Provide park-and-ride capacity for existing and new customers. Help reduce traffic congestion and support economic y. Support new SMART Plan, BART, and proposed express bus service. \$23 | | TBD | Unfunded |
| 15 | Miami Lakes Terminal | SR 826 (Palmetto Expressway) at NW 154th St | To be park-and-ride facility with eight (8) bus bays to support new express bus service connection. This project is being funded and built by the Town of Miami the To. Miami | | TBD | Unfunded |
| 16 | Miami Beach City Hall / Convention Center Intermodal Terminal | Miami Beach Convention Center at 17th St & Washington Ave | Construct a transit terminal facility with two bus bays for Local, Express, Max and Future BERT Routes. City of Miami Beach is to pay the estimated project cost of \$3.9 million. | \$4,276 | N/A | Unfunded |

6.7. State of Good Repair Projects

Table 6-8 presents a list of State of Good Repair projects, including the IRP which is funded at a level of \$12.5 million per year. All other projects are fully funded.

Table 6-8: State of Good Repair Projects FY 2022 - 2031

| Project Name | Project Description | 2020 Capital Cost - (\$000s) | Project Number |
|---|--|---------------------------------|-------------------|
| | IRP Project List | | |
| IRP - Automated Fare Collection System (AFCS) Cloud Migration | Implement enhancement and regional expansions to the Automated Fare Collection System (AFCS) based on the existing Contract 8481-2/22-1. The contract includes an option to purchase additional equipment and service for expansions and modifications. | \$3,000 | MDT: IRP263 |
| IRP - Emergency Exit at William Lehman Center | Widening of current exit to facilitate in and out emergency vehicle traffic at Palmetto Yard. | \$680 | MDT: CIP126 |
| IRP - Fueling Terminal Modernization | Upgrade fueling terminal to IP Base. | \$250 | MDT: IRP260 |
| IRP - Metromover Vehicles HVAC Compliance Overhaul & Mover Building A/C Replacement | Mover vehicle air condition HVAC system and Mover Building A/C replacement in order to comply with EPA requirement as the use of Freon 22 will be banned by EPA by the year 2020. | \$2,143 | MDT: IRP270 |
| IRP - Metrorail Bathrooms | Repair and renovate public restrooms at the 30-year-old Metrorail stations. | \$1,865 | MDT: IRP215 |
| IRP - Data Closets Uninterruptible Power Supply (UPS) Replacement | Replace Data Closets Uninterruptible Power Supply (UPS). | \$323 | MDT: OSP209 |
| IRP - Purchase of 2 HY-Rail Crew cab Trucks | Purchase support vehicles for the Track and Guideway maintenance division. | \$190 | MDT: IRP236 |
| IRP - Purchase Rail Wheel Press Machine | Purchase of a new Railcar Wheel Press Machine needed to support the (136) rail cars the department is procuring to replace the existing railcar fleet. | \$981 | MDT: IRP267 |
| IRP - Railcar Cleaner Platform Replacement Project | Upgrade the existing Cleaning Platform located at the William Lehman Center. The existing wooden platform is in need of constant repair. | \$2,790 | MDT: IRP234 |
| IRP - Rail Public Address System Replacement | Replace existing Public Address System at all Metrorail Stations. The Scope of Work includes the replacement and upgrade of all electronic components in the Paging chain. The distribution wiring will also be upgraded. | \$2,592 | MDT: IRP096 |
| IRP - Replacement of Tactiles & Barriers at Metromover Stations | Provide detectable warning safety edge tiles and between-car barrier (BCB) system in compliance with the DOT ADA regulations. Each station features two 80 LF Platform Structures and require tiles and BCB on both sides of the platform. The scope includes labor, materials, tools, appliances, equipment and other means of construction for performing and completing the work. | \$440 | MDT: IRP255 |
| IRP - Traffic Signal Prioritization Expansion to Congestion Mgmt. Plan / Real- Time Connected Vehicles - | Recapitalization of the Metrobus on-board equipment that provides passengers with free Internet access and connectivity for business traffic such as Fare Collection, CCTV, and CAD/AVL data. This project replaces field equipment that has been in continuous operation in Metrobus vehicles for the last 7 years and expands the deployment of the entire fleet. | \$1,196 | MDT: IRP265 |
| IRP - Metrorail and Metromover UPS Rooms HVAC Installation | Install new HVAC systems to provide cooling capacity for all UPS rooms on Metrorail and Metromover. | \$1,682 | MDT: CIP171 |
| IRP - Replacement of Diamond Frogs at Culmer Crossover | Replacement of Diamond Frogs at the Culmer Metrorail Station. | \$900 | MDT: IRP233 |
| IRP - Hydraulic Mobil Column Bus Lifts (Additional) | Provide 24 sets of four hydraulic column lifts with 70' required communication cables and 60' power cords for DTPW Bus Maintenance. | \$1,118 | MDT: IRP107 |
| IRP - Upgrade Chiller Units at Lehman Center | Replace two existing Trane water cooler 110 ton, R-113 chiller units, 3 chilled water pumps and all related controls, piping, valves, wiring etc at the William Lehman Center Facility. | \$650 | MDT IRP171 |
| IRP - Renovate Lehman Center 2nd Floor (Administration) | New office partitions, desks, chairs upgrade phone system etc. | \$850 | MDT: IRP306 |
| IRP - Emergency Back up Generators | Installation of electrical generators and transfer switches at Central Bus, NE and Coral Way. | \$440 | MDT: IRP109 |
| IRP - Rail EAMS Work Order Module | Infor EAMS software tool to implement Work Order module that will be integrated with the existing warehouse module. | \$700 | MDT: OSP234 |
| IRP - Metrorail Platform Cabling Replacement | Replacement, disposal and reinstallation of the infrastructure and cabling necessary to support the Emergency Transfer Switch, Emergency Telephone, End Gate Intrusion Alarm and Blue Light at 17 Metrorail Stations. | \$2,805 | MDT: IRP276 |
| Correct Civil Design and alignment of Curve #41 in the Lehman Yard Maintenance facility. The work will involve the realignment of the existing track layout to a 300 foot radius. The curve is currently of service and cannot be used until the curve geometry is corrected. The existing track bed and substrate will be modified to accept the new track layout. The third contact rail will also be aligned to match the 300 foot running rail radius. Alt power, control and communications cabling will also be modified to accommodate the new track and third-rail layout. The finished track bed will be tampe and concrete ties installed as required prior to laying the new running and third rails. The new track will be tested before being accepted to ensure that all control lines and traction power connection function per the intended design | | \$1,649 | MDT: IRP321 |
| IRP - Bus Garage and Employees Parking Lot Light Fixtures Upgrade | Install light fixtures at Coral Way, Northeast and Central bus garages and employee parking lot | \$260 | MDT: IRP329 |
| IRP - Roadway Signs in the Vicinity of twenty-three (23) Metrorail Stations | The scope of work includes, but is not limited to, installation and/or replacement of directional/guide signs on roadways and highways in the vicinity of the twenty three (23) metrorail stations. DTPW is proceeding with preparation of plans to obtain permits and implement improvements. The first phase of the project involved conducting field assessments of the roads to determine the inventory of existing signs and proposed signs. This first phase has been completed. | \$2,225 | MDT: CIP201 |

