## Fact Sheet

### Pump Station Upgrade

The Miami-Dade Water and Sewer Department (WASD) has embarked on a Capital Improvement Program to provide necessary upgrades to the water and sewer infrastructure to continue providing high quality services, protecting public health, and the environment. One of these projects is a Pump Station project in your neighborhood. This project is part of the Consent Decree Program which requires several operational and maintenance improvements to Miami-Dade's wastewater system.

On April 9, 2014, the United States District Court for the Southern District of Florida authorized a Consent Decree between Miami-Dade County, the United States of America, the State of Florida, and the Florida Department of Environmental Protection, for improvements to the County's wastewater collection system. The rehabilitation of Pump Station #0414 for Consent Decree project 5.04 is part of this program.

#### PROJECT INFORMATION / SCHEDULE

The construction at the Pump Station is expected to begin in November 2017 and is scheduled to be completed in nine months. Construction will take place on weekdays from 7 a.m. to 5:30 p.m. The contractor will take additional steps to minimize impacts, but you may experience some noise. At the conclusion of the project, the areas impacted by the construction will be restored. In advance, we thank you for your continued support as we enhance the water and sewer infrastructure in your area.
