Service Installation for an Additional Water Meter or a New Water Meter

Check List:

An application for new service request is required to install a water service line from an existing Miami-Dade Water & Sewer Department (WASD) water main for the first time, as well as whenever the relocation of service is greater than 5' from the existing service.

The application for new service installation request process may take about 8-10 weeks and for installations on FDOT roads can take up to 6 months.

To better service and keep within the process timeline, please provide the following information:

CUSTOMER AND PROPERTY INFORMATION

- Full Name, mailing address, contact phone numbers and email address, social security number or Federal Tax ID#
- Property use
- Complete legal description
- Property Survey signed & sealed or site plan (No larger than 11"x17") showing the desired service location to be marked on the survey and signed by Developer (Not older than 2 years)

FEES THAT MAY BE ASSOCIATED WITH THE SIR REQUEST ARE:

- Installation Charge (See Fee Schedule)
- Permit Fee (associated with the governing municipality)
- Connection Charges
- Construction Connection Charge
- Meter Fee
- First time account deposit
- Restoration Fee (associated with the governing municipality)