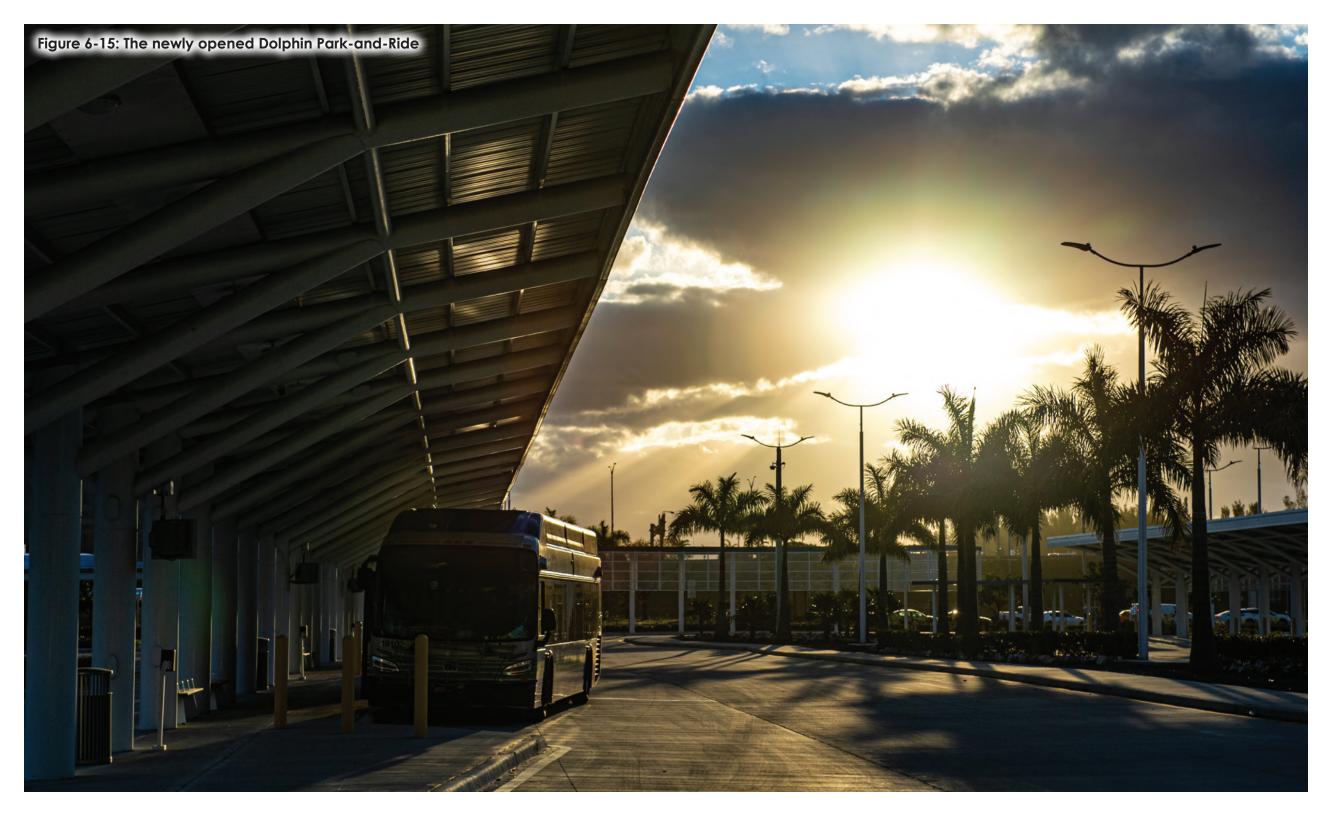

Table 6-8 (Continued): State of Good Repair Projects FY 2022 - 2031

| Project Name | Project Description | 2020 Capital Cost - (\$000s) | Project Number | |
|--|--|---------------------------------|--------------------------------------|--|
| IRP - BERT Route b Park & Ride at Tamiami Executive Airport | The proposed project is required to perform environmental analysis to construct a surface Park-and-Ride at the Tamiami Executive Airport. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route d Southwest Miami-Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project, develop concept plans and complete preliminary cost estimates in coordination with the Tamiami Executive Airport and the Kendall Parkway Project Team. Once these tasks are complete, the next steps towards construction will be leasing agreements and advancing the design. The requested amount is based on previous conceptual plan development efforts. | \$100 | MDT: CIP230 | |
| IRP - BERT Route b Park & Ride at SW 288th Street (SMART BERT) | The proposed project is required to perform analyses to construct a surface Park-and-Ride in the vicinity of the intersection of the Turnpike and SW 288th Street. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South Miami-Dade Express. The BERT study team has identified a proposed location for the facility. The requested Budget is to complete the planning/environmental analysis of the project, develop concept plans and complete preliminary cost estimates. Once these tasks are completed, the next steps will be land acquisition and advancing the design. The requested amount is based on previous conceptual plan development efforts. | | | |
| IRP - BERT Route b Park & Ride at SW 152nd Street & Turnpike | The proposed project is required to perform environmental analysis to construct a surface Park-and-Ride with approximately 150 parking spaces, Kiss and Ride, Bicycle and Pedestrian facilities at the Turnpike and SW 152nd St. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South Miami-Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project. The requested amount is based on conceptual plans. | \$150 | MDT: CIP232 | |
| IRP - BERT Route b Park & Ride at SW 211 Street | The proposed project is required to perform environmental analysis to construct a surface Park-and Ride in the vicinity of the intersection of the Tumpike and SW 211th Street. The proposed project will provide parking along the Strategic Miami Area Rapid Transit (SMART) Plan Bus Express Rapid Transit (BERT) Route b South-Miami Dade Express. The requested Budget is to complete the Planning/Environmental analysis of the project, develop concept plans and complete preliminary cost estimates. Once these tasks are completed, the next steps will be land acquisition and advancing the design. The requested amount is based on previous conceptual plan development efforts. | \$150 | MDT: CIP233 | |
| | Non-IRP projects | | | |
| Underfloor Rail Wheel Truing Machine | Purchase a new Tandem, Underfloor, Railcar Wheel Truing Machine, to support the new railcar procurement of up to 136 rail vehicles. These vehicles will replace the existing 136 railcar fleet. The railcars will be heavy rail married pairs, weighing approximately 83,000 lbs/vehicle, using 28 inch wheels and equipped with disc brakes. | \$20,269 | P2000000993 \$3001017 | |
| Escalators Replacement and Elevators Refurbishment | The escalators and elevators in the 21 Metrorail stations in the Department of Transportation and Public Works (DTPW) system require upgrade and/or replacement of this equipment over time, the DTPW has requested the services of a consultant to develop a design criteria package for use in future design-build procurements for the design, procurement and installation of this equipment and to develop cost estimates and schedules based on the budget | \$13,760 | P673910 \$3001039 TAMDT290 | |
| AC Unit Substations (Replace All Major Power Components) | Replace existing equipment in the AC unit substations that have been in service since Metrorail first commissioned. | \$15,000 | P2000000185 \$3001051 | |
| Green/Orange Lines and PYD Switch Switch Machine and Cable Replacement | Replace switch machines and cables at the William Lehman Yard and Mainline Area | \$12,320 | P2000000104 \$3001424 | |
| Metrorail and Metromover Train Control Replacement Project | Replace the existing Metrorail and Metromover relay based train control equipment with vital processor controllers or their equivalent. Project includes software and hardware modifications at Central Control to accommodate the new train control systems. | \$28,302 | P2000000993 S3001343 | |
| Metrorail Train Wayside Communication Equipment Installation at Rail | TWC Equipment Installation at 21 Metrorail Stations, except MIC and Earlington Heights stations, to interface with the station signs and PA to display the train route information at the platform. | \$8,762 | P674560 S3001037 | |
| Rail Vehicle Replacement | Rail vehicle replacement of 136 car fleet | \$385,813 | TA0000022 P6733001 \$68750 | |
| Bus Replacement | Bus vehicle replacement with CNG and electric vehicles. This project includes bus garage conversions and purchase of charging stations. | \$231,604 | TA7 P673800 S3001046 CIP183 | |
| Compressed Natural Gas Buses | Purchase of CNG buses | \$152,650 | P673800 \$3001647 CIP202 | |
| Green Line Rail Component Replacement | The majority of Metrorail track infrastructure is near or exceeded its life cycle. This will replace 40 miles of track along with running rail and fasteners. | \$80,000 | P6710900 \$3001384 CIP 148 | |
| Parking Garage Overhaul, Metrorail Stations | Overhaul 6 parking garages from the original 1984 Metrorail construction: Okeechobee, Earlington Heights, Santa Clara, South Miami, Dadeland North, and Dadeland South. A general overhaul at the MLK rail station parking garage. Scope of work includes: metal doors, lighting, parking stops, irrigation, drainage, sump pumps, and plumbing. | \$16,000 | P671560 \$3000793 | |
| Metromover Wayside Overhaul | This project includes the overhaul and repair of all major wayside components. | \$132,964 | P673910 S3001385 | |

Table 6-8 (Continued): State of Good Repair Projects FY 2022 - 2031

| Project Name | Project Description | 2020 Capital Cost - (\$000s) | Project Number |
|--|--|---------------------------------|--------------------------------|
| Disaster Recovery Control Center | Upgrade of the Metrorail Control Center Facility (MCCF), which is currently co-located with Yard Tower Control at the Lehman Yard Facility. Project includes the installation of new workstations, consoles, HVAC, lighting, telephones, a security station, fire alarm detection, facilities monitoring, Traction Power and Train Control status displays, etc. | \$9,855 | P674560 \$3001342 |
| Metrorail Escalators and Elevators Refurbishment | Refurbish and replace elevators and escalators at Metrorail stations. This project includes assessments, design, materials, procurement and construction. | \$68,166 | P200000104 \$3001035 |
| Tri-Rail Station Power Sub-station | Purchase new Traction Power Sub Station (TPSS), including all substation equipmnet to be located at the Metrorail Tri=-Rail Station with related site and off-site work. | | P200000104 \$3001382 |
| Coverboard Replacement | Replace the coverboard. | \$15,613 | P6710900 S3000918 |
| Acoustical Barrier Replacement | Replace the concrete and metal acoustical barrier along Metrorail's guideway system. | \$82,697 | P6710900 S3001335 |
| Government Center Fire Systems | Replace the fire system at the Government Center. | \$3,932 | P2000000104 \$3001005 |
| Private Branch Exchange Telephone System Upgrade to VOIP | Upgrade telephone system to VOIP. | \$4,042 | P2000000434 \$3001023 |
| Fiber Optic Repair and Capacity Augmentation | Metrorail fiber optic repair and capacity augmentation. | \$7,500 | P2000000434 \$3001036 |
| Metrorail and Metromover Electronic Real Time Signage | Metrorail and Metromover Electronic Real Time Signage | \$6,876 | P2000000434 \$3001025 |
| Mainline Video Upgrade | inline Video Upgrade Mainline video upgrade Phase 2 | | P2000000326 \$3001904 |
| Electric Vehicles | Purchase of electric buses and charging stations | \$35,650 | P673800 \$3001290 CIP147 |
| Track Inspection Vechile/Train | Purchase a track inspection vehicle/train | \$7,500 | P2000001308 \$3002479 |
| South Dade Area Bus Maintenance Facility | Construct a new South Dade Area Bus Maintenance Facility | \$56,214 | P2000001321 \$3002470 |
| Replacement of Articulated Buses | Replacement of articulated buses | \$162,555 | P673800 S3002474 |
| IRP - Metromover Fire Panel Upgrade | Install new fire panels, sensors and control equipment at the Central Control Facility to monitor fire alarms from all Metromover stations. The new system will allow for Metromover Rail Traffic to monitor the status of all new fire, smoke and heat detectors. The new system will enhance the safety of Metromover patrons. | \$3,307 | P673910 \$3001387 CIP172 |
| Mover Vehicle Mid Life Overhaul | Involves replacement or overhaul of vehicle subsystems, equipment and components for the reliable operation of the Mover fleet. | \$3,213 | P673910 \$3002476 |
| IRP - Hybrid Electric Bus Battery Replacement | Battery Management replacement system in order to keep Hybrid buses in service. | \$4,390 | P673800 \$3002475 CIP192 |
| Mover and Rail SCADA and Ethernet Switch Replacement | To replace all ethernet switches at all Metrorail & Metromover stations and at Metromover Maintenance Bldg & at Lehman Center Bldg. | \$2,989 | P673910 \$3002478 |
| IRP - Bus Passenger Shelter Project | Bus Passenger Shelters (design, fabrication and installation of approx. 2,265 shelters throughout unincorporated Miami-Dade County). | \$12,586 | P671560 \$3002471 CIP174 |
| | Funded State of Good Repair Projects FY 2022 - FY 2031 TOTAL COST (\$000s) | \$1,632,386 | |

7. VISION PLAN: 2031 AND BEYOND

In addition to the ten-year plan laid out in Chapter 6, DTPW has developed a program for projects that can be implemented from the 11th year onward. This list consists of a combination of projects that are scheduled for the later years of the 2045 LRTP, as well as DTPW's forecasted long-term needs. Many of these adopted projects are identified as Priority 3 (2031 - 2035), Plan Period 4 (2036-2045), or unfunded projects, which are beyond the 10-year planning horizon of the FY 2022 - 2031 TDP. Additionally, through its budget process, DTPW has identified unfunded capital needs in the proposed FY22 budget, as listed in Appendix A8.

7.1. 2045 Long Range Transportation Plan - Priority Transit Projects

Table 7-1 and corresponding maps, Figures 7-1, 7-2, and 7-3 identify DTPW priority projects planned to take place beyond the ten-year threshold of the Implementation Plan presented in Chapter 6. These projects will require consideration by the Miami-Dade TPO for the purposes of amending the 2045 LRTP to promote these projects to Plan Period 1 or 2 time frame.

Table 7-1: 2031 and Beyond Transit Vision Plan

| Мар | | | | Cost - (in \$000s) | 2045 LRTP Plan Period |
|-----|---|--|---|--------------------|---------------------------------|
| ID# | Project Name | Location | Project Description | Capital Cost | and TPO Project Numbers |
| 1 | Direct Ramps to Palmetto Intermodal Terminal from Palmetto Express Lanes | Palmetto Metrorail Station | Provide greater connectivity and reduce transit travel time. | \$52,260 | Unfunded |
| 2 | Direct Ramps between the South Dade Transitway and SR 826 (Palmetto) Express Lanes | South Miami-Dade Transitway and SR 826 / Palmetto Expwy | Construct ramps connecting the South Miami-Dade Transitway and SR 826 (Palmetto) Express Lanes | \$53,316 | Unfunded DT4326391 new212 |
| 3 | Direct Ramps between SR 878 (Snapper Creek Expressway) and Dadeland North Metrorail Station | SR 878 (Snapper Creek Expressway) and Dadeland North Metrorail Station | Construct ramps connecting SR 878 (Snapper Creek Expressway) to Dadeland North Metrorail Station | \$47,509 | Not in LRTP |
| 4 | NW 7th Ave Enhanced Bus | NW 7th Avenue from Downtown Miami to Golden Glades Multimodal Transportation Facility (GGMTF) | Premium limited-stop transit service along NW 7th Ave between Downtown Miami and the Golden Glades Interchange park-and-ride facility. Will replace route 77 and MAX route 277. Service headways: 10 minutes during the AM/PM peak/20 minutes during midday. This route will provide a premium transit connection to the NW 7th Ave Transit Village located at NW 7th Ave and NW 62nd St. | \$39,116 | Unfunded |
| 5 | Government Center Station (Downtown Miami Development of Regional Impact - Increment III) | 101 NW 1st St | Preserve existing transit facilities and equipment. Improve service reliability, safety, quality, convenience, and comfort. | \$14,880 | Unfunded |
| 6 | Historic Overtown/Lyric Theatre (Downtown Development of Regional Impact - Increment III) | 100 NW 6th St | Expand capacity, support connectivity. Preserve existing transit facilities and equipment. Improve service reliability, safety, quality, convenience, and comfort. | \$5,655 | Unfunded |
| 7 | Collins Avenue Enhanced Bus | Miami Beach Convention Center at 17 St & Washington Ave to Aventura Terminal | Improve the speed, reliability, identify, comfort and convenience of transit. | \$57,233 | Unfunded |
| 8 | SW 137th Ave Enhanced Bus Service | Tamiami Station to Caribbean Blvd / US-1 | Improve the speed, reliability, identify, comfort and convenience of transit. | \$67,114 | Unfunded |

| Мар | | | | Cost - (in \$000s) | 2045 LRTP Plan Period |
|-----|--|---|--|--------------------|----------------------------|
| ID# | Project Name | Location | Project Description | Capital Cost | and TPO Project Numbers |
| 9 | MDC Sharks Central Station - SMART Terminal | Miami Dade College Kendall Campus - 11011 SW 104th St (Killian Pkwy) | Construct Transit Terminal with four (4) bus bays | \$1,974 | Unfunded |
| 10 | Dolphin Mall-Dolphin Station Connector Road | Dolphin Mall - Dolphin Station (HEFT/SR 836/NW 12th St) | New cut and cover roadway to connect the Dolphin Mall to Dolphin Station | \$10,558 | Unfunded |
| 11 | Park-and-Ride/Transit Terminal at Gratigny Pkwy/NW 119 St/NW 27 Ave (Sharks North) | Gratigny Pkwy / NW 119 St / NW 27 Ave | Construct park-and-ride facility with 100 surface parking spaces | \$15,256 | Unfunded |
| 12 | NW 7th St Enhanced Bus | Dolphin Station to Government Center | Premium limited-stop transit service along NW 7th St from the proposed park-and-ride/transit center station at Dolphin Station (HEFT at NW 12th St) to Government Center. Service headways: 10 minutes AM/PM peak-hour/20 minutes mid-day. | \$62,173 | Unfunded |
| 13 | SW 8th St Enhanced Bus | FIU Panther Station to Brickell Metrorail Station | Premium limited-stop transit service along SW 8th St from FIU Panther Station to the Brickell Metrorail Station. Service headways: 10 minutes AM/PM peak/20 minutes mid-day. | \$71,026 | Unfunded |
| 14 | Little River park-and-ride | US 1 (Biscayne Blvd/SR 5) & NE 79th St (SR 934) | Lease 100 parking spaces | \$6,727 | Unfunded |
| 15 | Civic Center Transit Terminal | Civic Center Metrorail Station (NW 15th St and NW 12th Ave) | Construct transit terminal to increase bus terminal capacity and improve bus circulation | \$57,233 | Unfunded |
| 16 | South Dade Transitway Extension to Dadeland North | Transitway between Dadeland South and Dadeland North Metrorail Station | Extend Transitway from Dadeland South to Dadeland North Metrorail Station | \$11,085 | Unfunded |
| 17 | SMART - Kendall Corridor (North) | From SW 88th Street to SW 8th Street along SR-821 (HEFT) | New Metrorail service linking Kendall BRT to the East-West Corridor along HEFT | \$1,127,495 | Unfunded |
| 18 | Douglas Road (SR/NW 37 St) LRT | Douglas Road Metrorail / US-1 to MIC at MIA | Improve regional and local connectivity. Improve the speed, reliability, comfort and convenience of transit. Serve new markets and support economic vitality. | \$504,651 | Unfunded |
| 19 | SMART - Kendall Corridor (South) | From US-1 / SW 200th Street to SW 88th Street along SR-821 (HEFT) | Metrorail Turnpike Extension Phase 2 | \$1,595,511 | Unfunded |
| 20 | 72nd Ave / 67th Ave Enhanced Bus | Dadeland North Metrorail Station to Miami Lakes Terminal NW 154th St & SR-826 | Convert local route 73 to enhanced bus service | \$71,644 | Unfunded |
| 21 | NW 37th Ave Enhanced Bus (North) | MIC at MIA to Unity Station (NW 215th St / NW 27th Ave) | Implement limited stop enhanced bus service | \$59,703 | Unfunded |
| 22 | SW 40 St Enhanced Bus | SW 8th St (Tamiami Trail/SR 90/US 41) to Douglas Metrorail Station | Convert Route 40 to Enhanced Bus | \$95,113 | Unfunded |
| 23 | Miller Drive (SW 56 St) Enhanced Bus | SW 147th Ave & SW 8th St (Tamiami Station) to University Metrorail Station | Implement limited stop enhanced bus service | \$98,201 | Unfunded |
| 24 | Sunset Drive (SW 72 St) Enhanced Bus | SW 162nd Ave & SW 88th St (West Kendall Transit Terminal) to South Miami Metrorail | Implement limited stop enhanced bus service | \$71,644 | Unfunded |

