DEPARTMENT OF  
TRANSPORTATION AND  
PUBLIC WORKS (DTPW)

## **METROMOVER COMPREHENSIVE WAYSIDE SYSTEM OVERHAUL PROJECT (METROMOVER UPGRADE PROJECT)**

# PROJECT LOCATION

## DESCRIPTION

The project includes enhancements to the operating system and guideway electrical components. It also includes a complete overhaul of the central control center and an upgrade of the track switches.

## SCHEDULE

Design work began in May 2021. Construction activities began in late July 2022 and are scheduled to be completed in Summer 2025.

## FUNDING

The \$150 million investment consists of People's Transportation Plan (PTP) and Federal Transit Administration (FTA) funds.

Miami-Dade Transit riders deserve reliability, reduced delays, and enhanced communication. As such, the Department of Transportation and Public Works (DTPW) is actively working on upgrading the Metromover, a free elevated people mover system that operates seven days a week in Downtown Miami, Omni, and Brickell areas.

## BENEFITS

- The upgrade project will:
- Improve system reliability that will reduce service disruptions
  - Increase vehicle frequency which will reduce wait times for riders
  - Ensure compatibility for future expansion of the system
  - Increase service flexibility to move more riders in less time during special events
