

Project at a Glance

Project Number 4.10 (2)

- Rehabilitation of 2 miles of 54-inch wastewater line running east/west along the north end of the Opa-Locka Airport's property and Biscayne Canal.
- Construction will mainly take place nightly from 9PM – 8AM.
- The upgrade will not affect the water or the wastewater services in your area.
- The areas surrounding the construction will be restored at the conclusion of the project.

QUALITY. VALUE. ECONOMIC GROWTH.

FACT SHEET

Wastewater Line Replacement

The Miami-Dade Water and Sewer Department (WASD) has embarked on a Capital Improvement Program to provide necessary upgrades to the water and sewer infrastructure to continue providing high quality services, protecting public health, and the environment. One of these projects is a new wastewater pipeline in your neighborhood. This project is part of the Consent Decree Program which requires several operational and maintenance improvements to Miami-Dade's wastewater system.

On April 9, 2014, the United States District Court for the Southern District of Florida authorized a Consent Decree between Miami-Dade County, the United States of America, the State of Florida, and the Florida Department of Environmental Protection, for improvements to the County's wastewater collection system. The rehabilitation of wastewater lines for Consent Decree project 4.10 (2) is part of this program.

PROJECT INFORMATION / SCHEDULE

Construction of the new pipeline is expected to begin in January 2017 and expected to be completed in seven months. Construction work will take place during the week from 9:00 pm to 8:00 am. The contractor will take additional steps to minimize impacts, but you may experience some noise and intermittent traffic inconvenience due to lane and road closures or detours. At the conclusion of the project, the roadway areas impacted by the construction will be restored. We thank you for your continued support.