| Мар | | | | Cost - (in \$000s) | 2045 LRTP Plan Period |
|-----|--|--|---|--------------------|----------------------------|
| ID# | Project Name | Location | Project Description | Capital Cost | and TPO Project Numbers |
| 25 | 22nd Ave Enhanced Bus | Coconut Grove Metrorail to Golden Glades Interchange | Implement limited stop enhanced bus service | \$56,409 | Unfunded |
| 26 | SW 127th Ave Express | Tamiami Executive Airport to Dolphin Station at NW 12 ST/SR 821 (HEFT) | Provide a regional connection and serve new markets. Improve the speed, reliability, image, comfort, and convenience of transit. Attract choice riders. | \$2,162 | Unfunded |
| 27 | NW 183 St Enhanced Bus | Miami Gardens/I-75 (SR 93) Interchange to Aventura Terminal | Implement limited stop enhanced bus service | \$59,703 | Unfunded |
| 28 | Okeechobee Enhanced Bus | SR-821 (HEFT) to MIC at MIA | Implement limited stop enhanced bus service | \$69,173 | Unfunded |
| 29 | NW 199th/203rd St Enhanced Bus | Unity Station to Aventura Terminal | Convert local route 99 to Enhanced Bus | \$31,293 | Unfunded |
| 30 | 2nd Ave Enhanced Bus | Miami Beach Convention Center to Aventura Terminal | Implement limited stop enhanced bus service | \$109,318 | Unfunded |
| 31 | 17th Ave Enhanced Bus | Vizcaya Metrorail Station to Golden Glades Interchange | Implement limited stop enhanced bus service | \$88,937 | Unfunded |
| 32 | Coral Way Enhanced Bus | SW 147th Ave & SW 8 St (Tamiami Trail/SR 90/US 41) to Brickell Metrorail Station | Implement limited stop enhanced bus service | \$95,731 | Unfunded |
| 33 | NW 62nd St Enhanced Bus | Okeechobee Metrorail Station to Biscayne Blvd | Implement limited stop enhanced bus service | \$31,704 | Unfunded |
| 34 | NW 103rd St Enhanced Bus | Okeechobee Terminal to US-1/ NE 79th St (Little River Park-and-Ride) | Implement limited stop enhanced bus service | \$60,526 | Unfunded |
| 35 | South Miami Dade Corridor/US-1 (Transitway) | South Dade Transitway from SW 344th Street Park- and-Ride to Dadeland South Metrorail Station | Extend Metrorail | \$1,208,841 | Unfunded |
| 36 | 87th Ave Enhanced Bus | Palmetto Intermodal Terminal to Transitway at SW 136th St | Convert local route 87 to Enhanced Bus | \$59,291 | Unfunded |
| 37 | Kendall/SR-874 Station | Kendall Drive and SR-874 | Construct Park-and-Ride facility with 100 surface parking spaces | \$15,836 | Plan Period IV #37 |
| 38 | Tropical Station | SW 40th Street at SR-826 (Palmetto Expressway) | Upgrade Park-and-Ride facility with 100 surface parking spaces and 4 bus bays | \$3,590 | Unfunded |
| 39 | Metrorail / Tri-Rail Bus Hub Improvements | Tri-Rail/Metrorail Transfer Station | Enhance regional connectivity. Develop multimodal transit hub with convenient access to jobs, housing and goods & services. Improve quality, safety, convenience, comfort & accessibility. Serve new markets and increase system integration. | \$2,112 | Unfunded |
| 40 | NW 7th Street Connection Across HEFT | NW 118 Ave to NW 114 Ave | Provide greater connectivity and reduce travel time. | \$11,613 | Unfunded |
| 41 | Beach Corridor Transit Oriented Development (TOD) Project | Miami Beach Convention Center to Midtown Miami at or near NE 41st St and NE 2nd Ave. | DTPW will conduct a comprehensive planning effort that will inform transit and land use planning in the Beach Corridor. | \$0 | |

|-----|--|---|---|--------------------|-------------------------------|
| ID# | Project Name | Project Name Location Project Desc | | Capital Cost | and TPO Project Numbers |
| 42 | Dadeland South Intermodal Station | Dadeland South Metrorail Station | Construction of direct ramps to and from an elevated Bus Rapid Transit (BRT) platform at the Dadeland South Metrorail station platform level to provide seamless transfer between the TransitWay BRT service and the Metrorail service. This project will also include improvements and refurbishment to the existing Metrorail station to enhance passenger amenities and experience. Expand existing 1,254 space overcapacity park-and-ride facility. Construct a new 1,000 space parking garage with ground-floor retail and office space. | \$53,328 | Plan Period I #33 MDT189 |
| 43 | Okeechobee Terminal | Turnpike (HEFT) & Okeechobee Rd | Support new express bus services. Improve access and convenience. Reduce traffic congestion and promote conservation of environment and energy. Serve new markets. | \$1,647 | Unfunded |
| 44 | Kendall/SR-826 Station | SW 88 St (Kendall Drive) and SR-826 (Palmetto Expy) | Construct Park-and-Ride facility with 100 surface parking spaces | \$21,115 | Unfunded |
| N/A | Bicycle and Pedestrian Improvements at all Transitway Stations | Transitway Stations | Improve Pedestrian and Bicycle connections to the Transitway stations | N/A | Not in LRTP |
| 45 | Miami Executive Airport Park-and-Ride SMART Terminal | Miami Executive Airport Vicinity | MDX to construct a park-and-ride facility with 75 surface parking spaces and 4 bus bays to serve the SW Miami Dade Express (Route D) and other local routes | N/A | Plan Period IV #39 |
| 46 | Intermodal Terminal at SW 88th St / HEFT | SW 88th St (Kendall Drive) at SR 821 (HEFT) | Lease 100 surface parking spaces for park-and-ride/transit center | \$542 | Plan Period IV #35 MDT 160 |
| 47 | Brickell Metrorail Station (Downtown Miami Development of Regional Impact - Increment III) | 1001 SW 1st Ave | The Brickell Station serves as an intermodal station that provides passenger connections with the local circulator (City of Miami Trolley), local fixed route service (Metrobus), regional bus service (BCT I-595 Express) as well as Metromover and Metrorail. The station area is a linear site that spans between SW 8th St and SW 13th St. The primary goal of the Brickell Metrorail/Metromover Station improvements is to enhance passenger and pedestrian access. The recommended implementation plan includes additional bus passenger pick-up/drop areas, additional shuttle pick-up/drop off capacity, a new designated kiss-n-ride area, upgrade pedestrian connections and Improve passenger convenience through way finding, upgrade/ADA compliant sidewalks, continuous passenger canopies, and additional bike storage | \$4,117 | Not in LRTP |
| 48 | SW 11th St | Brickell Plaza to SW 1st Ave | Bicycle/pedestrian improvements | \$4,309 | Not in LRTP NW00147 |
| 49 | 252 Coral Reef Express | SW 152 St (Coral Reef Dr) to Dadeland South Metrorail Station | Implement express bus service from Country Walk, SW 152 Street/Coral Reef Drive to Dadeland South Metrorail Station. | \$3,892 | Unfunded |
| 50 | Water Borne Transit Service | Biscayne Bay | Implement two Water Transit Routes - 1. North/South Route - Express route from Haulover Marina (North) to Sea Isle Marina (South) Downtown. 2. East/West Route - Express route from Miami Beach Marina (East) to FEC Inlet/Bay Front Park Trust Dock (West). | \$10,558 | Unfunded |

8. TRANSIT FINANCIAL PLAN

The previous chapters identify critical transit needs in Miami-Dade County without consideration of project cost. In this chapter, however, the DTPW must reconcile its transit improvement needs with available financial resources. In the financial plan, the estimated costs of providing the agency's existing and planned new services are projected over a ten-year horizon. The financial resources that will support those services are also identified and estimated. Through the development of this plan, DTPW determines which service improvements are financially feasible and establishes a timeline for implementation.

8.1. Operating Expenses and Revenues

DTPW is the largest transit operator in the State of Florida and the 21st largest transit provider in the U.S. based on unlinked passenger trips, per the 2020 Public Transportation Fact Book published by the American Public Transportation Association (APTA). DTPW's size is reflected in the agency's direct operating budget, which is projected at approximately \$363 million in FY 2021. The primary components of the direct operating expenses are shown in Table 8-1.

Wages and benefits make up 62% of DTPW's total operating expenses. This includes salaries and overtime, benefits, health and dental, retirement, and worker's compensation. Contractual services comprise another 9% of the operating budget.

In addition to these direct expenses, DTPW will support approximately \$89 million of other operating expenses in FY 2021. These other expenses are detailed in the subsequent tables of this chapter.

In total, DTPW is projected to spend \$544 million in FY 2021 for the ongoing operation and maintenance of the transit system and the support of DTPW's other local and regional responsibilities.

Source: Transit Pro-Forma FY 2020-2021 (November 2020)

DTPW's transit operations are supported by a range of federal, state, local, and directly generated revenue streams. Table 8-2 shows the projected operating revenue for FY 2021, which total over \$364 million from the following categories:

- Fare Revenues: DTPW typically recovers around 15% of its annual operating expenses from transit fare revenue. Fares were suspended from March 22, 2020 to June 1, 2021, as a safety measure during the COVID-19 global pandemic. Revenue impacts from this suspension are reflected in Table 8-2.
- Other Operating Revenues: This revenue is generated primarily by advertising fees.
- Transportation Disadvantaged (TD) program: This program provides funding to assist TD populations, which include individuals with physical or mental disabilities, those with low income, or older adults unable to transport themselves or use fixed-route services.
- County General Funds: Miami-Dade County supplies DTPW with funding each year from its general fund.
- People's Transportation Plan (PTP) Surtax: The PTP provides sales tax revenue to support public transit and roadway infrastructure improvements.

8.1.1. Projected Operating Revenues

Revenue projections are developed based on the historical trends, the current state of the economy, and any anticipated policy or programmatic changes. In addition, revenue impacts from the unprecedented global COVID-19 pandemic must be considered. Overall, transit operating revenues are projected to increase an average of 3.4% per year between FYs 2022-2031. The critical funding growth assumptions that drive the Pro Forma financial projections are outlined in Table 8-3, highlights of which include:

- Fare revenue is projected to increase by 7.3% from FY 2021 to FY 2022, reflecting ridership recovery to pre-pandemic levels. Projections for the ten-year TDP planning period reflect this ridership stabilization and fare revenue is assumed to increase by 0.5% per year starting in FY 2022.
- Additional general fund revenue is anticipated for FYs 2022-2024.
- Regular programmed fare increases: A \$0.25 increase in the base fare (from its current level of \$2.25 to \$2.50) is assumed in FY 2021, with an additional \$0.25 increase assumed in FY 2026. These increases have the effect of increasing the overall revenue growth rate in those years. These programmed fare increases which occur every six (6) years are determined by policies approved by the Miami-Dade County Board of County Commissioners that authorizes DTPW to implement regular fare increases to keep pace with inflation.

^{*}PTP surtax is reported as zero growth because DTPW is reducing its reliance on PTP funds for Operations expenses and shifting those revenues to the capital budget for the purposes of expanding transit service.

^{**} General Fund is projected to fluctuate between 2021 and 2023 and increase 3.5% annually thereafter.

^{***} Fare Revenue is projected to increase 0.5% annually through 2026 and fluctuate thereafter.

^{****} CILOGT reimbursement is projected to increase 1.5% annually through 2022, decrease to 0.6% in 2024, and have zero growth thereafter.

8.1.2. Summary of Operating Budget

DTPW's transit operating expenses for the ten-year period of FYs 2022-2031 is summarized in Table 8-4, while the transit operating revenue for this same period is summarized in Table 8-5. The operating budget is producing a surplus as the projected operating expenses are slightly less than the forecasted revenues from various sources. DTPW balances its operating budget by adhering to a combination of strategies aimed at producing cost efficiencies: avoidance of any major service expansion and aggressive use of available local funding sources (LOGT and general funds).

This operating budget is based upon the budgetary assumptions that were applied within the FY 2021 Pro Forma. These budgetary assumptions are influenced by a number of factors that could impact actual revenue generation over the course of the ten-year period, thus resulting in a different budgetary outcome than presented in this TDP.

8.2. Transit Capital Expenditures and Funding Sources

This section provides an overview of expenditures and funding sources for DTPW's Capital Project initiatives, with a horizon year of FY 2030-2031.

8.2.1. Planned Capital Expenditures

DTPW's planned capital expenses for the next ten years are summarized in Table 8-6, which include project to improve the quality of service and longevity of the existing MDT system. Capital expenses in the first five years are forecasted by fiscal year, while the second five years are aggregated into a future category. Large capital projects or ongoing projects during this period (e.g., Metrorail Stations and Systems Improvements), may be funded by a combination of debt proceeds and cash. Five projects have funding allocated in the outside five years of the ten-year period: Bus Related Projects, Federally-Funded Projects, Infrastructure Renewal Plan, Metrorail Track and Guideway Projects, and Metrorail Vehicle Replacement.

8.2.2. Summary of Capital Plan

The DTPW's ten-year capital plan revenue sources are listed in Table 8-7. "Cash" revenue sources in the first five years are forecasted by fiscal year, while the second five years are aggregated into a future category. All projected capital expenditures could be funded with either PTP surtax debt proceeds, or on a pay-as-you-go basis, depending on the availability of funds. This capital budget is achieved by aggressive borrowing against the PTP surtax, ultimately requiring the inclusion of additional LOGT and general funds in DTPW's budget, to guarantee debt coverage.

8.3. Total Unfunded Need

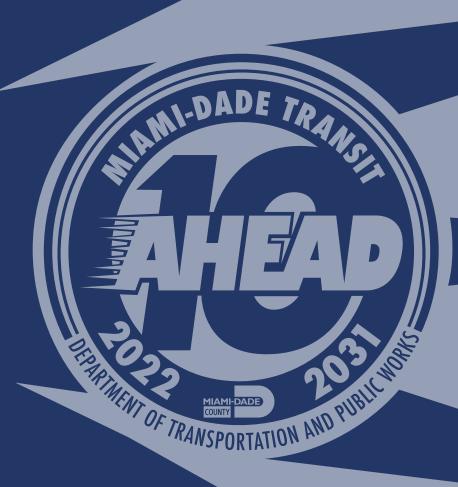

The implementation plan laid out in Chapter 6 of the MDT10Ahead document identifies the agency's funded, partially funded, and unfunded project needs for both operations and capital projects. The total unfunded need for the ten-year period encapsulates the difference between DTPW's programed needs and the total funding (Table 8-8).

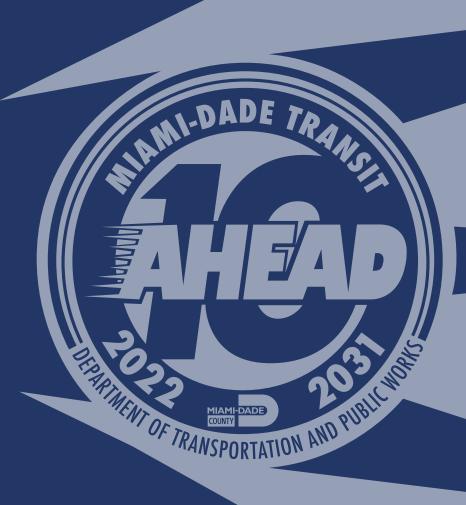

The unfunded need is calculated as the sum of the capital costs for the Unfunded Operations and Capital Projects, combined with the unfunded portions of the Partially Funded Capital Projects. Overall, DTPW's unfunded need is over \$7 billion.

Table 8-8: Ten-Year Implementation Plan Total Unfunded Capital Need

| Ten-Year Implementation Plan Projects | Unfunded Capital Need |
|---|--------------------------|
| Unfunded Operations | \$211,703,000 |
| Partially Funded Capital (Unfunded Portion) | \$5,320,016,000 |
| Unfunded Capital | \$1,511,639,000 |
| Total: | \$7,043,358,000 |

MDT10Ahead Annual Survey

Every year, the Miami-Dade Department of Transportation & Public Works (DTPW) launches the #MDT10Ahead survey asking riders to provide feedback that will help inform their tenyear Transit Development Plan (TDP). This strategic vision helps DTPW operate and grow a clean, safe, convenient, and reliable transit system. In addition, the results of this survey will allow DTPW to evaluate their existing system while identifying existing and future service improvements.

Responses to the online survey will be collected through July 31, 2020.

Take the online survey here

What is #MDT10Ahead?

Miami-Dade County's Department of Transportation and Public Works' (DTPW) Transit Development Plan (TDP) is a ten-year strategic vision that helps the Miami-Dade Transit (MDT) operate and grow a clean, safe, convenient, and reliable transit system. This brief survey uses your input to influence our plans looking forward to the next decade.

What this survey does: The TDP evaluates DTPW's existing transit system, identifies ongoing and future service improvements as well as capital investments, and ultimately presents a financial plan based on available funding.

How you can help:

- Fill out and mail back this short survey to:

Department of Transportation and Public Works MDT10Ahead

701 NW 1st Court, 15th Floor, Miami, FL 33136 (postage is on us)

- Submit additional comments via email at:
 MDT10Ahead@miamidade.gov
- Fill out the online survey at:
- http://bit.ly/MDT10Ahead2021
- Follow us on social media at @GoMiamiDade on Twitter, Instagram, and Facebook. Use #MDT10Ahead to join the conversation.

Recommended Service Plan: The ten-year implementation plan guides decisions about existing and future services. The plan is based on service standards, citizen input (like this survey), and stakeholder coordination.

Capital Investment Plan: This plan prioritizes investments in buses, stations, infrastructure, and equipment needed to preserve and expand the transit system and implement the Recommended Service Plan.

Financial Plan: The financial plan identifies all available financial resources and identifies financial needs based on the Recommended Service Plan and Capital Improvement Plan.

For more details, visit: www.miamidade.gov/transit

In accordance with the requirements of Title II of the ADA, Miami-Dade County will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, activities or facilities. Auxiliary aids and services for communication are available with five days advance notice. For material in alternate format (audiotape, Braile or computer disk), a sign language interpreter or other accommodations, please contact: Miami-Dade Department of Transportation and Public Works, Office of Civil Rights and Labor Relations, 701 NW 1st. Court, Suite 1700, Miami, Ft. 33136. Attention: Marcos Orrega, Telephone: 786-469-5225, Fax: 786-469-5258. E-mall: mor225@miamidade.gov. if you are Dead or hard of hearing you may contact the agency using the Florida Relay Service at 711, or 1-800-955-877 (Triv) or 1-800-955-877 (Tvice).

¿Qué es #MDT10Ahead?

El Plan para el Desarrollo del Transporte (TDP, por sus siglas en inglés) del Departamento de Transporte y Obras Públicas del Condado de Miami-Dade (DTPW) es una visión estratégica en un plazo de 10 años que ayuda al Departamento de Transporte de Miami-Dade (MDT) a administrar y crear un sistema de transporte público limpio, seguro, práctico, y confiable. Esta breve encuesta utiliza sus comentarios a fin de influir en nuestros planes para la próxima década.

Objetivo de esta encuesta: el Plan para el Desarrollo del Transporte estudia el sistema actual de transporte público del DTPW, identifica las mejoras al servicio en curso y futuro, así como las inversiones de capital y por último, presenta un plan financiero conforme a los fondos disponibles.

Cómo usted puede ayudar:

- Complete y envíe de vuelta esta breve encuesta a: Department of Transportation and Public Works MDT10Ahead
- 701 NW 1st Court, 15th Floor, Miami, FL 33136 (nosotros cubrimos el franqueo postal)
- Envíe más comentarios por el correo electrónico:
 MDT10Ahead@miamidade.gov
- Responda le encuesta en el sitio web: http://bit.ly/MDT10Ahead2021
- Síganos en las redes sociales @GoMiamiDade en Twitter, Instagram, y Facebook. Use #MDT10Ahead para participar en la conversación.

Plan de servicio recomendado: el plan de ejecución a diez años sirve de guía para tomar decisiones sobre los servicios actuales y futuros. El plan tiene como base las normas de servicio, los comentarios de los ciudadanos, (como esta encuesta), y la coordinación de las partes interesadas.

Plan de inversión de capital: este plan prioriza las inversiones en los autobuses, las estaciones, la infraestructura y los equipos necesarios con el fin de preservar y expandir el sistema de transporte público y poner en práctica el Plan de servicio recomendado.

Plan financiero: el plan financiero identifica todos los recursos financieros disponibles y las necesidades financieras según el Plan de servicio y el Plan de mejoras de capital.

Para más información, visite: www.miamidade.gov/transit

De conformidad con las disposiciones del Título II de la Ley de Estadounidenses con Discapacidades (ADA), el Condado de Miami-Dade no discriminará a las personas con discapacidades calificadas, por motivo de sus discapacidades, en los servicios, programas, actividades, o instalaciones. Hay dispositivos yservicios auxiliares a disposición del público. Es necesario solicitar/os con cinco días de antelación. Para solicitar materiales en formato especial (audiocinta, sistema Parille o disco de computadora), los servicios de un intérprete del lenguaje de señas u otras adaptaciones, comuníquese con el Departamento de Transporte y Obras Públicas de Miami-Dade, Oficina de Derechos Civiles y Relaciones Laborales, sito 701 NW 1st Court, Suite 1700, Miami, El. 33136. Atención: Marcos Ortega. Teléfono: 786-469-5225, Fax: 878-469-5589. Correo electrónico: mor225@miamidade.gov. Si tiene problemas de sordera o dificultades auditivas, puede comunicarse con el Departamento mediante Florida Relay Service por el 711, el 1-800-955-8770 Nov.

Kisa #MDT10Ahead ye?

MDepatman Transpò ak Travo Piblik Konte Miami-Dade '(DTPW) Devlopman Plan Transpò Piblik (TDP) se yon vizyon estratejik dis lane ki ede Transpò Piblik Miami-Dade (MDT) opere ak fè grandi yon system transpò piblik pwòp, ki san danje, pratik e fyab. Sondaj tou kout sa a sèvi ak opinyon w pou enfliyanse plan nou pou pwochen deseni ki ap vini an.

Sa sondaj sa a fè: TDP an evalye sistèm transpò DTPW ki egziste deja, idantifye amelyorasyon sèvis ki ap fèt ak sa ki va fèt alavni, kapital envestisman, ak finalman prezante yon plan finansye ki baze sou finansman ki disponib.

Fason ou ka ede:

- Ranpli ak voye sondaj tou kout sa a bay:

Department of Transportation and Public Works MDT10Ahead

701 NW 1st Court, 15th Floor, Miami, FL 33136 (Ou pa bezwen mete tenm)

- Soumèt lòt kòmantè pa imel nan:

MDT10Ahead@miamidade.gov

- Ranpli sondaj la sou entènèt nan: http://bit.ly/MDT10Ahead2021
- Suiv nou nan medya sosyal sou @GoMiamiDade sou Twitter, Instagram, ak Facebook. Itilize #MDT10Ahead pou antre nan konvèsasyon an.

Plan Sèvis Rekòmande: Plan aplikasyon dis ane a gide desizyon sou sèvis ki deja egziste ak sèvis alavni. Plan an baze sou estanda sèvis yo, opinyon sitwayen yo (tankou sondaj sa a), ak kowòdinasyon pati konsène yo.

Plan Envestisman Kapital: Plan sa a priyorize envestisman nan otobis, estasyon, enfrastrikti, ak ekipman ki nesesè pou prezève ak elaji sistèm transpò piblik la epi aplike Plan Sèvis Rekòmande a.

Plan Finansye: Plan finansye a idantifye tout resous finansye ki disponib epi idantifye bezwen finansye apati Plan Sèvis Rekòmande ak Plan Amelyorasyon Kapital la.

Miami-Dade County 22021 Transit Development Plan Survey Results

The Transit Development Plan Survey is conducted by Miami-Dade County Department of Transportation and Public Works every year to evaluate the existing transit system and collect input to define priorities and improve transit services within the County.

| Survey Period | September 01, 2020, to August 31, 2021 |
|---|---|
| Survey Format | Electronic and Paper Survey |
| Number of Questions | Electronic: 25 Paper: 16 |
| Survey Thematic Areas | How Do You Ride Transit |
| | Transit Priorities |
| | Miami-Dade Transit Overall Service Performance / Safety |
| | Demographic Information |
| | SMART Plan – Rapid Transit |
| Languages | English Spanish Haitian Creole |
| Number of Paper Surveys Completed | 65 Surveys English = 36 Spanish = 22 Haitian Creole = 7 |
| Number of attempted online Survey Respondents | 342 Surveys English = 320 Spanish = 16 Haitian Creole = 6 |

| Question No. | Survey Questions How do you Ride Transit | Responses | |
|--------------|--|-----------|-------|
| | How often did you use Miami-Dade Transit services, prior to the COVID-19 outbreak (March 2020) | 407 | 100 9 |
| 1* | How often did you use Miami-Dade Transit services, since February 2021? | | |
| 2 | | 342 | 84 % |
| 3 | How have you typically paid for the fare to ride Miami-Dade Transit? | 342 | 84 % |
| 4 | Do you make transfers? | 342 | 84 % |
| 5 | How did you transfer? | 155 | 38 % |
| 6* | How do you normally access transit information? | 325 | 80 % |
| 7* | The main reason I typically take mass transit is: | 325 | 80 % |
| 8* | Where do you typically start and end your trip? | 287 | 71 % |
| 9* | Before you begin your transit trip, how do you typically get to your Miami-Dade Transit station or stop? | 325 | 80 % |
| 10 | How long does it typically take you to get to your Miami-Dade Transit station or stop? | 260 | 64 % |
| 11* | When you exit the transit vehicle, how do you travel to your final destination? | 325 | 80 % |
| | Transit Priorities | | |
| 12* | What should be the main service priority for Miami-Dade Transit for the next ten years? | 321 | 79 % |
| 13* | What should Miami-Dade Transit's facilities-related priorities be for the next ten years? | 321 | 79 % |
| 14 | I would use Miami-Dade Transit services more often if: | 260 | 64 % |
| 15 | Would you be willing to pay increased transit fares to improve transit services? | 260 | 64 % |

^{*} Questions asked on both the online and paper survey

1. How often did you use Miami-Dade Transit services prior to the COVID-19 outbreak (March 2020)?

Figure 1 provides insight into the type and frequency of transit use. This question was on the electronic survey, as well as the paper survey. Based on the responses, 31 percent of transit users use Metrobus and Metrorail more than 4 times a week compared to 19 percent for Metromover and 4 percent for STS users at the same frequency. Similarly, 17 percent of riders use Metrobus and Metrorail 1-3 times a week compared to 13 percent and 5 percent for Metromover and STS respectively.

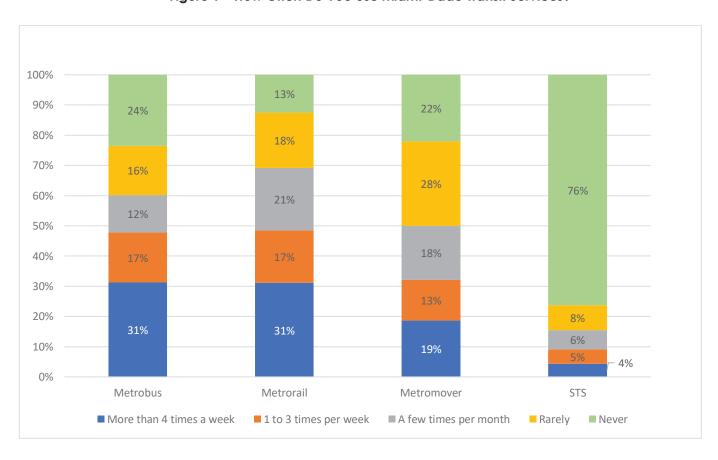

Figure 1 – How Often Do You Use Miami-Dade Transit Services?

2. How often did you use Miami-Dade Transit services since February 2021?

Figure 2 provides a summary of transit use after February 2021. During this period, businesses and services began to gradually reopen after the lockdown triggered by the SARS Covid-19 pandemic. This question was on the electronic survey only. Based on the responses, transit use across all modes except for STS dropped from their pre-pandemic levels. For Metrobus and Metrorail, the number of users who ride more than four times a week dropped from 31 percent to 19 percent. Similarly, Metromover ridership dropped from 19 percent to 11 percent. The percentage of non-riders also increased across all modes after February 2021.

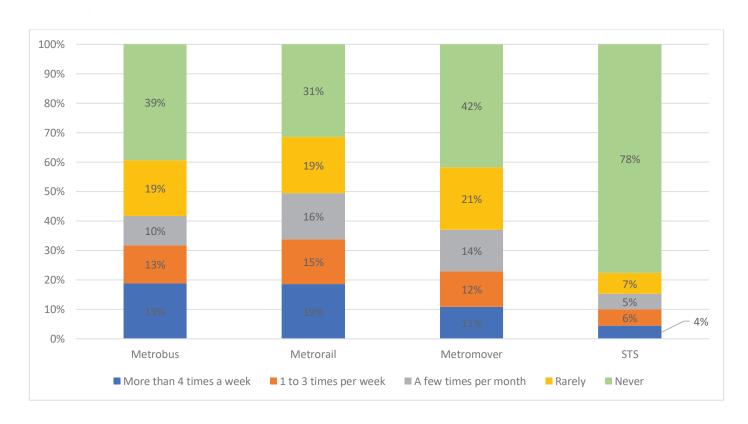

Figure 2 – How often did you use Miami-Dade Transit services, since February 2021?

3. Transit Payment Methods

Respondents were asked how they paid for transit fares. As shown in **Figure 3**, 29 percent of users pay their transit fare with EASY Card/EASY Ticket. 23 percent use credit cards. 14 percent pay cash for their fares, and 10 percent pay their Transit fare with contactless payment methods including Apple Pay and Samsung Pay. Mobile passes transit passes (Corporate EASY Card) constituted 9 percent and 8 percent of payment methods respectively. This question was asked on the online survey only.

Figure 3 – How Do You Pay for Transit?

4. Transfers

Respondents were asked if they made transfers between the MDT system. About 42 percent indicated they do not transfer when they travel. Results are shown in **Figure 4**.

Figure 4 – Did/Do you Make Transfers?

5. Transfers

Respondents were asked about their transfers between the MDT system. About 34 percent of transfers occur between Metrobus and Metrorail and 31 percent between Metrorail, Metrobus and Metromover. 19 percent of transfers occur between Metrorail and Metromover. 11 percent of users transfer between one Metrobus to another and 5 percent transfer between one Metrorail line to another. This question was asked on the online survey only. Results are shown in **Figure 5**.

Figure 5 – How did you transfer?

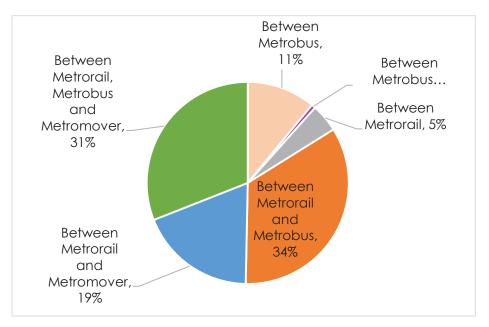

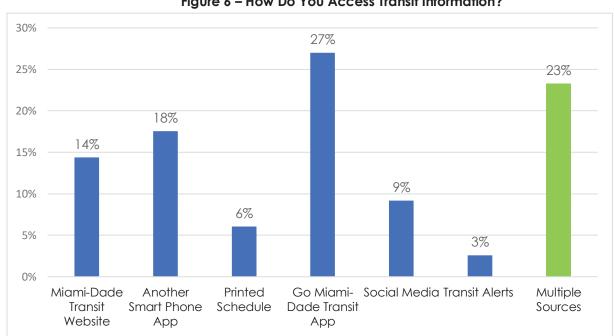

Figure 6 – How Do You Access Transit Information?

6. Transit Information

Survey respondents were asked about how they access transit information. As shown in **Figure 6**. 27 percent rely on the GoMiamiDade App for transit information while 18 percent get their information from another smart phone App. 14 percent rely on the Miami-Dade Transit website for transit information while 9 percent rely on social media. Only 6 percent and 3 percent rely on the printed schedule and transit alerts as their source of transit information. 23 percent of respondents use a combination of information sources to access transit information. This question was asked on both the online and paper survey.

7. Reason for Transit Use

Figure 7 provides the reasons respondents use public transit. 27 percent of respondents indicated that their primary reason for using transit is because its more convenient than driving. 19 percent of respondents use transit because of congested traffic conditions. 13 percent of riders use transit because they do not drive, and 12 percent find transit options to be more convenient than other modes of transportation. For 7 percent of users, transit is their only option for moving around. 8 percent of users take transit because they do not have access to a car and another 8 percent chose transit because it saves them money on their daily commute. This question was asked on both the online and paper survey.

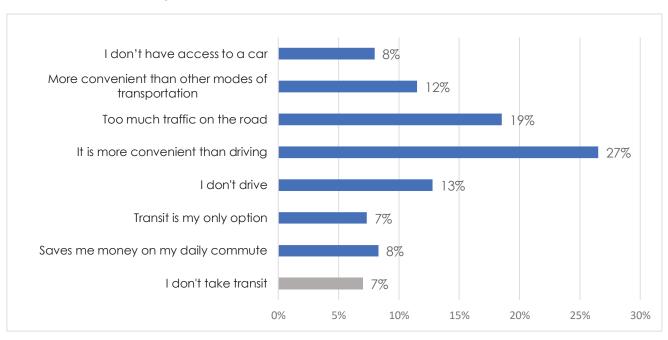

Figure 7 – Why Do You Use Transit?

8. Trip origination and destination zip code

Responder were asked to provide the zip code where they typically start their transit journey as well as the destination zip code. There were 75 trip origination zip codes and 60 different destination zip codes. For this analysis, the top 10 trip origination and destination zip codes are shown in the chart. **Figure 8** and **Figure 9** shows the top 10 start zip codes and top 10 end zip codes. This question was included in both the paper and online survey

Figure 8 – Where do you typically Start your trip? Start Zip Code

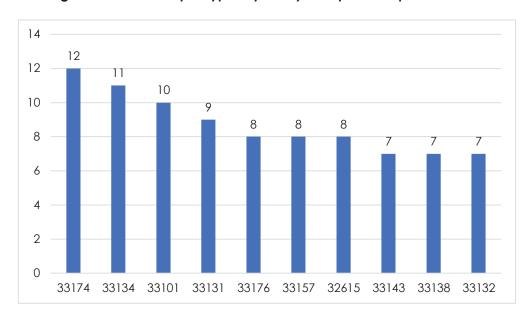

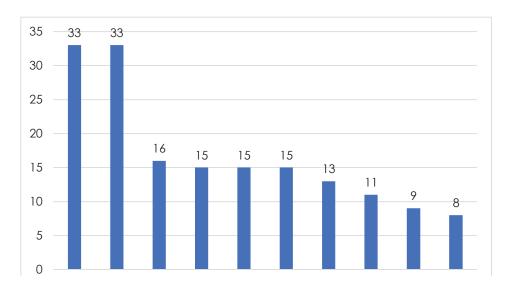

Figure 8 – Where do you typically Start your trip? End Zip Code

9. Transit Connections

Respondents were asked about the means of transportation to the nearest transit service point and to their final destinations. The results showed that 45 percent of respondents walk to the nearest transit point while 25 percent drive. For the means of transportation to their destination points, walking and biking took were the top two means of transportation. **Figure 10** and **figure 11** provides a breakdown of the means of transit connections make by users. These two questions were asked on both the online and paper survey.

Figure 10 – How Do You Get to the MDC Transit Station?

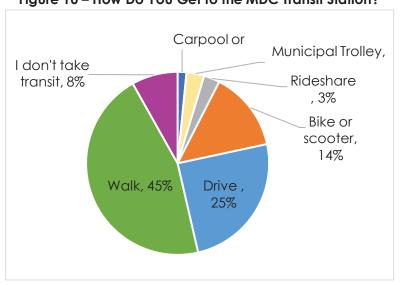

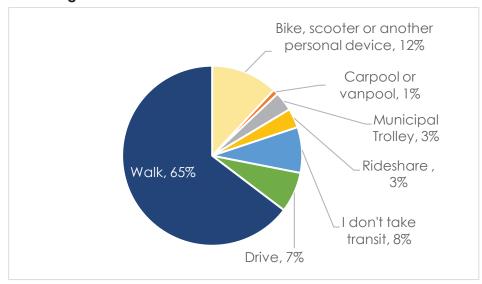

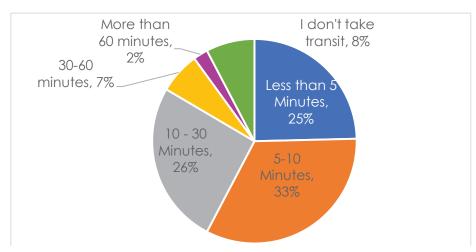

Figure 11 – How Do You Get to Your Final Destination?

Travel Time

This question seeks to determine the length of time it takes for riders to get to their nearest transit point. The results showed that most respondents (33 percent) travelled minutes or less to access transit. 25 percent of riders travel less than 5 minutes to their nearest transit stop. 26 percent of respondents travel between 10 to 30 minutes and 2 percent of riders travel over an hour to reach their nearest transit stop. This question was asked on the online survey only. See **Figure 12** for a complete breakdown of all responses.

Figure 12 – How Long Does It Take to Get to the Nearest Transit Stop?

10. Service Priorities

When asked about service priorities for the next 10 years, respondents indicated that arriving and departing on-time performance was the most important service priority the county should prioritize, followed by expanding service to new areas and more frequent service. **Figure 13** shows the details of all service priorities. This question was asked on both the online and paper survey.

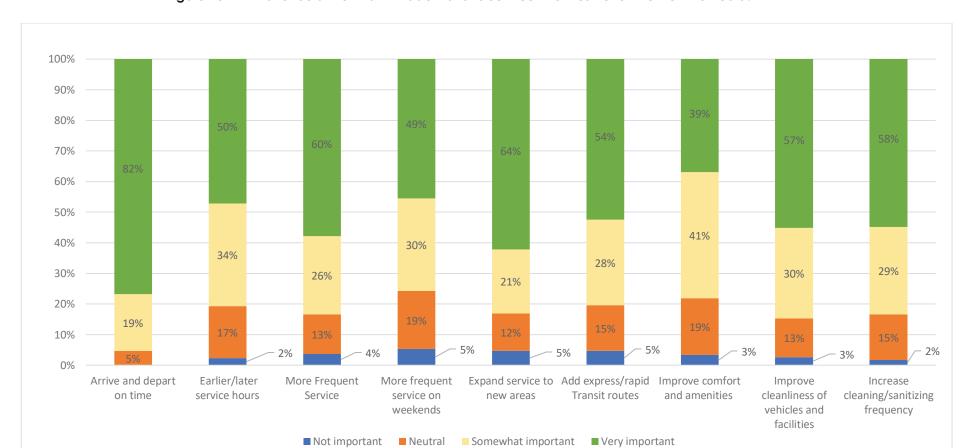

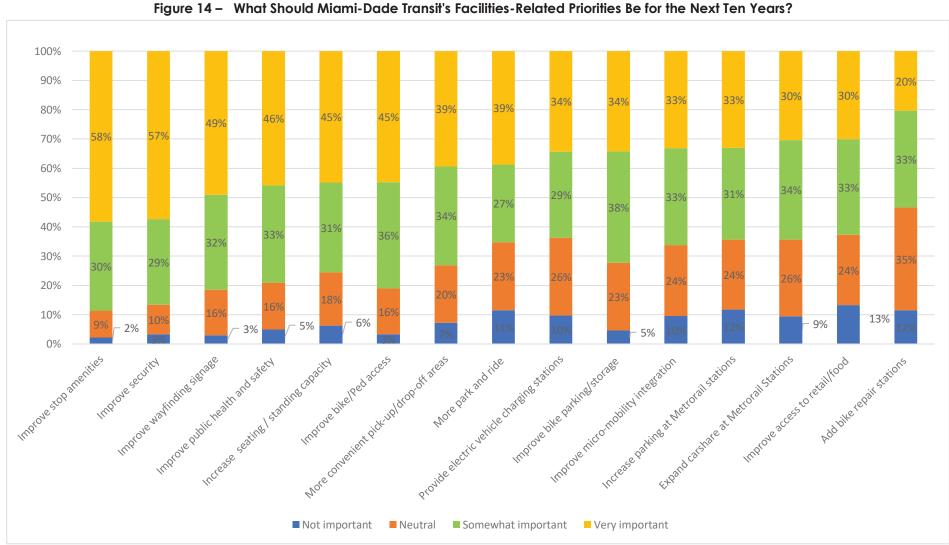

Figure 13 – What Should the Miami-Dade Transit's Service Priorities Be for the Next 10 Years?

11. Facility Related Priorities

Survey respondents were asked to provide input about facility-related priorities for the next 10 years. Based on the results, improving stop amenities, improving security at transit facilities, and improving signage at transit facilities were the top three priorities for most users. Improving public health and safety at transit stations was fourth on the list of priority. It is important to note that for the previous years' survey, improving public health and safety was top of the list of priorities. This could be attributed to the pandemic. However, with improved cleanliness and other safety measures, improving public health is no longer the top priority for riders for this year. Figure 14 shows the breakdown of the facility related priorities. This question was included in both the online and paper survey.

12. What Would Motivate You to Use Miami-Dade County Transit Services?

This question sought to find out what would motivate respondents to increase their patronage of Miami-Dade County transit services. The responses indicated that most people would use transit if wait times were shorter and reached more destinations (62 and 61 percent respectively). Other key motivators include reaching destination faster (59 percent), adequate connections (48 percent), proximity of transit facilities to residences (47 percent) and improved multimodal connections at transit facilities (51 percent). See **Figure 15** for detailed results. This question was asked on the online survey only.

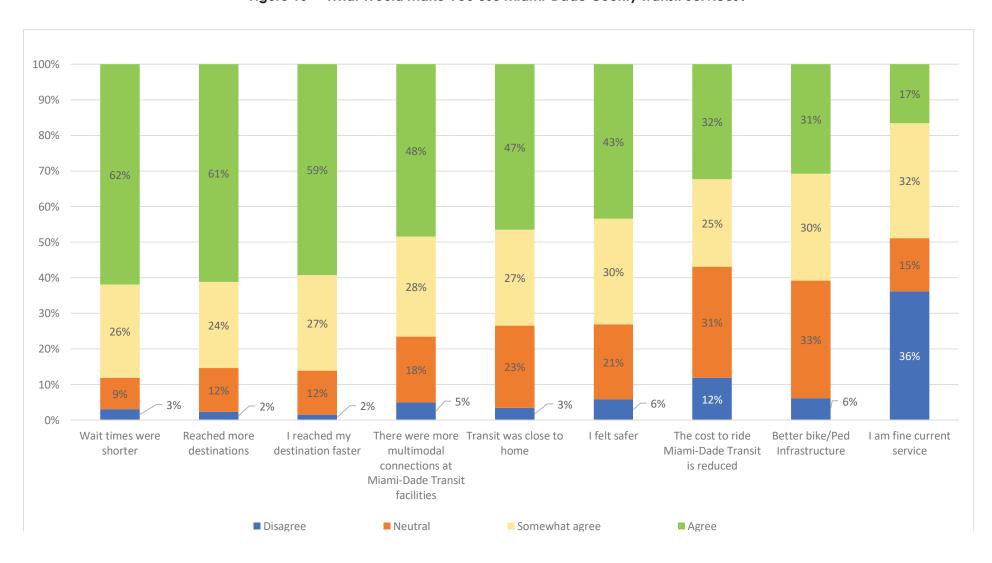

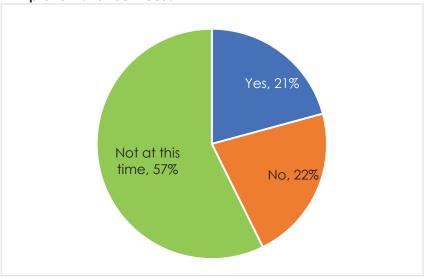

Figure 15- What Would Make You Use Miami-Dade County Transit Services?

13. Fare increase

As displayed in **Figure 16**, when asked about the willingness to pay higher fares for improved services, 57 percent of respondents indicated they would be willing to pay more for better service at this time. This is in sharp contrast to the previous year's survey where 55 percent of respondents were willing to pay more for improved services. This year's response could be attributed to the economic hardship brought on most people due to the Covid 19 pandemic and associated business closures and layoffs. This question was asked on the online survey only.

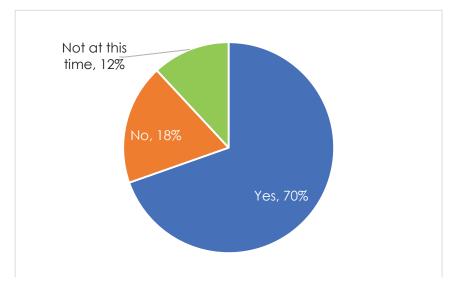

Figure 16— Would You Be Willing to Pay Increased Fare to Improve Transit Services?

14. Sales Tax Support

Figure 17 shows the responses from a question asking users whether they would support a referendum for an additional ½-cent sales tax which would support improved/expanded transit services. 70 percent of respondents would support the sales tax. This question was asked on the online survey only.

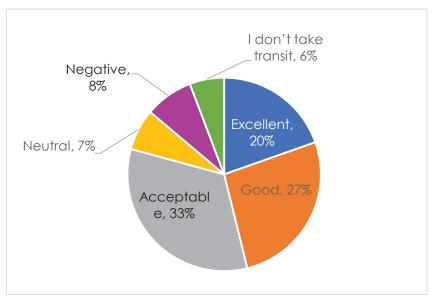

Figure 17 – Would You Support a Referendum for An Additional Half Penny Sales Tax for Improved/Expanded

15. Riding Experience

Miami-Dade transit users were asked to rate their overall riding experience. 20 percent of riders rated their experience on Miami-Dade Transit as excellent. 33 percent gave a satisfactory rating while 27 percent said they have had a good experience overall. 8 percent of respondents indicated a negative experience on Miami-Dade Transit. This question was asked on both the paper and online survey. The detailed results are presented in **figure 18**.

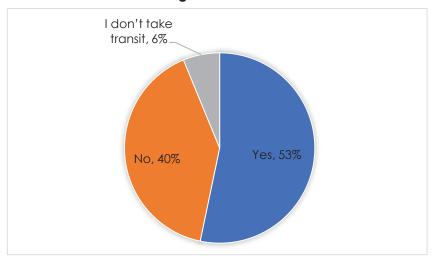

Figure 18– Rate Your Overall Riding Experience with Miami-Dade Transit.

16. Security

Respondents were asked about their perceptions of the adequacy of security systems on Miami-Dade Transit services. 53 percent of respondents were of the view that existing security systems on the transit network are inadequate. 40 percent held a contrary view. See **Figure 19** for detailed results. This question was asked on both the paper and online survey.

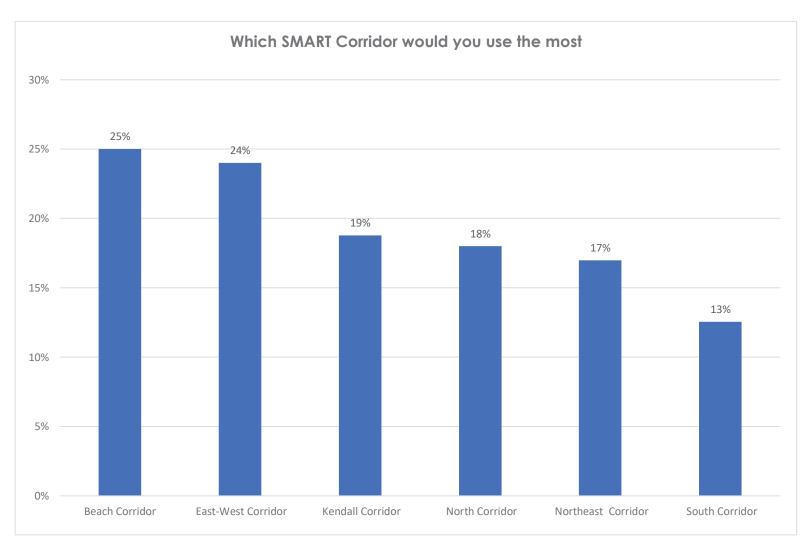

Figure 19 Do You Feel Security Systems Are Adequate While Using Miami-Dade Transit?

17. SMART Corridors

When asked about which of the six corridors in the Strategic Miami Area Rapid Transit (SMART) Plan respondents would use the most, the Beach Corridor came up as the top corridor followed by the East-West and Kendall Corridor. See **Figure 20** for details. This question was asked in both the paper and online survey.

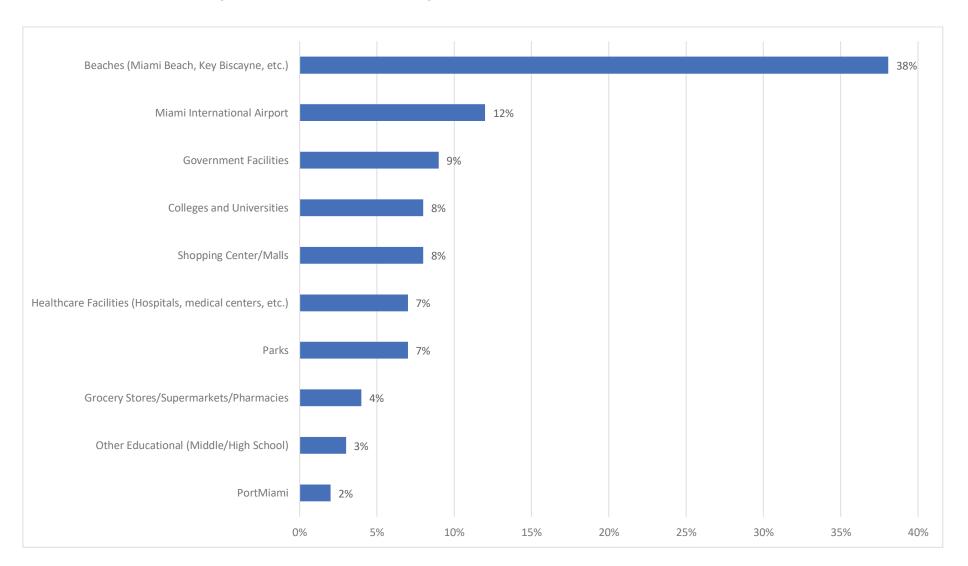

Figure 20 – Of the Six Corridors in The Strategic Miami Area Rapid Transit (SMART) Plan that are Being Considered for Miami-Dade County,
Please Rank the Corridors Which You Would Use the Most

18. Destinations

Figure 21 provides details on the destinations respondents would like Miami-Dade Transit services to better serve. The number top destination was the County's Beaches followed by Miami International Airport and Government Facilities.

Figure 21 – Which of the Following Destinations Could Miami-Dade Transit Serve Better?

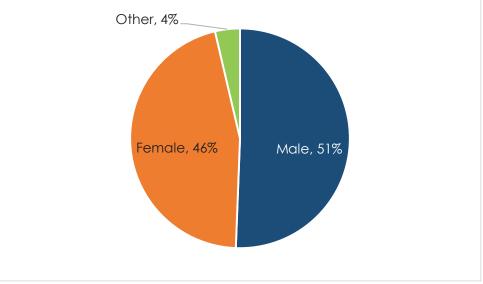

Demographic Information

The remainder of this report provides demographic information of those taking the survey.

Gender

As shown in **Figure 22**, survey respondents included 51 percent men and 46 percent women, 4 percent of respondents opted to not identify with a gender.

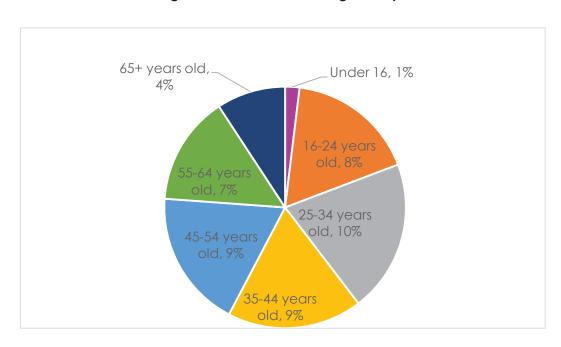

Figure 22 – What Is Your Gender?

Age

Respondents are categorized by age group in **Figure 23**. The largest group of respondents were between 25 and 34 years old.

Figure 23 – What Is Your Age Group?

Race/Ethnicity

Figure 24 provides information on the race and/or ethnicity of survey respondents. The three largest groups to complete the survey were Spanish/Hispanic/Latino, White, and Black/African American making up 39 percent, 38 percent and 17 percent, respectively.

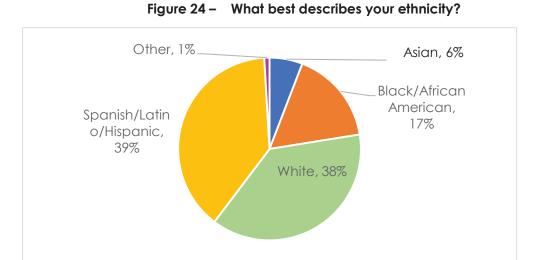

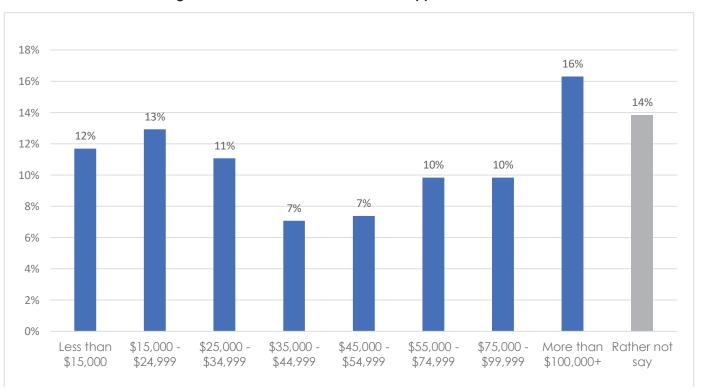

Figure 25 – What is Your Household Approximate Total Income?

Annual Income Figure 25 displat

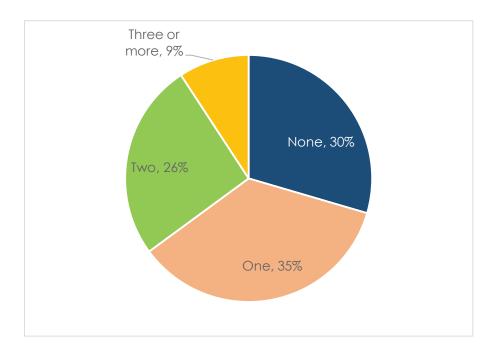

Figure 25 displays the income levels of respondents. Based on the responses, 16 percent of respondents have a household income of over \$100,000. Approximately 12 percent of respondents reported a household income of less than \$15,000.

Household Vehicles

As shown in **Figure 26**, 30 percent of respondents do not have a working vehicle at home. 35 percent have one working vehicle while 26 percent have two working vehicles.

Figure 26 – How Many Working Motor Vehicles Are Available in Your Household?

GENERAL COMMENTS

When asked if there were any other comments respondents would like to share with MDT, many respondents chose to do so. The following themes were noted:

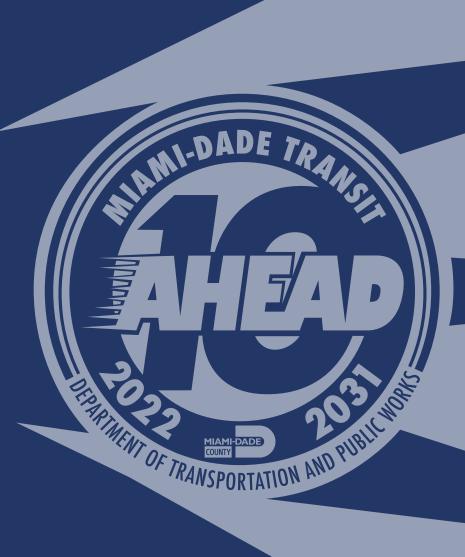

- **Expand Metrorail:** Survey responders commented on the need to expand Metrorail services within the County especially further south and the Northern Dade section
- **Enhance transit connections:** Riders expressed a desire to see better connections between all transit modes as well as connections between municipal trolleys and Miami-Dade Transit Services
- <u>Security:</u> Most respondents do not feel security systems including lighting, cameras etc. are adequate at transit facilities and asked for more investments to make riders feel safe
- <u>Rapid Transit:</u> Respondents expressed frustration over the County's delay in building rapid transit lines despite the setting up of the People's Transportation Trust for this purpose. Riders expressed displeasure at the diversion of funds purposefully set aside for rapid transit to other causes.
- Electric Vehicles: Residents called for addition of zero emission heavy rail and buses
- Restore Metrobus routes and Metrorail lines: Respondents expressed a desire for the County to restore a number of bus routes and the orange line which were suspended/reduced during the peak of the Covid-19 pandemic
- Improve Service Reliability: Many respondents voiced concerns over the lack of reliable service due to technical and operational issues.
- <u>Improve On-time Performance:</u> By improving the ability for transit services to remain on schedule, respondents agreed travel would be much easier for riders.
- <u>Bus Stop Amenities:</u> Residents express the need for more bus shelters and benches to be built to make it comfortable for riders to wait for the bus, especially during hot summer days.
- <u>Improved Signage:</u> There were a number of comments regarding the confusing signage, unintelligible announcements at Metrorail stations and inaccurate information at several bus stops.
- Security Enhancements: Riders expressed a need for improved station security, at parking facilities and on transit vehicles themselves.
- <u>Discriminatory Fares:</u> A number of responders indicated that the cost of buying a transit pass got cheaper when combined with a parking pass. This discriminates against riders who only purchase a transit pass who have to pay more to use transit
- Other Key Themes, less commonly expressed, yet still reported include:
 - o The need for more rail, not buses, because it avoids traffic
 - o Provide more exclusive bus lanes
 - o Invest in overhead rail
 - o Consider adding trams on the existing rail infrastructure
 - New trains should be purchased because the current ones are deteriorating
 - Contracted STS routes not providing adequate service to riders with wheelchairs
 - o Facility improvements including adding air conditioning/fans, fixing bus announcement and signage
 - o Check accuracy of information posted on the transit app as well as alerts

STRATEGIC AREA

Transportation and Mobility

Mission:

To provide a safe, intermodal, sustainable transportation system that enhances mobility, expedites commerce within and throughout the County, and supports economic growth

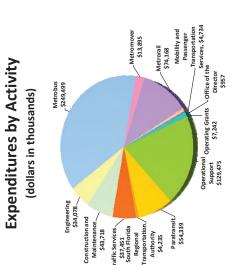

| GOALS | OBJECTIVES |
|--|--|
| TRANSPORTATION SYSTEM THAT | Promote efficient traffic flow on Miami-Dade County roadways |
| FACILITIES MOBILITY | Expand and improve bikeway, greenway and sidewalk system |
| | Provide reliable, accessible and affordable transit service |
| | Expand public transportation |
| | Facilitate connectivity between transportation systems and providers |
| SAFE TRANSPORTATION SYSTEM | Promote traffic and roadway safety |
| | Improve safety for pedestrians and bicyclists |
| | Ensure the safe operation of public transit |
| WELL-MAINTAINED, MODERN TRANSPORTATION | Harden and maintain roadway infrastructure |
| INFRASTRUCTURE AND ASSETS | Provide well-maintained, attractive and modern transportation facilities and vehicles |
| | Promote clean, attractive roads and rights-of-way |

Transportation and Public Works

The Department of Transportation and Public Works (DTPW) develops, coordinates and operates the County's transportation networks with a goal of improving mobility to create a resilient and sustainable community for our residents, businesses and visitors. As part of the Transportation and Mobility strategic area, DTPW operates the 18th largest public transit system in the country (based on annual vehicle revenue miles) and the largest transit agency in the state of Florida. DTPW provides approximately 27.5 million miles of Metrobus annual revenue service along 96 routes, 25 of which are operated with contracted services, with a fleet of 675 full-sized buses, 89 articulated buses, three minibuses and 80 contractor-operated buses. DTPW's system also includes a 25-mile dual elevated Metrorail track, a 20-mile South Dade Transitway line that is among the longest in the United States and a 4.4-mile dual elevated Metromover track. In addition, DTPW provides Special Transportation Services (STS) to eligible participants; administers the planning, construction and maintenance of a safe and efficient system of roads, bridges, drainage, pathways, traffic signals, signs and street lights; administers roadway infrastructure maintenance, inspection, compliance and improvement programs; implements all County highway, transit and neighborhood improvement projects included in the Capital Improvement Plan and the Transportation Improvement Program; implements various public works projects in the Building Better Communities General Obligation Bond (BBC GOB) Program and all of the County's transportation capital projects in the People's Transportation Plan (PTP) Program; ensures the maximum possible degree of flood protection in the secondary drainage canal system by providing adequate maintenance of these and other drainage facilities; and licenses and regulates private for-hire transportation.

stakeholders. DTPW also partners with local, state and federal agencies to ensure regulatory compliance and cooperation on large scale DTPW works closely with the Federal Transit Administration (FTA), the Florida Department of Transportation (FDOT), the Transportation Planning Organization (TPO), the Citizens' Independent Transportation Trust (CITT), the Miami-Dade Expressway Authority (MDX) or its successor agency, the South Florida Regional Transportation Authority (SFRTA), citizen advocacy groups and other transportation infrastructure initiatives.

FY 2020-21 Adopted Operating Budget

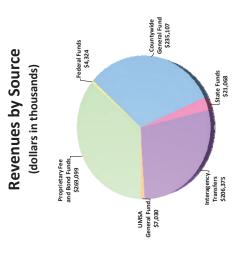

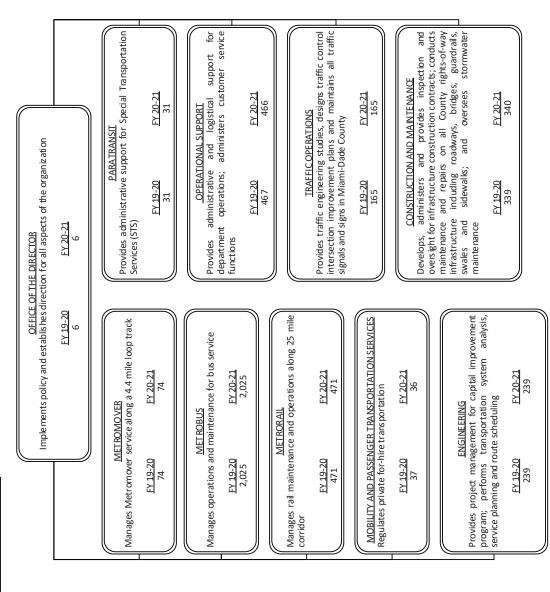

TABLE OF ORGANIZATION

*The FY 2020-21 total number of full-time equivalent positions is 4,098.84

DIVISION: OFFICE OF THE DIRECTOR

The Office of the Director is responsible for the overall direction of Metrobus, Metrorail, Metromover, Paratransit, Construction and Maintenance, Traffic Operations, Mobility and Passenger Transportation Services and related support services.

- Implements transportation services for Miami-Dade County residents and visitors
- Coordinates community outreach and provides market analysis
- Represents the Department to stakeholders including the Citizens' Independent Transportation Trust (CITT) and Transportation Planning Organization (TPO)
 - Implements People's Transportation Plan (PTP) initiatives

DIVISION: CONSTRUCTION AND MAINTENANCE

The Construction and Maintenance Division is responsible for developing, administering and providing inspection and oversight of infrastructure construction contracts; conducting maintenance and repairs on all County maintained rights-of-way infrastructure including roadways, bridges, guardrails, swales and sidewalks; and overseeing the stormwater management system.

- Manages and administers contracts and specifications for construction of roadway and right-of way infrastructure improvement and rehabilitation projects
 - Issues permits and inspects construction of facilities in public rights-of-way and on private property
- Maintains and repairs all County roads and sidewalks, including guardrail repairs and street sweeping along roadways with curb and gutters
- Maintains and repairs the Stormwater Utilities canals, pump stations and drainage system
- Maintains and repairs all County bridges and operates drawbridges

^{*}FY 2019-20 Projection reflects the impact of COVID-19

DIVISION COMMENTS

The FY 2020-21 Adopted Budget includes a departmental reorganization that transfers one Information Officer position from Operational Support to work on communications and public relations efforts related to Construction and Maintenance projects

^{**}FY 2018-19 Actual has been updated to reflect end of the year adjustments; the FY 19-20 Projection and FY 20-21 Target has been updated to reflect the challenge of identifying qualified candidates and reassignments

DIVISION: ENGINEERING

The Engineering Division is responsible for transportation system analysis, planning and development of the capital program, procurement, quality assurance, bridge inspection and project management activities.

- Manages long-term system planning and station area development
- Manages guideway, systems, station, rehabilitation and fixed facility construction
 - Responsible for project scheduling and cost control and reporting
 - Responsible for design and construction of capital projects
- Responsible for testing and acceptance of new systems and installations, as well as systems compliance
- Responsible for right-of-way acquisition, utilities relocation and survey of right-of-way administration; negotiates transitoriented developments
 - Develops and monitors quality assurance and quality control requirements for all transit projects along with operational activities to ensure compliance with federal and state requirements
- Responsible for bridge and guideway structural inspection and reporting
- Coordinates the Highway Transportation program, including the Five-Year Transportation Improvement Program (TIP)

DIVISION: METRORAIL

The Metrorail Division is responsible for Metrorail operations and maintenance.

- Manages train operations, train control, traction power, track and structures
- Provides maintenance for rail cars
- Performs all transit structural inspections of Metrorail and Metromover guideways
- Implements policy and procedures to enhance the efficiency and effectiveness of operations and maintenance activities

DIVISION COMMENTS

The FY 2020-21 Adopted Budget includes the elimination of one vacant Passenger Transportation Enforcement Officer 1 position (\$65,000)

DIVISION: OPERATIONAL SUPPORT

The Operational Support Division is responsible for providing administrative and logistical support to the Department.

- Manages accounting, budget, personnel and procurement functions
- Manages the service level agreements with the Information Technology Department for information technology projects and
- Manages joint development
- Provides route scheduling, service planning and ridership analysis
- Provides marketing services including advertising, promotions, graphic design, media relations and market analysis
- Directs labor relations and ensures compliance with the Americans with Disabilities Act and other federal, state and local laws and regulations
- Develops and implements policy for comprehensive, integrated and coordinated transit safety and security programs
 - Responsible for procurement of goods and services professional services and construction contracts and contract administration and compliance

DIVISION: TRAFFIC SERVICES

The Traffic Services Division, which includes Traffic Engineering and Traffic Signals and Signs, provides traffic engineering studies, designs traffic control and intersection improvement plans and maintains all traffic control devices in Miami-Dade County.

- Investigates requests for new or additional traffic control devices and performs traffic studies
 - Collects traffic data to monitor traffic patterns and trends
- Investigates hazardous traffic conditions and makes recommendations and plans for the installation of traffic control and calming devices
- Reviews permits for fences, block parties and special events
- Develops design plans for construction projects, such as intersection improvements, new signals, school zone flashing signals and general signage and pavement markings
 - Monitors and controls the County's Automated Traffic Management System (ATMS) at the Traffic Control Center (TCC)
- Maintains and repairs all traffic devices, which include signals, signs, school zone flashing signals and beacons and arterial
- Eahricates traffic signs
- Installs pavement markings

FY 2017-18 Actual reflects Hurricane Irma recovery efforts; the FY 19-20 Projection has been updated to reflect the impact of COVID-19

ADDITIONAL INFORMATION

- (CARES) Act to fund operations net of revenues received; in FY 2019-20, the Department projects to utilize \$96.849 million of The FY 2020-21 Adopted Budget includes \$48.910 million in federal funding under the Coronavirus Aid and Economic Security the CARES Act funding
- In FY 2020-21, the Countywide General Fund Maintenance of Effort (MOE) for transit services will increase to \$214.928 million, a 3.5 percent increase of the FY 2019-20 MOE of \$207.660 million
- In FY 2020-21, the PTP surtax contribution to DTPW totals \$152.694 million and includes \$35.152 million for transit operations and support services (a \$48.848 million reduction from the FY 2019-20 Adopted Budget); \$92.973 million for PTP surtax debt service payments for extension of Metrorail to Miami Intermodal Center (MIC), replacement of Metromover and Metrorail vehicles and on-going replacement and rehabilitation of existing transit system assets and equipment, \$24.569 million for PTP surtax debt service payments for major public works roadway improvement projects, public works neighborhood roadway maintenance and improvements, Advanced Traffic Management System and PTP neighborhood projects
- The FY 2020-21 Adopted Budget includes \$35.152 million in operating expenses approved by the voters and CITT as part of extension to MIA maintenance and operation (\$16.965 million) and bus service enhancements (\$52.116 million); because only the People's Transportation Plan; to support a portion of the fare-free service through the Golden and Patriot Passport programs (\$18.902 million), fare-free Metromover maintenance and operation (\$855,161), the Orange Line Metrorail \$35.152 million of PTP surtax is going to fund operations, \$53.686 million of General Fund is subsidizing these activities
- The FY 2020-21 Adopted Budget funds the South Florida Regional Transportation Authority (SFRTA) at the statutory minimum of \$4.235 million; this amount reflects the required minimum for operating needs of \$1.565 million (Section 343.58(2) Florida Statutes) and capital needs of \$2.67 million (Section 343.58(1) Florida Statutes)
- The FY 2020-21 Adopted Budget will continue to provide transit passes to both City Year (\$169,000) and Greater Miami Service Corps (\$47,000) in exchange for a total of 7,000 hours of volunteer service
- The FY 2020-21 Adopted Budget includes a reserve of \$2.146 million for future SMART Plan operations, maintenance and upgrades from joint development revenue as required by Resolutions R-429-17 and R-774-17 9

CAPITAL BUDGET HIGHLIGHTS AND OPERATIONAL IMPACTS

- alternative for the South Corridor; the project will include several improvements to the corridor to provide passengers with a reliable and comfortable travel option with rail-like travel times, iconic stations and enhanced safety features; the South Corridor service in the southern part of the County; the South Corridor is one of six rapid transit corridors in the Strategic Miami Area The FY 2020-21 Adopted Budget and Multi-Year Capital Plan includes the South Dade Transitway Corridor, a premium transit Rapid Transit (SMART) Plan; the South Corridor runs along the existing South Dade Transitway for approximately 20 miles from SW 344th Street/West Palm Drive in Florida City to the Dadeland South Metrorail station to connect the communities along the corridor to the existing rapid transit system and downtown Miami; Bus Rapid Transit (BRT) was adopted as the locally preferred consultant team has completed the FTA Project Development Phase, the project was advertised as a Design-Build Contract, bids were received and the Department anticipates awarding the contract by the fall of 2020 (total project cost \$303.460 million;
- The FY 2020-21 Adopted Budget and Multi-Year Capital Plan includes the project development and environmental studies for six rapid transit corridors in the Strategic Miami Area Rapid Transit (SMART) Plan Beach, East-West, North, Northeast, Flagler and Kendall corridors; the Beach and East-West corridors consultant teams will complete preliminary engineering and environmental evaluations of the transit alternatives and recommend a preferred alternative to the Miami-Dade Transportation Planning Organization (TPO) by Winter 2020 and Summer 2020, respectively, and the final environmental reports to the Federal Transit Administration (FTA) within a year (total project cost \$49.365 million; \$14.73 million in FY 2020-21) 9
- The FY 2020-21 Adopted Budget and Multi-Year Capital Plan continues funding for replacement of 136 Metrorail vehicles; the Department anticipates all 136 Metrorail vehicles to be replaced and in service by the end of FY 2020-21; the replacement of the Department's aging Metrorail fleet has improved service performance and reliability, which has decreased service delays, unplanned overtime expenditures and replacement parts (total project cost \$385.813 million; \$6.084 million in FY 2020-21) 0
- rhe FY 2020-21 Adopted Budget and Multi-Year Capital Plan contains several bus related projects including a fleet replacement program and build out of Compressed Natural Gas (CNG) facilities; 420 of 560 CNG buses have been procured and released for service; it is expected that the remaining 140 CNG buses will be delivered by the end of February 2021; the CNG stations at Coral respectively; the construction for the Northeast garage is expected to begin March 2021; the replacement of the Department's bus service performance and reliability, which will lead to increased rider satisfaction (total project cost \$600.91 million; \$218.569 Way and Central bus facilities are under construction and are estimated to be completed by September 2020 and August 2020, aging bus fleet will decrease bus delays, unplanned overtime and maintenance expenditures due to breakdowns and increase 0
- In FY 2020-21, DTPW will continue expanding and improving the Advanced Traffic Management System (ATMS) with enhancements to provide for real time data collection, adaptive traffic signal controls, infrastructure for vehicle communications, and traffic monitoring capabilities to provide more efficient traffic movement and congestion management; 300 intersections along 12 of the most congested corridors within the County have been upgraded; DTPW expects to upgrade approximately 40 additional intersections of the remaining 2,600 intersections countywide by the end of 2020 through on-going partnership efforts with FDOT, the Town of Miami-Lakes and the Village of Key Biscayne; in May, the contract for the remaining countywide traffic signals was awarded; the ATMS Program Management contract will be awarded at the start of the upcoming fiscal year (total project cost \$302.546 million; \$23.275 million in FY 2020-21) 0
- Included in the FY 2020-21 Adopted Budget and Multi-Year Capital Plan is the continuation of various countywide arterial roadway improvements such as resurfacing roadways, installing and repairing sidewalks and improving drainage; projects include roadway improvements on NE 2 Avenue from NE 20 Street to West Little River Canal, NE 16 Avenue from NE 123 Street to NE 135 Street \$128.093 million; \$22.870 million in FY 2020-21); DTPW anticipates minimal operating impact to the annual budget that will be absorbed using existing resources 344 Street from US-1 to SW 172 Avenue (total project cost 0
- improve vehicular traffic capacity and safety; projects include turn lanes at SW 268 Street from US-1 to SW 112 Avenue and an elevated intersection (flyover ramp) at NW 107 Avenue and NW 122 Street over the Florida East Coast (FEC) rail crossing to allow The FY 2020-21 Adopted Budget and Multi-Year Capital Plan will continue various intersection improvements countywide to continuous ingress and egress from the Pan American North Business Park (total project cost \$100.087 million; \$29.446 million 9

- traffic capacity; roadway widening projects include SW 137 Avenue from SW 184 Street to the Homestead Extension of the Florida Turnpike and SW 328 Street from US-1 to SW 162 Avenue (total project cost \$389.849 million; \$32.115 million in FY 2020-21); DTPW anticipates minimal impact to the operating budget as the maintenance of these projects can be absorbed within the The FY 2020-21 Adopted Budget and Multi-Year Capital Plan will continue various countywide road widening projects to increase existing budget
- refurbish the 23 stations; complete a condition assessment of Metrorail Station elevators and escalators to create a prioritized implementation schedule to overhaul, replace or refurbish the existing equipment inventory; and upgrade the Tri-Rail Station power sub-station (total project cost \$203.390 million; \$42.007 million in FY 2020-21); these improvements and upgrades will The FY 2020-21 Adopted Budget and Multi-Year Capital Plan includes Metrorail station and system improvements that will enhance the current Metrorail stations, improve system reliability and safety and reduce maintenance costs 9
- and upgrade transit's physical assets to include buses, facilities and equipment according to normal replacement cycles as part of the Infrastructure Renewal Plan (total project cost \$100 million; \$12.5 million in FY 2020-21) The FY 2020-21 Adopted Budget and Multi-Year Capital Plan will continue People's Transportation Plan (PTP) funding to replace 9
- extends from the Miami River to SW 13th Street; Phase Two extends from SW 13th Street to SW 19th Avenue; and Phase 3 extends from SW 19th Avenue to Dadeland Boulevard (total project cost \$149.319 million; \$7.438 million in FY 2020-21) The FY 2020-21 Adopted Budget and Multi-Year Capital Plan includes the design and development of the ten-mile Underline corridor running below the Metrorail guideway from the Miami River to Dadeland South Station, a multi-modal corridor and linear park that will enhance connectivity, mobility and biking safety for Miami-Dade County residents and visitors; Phase One 0
- The Department's FY 2020-21 Adopted Budget and Multi-Year Capital Plan includes the purchase of 103 vehicles including trucks, sedans and vans (\$7.201 million) for the replacement of its aging fleet; the fleet replacement plan will provide operational savings to the Department in the long-term as it will reduce maintenance costs, fuel consumption and overtime as a result of addressing equipment failure; the County's fleet replacement plan is included under Non-Departmental project #200000511 0
- In FY 2020-21, the Department will continue to utilize FTA Section 5307/5309 Formula Grant and FTA Section 5337 State of Good Repair Formula Grant to support the capitalization of major preventive maintenance expenses in the operating budget and miscellaneous capital improvement projects (total project cost \$596.233 million; \$80.801 million in FY 2020-21) 9

TRACK INSPECTION VEHICLE / TRAIN DESCRIPTION:

PROJECT #: 2000001308

Purchase track inspection vehicle or train for the Metrorall to ensure tracks are inspected more frequently as required by the American Public Transportation Association; track inspection equipment will be equipped with a data system that stores track defects and produces a trend analysis report to effectively correct areas reducing track failures and providing a more reliable transit system
